Congressional Record

PROCEEDINGS AND DEBATES OF THE 99th CONGRESS, FIRST SESSION

SENATE—*Wednesday, December 18, 1985*

(Legislative day of Monday, December 9, 1985)

The Senate met, in executive session, at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Gracious God, our Heavenly Father, love is the big word at this season—God's love who gave His Son—and our response. Forgive us for our indifference—for allowing almost everything else to be more important. Forgive us for the way we have cheapened love, demeaned it, degraded it. Help us to recover its meaning, patient Lord. It is difficult to think about love under these circumstances—difficult to give it or receive it. Grant us grace not to allow inordinate delays in legislation to deprive us of the edification of love. Save us from being victimized by a political process which was never meant to be efficient or fast—but was meant to be true and equitable and just. Refresh us with Your love, Righteous Father, that we may reflect Your love to spouse, children, neighbor, and one another. Transfuse the frustration of the hours that drag interminably with Your gracious, accepting, unconditional love. In the name of Him, whose incarnate love was for all people. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each, followed by routine morning business not to extend beyond 10:30 a.m. Then we would hope to have conference reports today. I think the first one will be the farm bill conference report, which should be here by about noon, I am advised, or a little after. That may not require a rollcall. I am not certain. If Members want a rollcall, obviously, there will be a rollcall. I think that could be disposed of fairly quickly.

Then the continuing resolution conference report. I have not discussed this with the chairman of the Appropriations Committee, Senator HATFIELD, but I understand there will be a conference this morning. There are only a few issues under consideration, or reconsideration.

As to the reconciliation conference report, again I am not certain the fate of that, though I know they were still working late last evening. I also know that the distinguished chairman of the Budget Committee, Senator DOMENICI, is necessarily absent today because his son is graduating from law school in New Mexico, so he will be gone. But he has indicated to me that we should proceed if the conference report is available.

Mr. Scanlon is still one of the nominees we hope to confirm today. There may be others on the Executive Calendar.

I know there are a number of resolutions that Members would like to dispose of if we can reach some agreement on both sides. Senator DANFORTH has indicated he would like to dispose of the telecommunications bill. He has advised me that it has been cleared on both sides, but I am not certain that is the case. I have told him, until we have been able to clear it on both sides, we could not entertain that because it would take a lot of time, maybe some votes, and it is my view the fewer votes the better.

We are in the last day of the session, hopefully, and I know that a number of my colleagues have indicated that most of these matters can probably wait until January. But if we can clear something on both sides, whether it comes from that side or this side, I would hope we could proceed. We do wish to avoid a number of amendments on bills and rollcalls, and so unless it has been fairly well cleared and can be handled by unanimous consent, it is very doubtful that it will be taken up today.

Also, I wanted to mention, seeing the Presiding Officer reminds me that we also have the low-level nuclear waste compacts. If we do not do something on that today, then we have, as I understand, three States involved that are going to stop accepting low-level waste as of January 1. According to the distinguished President pro tempore, the distinguished chairman of the Judiciary Committee, Senator THURMOND, they are very close to agreement. I hope we can work those out today and handle those by unanimous consent.

CONGRATULATIONS TO LAW SCHOOL GRADUATE—PETER DOMENICI

Mr. DOLE. Mr. President, Senator DOMENICI is necessarily absent from the Senate because his second oldest child, Peter, is graduating from the University of New Mexico Law School. All of us who are parents appreciate the importance of such milestones and recognize these events as a special time when families should be together. I am sure his Senate colleagues, as well as Senator DOMENICI's constituents understand that the decision to return to New Mexico for the scheduled celebration was a difficult one. However, I am sure we all agree that he is where he should be.

I would like to add my personal congratulations to Peter. I am sure he will make a fine lawyer.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The distinguished acting Democratic leader is recognized.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

WHY ARMS CONTROL IS IN DEEP TROUBLE

Mr. PROXMIRE. Mr. President, it has been said that the most tangible accomplishment of the summit meeting at Geneva last November was the agreement of President Reagan and Secretary Gorbachev to hold two additional top-level meetings. Certainly that assessment seems correct with respect to arms control. In a recent article, Lou Cannon, the White House correspondent of the Washington Post, writes that U.S. officials do not at this time expect a new arms control agreement at the Washington summit which is expected to take place next June. Cannon has good reason for this conclusion. Any arms control agreement approved by the two superpower leaders will require substantial progress in the United States-Soviet arms control negotiations that have been going on at Geneva.

How much progress has been made to date? Answer: None. For many months, the two sides have been meeting without the slightest public evidence that they have even begun to approach an agreement on any arms control issue. There has been no progress on restraining or limiting intermediate arms. There has been no advance in limiting intercontinental ballistic missiles or their nuclear warheads. In spite of a conspicuous public effort by Secretary Gorbachev to negotiate a comprehensive end to nuclear weapons testing, including an announced unilateral moratorium on such tests by the Soviet Union for the last 5 months of 1985, there has been exactly zero progress in even beginning such negotiations.

Meanwhile, the second Strategic Arms Limitation Treaty—SALT II—expired on December 31. If it is not renewed, arms control will suffer a major setback. SALT II has already required both superpowers to slow the massive buildup of their nuclear arsenals. SALT II has forced the Soviet Union to retire more of its nuclear arsenal than the United States. If SALT II is extended, both superpowers will have to reduce their arsenals further. The Soviet cutback once again will be even greater in relation to the American cutback than it has been to date. The continuation of SALT II is in the clear national security interest of the United States. If SALT II dies, not only does the cause of arms control suffer a setback, the relative nuclear power of the United States vis-a-vis the Soviet Union also suffers.

SALT II is not the only arms control casualty. The ABM Treaty of 1972 has prevented the extension of the arms race into space. It has averted the kind of immense offensive-defensive nuclear arms competition that would impose a colossal cost burden on both superpowers while reducing the security of both sides. But now the Congress is engaged in a rapid-fire buildup of a super missile defense system—the SDI or star wars. Just this past year, we have increased research expenditures by a huge 100 percent to nearly $3 billion, and the program is just beginning. Most independent scientists contend that the SDI cannot work and that it certainly cannot protect American cities from Soviet nuclear attack. But one consequence we know for sure that star wars will bring is the end of the ABM treaty. After all, what is the whole purpose of the ABM treaty? It is precisely to stop the construction of the kind of antiballistic missile system that the SDI would require. So the two most significant arms control accomplishments of the nuclear age have become terminal.

Now we are told that there will be no arms control advance in 1986. Administration arms control specialists contend that there is unlikely to be any progress in the negotiations that will resume in January. They say they expect progress, however, later in 1986. U.S. officials tell us that "it might be possible" for the two leaders to sign an arms control agreement at their third, and probably their final, summit at Moscow in 1987. How about that, Mr. President? We are losing our two prime arms control agreements. And we are told that some kind of arms control agreement between the superpowers may be possible in 1987.

We are living in the most dangerous time in the world's history. The two superpowers literally hold in their hands the power to destroy civilization and perhaps end the existence of mankind on Earth. Now we are faced with a year and a half in which the meager and painstakingly constructed arms control agreements between the United States and Russia are beginning to collapse. We are told that, just possibly, some kind of arms control agreement may develop in 1987. Well, this Senator believes there is very little prospect that will happen. President Reagan is absolutely determined to push ahead with his missle defense or SDI. Secretary Gorbachev has made it crystal clear that he will not agree to a reduction or a limitation on Soviet offensive missiles as long as the United States pushes ahead with its defensive system. And why not? After all, isn't it clear that the simplest way the Soviet Union can hold onto its hard-won superpower status in the face of the challenge represented by star wars is to maintain the credibility of its deterrent? And isn't it obvious that the most direct way to challenge and overcome SDI is to overwhelm it with such a volume of offensive missiles that it cannot prevent substantial penetration?

Mr. President, in all fairness, President Reagan is not the only reason why the SDI represents such a threatening juggernaut. In supporting SDI, both Houses of the Congress have voted for what is probably the biggest single-year percentage increase in a research program that exceeds $1 billion in this country's history. This kind of money, this kind of dollar commitment, takes on a life of its own. With each additional billion dollars appropriated and with each passing year, this vast expenditure in the sky will take on a more vigorous momentum and life of its own. That SDI momentum will provoke a corresponding offensive nuclear buildup. The prospects for a successful arms control summit agreement in 1987 are unfortunately invisible.

INCREASE IN HONORARIUM LIMITS

Mr. PROXMIRE. Mr. President, I wish to announce that if the conference report on the continuing resolution comes back to the Senate with the provision for an increase in the honorarium limits for Senators from 30 to 40 percent of salary, then the Senator from Arizona [Mr. DECONCINI] and I will raise this issue and bring it to a vote.

All Senators should be on notice that they will have to vote on this backdoor pay increase which was placed in the continuing resolution virtually without debate even though it represents a $7,500 increase in earning power for Senators.

Senator DECONCINI and I would welcome the assistance and support of all other Senators interested in this issue. For those listening to these remarks, we encourage them to contact either one of us or our respective staffs.

MYTH OF THE DAY: WOMEN SOLDIERS SHOULD BE BARRED FROM COMBAT

Mr. PROXIMIRE. Mr. President, the myth of the day is that women soldiers should be barred from combat. It is time for us to remove the myths from our national defense policies and replace them with facts.

First, it is a myth that there is an inclusive law which bars women from combat. The fact is that only the Air Force, Navy, and Marines are currently restricted from allowing women to serve on vessels and aircraft with combat missions. Army and Coast Guard women do not face the same legal restrictions, rather, women are barred from combat by Army policy and face no combat restrictions under current Coast Guard policy.

This policy is ridden with anamolies. Navy women may serve on destroyer tenders, but not on destroyers—even though tenders and destroyers sail together as part of the same carrier battle group. Women can fly tankers to refuel bombers on long-range mis-

sions, but cannot fly the bomber. Where is the logic? The tanker would be a primary target in any battle. Shoot down the tanker and you have the bombers.

Current policy effectively allows women to serve in positions where they would be shot at, but prohibits them from positions where they could shoot.

The reason for the many anamolies in the combat exclusion policy is that the policy itself is founded on a myth. The myth is that we can define combat. The fact is that technology has so expanded the range and effectiveness of weapons that the distinctions between combat and noncombat missions are sometimes arbitrary. What really are the differences between an air traffic controller on shore and an air traffic controller on an aircraft carrier that justify restricting women to shore positions? Neither controller is likely to see combat unless the Soviets decide to take our carriers with swords in their teeth. Of course, the Soviets could bomb our carrier, but they could also bomb our airport.

The military caste system of combat by gender hampers flexibility and inhibits readiness and deployability of the Armed Forces. Events, not law, policy or mission will determine which vessels, aircraft, and soldiers see combat. Combat exclusion policies result only in confusion, mismanagement, and crisis.

Grenada should have taught us our lesson. Four women military police officers deploying from Fort Bragg were stopped at the loading ramp and sent back to their barracks three times before they were finally allowed to deploy to Grenada. When they arrived at the island 4 days after the invasion they were ordered back to Fort Bragg. Then, after another 3-day wait at Fort Bragg, they were deployed to Grenada again, and this time they were allowed to do their jobs. Playing yo-yo with women soldiers in a large scale military emergency would result in confusion and the Armed Forces losing a critical 10 percent of its strength with no trained replacements available.

Valid concerns do exist regarding women in combat, and primary among these concerns is strength. Physical requirements are valid combat exclusion criteria. No soldier should be assigned to a position for which he or she is not suited. Gender exclusion, however, is confusing, limits flexibility in assigning soldiers during times of emergency, and inhibits readiness. Combat exclusion policy has led to such fiascos as barring women from masonry and surveying specialties in 1983, only to reopen them soon thereafter. If hand-to-hand combat is the activity of a masonry specialist, who is doing the fighting?

This illustrates the confusion and inconsistency of attempting to guess which soldiers will see combat. It is time to take these inconsistencies out of our defense policy and recognize the critical contribution that women make to the military. We cannot define combat; we cannot protect women soldiers from combat. At least we can recognize this and get rid of confusing policies that hamper readiness and deployability.

THE HELSINKI COMMISSION REPORTS ON HUMAN RIGHTS ACTIVIST

Mr. PROXMIRE. Mr. President, the Helsinki Commission reports of the Soviet's deplorable treatment of a well-known human rights activist in Russia. Balys Gajauskas is now serving his 33d year in a Soviet concentration camp.

Balys began serving a 25-year term for treason in 1948, 1 year before President Truman transmitted the Genocide Convention to the Senate. His dubious charge was based upon his participation in the Lithuanian resistance to the Soviet occupation of his country. He was released in 1973 after serving his full term. Balys was barred from the Soviet Union but returned to care for his ailing mother.

In 1977, after years of continued harassment by the KGB, Balys was again imprisoned, this time for his involvement with a Russian human rights group. He has been imprisoned in a labor camp until 1993 although he is in such poor health that he may not survive this sentence.

Still Balys Gajauskas remains undaunted in his commitment to freedom. Despite the abuses he has suffered at the hands of his Soviet captors and the hardships of family separation and isolation, he continues to defend the qualities of liberty we all take so much for granted.

The Genocide Convention defends these basic human rights as well. The ratification of this treaty will aid the struggle of those noble spirits like Balys Gajauskas in their fight for human rights.

We have considered the fate of the Genocide Convention for nearly as long as the 33 years that Balys Gajauskas has suffered in prison. In honor of the dedication to justice Balys Gajauskas represents, we must recognize the importance of this treaty. I call for the immediate ratification of the Genocide Convention.

RECOGNITION OF THE MINORITY LEADER

Mr. PROXMIRE. Mr. President, I am happy to yield the time of the distinguished Democratic leader to the Democratic leader. How much time remains?

The PRESIDING OFFICER (Mr. GRASSLEY). The Democratic leader has 5 minutes remaining.

The Democratic leader is recognized.

AFGHANISTAN ANNIVERSARY: 6 YEARS OF BRUTALITY

Mr. BYRD. Mr. President, the holidays not only are a time for merrymaking, gift giving, and song, but also a time for reflection. This December marks a grim anniversary. Six years ago, the Soviets invaded Afghanistan. On December 27, 1978, the Afghan people began an arduous struggle to maintain control of their country. While friends and families in the hills of West Virginia prepare to enjoy the warmth and fellowship of this sacred season, the mountain people of Afghanistan recall the sixth anniversary of the Soviet invasion.

In the 6 years since Soviet troops swept into Afghanistan, more than 3 million Afghan men, women, and children have been forced from their homes. The systematic war against civilians has cost tens of thousands of Afghan lives. At this time of year—and all year—the children of Afghanistan know that toys dropped from the sky are not presents. They are booby-trapped weapons the Soviet helicopters drop to maim and kill. During the past 6 years, the Soviets have waged an unprecedented campaign of brutality against civilians. It is a measure of the bankruptcy of Soviet policy in Afghanistan that children are a prime target of Soviet atrocities.

When I led a Senate delegation to Moscow in September to meet with General Secretary Gorbachev, the matter of Afghanistan was high on my list of priorities. When I raised that issue with Mr. Gorbachev, it led to the most heated exchange in our conversation. Nonetheless, I have a sense that the Soviet Union may be reconsidering its options. After 6 years, the Soviets have deployed more Soviet troops in Afghanistan than ever before—and these troops are taking more casualties. Six years of occupation have failed to achieve Soviet policy objectives in Afghanistan. The Soviet troops have less control of the countryside now than they had immediately following the invasion. Supply lines are less certain. And the Afghan freedom fighters are more effective, more coordinated, and more committed than ever to forcing the Soviets out of their homeland.

The Washington Post of Saturday, December 14, carried a report that the State Department has offered to play a role in achieving a peaceful solution and Soviet withdrawal from Afghanistan. I hope the Soviet leadership will take up this offer. I have followed Soviet-American relations for too long to believe that they would do so for

any reason other than self-interest. But perhaps we have reached the point where the direction of that self-interest is clear to them. As Soviet casualties mount, and as control of the country and its people continues to elude them, I hope the Soviet leadership will use the occasion of this grim anniversary to reflect on the need to find another way in Afghanistan.

The Washington Post of December 15 includes a brief, powerful editorial about Soviet policy in Afghanistan. I ask unanimous consent that the editorial, entitled "Afghanistan: This Is Genocide," along with the December 14 article entitled "U.S. Said Ready for Role in Afghanistan Peace," be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 15, 1985]

AFGHANISTAN: THIS IS GENOCIDE

"Human rights violations" is a phrase used so often and so casually that even the most compassionate among us can take it as routine. The quick meaning in most people's minds, we suspect, centers on police abuses, roughing and locking people up, perhaps killing some of them. Something like that is what you may expect to find in a new United Nations report entitled "Situation of Human Rights in Afghanistan."

But it's different. The second report on Afghanistan by Austrian parliamentarian and academic Felix Ermacora and a companion report on Iran mark the first time the United Nations has debated human rights in those countries on the basis of official U.N. reports. By a vote of 75 to 23 with 33 abstentions—India, lamentably, was the lone democracy holding Moscow's hand—the General Assembly registered its "profound concern." Afghanistan was singled out not just because a Third World Moslem country is the victim of aggression but also because of the terrible and deepening intensity of its ordeal.

Soviet troops with their Afghan clients have driven 4 million people out of the country and perhaps another 2 million out of their homes. Massively and indiscriminately, they bomb civilians—they bomb funerals. They destroy villages, crops and agricultural facilities. For the children, they drop cute, limb-shattering booby traps disguised as harmonicas and birds. Torture is "commonplace" and the operation of the judicial system "creates an atmosphere of insecurity and anguish." "There is apparently no health care for the majority of the population. As a consequence, the infant mortality rate has reached 300 and 400 per 1,000." Civilian deaths number "approximately 500,000."

When half the population is uprooted and a third driven into exile, when infant mortality reaches plague levels, when half a million civilians die and uncounted millions of others are maimed and malnourished, when, as Prof. Ermacora reports, the situation is getting worse, all this moves Soviet conduct well beyond what is ordinarily called "human rights violations." The word that comes to mind when one reads this report is genocide.

Soviets who talk about Afghanistan with foreigners sometimes solicit a certain sympathy for their policy dilemma and their costs. This is callous and arrogant. The people who deserve the sympathy are the Soviet Union's victims. Says a desperate Prof. Ermacora, "every hour lost is detrimental to the population"—the Afghan population. Moscow is committing one of the great crimes.

[From the Washington Post Dec. 14, 1985]

U.S. SAID READY FOR ROLE IN AFGHANISTAN PEACE

(By Jim Anderson)

The United States is prepared to play a role in guaranteeing provisions of a cease-fire and Soviet troop withdrawal in Afghanistan, Deputy Secretary of State John Whitehead said yesterday.

The offer, given to Soviet leader Mikhail Gorbachev at the Geneva summit last month and made in writing to the Secretary general of the United Nations, was made public by Whitehead in an address to the Washington World Affairs Council.

Whitehead said endless fighting is the only alternative to a negotiated cease-fire and withdrawal in the costly war, which began when Soviet troops invaded Afghanistan in December 1979. He suggested that the United States is prepared to increase aid to rebels fighting the Soviets.

"For our part, the rest of the world must exact from the Soviets a political price. They must pay for the death and destruction they are wreaking daily in Afghanistan," Whitehead said.

He also said President Reagan made it clear to Gorbachev in Geneva that the Afghanistan fighting will hamper the search for better superpower relations.

A U.S. official, who asked not to be identified, said, "This is a way of testing the Soviets. They said all these wonderful things at the summit. Now let's see if they're willing to follow them up."

Whitehead said, "As long as the Soviets pursue a military solution, we will continue to support the Afghan cause."

He also said the Soviets have increased their troop strength in and near Afghanistan to 150,000 as the war continues to spread.

He estimated that rebels control 65 percent of the country and have begun to bring the war to the cities with guerrilla attacks.

Whitehead also said the Soviets are paying a high political price in terms of their relationship with the rest of the world, including the United States.

He said the only lasting solution to the war is a political settlement under which Soviet troops are removed from Afghanistan, the 3.5 million refugees return home and the Afghanistan people can determine their future.

Whitehead said the Soviets will have a chance to follow through on Gorbachev's words at the summit starting Monday when the U.N.-sponsored "proximity talks" involving the Soviet Union and Pakistan resume in Geneva.

The remaining issue, according to Whitehead, is withdrawal of Soviet troops and how it would relate to the other issues already settled in the talks. These include an agreement on noninterference between Afghanistan and Pakistan, the key element that the United States would be expected to guarantee.

U.S. officials said that terms of a U.S. guarantee have not been defined but that Whitehead's remarks were intended to counter charges that the United States is delaying a settlement by not being helpful.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond 10:30 a.m., with statements therein limited to 5 minutes each.

VETO OF TEXTILE BILL

Mr. THURMOND. Mr. President, I am terribly disappointed that President Reagan has seen fit to veto the textile and apparel bill.

Mills are closing every day; thousands of jobs are leaving this country. People in this country are being thrown out of jobs on account of the trade policy that is being followed in the textile and apparel matter.

Mr. President, I think the President has made a great President, one of the finest this country has ever had, but he has been ill-advised on this subject. In my opinion, the administration is going to live to regret the day this bill was vetoed.

Mr. President, I ask unanimous consent to have printed in the RECORD the veto message of the President and a newspaper article containing my statement on the veto of the textile bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

To the House of Representatives:

I am returning herewith without my approval H.R. 1562. It is my firm conviction that the economic and human costs of such a bill run far too high—costs in foreign retaliation against U.S. exports, loss of American jobs, losses to American businesses, and damage to the world trading system upon which our prosperity depends.

At the same time, I am well aware of the difficulties of the apparel, textile, copper, and shoe industries, and deeply sympathetic about the job layoffs and plant closings that have affected many workers in these industries.

As I stated in my trade speech in September, I will not stand by and watch American businesses fail because of unfair trading practices abroad. I will not stand by and watch American workers lose their jobs because other nations do not play by the rules.

I am directing Secretary of the Treasury Baker, as Chairman Pro Tempore of the Economic Policy Council, to investigate the import levels of textiles and apparel to determine if these imports have exceeded those limits agreed upon in international negotiations. I have directed that he report back to me within 60 days and recommend changes in existing administrative and enforcement procedures, if necessary, so that corrective action is taken.

Also, I am directing the Office of the U.S. Trade Representative to most aggressively renegotiate the Multi-Fiber Arrangement (MFA) on terms no less favorable than present. Our trading partners must be put on notice that we will not allow unfair trading practices to continue. I am further directing Ambassador Yeutter to closely consult with the U.S. textile and apparel industry to ensure that their views will be fully represented during the negotiations.

Finally, I have directed Secretary of Labor Brock to work with the Congress to provide an additional $100 million increase in funds appropriated to help retrain and relocate displaced workers under the Job Training Partnership Act. The Job Training Partnership Act is a more effective way than Trade Adjustment Assistance for the Secretary of Labor to target those American workers and geographic areas most affected. This is the way we can best help dislocated workers—and without pitting one American worker against another.

Free and fair trade policies have helped create nearly 9 million new jobs in the last 3 years and given us the highest rate of employement in our Nation's history. Still, for some workers in troubled industries, these are difficult times. The personal distress of those who lose their jobs is very real. None of us wants to see American workers lose their jobs or American businesses suffer. I pledge to you to do everything possible to combat unfair trade practices. But in so doing we must take wise and positive steps to redress wrongs. To do otherwise would be counterproductive.

Unfortunately, H.R. 1562 would invite immediate retaliation against our exports resulting in a loss of American jobs in other areas. Because this bill is so sweeping in its provisions, we could expect that retaliation to be extensive. The United States exported tens of billions of dollars worth of goods to the countries which would be most affected by this measure, including approximatley a third of our farm exports. Workers in agriculture, aerospace, high-tech electronics, chemicals, and pharmaceuticals would be the first to feel the retaliatory backlash, but the damaging effects would soon be felt by every American in the form of lost jobs, higher prices, and shrinking economic growth.

We are pursuing an aggressive trade policy, based on the knowledge that American know-how is still number one and that American industry thrives on fair competition. Where U.S. industries are hurt by unfair practices, we will continue to take vigorous actions. Where foreign trade barriers lock out U.S. exports, we will do everything in our power to knock those barriers down. Our philosophy will always be to increase trade, increase economic growth, and increase jobs. We want to open markets abroad, not close them at home. In a fair and open world market, we know that America can out-produce and out-compete anybody.

RONALD REAGAN.

THE WHITE HOUSE, *December 17, 1985.*

THURMOND GREATLY DISAPPOINTED IN VETO OF TEXTILE BILL, HOPES CONGRESS WILL OVERRIDE

WASHINGTON, December 17, 1985.—President Reagan's veto today of a bill designed to halt the flood of foreign textile and apparel goods disappointed Sen. Strom Thurmond (R-SC), who says the industry cannot sustain continued damage from imports.

"I believe the President has heeded bad advice in vetoing this bill," said Thurmond, who originally introduced the measure in March. "I sincerely hope the House of Representatives overrides the President's veto and we shall exert every effort in the Senate to do likewise."

"Our domestic textile and apparel industry cannot sustain the damage it is facing. We are going to see more layoffs, more plant shutdowns and more long-term economic damage to an industry that is crucial to this nation," President Pro Tempore Thurmond said, noting that the bill would have assured the continued competitiveness against unfairly subsidized foreign imports. "We must not turn our backs on an industry which contributes $80 billion dollars to the gross national product and means four million jobs in textile and related industries."

The nation's defense structure and its consumers will suffer also, Thurmond said, if a major effort is not initiated to stem the flow of textile and apparel products made overseas. "The American textile and apparel industry has never asked for nor sought an unfair advantage. What this industry wants is competition on an even keel. What it is facing is an avalanche of goods made by cheap labor and deliberately targeted to undercut one of our basic manufacturing sectors."

Thurmond said many foreign manufacturers have gone beyond legal bounds and are now intentionally sidestepping international trade agreements. For that reason, the textile bill included an import licensing provision which was designed to prevent fraud.

Thurmond said he would continue to urge the Customs Service to strictly enforce laws designed to stop illegal imports. "Last year over $31 million in illegal textile and apparel goods were removed from the American market," he said. "That is a 300 percent increase over the year before."

The licensing provision was aimed at preventing fraud by improving import data used by Customs officials, reducing misidentification and stopping the practice of shipping products from one country through another to avoid quota restrictions.

ORDER OF PROCEDURE

The PRESIDING OFFICER. Does the Senator from Utah seek recognition?

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GARN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, I ask unanimous consent that all of these matters be considered as in legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

REMOVAL OF CERTAIN RESTRICTIONS ON AVAILABILITY OF OFFICE SPACE FOR FORMER SPEAKERS OF THE HOUSE

Mr. GARN. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be discharged from further consideration of H.R. 2962, a bill to remove certain restrictions on availability of office space for former Speakers of the House.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I do not believe that the script shows the request for consent to take this bill up immediately, nor does it show that the Chair put that question, does it?

The PRESIDING OFFICER. The Democratic leader is correct.

Mr. GARN. Mr. President, I ask unanimous consent for the immediate consideration of H.R. 2962.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 2962) to remove certain restrictions on the availability of office space for former Speakers of the House.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on third reading and passage of the bill.

The bill (H.R. 2962) was ordered to a third reading, was read the third time, and passed.

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE ROBERT N.C. NIX, SR., FEDERAL BUILDING AND U.S. POST OFFICE

Mr. GARN. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be discharged from further consideration of H.R. 2903, a bill to designate the Federal Building and U.S. Post

Office, located in Philadelphia, PA, as the "Robert N.C. Nix, Sr., Federal Building and U.S. Post Office," and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 2903) to designate the Federal Building and United States Post Office located in Philadelphia, Pennsylvania, as the "Robert N.C. Nix, Sr., Federal Building and United States Post Office."

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendent. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 2903) was ordered to a third reading, was read the third time, and passed.

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORITY FOR THE ADMINISTRATOR OF GSA TO COLLECT ADDITIONAL CONTRIBUTIONS IN REGARD TO THE NANCY HANKS CENTER

Mr. GARN. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be discharged from consideration of H.R. 2391, a bill to authorize the Administrator of General Services to collect additional contributions of money provided to him by private individuals or organizations for the Nancy Hanks Center, and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 2391) to authorize the Administrator of General Services to collect additional contributions of money provided to him by private individuals or organizations for the Nancy Hanks Center.

There being no objection, the Senate proceeded to consider the bill.

Mr. STAFFORD. Mr. President, the House of Representatives has passed H.R. 2391 and sent it to the Senate. This bill would authorize the Administrator of General Services to collect additional contributions of money provided to him by private individuals or organizations for the Nancy Hanks Center in the Old Post Office here in Washington. It is comparable to the provision contained in section 2 of S. 709 which was reported by the Committee on Environment and Public Works and passed the Senate on May 14 of this year. Current law contains a deadline on the acceptance of such contributions which had already been extended once. The extended deadline expired on February 15, 1985, but the memorial to Nancy Hanks has yet to be completed.

I regard this legislation as necessary to allow the construction of a suitable memorial to Nancy Hanks and would recommend it to my colleagues. At the same time I would point out that section 1 of S. 709 as it passed this body contained an important amendment to the Public Buildings Act of 1959. It provides for the establishment of the Public Buildings Service within the General Services Administration and requires that the Commissioner of Public Buildings be appointed by the President and confirmed by the Senate. This measure would give legal recognition to the significant functions of the Public Buildings Service and confer the stature of Presidential appointment on its Commissioner.

In passing S. 709, this body deemed both the provision relating to the Nancy Hanks Center and the provision relating to the Public Buildings Service as worthy of enactment. Let our willingness today to consider favorably H.R. 2391 as a separate measure concerning the Nancy Hanks Center not be regarded as a change of mind or a lack of resolve in promoting final enactment of the Public Buildings Service provision.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 2391) was ordered to a third reading, was read the third time, and passed.

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BILL PLACED ON CALENDAR—H.R. 2698

Mr. GARN. Mr. President, I ask unanimous consent that the Environment and Public Works Committee be discharged from further consideration of H.R. 2698, the James A. Walsh Courthouse bill, and I ask that it be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONTROLLED SUBSTANCE ANALOGS' ENFORCEMENT ACT OF 1986

Mr. GARN. Mr. President, I ask unanimous consent that the Senate turn to the consideration of Calendar Order No. 431, S. 1437, the Designer Drug Enforcement Act.

The PRESIDING OFFICER. The clerk will report

The assistant legislative clerk read as follows:

A bill (S. 1437) to amend the Controlled Substances Act to create new penalties for the manufacturing with intent to distribute, the possession with intent to distribute, or the distribution of "designer drugs", and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Utah?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on the Judiciary, with an amendment to strike out all after the enacting clause and insert the following:

That this Act may be cited as the "Controlled Substance Analogs' Enforcement Act of 1985".

SEC. 2. Part D of the Controlled Substances Act is amended by adding after section 403 the following new section 403A (21 U.S.C. 843):

"§ 403A. Prohibited acts D

"Any person who knowingly or intentionally manufactures with intent to distribute, possesses with intent to distribute, or distributes a controlled substance analog all or part of which substance is intended for human consumption shall be fined not more than $250,000, or imprisoned not more than fifteen years, or both. Any person who knowingly or intentionally possesses a controlled substance analog all or part of which substance is intended for human consumption shall be fined not more than $25,000, or imprisoned not more than one year, or both. This section does not apply to a person who manufactures, possesses, or distributes a substance in conformance with the provisions of an approved new drug application or an exemption for investigational use within the meaning of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355). For purposes of this section, section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) shall be applicable to the introduction or delivery for introduction of any new drug into intrastate, interstate, or foreign commerce.".

SEC. 3. Section 102 of the Controlled Substances Act (21 U.S.C. 802) is amended by adding at the end thereof the following new paragraphs:

"(31) The term 'controlled substance analog' as used in section 403A means a substance other than a controled substance that has a chemical structure substantially similar to that of a controlled substance in schedules I or II or that was specifically designed to produce an effect substantially similar to that of a controlled substance in schedules I or II. Examples of chemical classes in which controlled substance analogs are found include, but are not limited to, the following: phenethylamines, N-substituted piperdines, morphinans, ecogonines, quinazolinones, substituted indoles, and arylcycloalkylamines.

"(32) The term 'human consumption' includes application, injection, inhalation, or ingestion.".

SEC. 4. The analysis of part D of the Controlled Substances Act is amended by insert-

ing after the item relating to section 403 the following:

"403A. Prohibited acts D.".

Mr. GARN. Mr. President, I move adoption of the committee substitute.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment was agreed to.

Mr. THURMOND. Mr. President, I rise today to support the passage of S. 1437, the Controlled Substance Analogs Enforcement Act. The purpose of this bill is to forestall a potentially grave national epidemic. Those who prosper by exploiting human weakness have discovered a relatively new field of enterprise promising huge sums of money at relatively low risk. Increasingly, such profiteers are synthesizing enormously potent drugs which, while often lethal, are absolutely legal. Whether generated by individual back-alley chemists or by those associated with organized crime, these easily manufactured and unregulated chemical compounds present us with a truly frightening problem: designer drugs dealing designer death.

Simply put, law enforcement's problem is that unlawful activity under the Controlled Substances Act is defined with regard to the precise chemical makeup of the substances described by schedules issued in accordance with the act. Make a minor alteration in the molecular structure of an outlawed drug—replicate the chemical composition of heroin, say, in all but the slightest regard—and you have produced a powerful and dangerous narcotic which is not illegal. These laboratory-manufactured "analogues" of controlled substances are imprecisely and perhaps inappropriately termed "designer drugs." Such drugs are currently being sold both as counterfeits of the drugs they imitate and for consumption as designer drugs in their own right. Such drugs are potent and destructive. The deaths have begun, and we are informed that in California, at least, 20 percent of the State's herion addicts have turned to these even more dangerous designer compounds.

In order to deal with this deadly peril, the Judiciary Committee expedited consideration of S. 1437 with a hearing on September 18, and unanimous approval of a substitute amendment on October 3, 1985. The amendment to S. 1437 substitutes the phrase "controlled substance analog" for the perhaps too enticing term "designer drug" and creates a misdemeanor offense for simple possession of a controlled substance analog.

As befits the serious nature of the problem, there is strong bipartisan resolve to give our law enforcement officers the tools needed to combat designer drugs. To this end, I would like to commend Attorney General Meese and my colleagues from both parties who have joined me in introducing S. 1437, the Controlled Substance Analogs Enforcement Act of 1985. Senators HAWKINS and CHILES have taken a lead role in supporting the bill, as has the ranking minority member of the Judiciary Committee, Senator BIDEN. I am gratified that numerous other leading Senators from across the political spectrum are also sponsors of the legislation.

Mr. BIDEN. Mr. President, as the ranking member of the Judiciary Committee I join with the committee chairman, Senator THURMOND, in asking our colleagues to support final passage of S. 1437 the Controlled Substance Analogs Enforcement Act of 1985.

The urgency for the Senate to respond to the "designer drug" phenomenon was documented in my State yesterday morning when the headline in the Morning News in Wilmington, DE, read, "Chemist Charged in Drug Scheme." the article, which I will ask unanimous consent be placed in the RECORD, goes on to tell of the arrest of a Du Pont Co. chemist who allegedly manufactured and distributed more than 1 million dollars' worth of synthetic heroin substitute. Authorities seized four ounces of 3-methyl-fentanyl which is the largest amount ever confiscated and is the first major seizure on the east coast.

These so-called designer drugs are variations of known controlled substances that are manufactured by underground chemists for sale on the street. Designer drugs are extremely dangerous. They are extraordinarily potent, increasing the likelihood of death by overdose. Over 100 deaths, so far, have been linked to designer drug use. Designer drugs are also responsible for causing long-term neurodegenerative conditions, similar to Parkinson's disease, in some users. Designer drugs are also cheap to produce. For example, less than $500 worth of chemicals and equipment is needed to make 1 cup of heroin substitute that is worth $2 million on the black market. Thus, manufacturers and distributors of these drugs profit from them at the expense of the public health and safety.

This bill addresses a new and expanding law enforcement and drug abuse problem that could become the drug abuse problem of the 1980's and 1990's. The enormous profits that can be made, the high potency of these drugs, and the difficulty in detecting and identifying them could result in a drug abuse phenomenon far beyond what we have experienced to date. The Federal Government must act quickly to stop the spread of these drugs so we are not caught off guard as we were in the 1970's when PCP became a major drug abuse problem. This new legislation will permit an immediate response to those producing these drugs, permitting investigations, arrests, and prosecution before these drugs spread throughout the country.

Because of the complexity and volatility of the designer drug problem, this statute cannot define what is forbidden with the high degree of precision of the Controlled Substances Act. To lessen the chance of any language later being viewed as impermissibly vague, I would direct attention to the committee report on this bill, 99-196, particularly part II, section 3, in which a detailed explanation of the definition of a controlled substance analog appears. Section 3 concludes:

. . . The definition of "Controlled Substance Analog" contained in this section, therefore, closes the present loopholes in the Controlled Substances Act while still specifying a comprehensible standard of conduct. A substance fitting either of the two prongs of the controlled substance analog definition qualifies as such an analog. The legislation's message to illicit drug traffickers is clear: No longer will you remain immune from punishment when purposefully dealing in drugs that imitate the most dangerous compounds defined by law. When such chemical copies are intended for human consumption and do not fall under the exceptions set out in section 2 of the legislation, simulation is no defense.

Additionally, I wish to make clear that this legislation is not aimed at legitimate drug research that unwittingly falls within the designer drug definition. This act specifically exempts substances manufactured, possessed, or distributed in conformance with the new drug approval provision of the Federal Food, Drug, and Cosmetic Act. Early stage, clinical research is also protected by the new drug approval requirement for investigational use. These exemptions were included to prevent interference with legitimate research and development of new pharmaceuticals. Industrial and nonclinical applications are not affected since they are not intended for human consumption.

This emerging drug problem will require a partnership between law enforcement, the medical community, and scientific community if we are to be successful in stopping drugs before they become the next tragic drug abuse problem in this country.

I ask my colleagues to join me in passing this bill.

Mr. President, I ask unanimous consent that the article I referred to in the "Morning News" and related articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Morning News, Dec. 17, 1985]

CHEMIST CHARGED IN DRUG SCHEME

(By Laurie Hays)

When Michael C. Hovey appeared for his bail hearing in the tiny courtroom of Wil-

mington's U.S. Magistrate on Monday handcuffed and escorted by a U.S. marshal, his wife and her close friend and neighbor let out quiet gasps.

The tall, good-looking 33-year-old does not appear anything like a big-time drug dealer. He wore a plaid shirt, blue jeans and hiking boots and a pine-green L.L. Bean-style parka. He has light brown hair, a moustache and blue, friendly eyes.

His face looked strained and scared.

"So stupid," the neighbor, who did not wish to be identified, repeated to herself. "This is like a horror movie. I can't believe it."

Hovey's wife, an attractive woman, stared ahead most of the time. Once, when she looked at her husband, she studied him as though she were trying to understand what he had done.

Given permission after the hearing to speak with him briefly, she wept together with her husband while the uncomfortable U.S. marshal looked the other way and chatted with other officers in the hall.

"I'm sorry," Hovey said tearfully to the neighbor as he walked down the hallway, on his way back to Gander Hill.

News of Hovey's arrest on charges of manufacturing and distributing synthetic heroin and methamphetamine shocked and upset his friends and neighbors in quiet Graylyn Crest, a suburb north of Wilmington.

People wondered what could have made the young scientist with a doctorate from the University of Wisconsin and such an apparently bright future do "such a stupid thing."

His wife said she knew nothing about his alleged activities until she returned from church Sunday morning and found federal drug agents searching their house.

Betty Malone, who lives down the street from the Hoveys, said, "I really am in shock. I can't believe it. He's a doll. He's a family man. He rides a bike. They come to block parties. . . . He wouldn't even get a speeding ticket. He wouldn't even park a car where it shouldn't be. That's the kind of guy he is."

Like other neighbors, Malone spoke of the Hoveys' daughter, about 3 years old, and the devotion he showed for her. He recently built a small playhouse for her in their back yard. The gray-shingled house, which he built from scratch, has a tiny chimney and shutters painted with little red hearts.

Hovey had worked as an agricultural products research chemist at Du Pont for five years. Both he and his wife attended the University of Illinois and moved to the Wilmington area from Wisconsin when he came to work for the company.

His laboratory was in Building 402 at the Experimental Station, the company's research facility on a hill overlooking the Brandywine River.

Though the family did not appear to need money, the letters Hovey allegedly sent to another employee of the Du Pont Co. and federal undercover drug agents present the image of a man in need of cash and suspicious of the world.

He asked to be paid in gold coins because, he allegedly wrote, "Gold is untraceable and will remain legal tender long after our government collapses."

The letters also tell the story of a man so inexperienced in the drug business that the only "dealers" he could find were Federal Drug Enforcement Administration agents.

In the anonymous letter to a Du Pont Co. employee asking for contact with a dealer, Hovey allegedly wrote: "Why have I chosen you as my contact. . .? Because I picked someone who works at Du Pont. If something goes wrong and the police try to trace me through you, they will naturally look at Du Pont's chemists. I don't work at Du Pont, so they will not pick up my trail. My contacts tell me you can make the necessary million-dollar contract."

The recipient of the anonymous letter turned it over to company officials.

[From the Morning News, Dec. 17, 1985]

SYNTHETIC HEROIN SEIZED

(By Laurie Hays)

A Du Pont Co. chemist has been charged with manufacturing and distributing more than $1 million worth of a synthetic heroin substitute he allegedly made at his Experimental Station lab.

The four ounces of 3-methyl-fentanyl that was seized is the largest amount ever confiscated and is the first major seizure on the East Coast, Assistant U.S. Attorney Richard J. McMahon said Monday.

Michael C. Hovey, 33, was arrested Sunday morning as he was attempting to collect a $260,000 cash payment in the woods west of U.S. 202 near the Delaware-Pennsylvania line, McMahon said. The payment was for one ounce of the potent substance.

Drug agents later seized three additional ounces of 3-methyl-fentanyl and six ounces of methamphetamine at Hovey's house in the 1000 block of Sedgwik Drive, Graylyn Crest.

One ounce of the 3-methyl-fentanyl is equivalent to 62 pounds of pure heroin or 3,000 pounds of street heroin.

The drug is one of the "designer drugs," which are formed by chemically altering the structure of another drug to enhance its effect. More than 100 deaths, all on the West Coast have been attributed to use of the synthetic heroin, which is 1,000 times stronger than street heroin.

One ounce of 3-methyl-fentanyl, worth about $500,000, is commonly mixed with 3,000 pounds of lactose to make street heroin.

Federal Drug Enforcement Administration officials said Hovey was an amateur in the drug business, with no apparent street contacts that could enable him to sell the synthetic heroin. He has no prior criminal record and his wife, who appeared at his hearing in U.S. Magistrate Court on Monday, said she had been "absolutely shocked" by the news of his arrest.

Hovey has been a chemist in agricultural research for five years at the Experimental Station, Du Pont's primary research center on the Brandywine, north of Wilmington. He is described by friends and neighbors as "friendly," "normal" and a "family man."

Residents of his quiet, suburban neighborhood north of Wilmington were stunned.

Federal officials said Hovey manufactured the drug at the Experimental Station, but they could provide no further details.

According to the officials, in mid-October the Du Pont Co, Security Department initiated the investigation that resulted in Hovey's arrest after another Du Pont employee received an anonymous letter through the company mail asking for help contacting a drug dealer.

The letter, allegedly sent by Hovey, began, "Would you like to earn $10,000 or more? If so, I have a business proposition for you. This is no joke."

The letter also contained a small sample of the synthetic heroin.

The employee, who reportedly did not know why the letter had been sent to him, turned it over to the company, which notified federal drug agents.

Not knowing who sent the letter, undercover federal drug agents decided to do as it instructed and place a "Happy Ad" in the News-Journal papers on Oct. 31. The ad read, "Happy 31st Birthday Vermillion, Love, Joy, Kisses."

The ad was intended to signify that the agents were interested in making a deal. The agents two weeks later placed a second classified ad, as instructed, in the Help Wanted section. It contained their address and a phone number where the drug manufacturer could contact them.

The agents then waited. Pretending to talk about the advertisement, the letter sender on Nov. 15 called the undercover agent, who was using the name Robert Jones, and agreed to make a deal.

Five days later, the caller, allegedly Hovey, stashed one ounce of the synthetic heroin in two Army surplus ammunition boxes placed in a hole behind the Wilmington Hilton Hotel, at the Naamans Road exit of Interstate 95.

The agents in turn left him $40,000 in marked bills in the boxes placed in a hole in the woods north of Naamans Road, near Talley Junior High School. After leaving the money at 6 a.m. on Dec. 1, agents spent the day nearby, in the rain, watching everyone who came and went.

An agent standing behind a tree saw Hovey come for the money at 7 p.m., according to a spokesman for the federal drug enforcement agency.

Hovey was apprehended Sunday at the second pickup, where agents had left fake cash in a bright orange U.S. Mail bag in the woods north of Wilmington. Waiting for him in the woods were 10 officers from the federal drug agency and from state, county and Newark police, who provided additional assistance.

Hovey was carrying a loaded gun at the time of his arrest, the agents said.

Following a third payment of $700,000, Hovey was supposed to have sold the additional three ounces of the 3-methyl-fentanyl and six ounces of methamphetamine.

Hovey's bail hearing before U.S. Magistrate N. Richard Powers was postponed until Wednesday because he did not yet have an attorney to represent him on Monday. His case will be presented to a federal grand jury in the next few weeks.

He faces a maximum 15 years on six charges of manufacturing and distributing 3-methyl-fentanyl and methamphetamine. He was being held Monday at Gander Hill Prison. McMahon called Hovey "dangerous" and asked Powers to order Hovey incarcerated until his trial.

John R. Malloy, senior vice president of external affairs for Du Pont, said he was unsure whether Hovey would be fired.

"We've got to look at all the facts and circumstances. We're not exactly sure of all the details," he said.

[From the Morning News, Dec. 17, 1985]

MAKING POTENT DRUG SEEMS A SIMPLE TASK

(By Merritt Wallick)

A master's degree-level chemist with a few hundred dollars in raw materials and laboratory equipment can make a kilogram of 3-methyl-fentanyl that would sell on the street for about $1 billion.

Aside from breaking the law, the biggest risk is that the chemist could kill himself making the heroin-like substance, today the most common "designer drug" being illicitly

sold. The drug is so powerful—about 3,000 times as strong as morphine and 1,000 times as strong as heroin—that breathing even few stray particles could induce coma and death.

Michael C. Hovey, a research scientist at the Du Pont Co.'s Experimental Station, was arrested Sunday for allegedly making four ounces of 3-methyl-fentanyl in the Du Pont lab and trying to sell it for $1 million. Hovey is the first person known to have produced the granular substance on the East Coast.

Robert J. Roberton, administrator of American Hospital in Los Angeles, said that the "designer drugs" have introduced "a whole new technological terror" to our society and that it's spreading. Roberton became acquainted with the drug as the former top drug officer in California.

Roberton attributes 106 deaths to the drug from overdoses. "You can put enough 3-methyl-fentanyl on a postage stamp to support 1,000 heroin addicts for a month," he said. Enough could be placed on the head of a pin to kill 50 people.

Making the drug is easy, Roberton said. The difficult part is mixing it so that the drug could be taken in doses that would not be fatal. "They have to have very good equipment to weigh it," he said.

The term "designer drug" was coined by Gary L. Henderson, a pharmacologist at the University of California at Davis, specifically to refer to a family of man-made drugs derived from fentanyl, a prescription narcotic sold under the trade name Sublimaze by Janssen Pharmaceutics of Belgium.

Chemists produce designer drugs by subtly altering the molecular structure of a drug, creating an analog that is often much more potent than the original drug. Normal fentanyl, for instance, is only about 100 times as powerful as morphine, and its effects last only about 30 minutes.

Roberton said at least 10 analogs of fentanyl have been found in California. He estimates that 20 percent of what is being sold as heroin on the streets is really a fentanyl derivative, most often 3-methyl-fentanyl.

Gregory Hayner, a pharmacologist at the Free Drug Clinic in Haight Ashbury in San Francisco, said addicts are avoiding 3-methyl-fentanyl because it is so easy to get a fatal overdose.

"People are getting the idea that they are really playing Russian roulette with this stuff," Hayner said.

Another problem is that a similar family of designer drugs derived from meperidine, a narcotic, is suspected of causing Parkinson's disease. "You can't tell it apart until it's too late," Hayner said.

The presence of 3-methyl-fentanyl in the blood cannot be detected by normal methods, Roberton said. Only two laboratories in the United States perform tests sensitive enough to detect the one-part-per-trillion levels in the blood of someone under the influence of the drug, he said. People in drug treatment programs can use the drug without fear of detection by normal urine tests.

Du Pont officials declined to discuss security procedures at the Experimental Station in the wake of Hovey's arrest. In March, company officials said Du Pont's security staff conducts about 100,000 random searches annually of cars leaving and entering the site. About 400 employees in the lab have access to prescription drugs, they said, but only 50 employees have access to the pharmacy development area where narcotics and other substances regulated by the Federal Drug Enforcement Administration are stored.

Hovey's research was in agricultural products, which means he would not normally have had access to controlled substances. A chemist at the University of Delaware said the chemicals needed to make 3-methyl-fentanyl are available at any chemical supply house or in any adequately stocked organic chemistry laboratory.

Mr. DENTON. Mr. President, I want to join my distinguished colleague from South Carolina [Mr. THURMOND] in emphasizing the urgency of the problem that we face with designer drugs. I also would like to commend him for his leadership in making all of us aware of the magnitude of the problem.

Our efforts to put a halt to the designer drug phenomenon must be totally bipartisan. They kill and cripple our Nation's youth in increasingly greater numbers. We need to take immediate action to give our law enforcement agencies, both Federal and State, the knowledge, authority, and resources necessary to fight the growth of designer drugs.

Currently, the production of designer drugs appears to be confined to small individual labs. Because of the tremendous profits that can be realized from the resale of small amounts of the powerful drugs, however, it is only a matter of time before organized crime moves in and controls the market in the larger metropolitan areas, just as it controls the current market in conventional illegal drugs. When that happens, we could face a medical disaster of epidemic proportions. The effects of the new drugs are absolutely devastating, and we must not wait for a disaster to occur before we take action.

We owe it to the youth of our country to educate them about the debilitating and dangerous effects that these drugs will have. We also owe it to them to give Attorney General Edwin Meese and the Department of Justice the resources and authority they need to fight the growing problem.

Although the emergency scheduling provision of the Comprehensive Crime Control Act is important, it is inadequate to discourage the production of designer drugs. We must take a proactive approach, such as that in S. 1437, with heavy penalties.

Mr. President, I offer my utmost support of the legislation, and I urge my colleagues to pass it.

Thank you, Mr. President.

Mr. CRANSTON. Mr. President, I rise in support of S. 1437. It is sorely needed legislation. My own bill S. 1413, which was introduced the week before S. 1437 would have achieved the same goals—the creation of new penalties for those criminals who manufacture and distribute controlled substances analogs known as designer drugs.

These analogs can cripple and permanently ruin the lives of unsuspecting users. They are taken by people in the drug world who do not know what it is they are taking. Unfortunately, these drugs are being manufactured mostly in clandestine laboratories in my home State of California. These "chemists" have taken a lifesaving drug, fentanyl—anyone who has had major surgery has taken it—and made it into a deadly street drug. The derivatives of fentanyl induce all the effects of heroin and more. When improperly manufactured they kill.

Because these analogs can be manufactured so quickly and so cheaply it is imperative that we move full force on this. Cases have already been cited outside of California. Cases of young people who are permanently disfigured and undergo sporadic bouts with paralysis as a result of these analogs. Still there is a more severe effect, it comes after respiration halts and comatose sets in—death. In the meantime this new criminal industry is getting rich.

Cocaine and heroin have been by far the most widely distributed drugs by organized crime. But, the California Department of Justice has found fentanyl in organized crime laboratories, an indication that organized crime is entering the designer drug market.

This legislation will give us the weapons to fight the spread of this dangerous drug menace. I thank Senator THURMOND and the committee for acting swiftly on their own version of this legislation.

Mrs. HAWKINS. Mr. President, I rise to support S. 1437, an amendment to the Controlled Substances Act. This amendment will create penalties for the manufacturing of analog drugs with the intent to distribute these drugs.

Too often we, as a legislative body can only be reactive and respond to a problem that has already gotten out of hand. Today we have a chance to be proactive, to institute changes in the Controlled Substances Act which may make it possible to stem the tide of the most dangerous drug movement of the country.

Controlled substance analogs are sometimes flippantly called "designer drugs", suggesting something fashionable and trendy, like Sassoon jeans or Varnay sunglasses, Gucci shoes, Bill Blass Chocolates, or Bailey's Irish Creme. Nothing could be further from the truth. These drugs have earned their name from the Machiavellian abilities of the underground chemists to design a drug directed at a particular market by moving a radical here or changing a benzene ring there.

These analog drugs may be 1,000 or more times stronger than the drug it is meant to replace, such as heroin. Let me give you just one example of their potency: Fentanyl, which is legally used as a narcotic analgesic, has over a

hundred possible analogues which have not been adequately tested for safety and can be made by a chemist for very little investment and extremely high street sale value. This can be done legally because each new analog must go through the procedure required for substances to be put on the controlled substance list and the underground chemists come up with new analogs faster than the DEA can get the drugs listed. For one dose of one fentanyl analog, the drug must be cut in microgram amounts.

Mr. President, a single postage stamp weighs 60,000 micrograms! According to the Los Angeles Times, as many as 40 street doses can be made from a chunk of the drug the size of a grain of table salt.

Mr. President, these drugs are extremely dangerous and the only test trials they receive are on the street. Human beings are serving as the test animals. The potency of the drugs make overdoses common. They do not need to be imported and they are very cheap to make.

In testimony before my subcommittee, Dr. Robert Robertson, the chief of the division of drug problems of the California Department of Alcohol and Drug Programs stated that at least one of these drugs may be like time bombs in the brain, slowly destroying neurons, creating a whole generation of people likely to develop Parkinsonian like diseases down the road, 2, maybe 10 years, or even more after the drugs have been ingested. There have been over a hundred deaths caused by analog drugs.

We must pass this amendment to facilitate the efforts of our law enforcement agencies in dealing with analog drugs. So far, the major problems have been in California. However, they are spreading. We cannot delay.

(By request of Mr. BYRD, the following statement was ordered to be printed in the RECORD:)

● Mr. CHILES. Mr. President, I rise in support of S. 1437, the Controlled Substance Analogs (Designer Drug) Enforcement Act of 1985, and urge my colleagues to support this bill. I compliment both Senator THURMOND and Senator BIDEN for their timely consideration of this measure in the Judiciary Committee. Likewise, I compliment the administration, through the efforts of the National Drug Enforcement Policy Board, in addressing this issue.

Earlier this year, I introduced S. 746, a bill to require the National Drug Enforcement Policy Board to provide a comprehensive assessment of the designer drug problem and make recommendations to Congress for necessary legislation. Subsequently, at a hearing of the Senate Appropriations Subcommittee on Commerce, Justice, State, the Judiciary, and Related Agencies, I secured a commitment from Attorney General Meese, as Chairman of the National Drug Enforcement Policy Board, to address the designer drug problem and develop a strategy to get the necessary laws on the books before the problem gets out of hand. This bill meets that commitment. We cannot overstate the dangers posed by these new drugs. We need concern and results, and I certainly commend the Attorney General for his quick handling of this.

Last March, I brought the designer drug problem to the attention of my colleagues. This bill addresses the problem by making it unlawful to manufacture with intent to distribute, to possess with the intent to distribute, or to distribute designer drugs. Persons convicted of manufacturing, possessing, or distributing would be subject to 15 years imprisonment and a $250,000 fine.

We have before us a rare opportunity—the opportunity to address the problem before it become a disaster. I'm talking about designer drugs and the glitch in our law which allows those with only a smattering of ability to produce a deadly chemical in their basement and sell it, entirely legally, on the streets of America.

We have spent millions of dollars in the last decade in combating, with some success, the importation of deadly drugs. Certainly, that funding needs to continue. Now, however, we're finding unscrupulous drug dealers are buying equipment and chemicals over the counter and producing quite legally the same kind of substances we have been spending millions of dollars to keep out of America.

On July 18, I held a hearing about the designer drug problem and heard how someone can spend $2,000 on readily available equipment and chemicals, and turn 2 weeks of time into 200 million doses of drugs which has the potential street value of $70 billion. That just blows my mind. We have an opportunity to get ahead of the curve before it becomes a disaster and that's why this legislation needs our support right now today.

Designer drugs are made by chemically modifying controlled substances to produce analogs or chemical cousins of these substances which are not covered by the Controlled Substances Act. By adding a flouride or an extra carbon molecule, a new drug is created which will produce the high or euphoria the user seeks but is not illegal. But they are extremely dangerous, thousands of times more potent than the illegal narcotics presently flooding the country, and more than 100 deaths have been identified with designer drug use so far.

The more commonly used drugs—cocaine, heroin, and marijuana—take a terrible toll on their users in health problems and even deaths. Designer drugs multiply these risks and open the door to long-term neurodegenerative diseases, adding an entirely new dimension to the drug abuse problems. No one knows what is in each batch of designer drugs. They are not tested; there is no process to remove contaminants or unwanted compounds; and the potential is very real that is a highly toxic compound will hit the streets. In California, a substance known as MPTP was circulated as "new heroin." It has caused severe brain damage similar to end-stage Parkinson's disease in a number of users. The doctors are not optimistic about the future of a number of these patients because of the problems they are having. The human body can't last very long in this condition. At the hearing I held in July on the designer drug problem, Dr. William Langston showed a videotape about the Parkinson-like syndrome these patients developed. They literally changed before our eyes as the medication they were taking wore off; they became like zombies. The doctors are aware of over 400 young people who used these drugs in northern California. Although most are currently asymptommatic, a senior investigator at NIH has referred to them as walking time bombs. The human and medical economic costs of such an epidemic are almost incalculable. More recently, a designer drug user has been identified with the neurological symptoms of Huntington's chorea, a debilitating and eventually fatal disease.

All the signs indicate that designer drugs will be a major part of the drug abuse problem of the future. If that proves to be the case, the public health consequences of drug use may be entering an entirely new and frightening dimension.

The current procedure for controlling illicit drugs, even with the emergency scheduling provisions authorized by Congress in 1984, represents an essentially unworkable response in the face of any significant increase in the manufacture of designer drugs. The Federal Register will simply be required reading for the criminal chemist to keep up to date on what analog formulas are now illegal and need to be modified.

Mr. President, our experience with illegal drug law enforcement is usually a matter of too little, too late. The potential disaster posed by the designer drug phenomenon is too grave for us to delay in acting to prevent the manufacture and distribution of these drugs. We must outlaw these drugs before the country finds itself in the middle of a public health disaster of overdose deaths, poisonings, and addiction. I urge my colleagues to support this bill.●

Mr. GARN. Mr. President, I move the passage of the bill, as amended.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 1437), as amended, was ordered to be engrossed for a third reading, was read the third time, and passed.

The title was amended so as to read: "A bill to amend the Controlled Substances Act to create new penalties for the manufacture with intent to distribute, the possession with intent to distribute, the possession or the distribution of 'controlled substance analogs', and for other purposes.".

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SHAREHOLDER COMMUNICATIONS ACT OF 1985

Mr. GARN. Mr. President, I ask unanimous consent that the Senate turn to Calendar Order No. 486, S. 918, the Shareholder Communications Act.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 918) to amend the Securities Exchange Act of 1934 to authorize the Securities and Exchange Commission to subject banks, associations, and other entities that exercise fiduciary powers, to the same regulations as brokers-dealers, pursuant to section 14(b) of the Securities Exchange Act of 1934.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Utah?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Banking, Housing, and Urban Affairs, with an amendment to strike out all after the enacting clause, and insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Shareholder Communications Act of 1985".

AMENDMENT TO SECURITIES EXCHANGE ACT OF 1934

SEC. 2. (a) Section 14(b) of the Securities Exchange Act of 1934 (15 U.S.C. 798n(b)) is amended by inserting "or any bank, association, or other entity that exercises fiduciary powers," after "under this title,".

(b) Such section is further amended by inserting "(1)" after "(b) and by adding at the end thereof the following new paragraph:

"(2) With respect to banks, the rules and regulations prescribed by the Commission under paragraph (1) shall not require the disclosure of the names of beneficial owners of securities in an account held by the bank on the date of enactment of this paragraph unless the beneficial owner consents to the disclosure. The provisions of this paragraph shall not apply in the case of a bank which the Commission finds has not made a good faith effort to obtain such consent from such beneficial owners.".

EFFECTIVE DATE

SEC. 3. The amendments made by this Act shall become effective one year after the date of enactment of this Act.

Mr. GARN. Mr. President, I move the adoption of the committee amendment.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. D'AMATO. Mr. President, I strongly urge my colleagues to vote for final passage of S. 918, the Shareholder Communications Act of 1985. Although the legislation is technical in nature, its enactment will have important ramifications for millions of American investors who will receive more information about their investments. S. 918 is intended to improve the access of certain shareholders to proxy materials. Legislation such as the Shareholder Communications Act is needed to ensure that the congressional intent of the Federal securities laws, that investors be able to make well-informed investment decisions, is realized. A failure to vote for final passage of this legislation will deprive certain members of the investing public of the benefits of increased disclosure.

S. 918, in its present form, varies from the legislation that I introduced earlier this year. The legislation was amended in the Senate Banking Committee in response to the concerns of the banking industry during our consideration of this legislation. These institutions were concerned that S. 918, as originally introduced, could have breached the confidential relationship between a bank and certain of its clients. As explained in greater detail below, S. 918 as amended by the Senate Banking Committee, avoids the breach of any existing confidential relationship between a bank and its present clients by recognizing the important distinctions between stock held by broker-dealers for their customers and stock held by a bank trust department as a fiduciary.

The Shareholder Communications Act is designed to extend the authority of the Securities and Exchange Commission [SEC] to improve the proxy dissemination process by enabling the SEC to promulgate rules and regulations relating to the dissemination of these materials to banks, associations, and other entities that exercise fiduciary powers and hold stock on behalf of beneficial owners.

Section 14(b) of the Exchange Act currently grants the SEC the authority to regulate the activities of broker-dealers regarding proxy dissemination and voting with respect to shares held by them on behalf of beneficial owners. Under this authority, the Commission has adopted rule 14b-1, which requires broker-dealers to disseminate proxy and other material to beneficial owners. See, Release No. 34-13719 (July 5, 1977) (42 FR 35953). The Commission amended that rule to improve the proxy dissemination process with respect to the activities of broker-dealers and to add a provision which will make it easier for issuers to communicate directly with certain beneficial owners. See, Release No. 34-20021 (July 28, 1983) (48 FR 35082).

However, neither the SEC, nor bank regulators have authority to regulate the proxy processing activities of banks, associations and other entities that execise fiduciary powers and hold stock on behalf of beneficial owners. The SEC is therefore unable to extend rule 14b-1 or similar provisions to them. The inability to regulate banks and other entities in this regard creates a gap which denies beneficial owners of securities held by banks and other entities the benefits of the rules of the SEC that require timely delivery of information. The absence of such authority is especially significant with respect to banks, because banks hold a majority of the securities registered in nominee name. To remedy this deficiency, the Commission's Advisory Committee on Shareholder Communications, composed of private sector participants, including representatives of issuers, banks, broker-dealers and others, recommended that legislation be enacted to cover banks. See, "Improving Communications Between Issuers and Beneficial Owners of Nominee Held Securities," report of the Advisory Committee on Shareholder Communications, June 1982.

Section 2 of the Shareholder Communications Act amends section 14(b) of the Exchange Act to make that section applicable to banks, associations, and any other entities that exercise fiduciary powers. This would give the SEC the authority to adopt rules and regulations that would require bank nominees, association nominees, and other nominees that exercise fiduciary powers, to perform certain tasks with respect to proxy voting and distribution of proxies in respect of shares held in nominee name but where voting rights have been reserved. This authority would be delayed for 1 year, under section 3 of the bill to accord the SEC an adequate opportunity to promulgate thoughtful and effective rules and regulations.

Section 2 extends the SEC's authority to the trust and custodial activities of "banks," as that term is defined in section 3(a)(6) of the Exchange Act, and to other entities, such as savings and loan associations and savings banks. Among the entities covered by this provision are associations, as defined in 12 U.S.C. 14672(d) (1982). Such associations are Federal savings

and loan associations or savings banks chartered by the Federal Home Loan Bank Board [FHLBB] under 12 U.S.C. 1464(n) (1982). In addition, State savings and loan associations and savings banks and other entities who are or become authorized to exercise fiduciary powers would come within the ambit of the legislation. Historically, these other entities did not have fiduciary powers and, thus, did not hold securities in trust or custodian accounts on behalf of their customers. In recent years, however, a growing number of these entities, both at the State and Federal level, have been granted fiduciary powers and now are maintaining trust and custodian accounts. These activities are indistinguishable from the trust activities of banks and other entities that engage in similar fiduciary activities, and, thus, should be subject to the same regulations as banks with respect to those activities.

Section 2 recognizes that banks, and other associations and entities, as well as broker-dealers, hold securities that are beneficially owned by others. The legislation is intended to assure that shareholders who have retained the right to vote stock held in another name have the opportunity to vote that stock in a timely manner irrespective of the nature of the institution in whose name the stock is registered.

Consistent with this section, the SEC has indicated that it expects to extend rule 14b-1 to banks and, as it becomes appropriate, to other entities. Extension of similar requirements to banks and other entities will ensure that beneficial owners of securities held by them will receive the same protection as beneficial owners of securities held by broker-dealers.

Section 2 enables the SEC more effectively to carry out its mandate to protect shareholders. It is not intended to alter the overall regulatory scheme for banks and other institutions affected by this provision. The SEC is not intended to serve as a bank inspector or investigator, nor does this legislation provide that authority. However, when a securities violation occurs under this section, the SEC shall use its existing enforcement authority to obtain compliance.

THE COMMITTEE AMENDMENT

The Banking Committee amended S. 918 by adding section 2(b). Section 2(b) was added to ensure that the SEC, in carrying out its responsibilities under this provision, recognizes the important distinctions between stock held by broker-dealers for their customers and stock held by a bank trust department as fiduciary. The relationship between a trustee and a beneficiary is unique, and the courts have consistently held trustees to high standards.

During the Banking Committee's consideration of this legislation, issues were raised by banking institutions with regard to the disclosure of the identity of beneficial owners of securities held in nominee name. The banking institutions contended that such disclosures would violate an institution's fiduciary duty to protect the privacy of a customer. In recognition of the unique relationships between trustees and beneficiaries and the duties owed by trustees to beneficiaries, the regulations to be issued by the SEC under section 2(b) shall be applicable only where someone other than the bank trustee has voting authority, and any disclosure required by the regulations shall be applicable only to those who have voting authority. The legislation does not require trustees to disclose trust beneficiaries or other bank customers who do not have the power to vote.

Concerns about violations of a shareholder's privacy were particularly relevant to the standard of disclosure that the SEC could adopt. The SEC's rules with respect to broker-dealers require disclosure of the name, address and number of shares registered in the name of the brokerage firm unless the shareholder objects. Representatives of the banking industry felt that disclosing the same information—required from broker-dealers by the SEC's rules—with regard to their existing accounts without the customer's affirmative consent would violate the customer's privacy and potentially expose the banks to liability. They argued that they should be required to supply the names and other customer information only if the customer affirmatively consented. At the same time, banking industry representatives contended that these same considerations would not apply with new customers, who could be advised upon the opening of an account that their names would be supplied to issuers unless they objected.

Therefore, section 2(b) was adopted to accommodate these concerns. The SEC, in exercising its rulemaking authority under section 2(b) shall not require the disclosure of names of beneficial owners of securities in an account held by the bank on the date of enactment unless the beneficial owner consents to the disclosure. By contrast, the SEC could require that the names of beneficial owners of securities held in accounts with the bank after the date of enactment must be supplied to issuers unless the customer objected to the disclosure.

Because of the differences between brokerage accounts and fiduciary accounts and the numerous State statutes specifically relating to the confidentiality of bank records, an "affirmative consent" requirement, may be the more appropriate standard for rules promulgated pursuant to this section that are applicable to banks, associations and any other entities that exercise fiduciary powers, rather than the "nonobjection" standard adopted in the Commission's rule applicable to brokerage accounts. While the affirmative consent standard is appropriate to avoid breaches of a bank's duty to or the violation of a privacy right of a customer, a bank is in a different posture with regard to a new customer upon enactment of this legislation. Upon enactment of this legislation, a bank opening a new customer account would be on notice of the applicability of the nonobjection standard for beneficial owner disclosure and any such concerns would be adequately addressed by the bank at the time the new account is opened.

Section 2(b) is designed to grant the SEC authority to address the concerns of the banks and simultaneously ensure that banks are complying with the legislation's purpose of facilitating shareholder communication. The rules promulgated by the SEC should be designed to ensure that the intent of the legislation is realized and that the institutions covered by this act make a good faith effort to obtain responses from their customers. Therefore the legislation provides that the restrictions on SEC rulemaking shall not apply if the SEC determines that the institutions covered by this act have not made good faith effort to obtain the affirmative consent of their existing customers. The SEC will provide guidance in its rulemaking to assist the affected institutions in the determination of the conduct constituting a good faith effort to obtain affirmative consent.

In recognition of the concerns expressed to the committee that led to the adoption of section 2(b), the SEC must consider the privacy rights of bank customers in promulgating any rule governing bank proxy processing. The legislation contemplates that the SEC, in its rulemaking, must address the concerns of those who comment on the rules and regulations promulgated pursuant to this section. The SEC is expected to work in conjunction with the bank regulatory agencies to develop a regulatory scheme that is appropriate for banks.

Legislation, containing identical provisions, was passed by the other body this summer. I urge my colleagues to give favorable consideration to this bill which will enable shareholders to be provided with more information and will facilitate the ability of issuers to communicate with their shareholders.

Mr. GARN. Mr. President, I move the bill to third reading.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. GARN. Mr. President, I ask unanimous consent that the Banking Committee be discharged from further consideration of H.R. 1603, the House companion bill.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 1603) to amend the Securities Exchange Act of 1934 to authorize the Securities and Exchange Commission to subject banks, associations, and other entities that exercise fiduciary powers to the same regulations as broker-dealers, pursuant to section 14(b) of the Securities Exchange Act of 1934.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Utah?

There being no objection, the Senate proceeded to consider the bill.

Mr. GARN. Mr. President, I move passage of H.R. 1603.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 1603) was read the third time, and passed.

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. Mr. President, I ask unanimous consent that S. 918 be placed back on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. GARN. Mr. President, I inquire of the minority leader if he is in a position to pass or indefinitely postpone any of the following calendar items. First to indefinitely postpone Calendar Order No. 465, S. 978.

Mr. BYRD. Mr. President, there is no objection.

Mr. GARN. Mr. President, next would be to pass Calendar Order No. 466, S. 1896.

Mr. BYRD. No objection, on this side.

Mr. GARN. Mr. President, next would be to pass Calendar Order No. 472, H.R. 2542.

Mr. BYRD. No objection, on this side.

ORDER TO INDEFINITELY POSTPONE S. 978

Mr. GARN. Mr. President, I ask unanimous consent to indefinitely postpone Calendar Order No. 465, S. 978.

The PRESIDING OFFICER. Without objection, it is so ordered.

CAPTAIN JOHN FOSTER WILLIAMS COAST GUARD BUILDING

The bill (S. 1896) to designate the General Services Administration building known as the "United States Appraiser's Stores Building" in Boston, MA, as the "Captain John Foster Williams Coast Guard Building," was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

S. 1896

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the General Services Administration building known as the "United States Appraiser's Stores Building", located at 450 Atlantic Avenue, Boston, Massachusetts, shall hereafter be known and designated as the "Captain John Foster Williams Coast Guard Building", in recognition of Captain John Foster Williams' contributions to the Commonwealth of Massachusetts during the Revolutionary War. Any reference is a law, map, regulation, document, record, or other paper of the United States to such building shall be deemed to be a reference to the "Captain John Foster Williams Coast Guard Building".

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

WALLACE F. BENNETT FEDERAL BUILDING

The bill (H.R. 2542) designating the building located at 125 South State Street, Salt Lake City, UT, as the "Wallace F. Bennett Federal Building," was considered, ordered to a third reading, read the third time, and passed.

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

JENNINGS RANDOLPH LAKE

The bill (S. 1740) to designate Bloomington Lake located on the North Branch of the Potomac River, near Bloomington, MD, and Keyser, WV, as the "Jennings Randolph Lake," was considered.

JENNINGS RANDOLPH LAKE

Mr. ROCKEFELLER. Mr. President, it is a privilege to support S. 1740, a bill to designate the Bloomington Lake on the North Branch of the Potomac River near Keyser, WV, and Bloomington, MD, as the "Jennings Randolph Lake." I am also grateful to the senior Senator from Maryland [Mr. MATHIAS] for giving me the opportunity to be an original cosponsor of this measure.

This bill is a highly appropriate way for the Congress to express a well-deserved tribute to former Senator Jennings Randolph who served the citizens of West Virginia and our Nation for over 40 years in the House of Representatives and in the Senate.

As a member of the Senate Committee on Environment and Public Works for his entire service in the Senate and chairman of this committee for 14½ years, Senator Randolph was an effective and constant advocate for needed flood control and navigation projects not only in our State but throughout this country. For several years, he served as chairman of the then Subcommittee on Flood Control—Rivers and Harbors.

As Senators know, West Virginia recently suffered from devastating floods which has resulted in 29 counties being declared disaster areas. We are still in the process of calculating the damage from this flooding. However, it should be noted that the existing flood control projects in our State prevented hundreds of millions of dollars in additional damage. Many of those projects were brought into being by Jennings Randolph during his service in the Congress.

Thus, Mr. President, I am pleased that the Senate Committee on Environment and Public Works has unanimously recommended the renaming of the Bloomington Lake—a flood control project for which Senator Randolph worked and supported over a period of many years.

However, Mr. President, I prefer to view this bill as recognition of the accomplishments of Jennings Randolph beyond the vital work of flood control and navigation projects. As the successor to Senator Randolph, I continue to learn of the remarkable scope of his activities and accomplishments. Public works, highways, aviation, economic and regional development, the environment, education, the handicapped, worker health and safety, social services, veterans, programs for the elderly and the young are just some of the areas in which Jennings Randolph was a leader. His record of achievements has benefited millions of people throughout our Nation.

Mr. President, the Environment and Public Works Committee's report quotes one of Senator Randolph's colleagues: "Jennings Randolph was an institution himself within the institution of the Senate, which he took very seriously." That is an exceptional tribute to a very exceptional public servant and I am privileged to join the members of the committee and the Senate in urging the approval of this bill.

The bill (S. 1740) was ordered to be engrossed for a third reading, read the third time, and passed; as follows:

S. 1740

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Bloomington Lake located on the North Branch of the Potomac River near Bloomington, Maryland and Keyser, West Virginia is named and designated as the "Jennings Randolph Lake". Any reference in a law, map, regulation, document, record, or other paper of the United States to such lake shall be held to be a reference to the "Jennings Randolph Lake".

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, I ask unanimous consent that I be added as a cosponsor to S. 1740.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUPPLEMENTAL EXPENDITURES BY THE SELECT COMMITTEE ON INDIAN AFFAIRS

The Senate proceeded to consider the resolution (S. Res. 204) authorizing supplemental expenditures by the Select Committee on Indian Affairs, which had been reported from the Committee on Rules and Administration with amendments.

The amendments were agreed to.

The resolution (S. Res. 204), as amended, was agreed to, as follows:

Resolved, That section 21 of S. Res. 85, Ninety-ninth Congress, agreed to February 28, 1985, as amended, is amended by striking out "$764,032" and inserting in lieu thereof *"$814,032".*

SEC. 2. Section 2(a) of S. Res. 85, agreed to February 28, 1985, as amended, is amended by striking out "$44,828,358" and inserting in lieu thereof "$44,878,358".

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE FORMER PRESIDENTIAL YACHT "SEQUOIA"

Mr. GARN. Mr. President, I send the enclosed concurrent resolution to the desk, for myself and Mr. CRANSTON, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the concurrent resolution.

The assistant legislative clerk read as follows:

S. CON. RES. 98

To recognize the historical significance of the former Presidential yacht Sequoia, and express support for her donation to the United States Navy by the Presidential Yacht Trust

Whereas the former Presidential yacht Sequoia served eight Presidents of the United States, from Herbert Hoover to Gerald R. Ford, over a period of forty-four years;

Whereas the Sequoia was the setting for Presidential meetings, negotiations and decisions of extraordinary significance for and effect on the history of the United States and the course of world events;

Whereas the Sequoia was disposed of in 1977 to reduce Federal expenditures;

Whereas in recognition of Sequoia's unique historical significance, the private, bipartisan, and nonprofit Presidential Yacht Trust was established in 1981 for the purpose of restoring and preserving Sequoia;

Whereas since 1981 many Americans have visited the Sequoia and demonstrated support for her preservation and return to service;

Whereas in response to this support, the Presidential Yacht Trust, in consultation with the United States Navy, has determined that the proper future of the Sequoia is her return to Government service in the United States Navy as the Presidential yacht; and

Whereas the Presidential Yacht Trust has taken steps to fully restore the Sequoia by November 15, 1988, to donate her to the Navy as a gift of the Presidential Yacht Trust and the American people, and to establish an endowment sufficient for her future operation and maintenance: Now, therefore be it

Resolved by the Senate (the House of Representatives concurring), That Congress—

(1) recognizes the unique significance of the former Presidential yacht Sequoia which has made her a symbol of American political heritage and the Office of the President;

(2) supports the plans of the Presidential Yacht Trust to donate the Sequoia, with an endowment sufficient for her operations and maintenance, to the United States Navy for service once again as the Presidential yacht.

There being no objection, the Senate proceeded to the immediate consideration of the concurrent resolution.

Mr. SIMPSON. Mr. President, the former Presidential Yacht *Sequoia* is not only of great historical significance, but takes on this extraordinary uniqueness in that she is to be returned to service without expense to the American taxpayer.

Sequoia served eight Presidents of the United States over a period of 44 years, from Herbert Hoover to Gerald R. Ford, and a review of her role during that period is much like a synopsis of major world events—from President Roosevelt's shipboard planning of both war and domestic strategy, to President Truman's hosting of the first conference on nuclear controls, to President Nixon's meetings with Soviet President Brezhnev during the 1973 summit.

Following her disposal in 1977 by President Carter, *Sequoia* passed through several private owners before being acquired by the bipartisan, nonprofit Presidential Yacht Trust for historical preservation in 1981. Over the ensuing years, the Presidential Yacht Trust has undertaken informational and public service programs with *Sequoia*, including significant support for other charities and its much acclaimed 1984 national tour which took the *Sequoia* to over 100 cities in 16 States. Through these and other programs tens of thousands of Americans have had the unique, personal opportunity to visit and demonstrate support for *Sequoia*'s preservation and return to service.

In recent months, the Presidential Yacht Trust, in consultation with the Naval Historical Society, has determined that the proper future role for the *Sequoia* is her return to service as the Presidential Yacht. The trust has undertaken steps that would accomplish such a remarkable comeback of this truly historic vessel under the very best of circumstances.

First, the trust will donate *Sequoia* to the U.S. Navy no later than November 15, 1988, as a gift from the trust and the American people.

Second, prior to her donation, *Sequoia* will be totally restored by the trust in preparation for her future service.

Third, at the time of donation, the trust will provide an endowment sufficient for *Sequoia*'s future operations and maintenance.

The *Sequoia* project is first and foremost an effort of significant historical preservation—with the added benefit of her future service at no cost to American taxpayers.

I believe this resolution, endorsing the return of *Sequoia* to Government service, is an important step in assuring continued private financial support of the endowment fund and public awareness of this important project.

SUMMARY

Under plans developed by the Presidential Yacht Trust and the Naval Historical Society, the former Presidential Yacht *Sequoia* would be returned to service in the U.S. Navy as the Presidential Yacht by November 15, 1988, under the following conditions:

First. *Sequoia*'s return to service would be by donation from the Presidential Yacht Trust to the U.S. Navy.

Second. Prior to her donation, *Sequoia* would be fully restored—at no cost to the Government—and in first-class operating condition suitable for her new use.

Third. Prior to her donation, legislation would be sought to recognize *Sequoia*'s historical importance and to protect her from future disposal.

Fourth. At the time of donation, the Presidential Yacht Trust would provide an endowment sufficient to cover costs of *Sequoia*'s operations and maintenance in perpetuity.

These plans provide for *Sequoia*'s return to active service under the very best of circumstances. This historical vessel, which served eight Presidents of the United States would be first, restored; second, donated by the bipartisan, nonprofit Presidential Yacht Trust as a gift of the American people; and third, available for future service at no cost to the taxpayer.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 98) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE CALENDAR

Mr. GARN. Mr. President, I ask unanimous consent that the Senate proceed to consider all nominations on the Executive Calendar under the Foreign Service list appearing on page 5 with the exception of the nomination of Edward G. Corr.

Mr. BYRD. Mr. President, there is no objection on this side.

Mr. GARN. Mr. President, I ask unanimous consent that the nominations be considered en bloc, and confirmed en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations confirmed en bloc are as follows:

Foreign Service nominations beginning L. Paul Bremer, III, and ending Jerome F. Tolson, Jr., which nominations were received by the Senate and appeared in the Congressional Record of October 28, 1985, except Edwin G. Corr.

Mr. GARN. Mr. President, I move to reconsider the vote by which the nominations were confirmed en bloc.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

RAILROAD RETIREMENT BOARD

Mr. GARN. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the nomination of William J. Doyle III, of Maryland, to be inspector general, Railroad Retirement Board.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nomination will be stated.

The legislative clerk read the nomination of William J. Doyle III, of Maryland, to be inspector general, Railroad Retirement Board.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. GARN. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. GARN. Mr. President, I ask unanimous consent that the Senate resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

JOINT RESOLUTION WAIVING PRINTING ON PARCHMENT

Mr. GARN. Mr. President, I ask unanimous consent that the Senate turn to the consideration of House Joint Resolution 485, waiving the printing on parchment of enrolled bills and joint resolutions during the remainder of the 1st session of the 99th Congress.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 485) waiving the printing on parchment of enrolled bills and joint resolutions during the remainder of the 1st session of the 99th Congress.

The PRESIDING OFFICER. Without objection, the joint resolution will be considered as having been read twice by title.

The Senate proceeded to consider the joint resolution.

The joint resolution (H.J. Res. 485) was ordered to a third reading, read the third time, and passed.

Mr. GARN. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AN ACT TO AMEND THE SMALL BUSINESS INVESTMENT ACT OF 1985

Mr. GARN. Mr. President, I ask unanimous consent that the Senate turn to the consideration of H.R. 3608, the Small Business Investment Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

H.R. 3608, an act to amend the Small Business Investment Act of 1985.

The Senate proceeded to the immediate consideration of the bill.

Mr. WEICKER. Mr. President, I rise in support of H.R. 3608 which would amend the Small Business Investment Act of 1985, to clarify certain provisions in current law that establish the permissable interest rates that a small business investment company [SBIC] may charge to a small business borrower. In effect, H.R. 3608 simply makes clear what Congress intended to do in 1980 when this provision was enacted into law, that is, permit the Small Business Administration by regulation to establish the maximum interest rate that an SBIC may charge to a small business borrower. The change is really a technical one that will take some confusion out of current law regarding which interest rate—SBA, State, or a formula based upon the Federal Reserve rate—applies to any particular SBIC financing.

I want to emphasize, however, that nothing in this legislation in any way affects or impedes the right of any State to override SBA's interest provision, if it so desires. It simply ensures that SBA can establish the maximum, uniform, programmatic interest rate standard that applies to all SBIC's. But, if a State wants to override this interest rate standard as inconsistent with its own standard, it can easily do so, just as it can now.

I might also note, Mr. President, that hearings were held recently by the House Small Business Committee on this bill. The SBIC industry and SBA, after clearing its testimony with the Office of Management and Budget, testified in support of enactment of this bill. And, I can assure you, when OMB signs off on any legislation to permit SBA to operate any of its programs more efficiently, you can be sure that it is nothing more than a technical matter.

Mr. President, Senator BUMPERS, the Small Business Committee's ranking member, has also reviewed this bill carefully and concurs in my view that this bill will serve to clarify the original congressional intent with regard to SBIC interest rates. We jointly recommend that this bill pass and be enacted into law.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 3608) was ordered to a third reading, was read the third time, and passed.

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. Mr. President, I have no further business at this time. I ask, does the distinguished Democratic leader have any further business?

Mr. BYRD. Mr. President, I thank the distinguished acting majority leader.

OBSERVATIONS OF SENATOR BAUCUS ON TRADE

Mr. BYRD. Mr. President, I call attention to a statement by our distinguished colleague, Mr. BAUCUS.

Senator MAX BAUCUS is one of the Senate's most thoughtful experts on trade policy. He has distinguished himself in his work in this area on the Finance Committee, and as a member of the Democratic Working Group on Trade Policy. On December 9, 1985, he shared his thoughts on a new round of global trade negotiations with the "consumers for world trade" here in Washington. I know his colleagues and others will find these observations useful, and I ask unanimous consent that Senator BAUCUS' statement be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR MAX BAUCUS, NEW ROUND OF GATT NEGOTIATIONS

Centuries ago, the Roman poet, Ovid, made the following observation: "What is worthwhile is necessarily difficult."

Today I want to make two simple points that reaffirm that ancient maxim. First, the new round of GATT negotiations is potentially the most worthwhile round we have ever had. Second, it will also be the most difficult round we have ever faced.

NEED FOR A NEW ROUND

Let me take these two points in order: Why can a new round be worthwhile?

The answer lies in a relatively unpublicized statement by the GATT economists several weeks ago. At that time, the GATT economists announced that the level of world trade will grow by only 2 to 3% this year. That compares to an average increase of 6% in the decades following World War II. In those years, a healthy GATT was the locomotive for the growth in world trade.

Today, the breakdown in the GATT has led to a serious decline in world trade. By the Administration's own estimates, only between 10 to 50% of world trade is subject to the GATT. Some products are not covered by GATT. Other products have been intentionally excluded. But other products are not subject to GATT because many countries are not adhering to GATT.

In many cases, the GATT rules simply are not working anymore. And when the rules don't work, countries don't play by the rules. And when countries don't play by the rules, they erect barriers that stifle trade. And when trade is stifled, all countries are worse off.

The point is that: if a GATT is properly negotiated and enforced, America has the potential to benefit greatly from a new round. We can improve the living standards of the citizens of all nations.

Simply put, we can make a better world.

STRICTER ENFORCEMENT

Now that's the good news. The bad news—or at least the challenging news—is that this will be the toughest round of GATT negotiations we have ever faced.

Let me suggest several reasons why this round will be so tough.

First, it will be tough because we want tighter enforcement of the GATT rules, but we as a country typically resist control by international institutions. We all want to strengthen GATT by tightening its enforcement provisions. But as the debate over a new GATT round proceeds, I suspect that we will have to ask ourselves how much of our independence we are willing to forfeit for stronger enforcement of the GATT rules. Because if GATT can be strictly enforced against other countries, it can be strictly enforced against us. And that will not be easy medicine for a country that is used to being the biggest kid on the block.

If you don't believe this will be tough, let me review a little history. Over 35 years ago, in 1950, when GATT was first contemplated, a stronger organization was also proposed. That organization—called the International Trade Organization—would have had stronger enforcement authority over world trade. And do you know how the United States reacted? It refused to join the ITO precisely because of business pressure and Congressional opposition to some of the ITO's authority.

We will face the same problem today. We want greater control, but we do not want to be controlled.

Let me make my position clear. I believe we need stricter enforcement of the GATT. But I simply observe that it will be difficult to find ways that we and other countries can live with stricter international enforcement.

NONTARIFF BARRIERS

A second reason this GATT round will be more difficult is that the unfair trade practices we face today are more subtle.

In the first seven rounds of trade negotiations, we liberalized barriers that are easily identifiable—barriers such as tariffs. Although high tariffs on some products remain, those negotiations were generally successful: the average tariff has decreased from 40% in 1947 to 5% today.

However, as tariffs fell, countries found new ways to protect national interest groups. Today we face a host of more subtle, non-tariff barriers that are less transparent, but just as devastating to U.S. trade. And most important, these non-tariff barriers are much more difficult to root out.

In short, when it comes to eliminating barriers, many of the easy things have been done. Achieving progress on the remaining barriers will be tough.

THE CURRENT TRADE CRISIS

A third reason these talks will be tough is that America is facing its worst trade crisis since the Depression.

Traditionally, Congress grants the President trade negotiating authority only if he accepts trade law reform legislation in return. For example, Congressional approval of the first textile agreements in 1962 was accompanied by the Trade Expansion Act of 1962.

Today, the likelihood this will happen is even greater. Today we have a Congress that feels that strong action must be taken on trade. We are suffering through a severe trade crisis that fuels those demands. But we have a President who is opposed to trade law reform generally.

I suggest to you today that those competing demands and pressures will make it difficult even to grant the President the initial authority to negotiate a new round—let alone provide the Congressional backing to keep those negotiations going.

BUILDING A NATIONAL CONSENSUS

Finally, let me say that this new round will be difficult because we have not yet even begun to decide what we want out of a new round. As a nation, we need to build a consensus as to what kind of world trading system we want to shape.

But building this consensus will not be easy. We lament the fact that only 10 to 50% of world trade is covered by the GATT. But many of the products not covered by the GATT are produced by industries that are vital to America: agriculture and textiles, to name a few. Other countries benefit by the special treatment given these industries, but America benefits as well.

Do we have the political resolve to relinquish these benefits? Would this be in the best interests of America? Are willing to trust our trading partners to remove their barriers if we remove ours?

I do not know the answers to these questions. But I do know that we have not begun to find answers to these questions—or to define our interests.

Let me suggest as well that it is not just a question of defining our interests, but also of reconciling competing interests.

Let me give you an example. The U.S. is very interested in expanding its service trade. However, in return for a liberalized service trade, the LDCs are likely to demand access to our traditional manufacturing markets. It is very likely that we will have to strike a balance between the interests of our service and traditional manufacturing sectors. Traditional manufacturing will argue it is the backbone of our country. Service interests will argue they are the future of our country.

And that debate will raise the fundamental question as to what kind of economy we believe America should have.

But we must reach a consensus on what we want, or no GATT agreement will sell domestically.

The Administration will not be able to sell Congress on a new round unless it makes progress on issues with strong constituencies, such as agriculture, services, manufacturing and high tech.

Congress must also begin to understand how a consensus can be built. So I would like to extend an invitation to each of you in this audience today. I personally invite each of you to meet with me or my staff at your earliest convenience to discuss what we must accomplish in the new round.

In the end, we can only succeed in this new round if we reach a consensus in this country as to what we want to achieve. So let me repeat: I invite all of you to meet with me or my staff to discuss your concerns, so that we can begin building a new national consensus.

CONCLUSION

Let me make one point in conclusion. The new round of GATT negotiations will require that we not only develop a national consensus, but also that we develop a national purpose. It will require that we ask not only where we are, but where we hope to be.

That search will involve difficult choices. It will require all of our discipline, integrity and statesmanship to carry it out. But we must begin defining America's new role in the world trading system.

Walter Lippman one put it well: "Surely the task of statesmanship is more difficult today than ever before in history. . . . The distance between what we know and what we need to know appears to be greater than ever. But we cannot keep to the problems within our borders. Whether we wish it or not, we are involved in the world's problems and all the winds of heaven blow through our land."

The new GATT round presents new challenges, but offers great opportunities. I am confident that when we confront those challenges, the winds blowing thorugh our land will be the uplifting breezes of enhanced international trade.

Mr. BYRD. Mr. President, I yield the floor.

THE LEAST A GRATEFUL NATION CAN DO

Mr. WILSON. Mr. President, I rise to make clear my intention, later in this day, to ask unanimous consent for the introduction of a bill and for its immediate consideration. The bill will be a complement to that which the distinguished senior Senator from South Carolina [Mr. THURMOND] is offering to try to provide relief to the bereaved families of the victims of the tragic crash in Gander. Senator THURMOND's legislation will keep a roof over the heads of those who are suffering grief and loss. It will allow them the time to determine what their plans are and to relocate.

It is necessary because of a deficiency in existing law which unintentionally, I must assume, has the heartless effect of displacing and dislocating those families from military housing on base or, alternatively, of requiring that they now, in their time of need, begin to pay market value rent for the housing that they have received.

This is an obvious injustice. It is an obvious hardship. Most of these families are young families; they are the families of young enlisted personnel. In most instances, they are families of modest income. For them suddenly to find themselves so dislocated clearly is not a result that we can countenance. Therefore, Senator THURMOND's legislation is necessary, and I commend him and have joined him as cosponsor of that legislation.

Mr. President, in addition to giving that amount of help, which is the very least a grateful Nation must afford in order to show its gratitude for the sacrifice of these young men and women serving us in the armed services, what is also necessary in order to provide needed relief to their families, their survivors, is to provide those families with the flexibility which can come from having only an adequate amount of cash so that they can take such decisions, make such plans involving relocation as is required in their best judgment.

Mr. President, Public Law 99-166, enacted on December 8, 1985, will assist in the future to provide that kind of flexibility by increasing the serviceman's group life insurance maximum amount—that is, the base amount—from the existing base amount of $35,000 to $50,000. Prospectively, that will assist, but the problem, obviously, is that the change was to be effective on January 1, 1986. The bill that I intend to introduce, upon which I am soliciting cosponsors, would simply make that change effective on October 23, 1983; that is to say that the amendment that was enacted on December 8 will be deemed to have been in effect during the period from October 23, 1983, and ending January 1, 1986, so as to provide special assistance not only to the families of the Gander crash victims but also to the families of the Marines killed in the tragic bombing of Beirut on October 23, 1983.

This assistance would be provided to the families of service members who died within that period of active duty. It is, it seems to me, the least a grateful Nation can do. It is some modest increase in the assistance required.

So, Mr. President, later today, I shall send that bill to the desk. It is my purpose now to advise all colleagues who wish to cosponsor that measure to contact me or to contact the Armed Services Committee, specifically the Subcommittee on Manpower, so that we may render this assistance for the dependents of those service personnel to whom we owe so much.

The increase in the amount of insurance would be made payable to the families of the members of the armed services from that date, October 23, 1983, forward. That would be the effect of this bill in conjunction with the change in the law that was enacted on December 8.

I thank the Chair and repeat that it is the intention before the end of this day, which the leader has announced is intended to be the last day before we recess for Christmas, to see that this bill is introduced so that we can offer to the victims' families the assurance that they will receive this increase in assistance.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KASTEN). Without objection, it is so ordered.

DEPRESSION IN AGRICULTURE

Mr. GRASSLEY. Mr. President, hopefully later today we will be passing a farm bill and I suppose these remarks would be as appropriate for the farm bill now in morning business. But I want to stand aside of the farm bill just a little while to address the issue of depression in agriculture and to do it in a way that will highlight the seriousness of the situation. That seriousness is demonstrated by a survey that was taken at the annual Iowa Farm Bureau convention held 2 weeks ago in Des Moines, IA. I think the significance of this survey is that it is of the leaders of the farm bureau, the voting delegate from each of the 99 counties and other leaders within the farm bureau.

I have known, in 30 years' membership in the farm bureau and my relationship with that organization, these people to be the cream of the crop.

Mr. President, over the last few months many policymakers and observers have advanced the idea that only the bad farmers are in trouble. The implication is that if a farmer is experiencing financial difficulties he probably should not be in the business of farming anyway. Somehow these experts believe that our country's economy would be better off by eliminating these inefficiencies.

I believe this view is completely off base and an insult to many good farmers who are now experiencing financial trouble. The farmers who are in business today are in fact efficient producers. Our farmers are capable of outproducing any other country in the world.

The Iowa Farm Bureau during its State convention last week conducted a poll of the organization's leaders, that I have already referred to, to find out what their financial conditions were. These farmers represent some of the best farmers in Iowa and the most efficient producers in the United States and the world. The results of this survey showed without question that the difficulties facing rural America are not limited to the inefficient producers, if there are any inefficient producers left farming. I believe that the bad managers went out of business long ago. This poll showed that 38 percent of these farmers had debt-to-asset ratios in excess of 40 percent and 9 percent had debt-to-asset ratios in excess of 70 percent. This means that well over one-third of these farmers are experiencing serious financial difficulties and almost 1 out of 10 are in critical financial condition. The experts would have you believe that these farmers are lazy, unsuccessful, and unproductive farmers. On the contrary, these are farmers who are successful in their community, in their profession, and recognized by their peers as leaders in agriculture.

The survey also showed that 41 percent of these leaders felt that Iowa farmers as a whole were experiencing very serious financial conditions and 45 percent felt that their areas' agribusinesses were suffering severe problems as well. In addition, 47 percent believe that financial institutions were also experiencing very serious financial problems.

Now, for those of us from the upper Midwest, there is nothing in this survey that is surprising, but I feel Congress ought to take into consideration the plight of the best of farmers in our State.

These farm bureau leaders are generally very conservative businessmen and they have very many years of experience in the business of agriculture. The leaders polled in this survey had an average of—and let me emphasize this figure—27.3 years of experience in farming and they farmed an average of 581 acres. 581 acres in my State is twice the average farming operation.

Both farmers and financial institutions are likely to experience even more troubles in the near future as only 80 percent of the farmers surveyed were current in their real estate loans and only 71 percent were current in their operating loans. Of those surveyed, only 64 percent were current on obligations to suppliers and 13 percent expected to have problems arranging for operating money in 1986.

Let me repeat that figure: 13 percent of these farm bureau leaders expected to have problems arranging for operating money in 1986. If 13 percent of the farm bureau leaders are having this trouble, I think it is fair to assume that a higher percentage of farmers generally are going to have this problem. As this is the last day of the 1985 session of the 99th Congress, I would think that even as we debate what is going to be paraded on the floor of this body today as an ideal piece of farm legislation, they should not be surprised that when we reconvene on January 21 the farm issue is not in fact behind us, as a lot of people want to believe it ought to be after we pass the farm bill, but there is still going to be a lot of problems out there in agricultural America that we have to deal with, and the most immediate is that at least 13 percent of the farm bureau leaders, and probably a higher percentage of farmers generally, are going to have trouble arranging for operating money in 1986.

Mr. President, I hope policymakers who have blamed farmers for their own troubles listen to these statistics and start looking for constructive ways to further solve the problems in agriculture. I am one who believes that a farm bill, or even credit in agriculture is not the solution, but there are problems not associated directly with farm legislation which are probably more important to profitability in agriculture, the most important of which is the reduction of interest rates and the reduction of the value of the dollar, and those two are somewhat related. Those two things being accomplished, hopefully as a result of Gramm-Rudman, will do more for agriculture than anything we can do in the farm bill. It is too easy for people unconcerned about agriculture to point their finger at someone else and then just walk away without doing anything. If we in the Congress do not move to stop counterproductive trade policies, bad monetary and fiscal policies, and offer stability and consistency to our agricultural policies, we will certainly see more and more good farmers fall to the level of insolvency. The statistics that I just quoted could be even worse next year and the year after that unless we act responsibly.

RELIEF FOR SERVICE FAMILIES

Mr. McCONNELL. Mr. President, early this morning the distinguished Senator from California [Mr. WILSON] introduced on behalf of himself, Senator THURMOND and others, S. 1956.

Mr. President, I rise in strong support of this legislation. We are all aware of the unfortunate tragedy which robbed 248 families of their loved ones. the men and women who died in Gander, Newfoundland, last week were members of the 101st Division, an exceptional unit with a record of accomplishments that all Americans can be proud of. They died serving their Nation in a mission of peace. when those men and women joined the U.S. Army they did so knowing they were putting their lives at risk to defend their country. They turned a risk into a challenge, then dedicated their courage and skill to meeting that challenge. They fulfilled their commitment to their nation. Now it is our turn to fulfill ours to their bereaved families.

Under current law, the families of servicemen who die on active duty are no longer entitled to the living quarters or housing allowances they have received. If this law is enforced, dozens of women and children will be forced onto the street immediately. I know my colleagues share my sympathy for the suffering these families have already endured in the loss of their soldiers. Those members of the 101st who died were brothers, sons, fathers, neighbors and friends of hundreds of people. They were, most recently, Kentuckians. I cannot imagine evicting them at a time like this. They are most deserving of our support, not the cold shoulder of bureaucracy that tells them they must move on. Let us not compound this tragedy with insensitivity.

I urge my colleagues to support this resolution and afford the victims of this disaster a brief grace period, some time to gather their strength before being forced to address the pressing practical business of day-to-day life. I urge my colleagues to support this legislation which will allow these families 60 days to stay right where they are. We are not providing them much, particularly given their loss. I spent Monday with the President visiting many of these families. Their grief is overwhelming. I ask my colleagues to help relieve some of their anxiety and burden by passing this bill. During this holiday season of good will, let us not forget those who have so valiantly defended our peace and freedom. More important, let us remember the families who have comforted and supported those soldiers and who now need our help. Sixty days will never compensate for or recover the lifetimes lost, but it will give a few families some peace of mind.

In addition, Mr. President, Senator WILSON introduced a complementary bill, which I am also cosponsoring, which will increase the maximum death benefits of service members' families from $35,000 to $50,000. This will cover any service people who died on or after October 23, 1983. This bill will entitle family members of the marines killed in the Beirut bombing, for example, on October 23, 1983, to receive a supplement to their earlier death benefits.

I also urge favorable consideration of that measure. I think it is terribly important that one or both of these bills be approved by the Senate and the House today, before we leave. It is the least we can do in fitting memory of those of the 101st who died last week.

FARM CREDIT

Mr. GRASSLEY. Mr. President, yesterday the Senate passed a bill designed to restructure the Farm Credit System and offer more regulatory power to the Farm Credit Administration. This legislation did not however offer financial assistance to the system or the stockholders of the system. We must recognize that if we do not do something to shore up the seriously deteriorating situation in the Farm Credit System, agriculture will certainly take a turn for the worse. It should be clear that financial help is necessary for the farmers within the system but we in Congress should make sure that this money goes to help the farmer and not the system.

If there is one thing I have discovered from my many conversations and meetings with Farm Credit System officials, farmers, and responsible outside observers, it is that the Farm Credit System's policies are not working. Not only are their policies not working but they are actually making the situation worse.

The policies the Farm Credit System is implementing today are hurting the farmer, destroying the system, and in the near future will cause tremendous expense to the rest of the economy. The Farm Credit System was created during the last depression in agriculture to serve the family farmer. On September 6 of this year I held a hearing regarding the Farm Credit System. During that hearing testimony proved overwhelmingly, that the Farm Credit System has taken on an identity of its own, separate from its own stockholders. Even the president of the farm credit banks of Omaha admitted, in the hearing I held, that their policies do not work in times like these but they are continuing them anyway. The system. believes that it has the power to do whatever it wants and not answer to its boards of directors, its membership, and least of all, to the Congress.

The system's lack of responsiveness has been proven everyday by their actions. We know, for example, that the farm credit banks of Omaha intends to call more than 2,000 of its 16,000 Production Credit Association loans. This is 12.5 percent of all their PCA loans and is 4 to 5 times as many loans as are already in bankruptcy or acquired property. Presently the system has put these actions on hold until at least January 1 but that is not nearly enough and we have no guarantees after that point. As a matter of fact, I have heard reports from concerned officials within the system that some PCA's will be liquidating more than 30 percent of their borrowers. These statistics do not even include the loans that will be called by the Federal Land Banks, and other Farm Credit System institutions.

I have received many calls from bankers stating that they are very concerned about the direction the system is taking. They say that they can't stand idly by and watch their assets be eaten up by the Farm Credit System. So these commercial bankers now feel they need to foreclose or hold credit away from farmers who deal with the system. We can add to this chaos the Farmers Home Administration, insurance companies, and others who are being forced to call loans and continue the panic. This is a dangerous deteriorating situation that requires drastic action before events get anymore out of control. If we do not do something quickly, we may have only seen the tip of the iceberg.

Mr. President, I know what the Farm Credit System officials will say. They will say, "we are only reacting to the situation we are in". They will say that "we are the victims not the culprits". To some extent they are right, they are victims of bad government policy just as the farmers and all of rural America have been. But they are also the cause of many of our problems and they are definitely accelerating the decline. In the last 15 months the members of the Federal Land Bank in my district have watched interest rates go up 1¾ percent. Higher interest rates cause the farmers expenses to increase and even more significantly cause their assets to decline. These higher interest rates turn cashflowing farmers into bankrupt farmers and only serves to dump more assets on the market. This not only destroys the farmer but it also hurts the system. The system takes the loss on the loan, the loss on the land values, and the loss of an otherwise good customer.

In any other industry the Government would classify the Farm Credit System as a monopoly. The control one-third of all agricultural debt. They could use this control to either stabilize the crisis, as they did in the last depression, or to destabilize it further. Unfortunately, today they are heading down the road to destroying stability in agriculture. The system through it's policies is causing an erosion of their customer base, a deterioration in capital, an increase in expenses, and the most significant issue of all, they are causing a complete loss of hope in the future for their stockholders.

Many might say that I am making an emotional plea and they would be right, but I am also making an economic argument. Farmers who lose any hope of surviving don't make payments and give back their farms to their lenders. This causes the Farm Credit System's situation to deteriorate even faster. In addition to these losses, many farmers are leaving the system for greener financial pastures. It is clear that the system's policies are leaving the farmers in the middle, the ones that are not rich enough to get out and not poor enough to quit, to pay the price. By doing this the system is forcing these farmers in the middle to take one more step closer to quitting themselves.

Not a day goes by that I do not receive phone calls from farmers who are being harassed by the system. Many of these farmers are only 30 or 60 days late on their payments. Some of these farmers are being foreclosed on despite the fact that they offered to make their payments. It is quite obvious, from all the research that has been done, that the farmers confidence in the system has virtually disappeared.

It does not make any sense to go through all the expense of liquidating these farmers, when they may become income producing customers after financial assistance. The system admits that foreclosures and liquidations are expensive. During my hearing it was revealed that liquidation costs on real estate is minus 25 percent to 35 percent from the present market value, which is 50 percent below land values of just 4 years ago. Liquidation costs on machinery is minus 25 percent, on grain and livestock is minus 25 percent, and on hay and silage is minus 65 percent. It is simply bad business to foreclose on farmers today, and incur all the legal and liquidation costs, when this farmer may be able to cashflow in just a few months. The system assumes in its evaluation of loans that it will take 2 years to liquidate a farmer. What is a couple of months in relation to 2 years, when a farmer's livelihood and the stability of agriculture is at stake.

I have received many reports that the Farm Credit System is foreclosing on farms and then turning around and giving "sweetheart" deals to nonstockholders of the system. Such deals include: Selling the land at a lower price; not requiring the new owner to buy stock in the Farm Credit System; allowing the new buyer to make low down payments; and most importantly, offering lower interest rates to these new owners than they do to their own members. In many cases, if the same opportunity had been offered to the original owner, a stockholder in the system, he could have survived.

When I first heard these reports about "sweetheart" deals, I could not believe them. During my hearing in September, I asked Mr. Harling, president of the Farm Credit Banks of Omaha, about this practice and my worst fears were confirmed. When I asked him to justify this policy the reply I received was:

> We don't want to leave the impression . . . that we are giving preferential treatment to the borrowers who are having financial difficulties.

Yet they are willing to give preferential treatment to nonstockholders of the System. This twisted philosophy is ruling their actions. These type of policies will bankrupt the System and will cost the U.S. Government billions of dollars unless we put them on hold until more intelligent decisions can be made.

The Farm Credit System will say that these actions are necessary to shore up their assets. The professional managers of the Farm Credit System don't even know where they are at financially. Every projection that has come from the System has been grossly "off the mark." Just 3 days before my hearing in September the Farm Credit Administration admitted that they needed help. This was only 30 days after Governor Wilkinson had denied that there was any need for Government assistance.

It is obvious to anyone who has studied the Farm Credit System, that the professional managers of the System want it to be one big nationwide diversified bank. I encourage my colleagues

to read the "project 1995" study and speeches given by officials of the System. They would like to first consolidate all the banks and associations in a district into one district-wide bank or association. Then they would like to consolidate all the districts into one nationwide bank.

Finally, they would like Congress to write them a "blank check" and allow them to do whatever they want. Many Senators may think that this is just a dream. Let me tell you that this is happening today, right under our noses. The System is using "Gestapo tactics" to blackmail its own membership into voting for mergers and consolidations. These mergers and consolidations take all meaningful control away from the stockholders on the local level.

We have heard that plans are being made to eliminate all members of the boards of directors, whose loans are not of the highest quality. We hear that once these consolidations take place presidents of local banks and associations become answerable to the district presidents and not local board members or stockholders. We also know that the Farm Credit System is threatening to liquidate all associations and banks which do not vote for the consolidations and mergers the system wants.

In my district Federal Land Bank Board members were told that they needed to vote for consolidations or the internal Farm Credit System assistance package would be void. We later found out that this was not only misleading but just plain wrong because the production credit association mergers were the only consolidations required under the assistance contract. Of course this discovery was too late than to allow for these board members to revote. In addition, during my hearing, it became clear that the System could not afford to liquidate even one assocation because it would cause a "chain reaction" that would first destroy the district and then destroy the whole Farm Credit System.

Many people might say, "Why don't these farmers just get out of the System if they don't like it?" Many farmers cannot leave because their production credit association's stock has been frozen. When stock is frozen it turns from an asset to a liability. Other commercial lenders look at this as a potential loss instead of a liquid asset. Let me make this perfectly clear, these farmers cannot redeem their stock, which is 10 percent to 15 percent of their loan, even if they walked in today and paid off their loan completely. These farmers are forced to wait until the System decides their fate. The System has told these farmers that if they do not vote for the mergers the System wants they will lose their stock, which means instant bankruptcy for many of these farmers. This isn't a choice, this is a threat.

I have been contacted by commercial bank presidents and past and present officials in the system who believe the system is destroying the whole economic fabric of rural America. These same officials and bank presidents are afraid to speak out in public because the system will retaliate against them. Senators, this is happening today, in America, and we must put a stop to it.

Mr. President, I want to make it very clear that this is a problem not just in my district but across the Nation. I admit that things are worse in my district and Senators should take notice. What is happening in my district today will be happening in your district tomorrow. The pattern is clear, the System takes on a district at a time, one board of directors at a time, one bank at a time and one group of stockholders at a time.

The System is patient in deciding who will be the next victim, but once they decide, they attack. Since the beginning of this year the Farm Credit System has managed to wrestle away all real power from the stockholders in my district. The only action that is left for them to do was to officially vote away their authority last month. Many banks and associations stood their ground and voted against these mergers. Now it is clear that they will be pressured to vote again. Not all banks and associations will be asked to vote again, only those who did not approve the System's plan the first time, around. Board members and farmers tell me that they do not want to give away all their local control and that they do not believe these consolidations will be significantly more efficient. Why did farmers vote for these consolidations? Because the Farm Credit System told these farmers that if they did not vote for consolidations, they would be liquidated. To scare these farmers even more, they have started foreclosing on many of their neighbors and friends.

If a Senator is interested in finding out if his district may be next I suggest he look at the financial condition of his district's banks and associations. If your district is in any kind of trouble, you better look out. The St. Paul, Wichita, Louisville, and Columbia districts are prime targets for the System's plans. As a matter of fact, I believe the process has already started in many of these districts.

I am not here to say "The sky is falling." I am here to say that it has already fallen. We, in Congress, have a responsibility to stop it from falling any further and then putting it back up where it belongs. The Farm Credit System's professional managers need to know that Congress is not going to lay down and let them walk over us. They need to know that we believe in a locally controlled system. They need to know that if we are going to get rid of any layer of the System's bureaucracy, it is going to be the top layer not the bottom layer.

I believe that any bail out plan for the system needs to include more local control, more arms length regulatory authority, and a re-establishment of stockholders rights. Any financial assistance has to be geared to help the farmer and not just the system. All these policies will take time to legislate and implement. While we discuss solutions in congress, we need to know that the system is no longer foreclosing on its farmers and tightening its grip around the throat of the system.

These are times of extreme difficulty. We have great plans to deal with most other disasters that occur both nationally or internationally. Yet no one in this body has a real reference point to draw from in order to deal with the type of crisis we are experiencing today. Few, if any, of us were around during the last depression. Our memories are at best clouded. We need to look beyond standard practices. We need to be creative and challenge ourselves to meet this completely new situation. But we can't be creative and make clear headed decisions when our farmers are being bled to death by a system that was created by Congress.

Mr. President, the bill passed yesterday is a beginning but it certainly does not go far enough. It may satisfy the concerns of some bond holders for the short-term. Unfortunately, this bill has many holes, it is only a matter of time before we must revisit this issue and come to grips with the real solutions to the economic and human tragedy now occurring in rural America. This legislation leaves too much control in the hands of farm credit system's and farm credit administration's officials. In the coming months we need to watch FBA and FCS actions closely, particularly the regulations issued by the FCA. Congress must address the issues of stockholder's rights, local control, congressional oversight, and direct assistance to farmers before we lay this whole Farm Credit System assistance package to rest for good.

In the near future we will be considering many important issues dealing with trade, monetary and fiscal policy, and ways of assisting agriculture. You can be certain that I will be making every effort to push for policies that will lead the way to a recovery in agriculture and not perpetuate the failed policies of the past and I encourage my colleagues to join me in this effort.

CONTINUING TRADE CRISIS WITH JAPAN

Mr. DOLE. Mr. President, last August, this Senator led a delegation of seven Members to the Far East to discuss our growing trade imbalance

with countries in that region. This delegation was particularly concerned about the enormous United States trade deficit with Japan, which by itself makes up about one third of our total global trade imbalance.

The trade imbalance with Japan has been escalating at an alarming rate, increasing last year by more than 70 percent. At its current pace it will likely increase by another 35 percent this year. In fact, in this year alone, our trade deficit with Japan will likely reach close to $50 billion, an amount larger than our total international trade deficit just 3 years ago.

THE JAPANESE RESPONSE

In response to our concerns, Japanese officials pointed to Prime Minister Nakasone's then recently announced Action Program. This action Program was a small step forward, but the 3-year implementation period ignored the urgency of the problem.

I am disappointed to say that little progress has been made since that August announcement.

While in Japan, this Senator had the opportunity to address the Japan National Press Club and comment on our trade concerns. In that speech, I indicated that any new initiative to address the escalating trade deficit would need to be judged based on its results rather than on the rhetoric that heralded its announcement.

Unfortunately the actions that have been taken are largely symbolic in the short term rather than actions that have had a measurable effect on the trade imbalance. As noted, the Japanese Government's Action Program, with its delayed implementation date, was not calculated to achieve quick results. Our own administration has set up a strike force and instituted some section 301 and antidumping cases, but these steps are merely striking at the fringes of the problem.

The fact is the trade deficit has continued to widen and most of the unfair barriers to fair trade with Japan remain in place. In September we set a new record single month trade deficit with Japan of $5.1 billion. Moreover, most experts predict that the trade deficits with Japan will continue to widen despite all steps taken to date. To put this deficit in perspective one needs to bear in mind that 1977 was the first time the United States had an annual trade deficit with the entire world that exceeded $10 billion.

This problem would be greatly compounded if the Japanese Government decides to end voluntary restraints on automobile imports as was recently suggested in the press. No amount of rhetoric can change the fact that such a decision would widen the United States-Japan trade deficit.

Therefore, this Senator believes it is time to take stronger action to address the problem. We indicated to the officials we met with in Japan that there was a brief window of opportunity to take meaningful action to open Japanese markets and to address the concerns we raised. That window is about to slam shut and no real measurable improvement has been achieved.

Therefore, I believe it is time that the Senate take up and pass several pieces of legislation that the Senate Finance Committee has reported out and which have long awaited action.

PENDING TRADE LEGISLATION

One such bill that I believe we should act on is S. 1404, the Japanese unfair trade practice bill. Under this bill, the President is required to take all action necessary to eliminate Japanese trade barriers to United States goods or to offset the effects of trade barriers between the United States and Japan.

A second bill that we should act on immediately is S. 942, the telecommunications bill. This bill is designed to require the negotiation of agreements to obtain opportunities in foreign markets that are substantially equivalent to opportunities available in the U.S. markets for telecommunications products and services.

Finally, we need to move forward on S. 1860, the bipartisan trade initiative that was introduced on November 20, 1985. This bill addresses a broad range of trade issues and seeks to strengthen our ability to eliminate barriers to U.S. exports by enhancing retaliatory authority and setting time limits for action on the part of the U.S. Government.

CONCLUSION

In sum, the situation grows worse leaving us little option but to take strong action. As a Senator from an agricultural State, I appreciate the risks that strong action involves. I would sooner see a system of trade based on equal access to all markets. We welcome fair trade. But that is dependent on open, accessible markets. We look to Japan to help us in achieving truly open markets in the immediate future.

TEMPORARY FAMILY HOUSING FOR DEPENDENTS OF DECEASED MEMBERS OF THE ARMED FORCES

Mr. THURMOND. Mr. President, I ask unanimous consent to bring up S. 1956, a bill which is at the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1956) to amend title 5, United States Code, to authorize temporary family housing for certain dependents of deceased members of the Armed Forces; and to amend title 37, United States Code, to authorize temporary payment of an allowance for quarters for certain dependents of deceased members of the uniformed services.

The Senate proceeded to the immediate consideration of the bill.

Mr. THURMOND. Mr. President, I want to say that joining in this bill are the distinguished majority leader, Mr. DOLE; Mr. WILSON, who is in charge of the Subcommittee on Manpower and Personnel of the Armed Services Committee; the distinguished Senator from Virginia, Mr. WARNER; and Senator STENNIS, Senator RUDMAN, Senator KENNEDY, Senator MCCONNELL, Senator HECHT, Senator HELMS, Senator TRIBLE, Senator BENTSEN, Senator LEAHY, Senator HUMPHREY, Senator EXON, Senator SASSER, Senator HART, Senator LEVIN, Senator BINGAMAN, Senator GLENN, Senator NUNN, Senator DIXON, Senator GOLDWATER, Senator METZENBAUM, and Senator BYRD.

Mr. President, this is an urgent bill in behalf of the wives of the Army personnel who lost their lives recently in the crash of the chartered aircraft in Gander, NF.

Dependents of military personnel living in the community at the time of the death of the sponsor are also faced with a financial hardship. In most instances, they must continue to pay rental or mortgage payments even though they no longer receive the deceased military member's income.

Mr. President, section 5911 of title 5, United States Code, requires that a reasonable value be charged for housing provided civilian employees in the United States. The Office of Management and Budget Circular A-45, which implements the law, permits the military services the option of allowing dependents of deceased service members to remain in Government quarters for a period normally not to exceed 60 days. They are required to pay either the fair market rental or an amount equivalent to the service member's housing allowances. This policy imposes a financial hardship on the dependents who are required to vacate quarters and find new housing during this time.

Dependents of deceased members no longer receive housing allowances after the death of the military member. However, current law requires the dependents of deceased members to pay a rental charge to occupy Government quarters. In addition, unneeded stress is placed on dependents residing in the community who have the burden of paying for housing without the member's income. The law must be amended to allow dependents of deceased members to remain in quarters without charge.

Mr. President, the dependents remaining in Government quarters would not be entitled to a housing allowance. The law must also be amended to provide a housing allowance to dependents of deceased military members who are not residing in Govern-

ment housing for a period not to exceed 60 days.

This proposal will provide dependents an opportunity to locate other housing and tend to matters of an immediate nature without imposing the additional financial burden and stress of a housing rental or mortgage payment.

Any additional cost resulting from the enactment of this proposal will be negligible and will be absorbed in applicable appropriations.

Mr. President, I believe our country should take this additional burden off the families of our Army personnel who lost their lives in the service of our country. I strongly recommend that my distinguished colleagues promptly approve this measure before the holiday recess.

Mr. President, some questions have arisen about the number of days. The distinguished Senator from Ohio preferred a longer time and I would prefer a longer time. I am sure that most of those who joined on the bill would so prefer.

However, if we went much longer we would have to go to the Armed Services Committee, hold hearings, and delay it. This is more or less of a rush matter, an emergency matter, to help those people right now. They need this help right now.

I have conferred with Members and I have conferred with the distinguished Senator from Ohio. We have reached an agreement to make it 90 days. We have increased it to that amount.

AMENDMENT NO. 1421

(Purpose: To increase the period for housing and housing allowance extension from 60 to 90 days)

Mr. THURMOND. Mr. President, I now send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from South Carolina [Mr. THURMOND], for himself and Mr. METZENBAUM, proposes an amendment numbered 1421.

Strike out the phrase "60 days" both places it appears in the bill and insert in lieu thereof "90 days".

Mr. THURMOND. Mr. President, we hope this amendment will be agreed to. I realize the Army has recommended 60 days and the Defense Department favors that time. However, we think that 90 days should be granted. I am very pleased to offer this amendment, along with the distinguished Senator from Ohio who joins in this amendment with me, to favor the 90 days instead of the 60 days.

Mr. METZENBAUM. Mr. President, I not only support the amendment but support the original thrust of this legislation. I would like to address myself very briefly to the issue.

The issue has to do with the period of time that the Government provides housing rental free to the widow of a soldier killed in the line of duty.

Under the present law, it is my understanding that they can remain in the housing for 60 days but must pay rent. Under this proposal, originally it was to be 60 days rent free.

At that point when I heard about the proposal, I put myself in the shoes, hopefully never to be in those shoes, of one who had lost a loved one, perhaps a wife or mother—probably a wife—maybe with one or two little children and suddenly has the shock of knowing that her husband has given his life to his country, whether in an accident of the kind that just occurred recently, which was so tragic—and it is hard to think of any instance in which giving a life by a soldier is not tragic—and then having somebody come to the door and say, "The military is being very cooperative on this and we want you to know what we are doing for you. We are going to let you stay in these premises for 60 days."

Put yourself in the shoes of that woman. The whole world has crashed down upon her. She has lost her husband. The children have lost their father, and then they are told that their Government, for which the life was given, is going to permit them to stay on the premises for 60 days rent free.

When I thought about that, I said, to me that is just almost insulting, demeaning. It is too little. I do believe that the very minimum that ought to be made available is a period of 1 year rent free, at least, so the wife might be given an opportunity to adjust, to be able to accept the shock of having lost her husband.

I got to thinking about that. I was going to come to the floor and talk about the issue, about making it for 1 year. After talking with my distinguished colleague from South Carolina, I was urged to make it a lesser period. I wanted to go to 6 months but we finally agreed to make it 90 days.

I agreed to the 90-day figure not because I believe it is the right figure, but because it is my understanding that the subcommittee that has jurisdiction with respect to this issue, headed up by my distinguished colleague from California, Senator WILSON, will be addressing itself to this entire issue.

I am not unaware of the fact that Senator WILSON offered a proposal this morning, in which I join, to increase the insurance from $35,000 to $50,000. I commend him for that and I was happy to be a cosponsor.

But housing, the home over the head, is something different, something more emotional in many ways than the dollars, because the dollars are hard for the woman to appreciate, whereas knowing that she must move is a very, very traumatic experience.

I am happy to hear that the Armed Services Committee will be looking at this entire issue. I would hope that they would see fit to go substantially further than the 90 days. But I think that going from no days, which is the present law, no days free rent, but merely being permitted to remain on the premises for 60 days, to the point where the Senator from South Carolina and so many other cosponsors are now advocating, 90 days—and I am a cosponsor of that—90 days rent free at least is a major step in the right direction.

It is not the perfect solution but I think it is better than no solution at all. I do not want to impede the passage of this legislation and, therefore, I am happy to join with my colleague from South Carolina both in the amendment as well as the original legislation. I hope we will see further action on this subject.

Certainly, there is no American, probably no person in this world, that does not empathize with the loss of those whose beloved ones went down with that plane in Gander. I cannot think of anything more horrible for a family to learn about, particularly in this holiday season. There is nothing we can do to undo that which has occurred, except maybe to see that it does not happen again. I think that is a subject that bears the Government's scrutiny promptly, as to why we are continuing to use planes of this kind in private charter, particularly of this company. But that is a subject for another day. At least at this point I think the Senate is indicating that it does have some feeling, some concern, and is trying to evidence that concern before we adjourn.

Mr. THURMOND. Mr. President, I thank the distinguished Senator from Ohio. If there is no further comment on the amendment, we can adopt that and then there will be comments on the bill, I am sure.

Mr. WARNER. Does the distinguished manager wish to move the amendment now?

Mr. THURMOND. To move the amendment to the bill.

Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1421) was agreed to.

Mr. THURMOND. I move to reconsider the vote by which the amendment was agreed to.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I have joined as a cosponsor and I wish to commend the others, particularly the Senator from South Carolina and the majority leader, for taking this step forward, for taking the leadership. I do want to ask a question or two.

We are driven into this expeditious legislative course by this frightful tragedy that has come at this happiest of all times of the year. I certainly feel that the Congress should step in to help.

The bill is drawn, however, to affect the entire military, as I understand it, and stands as a precedent for future tragedies.

Mr. THURMOND. That is correct. That is the legislation.

Mr. WARNER. Did the drafters of the bill consider perhaps just limiting this bill to this specific tragedy and the families involved and then at a later date, after adequate opportunity for hearings, go into a broader policy that would affect the entire military?

Mr. THURMOND. The Army recommended that we make it permanent law for the dependents to stay in the housing rent-free for 60 days. We felt that was a short time and made it 90 days so that the matter could be considered further by the Armed Services Committee.

Mr. WARNER. And it applies to everyone in uniform?

Mr. THURMOND. That is correct.

Mr. WARNER. A further question, Mr. President.

The phrase is used in here that the allowance is for the dependents of a member of the Armed Forces "who dies in the line of duty."

Mr. THURMOND. Yes.

Mr. WARNER. Would that apply to an individual who is in the hospital and regrettably has a heart attack tomorrow?

Mr. THURMOND. Yes, it would, Mr. President.

Mr. WARNER. So all the persons who are in the Armed Forces at this moment who might be suffering from illness and would pass on would be subject to the benefits of this measure?

Mr. THURMOND. That is correct. And if they do not occupy Government housing, they would get the allowances.

Mr. WARNER. Mr. President, I ask these questions only in the sense of trying to clarify and make some legislative history. As the distinguished Senator knows, at one time, I had some responsibility for managing this type of thing in the Defense Department.

Mr. THURMOND. And the Senator did a good job, Mr. President.

Mr. WARNER. Was consideration given to the fact that each case is different and, say, under section H, where there was a widow who was in housing—she gets to remain 60 days, but she might wish to exercise the option of going immediately to stay with her friends or relatives for the normal compassion the family gives. She would not require the housing but would, in fact, require the remuneration of the family allowance. In other words, if we are trying to help the person, should we not give them the option either to take the housing or the allowance depending upon their individual difficulties?

Mr. THURMOND. I think the Armed Services Committee would want to look into that facet of it, but the idea was to allow them to remain in the housing during this transition period or, if they are not in Government housing, to draw the allowance.

Mr. WARNER. As I look at the bill, if they are in the housing, that is the sole option, to remain in that set of quarters. This would not give the widow the option to draw the allowance if in fact she wished to live elsewhere?

Mr. THURMOND. That is correct. If she did not need the housing and wished to move to another place, she would not draw the allowance. But she is entitled to remain in that housing.

Mr. WARNER. That is clear from the way the bill is drawn, but should we not give that person the option either to stay in the housing or draw the allowance?

Mr. THURMOND. I think the distinguished Senator has made a good point, but this is more of an emergency matter. The Armed Services Committee will be taking it up and that specific point could be considered at that time when they have a hearing on the bill.

Mr. WARNER. That would seem to me to be a reason to limit this legislation to this particular group of families who are facing this tragedy at this time and not try to make broad policy for the entire Armed Forces.

Mr. WILSON. Will the Senator yield for a question?

Mr. WARNER. Yes, Mr. President.

Mr. WILSON. Actually, it is to offer a suggestion. The Manpower and Personnel Subcommittee will be holding a hearing or hearings to determine whether or not this or another period is the appropriate time, in addition to which, we will consider the very subject that the Senator from Virginia has raised, quite properly, this morning.

I suggest that it may not be necessary to limit the particular relief that the Senator from South Carolina is proposing. It can be a permanent change, because as I understand the Senator from Virginia, he is suggesting that there be an alternative or option. I think we can make this change now and he likely will wish to offer that option as well, but that can be added.

Mr. WARNER. I am wondering—Mr. President, I would be happy to provide an amendment which would enable a widow to exercise either the option under section H—or however this is drawn—the two particular provisions.

Mr. THURMOND. The Armed Services Committee plans to hold hearings and we are going further now than the Army recommended, Mr. President, to take care of these people in this emergency now, although it is permanent law. If we had another accident tomorrow, you see, we would only get this taken care of. I would suggest that we just pass this bill now as the Army recommended, except to extend it for 90 days. Then the distinguished Senator from California [Mr. WILSON] plans to hold hearings on this and related matters. That can be handled at that time. That could be handled by the 90-day period.

Mr. WARNER. I hope the distinguished Senator does not misconstrue my motivation in any way as trying to be dilatory but having had the experience, I know that once we establish a policy throughout the Department of Defense, regulations have to be implemented, a lot of steps have to be taken prior to the Armed Services Committee having hearings and then beginning to modify the legislation. People in the armed services tend to learn about a situation, get adjusted to it; then we turn around and change it, perhaps.

Mr. THURMOND. We did not want to have a disruption there of anybody who is in the housing. If they feel they no longer need the housing or want to move from there, they have a right to do so; but they can stay there 90 days free. We felt that was a reasonable way to handle it. To say we will go beyond that, beyond what the Army recommended—the Armed Services Committee is going to have hearings and go into the entire field. At that time, there may be other angles that will want to be considered.

The distinguished Senator from California is on the floor. As I understand, he plans to hold hearings on this and any other related matter he feels necessary.

Mr. WILSON. That is correct, Mr. President.

Mr. WARNER. That is correct and I do feel we should hold hearings, but once again, it is a matter of a few minutes to draw up a quick amendment to enable a widow to have the option of staying in a relative's or friend's home and drawing the allowance and then going back to this place and still have the benefit of the housing.

Mr. THURMOND. Mr. President, I think we have gone as far as we need to go right now. The able Senator from California is going to hold these

hearings right away and we think that will take care of it. In my view, that is the wise thing now. If we try to amend this, other amendments may come in and we will get bogged down and we may get nothing. I feel we should stay as we are and do it as quickly as we can.

I do appreciate the suggestion the Senator made. There is merit in it and the distinguished Senator from California will consider that when he holds these hearings.

Mr. WARNER. Mr. President, I have made my case. I am fully supportive of what we are trying to do in the Senate. I simply am trying to perfect it to take care of individual situation. If the managers of the bill feel this cannot be achieved, I shall withdraw any further suggestion at this time. I support the bill.

Mr. WILSON. Mr. President, I rise to commend and join my distinguished colleague, the distinguished Senator from South Carolina. I commend his initiative in trying to relieve the bereavement of these families of the victims of the tragic crash in Gander. The situation in which these widows and the surviving children of the crash victims now find themselves is as has been described. I cannot believe that the effect was intended, but the law presently on the books would displace them from their housing on a military base or, if they are receiving the basic allowance for quarters and living off base, that allowance would cease upon the death of the uniformed member.

Mr. President, I can conceive of no more heartless result. It is not acceptable. The law must be changed. I think most of us were unaware that such a provision existed to actually penalize rather than assist the dependents of those servicemen whom we so often take the floor to praise.

This change in the law is essential if we are to do the very least which a grateful Nation owes to the memory of those departed service members and which we owe to their surviving families.

I not only commend and join as cosponsor Senator THURMOND in this legislation but, as I earlier announced in an effort to advertise the fact of my intention to introduce a companion bill and I now repeat, a supplement to this measure by Senator THURMOND which will literally keep a roof over the heads of the widows and surviving children of these crash victims. What is really necessary is to provide them with the kind of cash in a lump-sum payment that will afford them adequate flexibility so that they can make plans, released from the pressures that they are faced with upon the death of their loved service member.

On December 8, the law was changed in a beneficial way. Those who are covered, as are most service members unless they have consciously elected not to be covered by the Servicemen's Group Life Insurance Program, are insured on their lives to the amount of $35,000 under exiting law. On December 8 a change was made to increase that face value from $35,000 to $50,000. The law unfortunately was not to become effective until January 1, 1986. As such, the beneficial increase in the face value of the policy would not apply to those victims of the Gander crash.

Mr. President, the bill which I intend to offer and for which I seek cosponsors will simply treat that change in the law as having been in effect since October 23, 1983. The purpose simply and obviously is to do equity not only to the families of the Gander crash victims but to the families of all those killed in the line of duty from that date, October 23, 1983, to the effective date of the change in the law on January 1. October 23, 1983, is chosen, Mr. President, because it is the date of the bombing of the marine barracks in Beirut. So in order to both keep literally a roof over the heads of the families, these dependent families of those whom we have lost in this tragic crash, as well as the victims of that tragic bombing in Beirut and for all who have died in the line of duty from that day to the present time, it is necessary that we act on both these measures as early as possible.

It is going to be a very sad Christmas for those families. It has been a sad Christmas for the families of those young marines who were lost in the Beirut bombing. The least that a grateful Nation can do, Mr. President, it seems to me, is to act promptly upon both these measures to give a modicum of financial relief to those families who find themselves faced now not only with the enormous burden of their grief but with the immediate financial loss that they have in no way been prepared to expect or to deal with.

So, Mr. President, I urge the prompt action of the Senate upon Senator THURMOND's legislation and later in the day, when we have cleared the other measure, I will seek similar action upon it. I thank the Chair.

Mr. SIMPSON. Mr. President, I seem to always become involved with things which would portray a man as pinched, driven, and less than compassionate as I deal with immigration, veterans affairs, and nuclear regulation. As I have said so many times, they are issues that have a remarkable blend in them of emotion, fear, guilt, and racism. I say that because that is how this place works. You either pass or kill a bill with a deft blend of those particular emotions or feelings. Now, there is no possible question about the senseless tragedy of those veterans, those active-duty service persons in the crash of the plane in Gander, Newfoundland.

It becomes late in the session, as we are batting the ball back and forth across the Chambers, trying to bring a tiny bit of order to the final hours, which is impossible, totally impossible. I share with my colleagues that Senator MURKOWSKI is the chairman of the Veterans' Affairs Committee, and he is not in the city. He is not in Washington, DC. And so as the ranking majority member of the Senate Veterans' Affairs Committee, let me just very briefly share with you just where we are.

On December 3 of this year legislation was enacted increasing the GI life insurance from $35,000 to $50,000. This legislation has an effective date of January 1, 1986. This life insurance program, which is SGLI, the veterans' life insurance issue, is a self-sustaining program with premiums that are paid by active-duty service persons. In view of this terrible event in Gander on December 12, in which 260 active-duty service members were killed in a deep tragedy, we now have an effective date on this legislation which would encompass them and then here we see a retroactive date now presented for approximately 2 years, to October 23, 1983. That change would cover service in Grenada, Central America, Beirut as well, all inservice deaths. I respectfully suggest—and there is no one I admire more than this fine friend and Senator from California, but I respectfully suggest that I think it is something within the province of the Veterans' Affairs Committee. I do not know where else it could possibly be. It should not be in the Foreign Relations Committee or the Armed Services Committee. The Veterans' Affairs Committee has jurisdiction over this issue. This proposal is not within the province of any other committee. This is where GI life insurance is discussed, veterans' health benefits, veterans' comp, and pension plans. I earnestly suggest that making the bill retroactive to this date of enactment would be a dangerous precedent. Certainly it is a tragic situation. Who does not agree with that? I think this a marvelous attempt to see that there is an accommodation and a feeling expressed with regard to those survivors of that tragedy. But these are the kinds of things, as we legislate in the arena of emotion, fear, guilt, or racism, where we usually end up wishing we had not done it—because we often go for more than we intended.

I say to you that we could also go on to amendments which would take the GI life insurance policy back to other wars where it was $10,000. I am a member of the VFW and American Legion and American Veterans. It would be easy to also go back to those years when the benefit was $10,000.

Cost implications I know I should not even bring up. Someone will say, "Well, why should that even enter the discussion?" But approximately $60 million in benefits could be required to be paid out of the SGLI insurance fund, and it would be paid by current active-duty beneficiaries. That is who will pay it. It is an insurance policy. It is not a gratuity. Insurance policies are based on actuarial tables—not very functional in the veterans or active duty community—but they are paid on what you pay in and the amount of coverage. I hope the Senator can be urged to let this proceed in its original form, and I can assure the Senator on behalf of the chairman of the Veterans' Affairs Committee, Senator MURKOWSKI, that the Senator can introduce the legislation and we will see that it is referred properly to the Veterans' Affairs Committee for consideration, or at least, if that is not possible, request him to offer some type of language or compromise that would make the change effective upon the date of enactment, which would take care of those who were tragically killed in Gander. I hope that might be a prospect for consideration.

Mr. WILSON addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. THURMOND. Mr. President, will the Senator yield for a moment?

Mr. WILSON. I yield.

Mr. THURMOND. I wonder if we could pass this bill and then carry on the discussion of the other matter.

Mr. WILSON. Mr. President, I am happy to allow the vote to occur on the measure introduced by the Senator from South Carolina, and then I will respond to the points raised by my distinguished friend and colleague from Wyoming.

TIMELY ASSISTANCE FOR DEPENDENTS OF SERVICEMEN WHO DIE IN THE LINE OF DUTY

Mr. DOLE. Mr. President, I am pleased to join the distinguished Senator from South Carolina, Senator THURMOND and many of my colleagues in sponsoring S. 1956, which authorizes temporary family housing for dependents of members of the Armed Forces who died in the line of duty.

While the genesis of this legislation may have been the recent and tragic crash of a plane killing 248 brave soldiers of the 101st who were returning home for the holidays, it is legislation long overdue.

When a member of the military dies in the line of duty, difficult times always lay ahead for his or her family. Friends and loved ones may comfort them—but the cruel reality is that most of these soldiers are young and do not always have the financial means to support a wife or family in the event of a tragic accident. This bill, in a small way, helps alleviate the burden of worrying about housing for the dependents of a serviceman.

We often forget that simply being an American serviceman is a dangerous undertaking—whether it be in Korea, Lebanon, Central America, or anywhere else our global commitments take us. We often forget the routine stresses and strains to which these courageous men are subjected on a daily basis.

This bill is straightforward. The Secretary of Defense or Transportation, in the case of the Coast Guard, may provide an allowance for quarters to the dependents of servicemen who die in the line of duty for 60 days.

There is no way, Mr. President, that we can adequately express our profound sorrow over the death of the men who died in Newfoundland or servicemen that may die in the future while wearing the uniform. But one thing we can do, is assure that their dependents will have a roof over their heads.

I know I speak for my colleagues, in expressing our heartfelt grief at the death of the brave men of the 101st, and extend our condolences to their families. One of the best things we can do this holiday season, on behalf of their families, is pass this bill. Thank you Mr. President.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 1956), as amended, was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 1956

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5911 of title 5, United States Code, is amended by adding at end thereof the following new subsection:

"(h) The Secretary of Defense, or the Secretary of Transportation in the case of the Coast Guard when not operating as a service in the Navy, may allow the dependents of a member of the Armed Forces who dies in line of duty and whose dependents are occuping family housing provided by the Department of Defense, or by the Department of Transportation in the case of the Coast Guard, other than on a rental basis on the date of the member's death to continue to occupy such housing without charge for a period of not to exceed 90 days.".

SEC. 2. Section 403 of title 37, United States Code, is amended by adding at the end thereof the following new subsection:

"(l) The Secretary concerned may pay an allowance for quarters to the dependents of a member of the uniformed services who dies in line of duty and whose dependents are not occupying a housing facility under the jurisdiction of a uniformed service on the date of the member's death or are occupying such housing on a rental basis on such date. The amount of the allowance for quarters shall be the same amount that would be payable to the deceased member under sections 403, 403a, and 405 of this title if the member had not died. The payment of an allowance for quarters under this subsection shall terminate not later than 90 days after the date of the member's death.".

SEC. 3. The amendments made by this Act shall take effect December 12, 1985, and shall apply only with respect to dependents of members of the uniformed services who died on or after that date.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. WILSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

APPOINTMENTS BY THE CHAIR

The PRESIDING OFFICER. In accordance with Public Law 83-420, the Chair appoints the following Senator to the Board of Directors of Gallaudet College: NANCY LANDON KASSEBAUM of Kansas.

In accordance with 22 U.S.C. 1928a-1928d, as amended, the Chair appoints the following Senator as member and chairman of the Senate delegation to the North Atlantic Assembly during the 99th Congress: WILLIAM V. ROTH, JR., of Delaware.

In accordance with Public Law 94-118, the Chair appoints the following Senator to the Japan-United States Friendship Commission: WILLIAM V. ROTH, JR., of Delaware.

In accordance with Public Law 99-83, the Chair appoints the following Senator to the International Advisory Commission for the Caribbean Region: THAD COCHRAN, of Mississippi.

Under provisions of Public Law 99-93, as amended by Public Law 99-151, the Chair appoints the following Senators as members of the U.S. Senate Caucus on International Narcotics Control: FRANK H. MURKOWSKI, of Alaska; ARLEN SPECTER, of Pennsylvania; JAMES ABDNOR, of South Dakota.

In accordance with Executive Order 12131 signed by the President on May 4, 1979, as extended, the Chair appoints the following Senator to the Presidents Export Council: ROBERT KASTEN, of Wisconsin, vice Senator WILLIAM ROTH.

MEMORIAL SERVICES FOR CASUALTIES OF THE 101ST AIRBORNE DIVISION

Mr. THURMOND. Mr. President, on December 16, 1985, I attended a ceremony at Dover Air Force Base, DE, honoring those members of the 101st Airborne Division who were killed in Gander, NF, last week. The ceremony was a poignant reminder of the high costs that must often be paid in order to maintain peace in a troubled world.

These young men and women were a part of Task Force 3/502d, and they were returning from 6 months duty in the Sinai as a part of the Multinational Force and observers. Theirs was a

mission of peace and hope for long-term stability in the Middle East—a mission which sadly ended in tragedy.

As we all know, these soldiers—eight of whom were from South Carolina—were returning home to families and loved ones for the Christmas holidays. Their deaths are made all the more tragic and senseless for that reason, especially when we have all seen the pain and sorrow their families have suffered at a time when they had looked forward to joy and celebration. Their grief and tremendous loss shook all of us, and our Nation collectively mourns for those families.

Words cannot adequately console those families, but I know my colleagues join in extending our prayers that God will aid and comfort each of them in this most trying and difficult of times.

The simple, dignified tribute paid by the U.S. Army to its fallen comrades touched all who were present. The Secretary of the Army, Hon. John O. Marsh; and the Chief of Staff of the Army, Gen. John A. Wickham; paid homage to the 248 soldiers who were killed in the line of duty.

These fine young Americans answered the call of duty to help preserve peace in a region scarred by war and suffering. For this noble cause, they gave their lives. We will never know what accomplishments they might have achieved had they lived, but we will never forget the cause for which they served so proudly.

It is always difficult for a nation to accept so tragic a loss of life, and it is up to us to ensure that their sacrifice will not have been in vain.

When the 101st was formed more than four decades ago at the height of World War II, the division commander stated that the Division had no history, but it had a rendezvous with destiny. The Division has established quite a history in the fight for peace and freedom, and these young Americans now belong to that proud history.

I was deeply moved by the ceremony at Dover Air Force Base and by the remarks made by Secretary Marsh and General Wickham. In order to share those remarks with my colleagues, I ask unanimous consent at this time that their speeches be included in the RECORD at the conclusion of my statement.

There being no objection, the speeches were ordered to be printed in the RECORD, as follows:

REMARKS BY HON. JOHN O. MARSH, JR., SECRETARY OF THE ARMY, 101ST AIRBORNE DIVISION MEMORIAL SERVICE, DOVER DE

In the Book of Isaiah are the words:

"Whom shall I send and who will go for us? Then said I, Here am I: send me."

This was the spirit of these men and women of the American Army we mourn today.

We are here to pay tribute to them—soldiers of the 101st Airborne Division who gave their lives in the service of their country. In a troubled world, they were the Peacekeepers.

They were returning from a mission in support of our Nation's commitment to world peace.

Their duty as soldiers took them far from home and family. It took them to a place of isolation and loneliness. Their tasks were difficult and demanding—and they did them superbly. We knew they would because they were great soldiers.

Our hearts, our love, our prayers go out to those who suffer the most by such a loss. We shall seek to comfort them, aware we can never fully thank them, or assuage their grief. The U.S. Army—this great Divison shall forever honor and remember them.

They were engaged in a noble endeavor—to bring peace to a troubled land.

Today in the Sinai, the checkpoints and observation posts, where they kept their lonely vigil, are manned by another battalion of the American Army, a continuation of the mission they had fulfilled.

The Christmas Season is one of deep spiritual meaning.

It is a time we reflect on values.

It is a time of hope when we pause to think of peace and goodwill.

It is a time of giving, and thanksgiving, as we count the blessings of our abundance.

It is a time of compassion when we remind ourselves we are our brothers' keeper.

This year as we observe the festival of lights, and tell again the Christmas Story, let us light a candle in our hearts for those soldiers who were coming home from the land of our Spiritual heritage. A place where they in their own way, and in their own time, sought to give meaning to the message of "Peace on Earth, Goodwill Toward Men."

Let us remember them for what they were—American soldiers, who were the peacekeepers.

REMARKS BY GEN. JOHN A. WICKHAM, JR., CHIEF OF STAFF, ARMY, 101ST AIRBORNE DIVISION MEMORIAL SERVICE, DOVER, DE

Today the Nation and the total Army mourn our fallen soldiers from the 101st Airborne Division and Fort Campbell, Kentucky. All of us in the Army are deeply saddened that their homeward journey which began with great anticipation of a holiday reunion with friends and loved ones, ended with tragedy. Our prayers reach out to all those who have been touched by this sorrow.

The father of the 101st Airborne Division, Major General William Lee, started the proud tradition of the Division with these words:

"The 101st * * * has no history, but it has a rendezvous with destiny * * *. We shall be called upon to carry out operations of far-reaching military importance * * *."

These superb young soldiers kept their "rendezvous with destiny" as they fulfilled an important peacekeeping mission in lonely outposts of the Sinai. They served with honor and distinction on duty with the Multinational Force and Observers. As soldiers of the U.S. Army and Fort Campbell they were proud of their heritage and proud of their service. Just as other soldiers before have been and are proud today in protecting freedom for us and our friends.

Theirs was the ultimate sacrifice made in line of duty. Their service adds luster to the proud history of the U.S. Army and the 101st. Soldiers who follow behind them will know of their dedication, patriotism, and sacrifice, the same as the "Screaming Eagles" in World War II and in Vietnam.

The American flag which covers each coffin is the emblem of our unity, our power, our purpose as a nation. Our flag has no other character than that which Americans endow it from generation to generation, just as these superb soldiers have given in our time. Though silent and motionless on each coffin the flag speaks to us of the men and women who have served and of the values, deeds, and memories we shall forever cherish.

In Arlington Cemetery there is a monument to fallen soldiers which says:

"Not for fame or reward * * * but in simple obedience to duty as they understand it, these soldiers suffered all, sacrificed all, dared all, and perished."

The magnificent soldiers we mourn today were obedient to their duty and selfless in their service to our nation. The United States Army salutes them.

ROMANIA: "THE DEFECTOR'S STORY"

Mr. HELMS. Mr. President, this week Secretary of State Shultz has been in Romania warning "President" Ceausescu that most-favored-nation trade status might be cut off if Romania persists in its human rights violations. A great many Americans are wondering where Secretary Shultz has been for the last 3 years, because the facts of Romania's repressive behavior have been well known to everyone except the State Department, which has long served as an apologist for the most authoritarian regime in Eastern Europe.

The question is whether the Secretary of State is really serious with his warning, or is it merely a rhetorical exercise to placate the Congress?

Mr. President, for some reason the State Department is under the naive impression that Romania has a supposed independent foreign policy, but United States Ambassador David Funderburk—who was the closest United States official to the Romanian atrocities—has pointed out there is definite proof that this alleged independence is dictated by Romania's masters in the Kremlin.

The real story on Romania is so well known to everyone, except those in Foggy Bottom, that even the fashionable Washingtonian magazine has reported extensively on the brutal regime. Mr. Ion Pacepa, former Deputy Director of Romania's Department of Foreign Intelligence and personal adviser to Ceausescu—also the highest ranking intelligence officer from a Soviet bloc country to defect to the West—describes the horror of the Ceausescu regime in detail in the current issue of the Washingtonian.

Mr. President, I ask unanimous consent that Mr. Pacepa's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE DEFECTOR'S STORY

(By Ion Mihai Pacepa)

When Ion Mihai Pacepa arrived at Andrews Air Force Base on July 28, 1978, aboard a US military aircraft that had taken off in West Germany, he was described by State Department spokesmen and newspaper reports as a "high-ranking aide" to Rumanian president Nicolae Ceausescu.

In fact, Pacepa, who quickly was granted political asylum by the United States, had been personal adviser to Ceausescu and deputy director of the Department of Foreign Intelligence—called DIE from its Rumanian name, Departamentul de Informatii Externe. He is the highest-ranking Soviet-bloc intelligence officer ever to defect to the West.

Within months of Pacepa's defection, the Rumanian ambassadors to the United States and the United Nations were replaced. In a November 19, 1978, report on Rumania, Michael Dobbs of the Washington Post wrote that the Pacepa affair "has contributed to the most thorough purge of ranking Communist-party and government officials since Ceausescu came to power thirteen years ago."

Educated as an engineer at the Polytechnical Institute in Bucharest, Pacepa entered the Rumanian intelligence service in 1951, when he was 23 years old. By the time of his defection he had been a frequent visitor to the United States.

Pacepa made advance arrangements for President Ceausescu's official trips to visit President Richard Nixon in 1973, President Gerald Ford in 1975, and President Jimmy Carter in 1978. He then accompanied the Rumanian president and his wife, Elena, on all three of the White House visits. During these state visits, Pacepa not only arranged discussions with American Presidents but even provided a food taster for the security-obsessed Ceausescu. Pacepa also arranged for special Rumanian intelligence teams to electronically sweep Ceausescu's quarters in the US for listening devices, including rooms at Blair House.

Pacepa, whose father worked in Rumania for General Motors before World War II, is now 57 years old and living under a new identity in the US. His daughter, Dana, an artist, remains in Rumania with her husband and family. Despite making repeated attempts, Pacepa has had no contact with her since he called her from West Germany in 1978, just before his defection. An "open letter" sent to her last year through a Paris newspaper—and repeated time and again over Radio Free Europe—ended:

"There is a picture on my desk. I took it on a sunny day, of you eating an apple. Bite the apple again, my daughter, for infinitely more sunny days. I love you incredibly much, my Dana."

Pacepa is at work on a book about life at the top in the Communist world and about what he calls "the first Communist dynasty"—Nicolae Ceausescu and his family. These excepts from the book manuscript represent the first time Pacepa has told his story for publication.

HEADS OF STATE

Blair House—the lady wasn't impressed

Rumanian president Nicolae Ceausescu and his wife, Elena, arrived in Washington on April 11, 1978, for a state visit with Jimmy Carter. Ceausescu has not returned to the United States since.

The presidential Boeing 707 landed at Andrews Air Force Base at 6 pm. A few minutes later Evan Dobelle, the US chief of protocol, came on board the plane and invited the Rumanian guests onto American soil. At the plane's steps, Nicolae Ceausescu and his wife, Elena, were greeted by Secretary of State Cyrus Vance and his wife, Grace, as well as by other American and Rumanian representatives. From the airport the Ceausescus rode in the same car with the Vances. Half an hour later, the motorcade arrived at the official residence for visitors, Blair House.

Blair House was already familiar to me from Ceausescu's last two visits to Washington, in 1973 and 1975. To alleviate Elena's traditional scene over not yet having her luggage when she arrived, I asked one of the people in charge of the house to show her around.

"Blair House was built by Dr. Joseph Lovell, America's first surgeon general, 154 years ago," the distinguished lady said with professional competence. "After his death in 1836, the family sold the house for $6,500 to Mr. Blair, who had just come to Washington as the new editor of the Globe. . . ."

The tour began with the first floor's Blair drawing room and its beautiful Queen Anne desk and magnificent Sully portrait of Montgomery Blair, then it continued to the Abraham Lincoln Room.

"It was in this room full of memorabilia that Mr. Lincoln signed the Emancipation Proclamation," the guide went on, pointing to a pen-and-ink drawing of President Lincoln.

"The portrait of General Robert E. Lee is a reminder of the fact that, in this same room, Lee refused the command of the Union Army, which was offered to him by Lincoln through Blair, who was related to Lee by marriage." The table in the first-floor dining room was set with heavy linen damask cloths for the private dinner on this evening.

On the second floor Elena was shown Ceausescu's large bedroom, adjoining a spacious library, both decorated with fresh flowers. That morning's Washington Post and New York Times, as well as the just arrived evening newspaper, the Washington Star, lay on a table in the library.

"This is your bedroom suite, madam," said the guide, pointing to a room with a lovely, canopied four-poster bed. "Although it could not be refurbished in time for the 1957 visit of Queen Elizabeth, it is still called the Queen's Suite to this day," finished the guide, wishing Elena an enjoyable stay.

"Close the door, Pacepa," Elena's acid voice suddenly rasped out. After I had executed the order, she exploded. "Just look at the harpy. She has never seen me before in her life, and she decides I should sleep here, not with the Comrade. Just so she can make up stories about the Comrade to tell other people who stay here."

Imitating the guide's voice, she went on, "'We have an Emancipation Proclamation.' It's a long way from that piece of paper until these idiots will really be emancipated." Then, suddenly changing the subject, she ordered me, "Tell our press correspondents to include in their articles that 'the Vances came to the airport on behalf of the President of the United States and Mrs. Rosalynn Carter. Idiots that they are, they may forget that."

Friendly persuasion

Jean-Bédel Bokassa became leader of the Central African Republic in a coup staged December 31, 1965. On December 4, 1977, he crowned himself emperor of the impoverished nation in a lavish ceremony. Ousted in a coup nearly two years later and sentenced to death in absentia for atrocities committed during his reign, Bokassa lives now in France.

Before the infamous president of the Central African Republic Jean-Bédel Bokassa made a visit to Rumania, the DIE spent months on intensive intelligence operations to study him. The most important vulnerabilities found were his insatiable desire for women and a primitive impulse to collect jewels, money, and personal bank accounts and safe-deposit boxes in Switzerland. Several days after Ceausescu received a complete study on Bokassa, he took me for a walk in the enormous garden surrounding his personal residence.

"Central Africa has huge diamond reserves, which could spell a fortune for us. The problem is we cannot compete with the experienced capitalist sharks in obtaining concessions for diamond mining there. We'll have to steal them. Bokassa has five wives in Bangui. Let's give him another one, prettier and more high-class than he could ever dream of having. Get a good-looker ready for his visit, and then let Bokassa find her himself. And then I'll be magnanimous with him."

During his visit to Bucharest, Bokassa fell head over heels in love with a comely Rumanian doctor who was a security agent sent to him when he gave the first sneeze of an apparent cold. Following Bokassa's repeated requests to Ceausescu, the doctor was sent to Africa on a special presidential airplane to further treat the cold he had allegedly contracted in Rumania. The doctor was overwhelmed with jewels, was given a personal villa full of servants, and became Bokassa's unofficial but favorite wife.

When she asked for fresh tomatoes and other vegetables, Bokassa implored the Rumanian ambassador to help him. Military airplanes brought an agricultural team and equipment into the country, and soon a modern vegetable farm started producing for Bokassa and the doctor. The manager of the farm, an agricultural engineer, was actually a DIE officer who became the doctor's case officer.

Soon after that, Vasile Pungan and Nicolae Doicaru, two of Ceausescu's personal advisers, made a secret trip to Bangui. When they returned home, they reported that Bokassa had accepted 10 percent of the Rumanian profits from diamond mines developed on preferential terrains in his country, taking the business away from Western companies with experience in diamond mining.

Several years later, the doctor decided to take her life in her own hands. She escaped from Bangui with some of the jewels Bokassa had given her and began a new life in France. Discovered by the French press, she made history telling of her romance with Bokassa, but she carefully omitted all mention of her connections with the DIE.

"Make Use of Carter's Inexperience"

We were walking along the garden path at his Bucharest residence when Ceausescu suddenly started talking.

"I read through the whole file you gave me on Carter and his family twice." I had given him a briefing file on American President Jimmy Carter, based on material in DIE records.

"I can see that, despite his innocent smile, his soft voice, and shy manner, Carter is not an easy or predictable fellow. But he is not contradictory, as you describe him. The file

says that, although he graduated from the Naval Academy only in 60th place out of 820, he has the intelligence of a near genius, a fantastic memory, an unusual capacity to absorb masses of information, and is a very good listener and a very hard worker. That's not a contradiction. I never graduated from any university before becoming a political leader. His rivals accuse him of having concealed a high degree of stubbornness and a vindictiveness behind his smile when he was the governor of Georgia. That's not a contradiction, either. It's probably normal for a politician.

"In my opinion, his weak points are other ones. One is his ridiculous religiousness. . . . Another weakness is his intense inner life, which is detrimental to the dynamism he needs to have.

"Nevertheless, as I read in your file and between its lines, Carter has enough qualities to succeed. You probably haven't realized that there are even some similarities between him and me. Both of us consider that the people elected us not just as an individual but as a paterfamilias, that our wives and children were also elected together with us. Apropos, you might pull together everything you have on Carter's deep respect for his wife and children and on his commitment to giving them a high profile during his presidency, and then give it to Comrade Elena. That may help to change her broken record that Carter is nothing but a peasant.

"Carter's biggest disadvantage is that he is totally inexperienced—what can you expect from somebody who raised and sold peanuts all his life, That's one of the worst sides of the American system: Anybody can become President, if he has money and a nice smile, and then, just when he starts to learn something, he has to leave. They just can't understand that being chief of state is a profession. . . .

"Anyway, that's their problem, isn't that true? And we should make use of Carter's inexperience and friendship as long as he is President. That's why I insisted on having my visit there in the very first days of his presidency, to find him virgin, uncontaminated by the influence of others."

Suddenly Ceausescu stopped, hung onto a button of my jacket, and, looking me in the eye, continued in a low, conspiratorial tone. "In your file on Carter's family, I see that his brother, Billy, is some kind of drunk, a corruptible fellow who doesn't know how to do anything but is trying to turn a fast buck any way he can. I see also that the DIE has turned up a foreign agent who might manage to build up some business relations with Carter's farm and with Billy. Isn't that a Liberian who has an export-import company in London?"

"Yes, Comrade," came my answer.

"We should do everything we can to encourage this operation. We import enough peanuts into Rumania, so let's buy them from him, from his farm. We can use so many peanuts that we could buy up his whole production for at least the next ten years. Let's make Billy our representative for importing peanuts and other things. But for the beginning, let's work under a foreign flag. Let's import peanuts through the London company of your Liberian agent's. When Billy has gotten enough of a taste for this money, then we can tell him that it's not English or Liberian money, but ours. But only when we are sure that Billy won't be able to do without his new source of income."

Advice for Kojak

Although Ceausescu has never been in a public movie theater, he is a movie fanatic. Each of his four residences has a fully equipped projection room and a permanent film library. His favorites are movies about the Roman empire and Napoleon and American police films and television shows.

During a movie at his private residence, where he does not have to worry about protocol or what people looking at him will think, Ceausescu is a normal human being, relaxed and entirely different from his public image. He loves to watch Kojak shows, not only because they are full of action, but especially because with his quick mind he has no trouble figuring out the dénouement of a Kojak episode. Savoring the thought that he would once again be one step ahead of Kojak, he settled down into his chair, disappearing completely from my sight from where I was sitting behind him.

"Come on. Don't waste your time on him, Commissar. He's a friend. You'd do better to keep your eye on the dead man's girlfriend. Hey, Ropoteanu, tell him that in English."

Ropoteanu was an English teacher who had become an intelligence officer and was Ceausescu's favorite interpreter for movies.

"Don't listen to the captain, Kojak," Ceausescu continued his advice. "He didn't know anything in the last movie, either. In Rumania I wouldn't keep him on the payroll a single day longer."

"An idiot, Nick. An idiot," piped up Elena, who was sitting in the chair beside him. "All security officers are idiots. I've told you that many times. Wouldn't it be better to show a war movie, with the army in it? They're idiots, too, but at least they carry out orders without asking any questions."

At the end of the movie the lights revealed Elena fast asleep, with her head resting on the soft back of her easy chair. Her mouth and her robe had both fallen indecorously open.

HUMAN RIGHTS AND WRONGS

Ceausescu's grand plan

"Horizon" was by far the most secret DIE operation, and its files were locked in the DIE's super-secure vault, continuously covered by closed-circuit television cameras and accessible only to the minister of interior, the political chief of the DIE, and me. Everything in its files is written ony by hand.

"Horizon" was Ceausescu's grand plan, an extension of Euro-Communism, for strengthening his Communist rule in Rumania with help from capitalist governments. It was created by him as a masterpiece of a political-influence operation, aimed at gaining Western good will, political support, credits, and prohibited technologies, without in the least compromising Bucharest's orthodox Marxist rule.

"Horizon" contained in several bulky files organized by geographic area, was the only place where one could find a distillation of Ceausescu's overall goals and concrete objectives for each non-Communist country of interest, starting with the United States and ending with Bokassa's Central African Republic, as well as data on the most important influence agents created by the DIE over the years.

Concealed in the "Horizon" files was information on every major successful influence operations created by Ceausescu. Among the oldest was the operation to provide clandestine support for Willy Brandt, the chairman of West Germany's Social Democratic party, in two parliamentarian votes of confidence, in 1973 and 1974, which he won only by also having two supporting votes from the opposition. According to the DIE station chief in West Germany, the two deputies in question had been approached by Rumanian intelligence officers, who plied them with valuable gifts and persuaded them to vote against their own party.

One of the newest operations documented there, and by far the most important, was the annual effort to have the United States Congress renew most-favored-nation trade status from Rumania.

For this operation, almost every Rumanian representative in the United States, including the ambassador, was replaced by an intelligence officer. More than 10,000 Rumanians were recruited as agents and sent to the West as émigrés in a mass operation designed to influence the governments of the United States and its allies, especially West Germany and Israel. Intelligence officers and agents were secretly sent to the United States to take over control of émigré organizations and direct their publications and social activities.

The file showed that the DIE had helped finance and direct the activities of such émigré organizations as the American-Rumanian Central Foundation, the American-Rumanian National Institute, and the American-Rumanian National Committee for Human Rights. Through such organizations, the DIE conducted an intensive lobby on Capitol Hill and led street demonstrations in Washington. In 1975, when Rumania first received most-favored-nation status, the DIE's chief was rewarded by being made a Hero of the Rumanian Socialist Republic, and the chief of the U.S. Brigade was promoted to the rank of general.

Ceausescu considered that this operation gave Communist Rumania the most valuable political, financial, and technological benefits in its history.

Targets of Assassination

At the conclusion of his 1978 visit to the U.S., Ceausescu and Jimmy Carter issued a joint declaration in which both affirmed the "observance of and promotion of respect for human rights and fundamental freedoms, including all the conditions required for a free, dignified, and prosperous life."

Three months later, during a walk in his garden, Ceausescu orderd Pacepa to arrange the assassination of Emil Georgescu, a supervising editor in Radio Free Europe's Rumaninan Department.

"Emil Georgescu must be killed, without involving the Rumanian government," Pacepa recalls Ceausescu saying. "Foreign professional criminals must be used, and that wasps' nest, Radio Free Europe headquarters, must be wiped out with powerful explosives."

Pacepa defected one week later.

In the totalitarian logic of the Rumanian government, émigrés are Rumanian citizens subject to Rumanian laws, regardless of their current citizenship. In dealing with them, the DIE has the same role as the security forces have inside Rumania: It acts as the "extended arm of the proletarian dictatorship."

In 1975 the DIE began an ambitious project to set up a complete, computerized data bank on the more than 600,000 native or second-generation Rumanians living in the West, using consular, mail-censorship, and intelligence information. Undercover officers and agents sent abroad to take over control of émigré organizations, publications, and social activities used various covers, from folk-art instructor to priest.

Because the Rumanian government has no poisons abroad, it uses beatings, kidnappings, and unattributable assassinations to "discipline" émigrés in the West. It has become a matter of political prestige for Bucharest to try to execute defectors who have been granted political asylum in such countries as the United States, France, and West Germany. Explosive letters and packages are sent to Rumanian anti-Communist leaders in exile, such as those mailed during the 1981 Madrid Conference on Security in Europe.

Dissidents who have been given exit visas from Rumania have also become DIE targets for assassination in the West. In April 1982, Matei Haiducu, a Rumanian who moved to France in 1975, confessed to French authorities that he was a Rumanian illegal officer and that his current assignment was to assassinate dissident writers Paul Goma and Virgil Tanase in France "by any means," the only condition being that Rumanian government involvement not become known. Haiducu turned over to the French a fountain pen loaded with a toxic chemical that he had been given to accomplish the deed, in true spy-thriller fashion.

Orders have repeatedly been given for the silencing of émigré journalists and others who publicly criticize the Rumanian dictatorship, including US government employees working for Radio Free Europe. Monica Lovinescu, a respected but outspoken French citizen who for years has been an employee of Radio Free Europe in France, has particularly incensed Ceausescu.

"Lovinescu must be silenced," Ceausescu ordered at one point. "Not killed. We don't need any uncomfortable French and American investigations just now. She should be beaten to a pulp and have her jaw, teeth, and arms broken, so that she will never again be able to speak or write—beaten in her own home so she and others will learn that no place is safe for people who calumniate the proletarian dictatorship, not even their own homes. She should become a living corpse, an unforgettable example for others."

In November 1976 Lovinescu was severely beaten in her home by a Palestine Liberation Organization group acting on Rumania's behalf.

Emil Georgescu, the program editor at Radio Free Europe in Munich whom Ceausescu had ordered me to have killed in 1978, was brutally stabbed 22 times at his own home on July 28, 1981, and barely escaped with his life. That order played a decisive role in my final break with Bucharest.

The flesh trade

Trade in human beings became another important business for the DIE. Ceausescu was obliged to open the door for emigration, despite his personal repugnance to it, by the international movement for human rights and the freedom of movement, in particular the Helsinki Agreement on Security and Cooperation in Europe and the decision by the US Congress to tie most-favored-nation trade status to emigration rights. Emigration provided Ceausescu with political gain, and he soon decided to use it for financial profit as well, in a highly confidential operation kept so secret that at his direction it was handled only through the DIE.

The DIE initiated discreet contacts in Israel and West Germany and cautiously suggested that, if Rumania could be reimbursed in hard currency for the social and education expenses incurred for the ethnic German and Jewish émigrés seeking to leave Rumania, the emigration process might be accelerated.

Secret, unwritten agreements were made with the Israeli foreign intelligence service and with the West German Ministry of Interior. The Israelis and the West Germans paid thousands of dollars for each Rumanian Jew and ethnic German granted an exit visa, in some cases as much as $50,000 per person, depending on his or her level of education and profession.

Over the years, many hundreds of millions of dollars were secretly paid to Rumania, along with low-interest credits issued through the DIE as bonuses for increasing the emigration quotas. For reasons of secrecy, most of the payments were made in cash and only in US dollars. No other member of the Rumanian government knew anything about them except the prime minister, who was given only a general briefing and instructed that, if the matter even came up, he should vehemently deny any suggestion that Jews and Germans were being sold.

In February 1972 Ceausescu decided that additional side benefits might be had from the emigration of Jews and Germans. "No Rumanian citizen," Ceausescu stated, "whether of Rumanian, Jewish, or German ancestry, should be given an emigation visa unless he is a security agent, has signed a secret, written agreement with the security forces, and has agreed to act as an intelligence agent abroad." More than 10,000 emigrating Rumanians were recruited in a mass operation between 1972 and 1978 and instructed to penetrate the governments, political life, and scientific and technological circles of the United States, Israel, West Germany, and other Western countries.

Most of the Jewish and many of the German émigrés never used their secret communications systems and simply disappeared as agents.

AS OTHERS SEE US

The American way

During a previous visit to the United States, I was in the Cabinet Room with Ceausescu, when, counting the labeled chairs, he suddenly said, "Can you believe it? Only thirteen secretaries! Why do we have to have a president and a prime minister? Why do we keep a prime minister, twelve deputy prime ministers, and 40 ministers? Why does the prime minister need 53 labeled chairs for a government meeting? We should learn from the American system of democracy. We should apply the same principles. And if some journalist says we have a dictatorship, we should answer that our government is a faithful copy of the American government. As here, we should have only one boss and several secretaries carrying out his orders."

That was when Ceausescu gave me the order to give him a complete study on the American system of government. Based on this order, a DIE officer under deep cover, Colonel Dumitru Mazilu, was sent to the United States for six months to prepare the study.

When I gave the final report to Ceausescu, he promptly said: "You don't understand anything! I don't need to know anything about the Congress and the judicial system. Stop talking about the three branches of their government. Rewrite the report covering only the administration, and strongly emphasize that the American government has only a President, a Vice President, and a few secretaries, that they don't have and never have had any prime ministers! Write that they have a presidential system without any prime minister or deputy prime ministers and that that's all they need. Someday we have to finish with the wastefulness we have. We don't need two governments, one run by the president and the other by the prime minister."

The air-conditioned nightmare

Air conditioning was probably my biggest headache for all the presidential visits I prepared.

Shortly after he had taken over, after the death of his predecessor, Gheorghe Gheorghiu-Dej, Ceausescu returned from a secret visit to Moscow and began worrying about the protracted pain in his throat. Gheorghiu-Dej had died from a fast-developing form of cancer, its first symptoms having appeared as throat pains not long after his return from a vacation in the USSR together with the Italian Communist leader Palmiro Togliatti, who had died very suddenly after his return under circumstances considered strange. Ceausescu was convinced beyond the shadow of a doubt that both had been assassinated by the Kremlin through secret radiation with a strong source of isotopes, and his throat pains therefore caused him indescribable panic.

Doctors from all around the world were secretly brought to Bucharest over an anguishing period of long weeks. Finally an old, very conservative West German doctor put it to him very bluntly: "You, sir, talk too much and too loudly, and your vocal chords are terribly irritated. If you want to keep them, you must protect then."

The doctor's prescriptions were old-fashioned: chamomile tea as often as possible, but always when he had to speak longer and louder than usual, and protection from any kind of drafts, including fans and air conditioners. Since then, during every speech Ceausescu makes, a waiter changes his chamomile tea glass every half hour, no matter whether it is a routine meeting, a Politbureau session, or a Party Congress. Every single fan had to be removed from all his residences, and the central air conditioning system installed at the Central Committee of the Communist Party was dismantled.

During his foreign visits, especially to North and South America, I encountered indescribable difficulties in having the air conditioning and heating turned off in every building he was to visit and closing or at least covering every vent. In Venezuela, for instance, he ordered me to disconnect the air conditioner in his official vehicle, so that the Venezuelan driver would not under any circumstances be able to turn it on. As it was an armored car, the windows of which could not be opened, the trips around Caracas quickly became a nightmare.

I also had never-ending discussions with the management of the Waldorf Astoria in New York and other hotels used by Ceausescu, when I would ask them to turn off the central air-conditioning or heating systems and to seal off every vent. It repeatedly happened that Rumanian dignitaries accompanying Ceausescu abroad spent their nights trying to find and seal off hidden vents or leaky windows.

Distinguished Americans

"Pacepa's just been telling me some interesting information about the American President," Ceausescu told Elena as she entered the room. "Carter looks unexpectedly nice, even distinguished, showing esteem for his wife and devotion to his family. I've asked him [Pacepa] to prepare a file for you that I hope you'll like."

"Go soak your head, Nick! Have you ever seen a 'distinguished American'?" Elena squawked, trying to put all her knowledge of English into the last two words. "Name me just one movie where you've seen such an American, and on top of it all a loving husband and devoted father, and I'll eat it, Nick. And you," she went on, turning toward me. "Don't you fill the Comrade's head with your intrigues and fantasies. Do you understand?" Then turning back to Ceausescu, "You'd better come to bed Nick, rather than wasting your night away listening to fairy tales. You want to learn about Americans? You have your *Kojak* movies. They are at least authentic, made by Americans!"

Books, blacks, and Barbara Walters

The following conversation took place at Blair House on April 11, 1978, the first day of Ceausescu's visit to Jimmy Carter.

"What about the book exhibition I ordered? Ceausescu asked me.

"It opened today at the Martin Luther King Library, with books printed in all the languages of the various ethnic groups living in Rumania and with a special exhibit case containing books written by and about you. The report says that the director of the library opened the exhibition with an address presenting you as a brilliant thinker and political personality, whose love of books has favorably influenced the whole course of publishing activity in Rumania."

"Listen to him, Nick," Elena broke in. "In all of America, they couldn't find any better place than a library for black people!"

"Anything new on the television interview?" Ceausescu intervened.

"Yes. ABC insists on taping the interview tomorrow afternoon so they can put parts of it on the air during the prime-time news tomorrow evening, the first day of the visit, and broadcast the entire interview on Sunday, April 16, on the *Issues and Answers* show."

"Is the interviewer somebody?" he asked.

"Yes, Comrade. Barbara Walters, one of the ABC's best television interviewers."

"A woman? A woman to interview you, Nick? That's ridiculous! Isn't she the harpy who interviewed Castro and made a whole circus out of his personal life, his estranged wife, and his love affairs? Isn't she that one?"

"I think, Comrade Elena, that she interviewed Fidel Castro several years ago."

"Fiddlers! That's all they all are, nothing but fiddlers. I told you so. It's all a plot against you, no question about it. Why else, out of 200 million Americans, could they find only that harpy to interview you? It's a plot to compromise you, Comrade. Can't you see that?"

After reaching this decision, Elena furiously left the dining area. During Ceausescu's visits abroad, Elena was always dissatisfied with everything and everybody.

TRADECRAFT

The nuclear go-between

In 1975 I showed Ceausescu credible DIE information indicating that Pakistan was conducting secret operations to develop its own nuclear capability. Two days later he ordered me to arrange a secret meeting for him with Zulfikar Ali Bhutto, Pakistan's Prime Minister. With the help of Andrei Stefan, secretary of the Central Committee of the Communist Party and chief of its international department, a short stopover was arranged to take place in Karachi, with Bhutto welcoming Ceausescu at the airport.

When Ceausescu's airplane landed in Karachi, Bhutto was there, accompanied by numerous local dignitaries. He invited Ceausescu for lunch to a nearby palace, where we arrived after almost an hour's ride on a hot, dusty day. In the palace garden tents were already waiting, filled with food in large silver pots. For each guest there were several servants ready to carry out his least wish at the slightest signal. In the main tent, the highest Rumanian and Pakistani dignitaries joined their two leaders for lunch.

Ceausescu has a great talent for personal diplomacy, most of his successes having been brought about by personal discussions. A good psychologist, he pays a great deal of attention to knowing his discussion partners, and he tries to impress and subdue them with a deliberately open and direct manner and with discreet anti-Soviet allusions.

Bhutto was a relatively easy prize for the experienced and well-prepared Ceausescu. By the end of the luncheon, Bhutto was addressing Ceausescu only in superlatives.

After lunch, Ceausescu asked for a private discussion, accompanied only by a DIE interpreter and me. He opened his frontal attack on Bhutto. "You and I share the same dream, to make a place in history for our countries, and the best way to do that is to build their power. In our time the only real power is nuclear power. We should build it secretly. Working separately, our intelligence services"—pointing toward me—"have obtained remarkable results. Together we might be able to realize our dreams. In this envelope is a sample of what we can do. Read it later on. If you agree, give me a sign. If not, you may forget the whole thing."

Bhutto put the envelope carefully into his pocket, without opening it. It contained a detailed inventory of the nuclear-intelligence information Rumania could secretly provide to Pakistan.

Then there was a short break in the meeting.

When Bhutto came back into the room, he proposed that he and Ceausescu make a public declaration. Ceausescu spontaneously gave a public speech, followed by Bhutto.

Intelligent, sensitive, and ambitious, Bhutto reacted almost exactly as Ceausescu had expected. Just before our departure, he gave Ceausescu an envelope. "Inside is a name, one of our most secret names. Don't try to find him," Bhutto said in my direction, "because he doesn't have any official positions. I will personally instruct him and send him to Bucharest. I will send you the date and flight number through your ambassador, without further explanation. In Bucharest one of your people should meet him and organize future cooperation. It should be a personal contact between two individuals, not two governments. I hope we never need discuss this matter again in our future cooperation, my dear friend."

Two weeks later I had a meeting in a safe house with the man who would become "235," and the next day Ceausescu had both of us for a private dinner at his residence in Snagov, not far from Bucharest. Radu Andreescu was the operational name of a brilliant DIE engineer who became his case officer. Ten days later Andreescu left for Pakistan with a voluminous diplomatic pouch containing the whole documentation secretly obtained from Canada and used to construct a Rumanian heavy-water plant.

He came back with the complete project for a small Canadian Candu reactor that the Pakistani government had bought as well as significant intelligence data on the industrial-size Candu nuclear reactor.

On further visits to Pakistan, Andreescu took with him technical intelligence on West German and French nuclear reactors and security systems, and he brought back to Rumania the Degussa centrifugal system for enriching uranium, data on the industrial production of uranium 235, and other military technical nuclear intelligence that Pakistan had obtained.

A recently arrived postcard was the first sign of life we had gotten from "235" after the July 5, 1977, coup, when General Muhammed Zia ul-Haq arrested Bhutto and declared himself chief administrator of martial law.

"You must be terribly careful! We badly need to keep our Rosenberg," said Ceausescu.

The corn caper

Technological espionage was also extended to unclassified projects, in order to save costs on legal imports. The complete blueprints for newly designed American aluminum rolling mills were used as the basis for constructing high-capacity aluminum-foil and sheet-metal factories, which were scheduled to go into production between 1982 and 1984. Three glass factories were built from 1976 to 1980 based on illegally obtained intelligence provided by an American engineer in exchange for the initial sum of $200,000. The intention was to flood the American market with glass products at dumping prices. Today Rumanian glass products are for sale at attractive prices all over the United States and Western Europe.

Through an agent recruited at the United States Department of Agriculture's Research Center in Beltsville, Rumania secretly obtained the entire US national hybrid-corn collection, containing more than 14,000 assortments and species, which became the basis for further research in Rumania. Together with other genetic materials also illegally obtained from the United States, American brands of corn, such as Pioneer or Wyoming, soon began to be replaced by Rumanian hybrid strains. As of 1978 they numbered from RH-101 up to RH-291, RH standing for "Rumanian hybrid."

In July 1978 the Rumanian ministry of agriculture estimated the total savings for Rumania generated by this operation over the years at a staggering 300 billion dollars.

Shallow penetration

Accompanied by Pacepa and others, Ceausescu visited the Dallas headquarters of Texas Instruments during his April 1978 trip to the United States. Afterwards, at a dinner arranged by the Texas Chamber of Commerce, Ceausescu said, in part:

"Some of the products turned out by Texas Instruments also have a strategic character. We are not concerned with turning out such products, because we stand for disarmament, for the destruction of atomic armaments and of weapons in general. We stand for a world without weapons, a world of peaceful cooperation."

In all of Eastern Europe, and in their foreign intelligence services, Texas Instruments was considered to be the most advanced producer of microelectronics and chips in the whole world, and also one of the best-protected private companies working on classified government contracts.

During the Brezhnev-Ustinov-Andropov militarization era, I was repeatedly asked by Soviet KGB representatives to direct the DIE toward penetrating Texas Instruments

and obtaining its highly secret microelectronic technologies, but the intensive efforts made in this direction over many years were without success.

Some technological information was later obtained indirectly, however, through cooperation with a prestigious British firm producing microelectronics under a Texas Instruments license. Several hundred volumes, containing tens of thousands of pages of classified American documents, were photographed and turned over by a newly recruited and well-paid British agent.

These documents almost entirely filled Ceausescu's executive-committee room when they were presented to him. He considered this operation one of the most valuable producers of technological intelligence for Rumania, and he directed that it be used as the basis for the secret production of chips and other microelectronics in a top-secret military plant close to Bucharest especially created for this purpose. But this beginning only whetted his appetite for a real penetration of Texas Instruments.

After Leonid Brezhnev had personally asked him for information on American microelectronics, Ceausescu asked me to include a visit to Texas Instruments in the itinerary of his April 1978 visit to the U.S., as a way of opening the door to a direct intelligence operation. At the end of March, when I was sent to the U.S. by Ceausescu to prepare for his visit, he ordered me to go personally to Texas Instruments in my official capacity as presidential adviser and to open its doors for officers from both the Washington and the New York DIE stations. But up until the time of Ceausescu's visit there, the Rumanians had been totally unable to talk with any engineers or technicians from Texas Instruments, being restricted to meeting with only public-relations or security officers.

Several weeks later as Ceausescu stepped inside the company's building, he shot me a triumphant look, then turned to the other people present, his face and eyes lighted up with enormous self-satisfaction. He had accomplished his wish to be the first Communist president to set foot inside Texas Instruments, to do something Brezhnev had been unable to do. Indeed, Ceausescu was at last able to walk into that prohibited microelectronics empire, but the equipment and the people working there could be seen by him only through a protective window wall.

Stealing NASA's secrets

On Saturday, April 15, 1978, we were flying from Dallas to Houston on an Air Force One airplane provided by the White House for Ceausescu's visit to the United States. Without enthusiasm we began a new game of chess.

"Was the contact with 'ARMAND' put on ice for the duration of the visit, as we discussed, Pacepa?"

"Yes, Comrade. We paid him to take a two-week vacation in Italy. It's best for him to be as far away from NASA as possible."

"That's good. Sometime you may bring him to the Black Sea, under another name, and treat him to a vacation there that he'll never forget."

"ARMAND" was a British engineer who was recruited in the early 1970s on the basis of "tax-exempt" money to provide technological information. He proved to be a workaholic who was greedy to make a fortune, and he turned his contact with the DIE into a big business.

Ceausescu became aware of "ARMAND" when the NASA technical documents he furnished caused stupefaction in Bucharest and a report about them, handwritten and signed by Gheorghe Opera, the first deputy prime minister, was presented to Ceausescu. The report stated that the NASA documents contained incredibly valuable technological and technical information never before seen in any published material. Because of imperfections in the American bureaucratic system, the material had not yet been legally classified. The report further stated that the information could be immensely useful for the creation of a Rumanian space industry, with meteorological rockets as its public facade and military rockets as its most important and much larger component.

It was proposed that the DIE mount an intensive operation to steal as many technical and technological materials from the United States as possible, before the deficiency in the security precautions would be discovered and measures taken to classify such material.

Ceausescu has a particular fascination for everything that is on a grand scale. Now, because of the NASA documents, he could visualize his dream of a space program as not only fantasy but as a real possibility. He ordered me to arrange an exposition of the most significant NASA documents in a room next door to his office, taking maximum security precautions to ensure that the secret of our possession of the NASA documents be tightly kept.

These NASA documents became a cult object of admiration for Ceausescu. The exhibit remained next door to him for many weeks, and he repeatedly visited the secure room where they were kept, asking for explanations and details. Then he started showing the exhibit off—first to his wife, Elena, then to his son, Nicu, and to his brothers, Ilie and Nicolae, both generals, and eventually to his closest collaborators, such as Prime Minister Manea Manescu and Secretaries of the Central Committee of the Communist Party Ilie Verdet, Andrei Stefan, and Corneliu Burtica.

Whenever Ceausescu took me for an evening stroll in his garden, I understood very well that he wanted to talk about something very confidential.

"Remember how, on our last visit to the United States in 1975, Kissinger said that his time and his life were limited, and that he could and would not spend them dealing with small countries, because they couldn't play any significant role in contemporary history? Or how he said that he should spend his time only on the big countries, because only they held the key for the peace and the future of mankind? I said then that he was wrong and that history would prove it. With his German head he can't understand that in today's scientific explosion, undeveloped countries like India or small countries like Pakistan can one day possess nuclear arms and then have a powerful voice in world affairs."

Ceausescu stopped, grabbed one of my buttons, and said, looking deep into my eyes, "Maybe one day Rumania, too, if we could attract Qaddafi's money."

Agents of terror

Through cooperation among the Soviet-bloc services, Communist state-owned land, air, and sea transportation organizations were secretly used as cover for the movements of specially trained officers and for the clandestine shipping of captured persons.

Based on the Bulgarian model, in 1972 the CIE (Centrala de Informatii Externe) assumed direct control of the whole TIR (Transport International Routier) land transportation system. Bulgaria has one of the largest TIR fleets in Europe, basically intended for the rapid shipment of its fruits and vegetables to the West. As was the case in Bulgaria, in less than two years' time most of the drivers of the Rumanian TIR trucks were CIE officers under cover, who were trained to transport people and equipment and to pick up espionage materials from dead drops placed along Western highways.

Patterned after Bulgaria's Balkanair, the Rumanian airline company TAROM was taken over by the military intelligence service, Directia de Informatii a Armatei. Positions in TAROM offices in Western countries were filled with officers of the DIA (Rumanian military intelligence).

Drawing on the Hungarian experience with using water transportation on the Danube for clandestine intelligence operations, the CIE took over control of the Rumanian chartering agency NAVLO-MAR, introducing undercover officers into most of its offices abroad. The Bulgarian foreign intelligence service adopted identical measures.

These measures opened a new era in terrorist operations. The intelligence officers assigned under transportation cover were intensively trained. The logistical support systems at their control soon began to be used for illegal import and export. The TIR system was used for the secret transportation of intelligence materials and prohibited goods, from embargoed alloys to Western military equipment captured in Lebanon. TIR tracks were used to ship drugs and contraband arms sold to obtain foreign currency, particularly to Turkey, with the cooperation of the Bulgarian authorities.

Some of these shipments were protected by diplomatic courier seals and papers, as well as by foreign customs seals. In Rumania, every kind of seal used by foreign customs authorities was duplicated over the years and used when needed to replace an original customs seal destroyed in an intelligence operation.

TAROM airplanes were used for the "unaccompanied diplomatic pouch," which consisted of documents, illegally obtained cash, illegal arms for use of the CIE abroad, and technology and other military equipment, including relatively large napalm bombs and COBRA and MILAN antitank missile systems.

NAVLOMAR's ships were occasionally used for bulky pieces of equipment, such as a Centurion tank the DIE obtained, Air Force radar equipment and rockets, and for technology equipment illegally imported from Japan or Hamburg.

Drawing on the experience of the Bulgarians and the Yugoslavs, in the 1970s the CIE started to look for foreign professional criminals capable of carrying our terrorist acts on its behalf. Rumania's close relations with Yasir Arafat, the leader of the Palestine Liberation Organization, opened the way for personal cooperation between DIE leaders and Hanny Hassan, the chief of the PLO security department. Specially trained PLO teams were used to carry out terrorist acts, which only Hassan knew were undertaken for Rumania. Paramilitary training schools were organized in Rumania for training Greek and Spanish Communist-party members for terrorist and guerrilla-type operations. Although the foreigners were trained under the direction of the Rumanian military forces and the DIA, the DIE utilized them for spotting foreign pro-

fessional criminals. The Greek Communists were useful in recommending Greek and Turkish terrorists. The Spanish Communists, for many years exiled to France, facilitated contact with French smugglers and drug dealers.

The Mafia is another pool in which the Communists fish. In the 1970s an American citizen who lived in New York City was arrested by the Bulgarians at their border for carrying undeclared, illegal merchandise. He was turned over to Rumanian security authorities becuse his wife was a native Rumanian. He admitted to being a member of the Mafia in the United States. Asked to locate Rumanian defectors, he came up with reliable information through Mafia sources. He was given the assignment of assassinating several defectors in the United States, but the killings were prevented by my defection.

ENEMY OF THE STATE

Within the Soviet bloc, religion is considered to be even more dangerous than capitalism, because faith cannot be destroyed through political-administrative measures such as the nationalization of capital. When Communist governments, directed from the Kremlin, came to power in Eastern Europe, thousands of churches were seized and turned into cultural clubs, public libraries, Communist office buildings, or simply sealed up. Baptism, marriage and other religious sacraments were outlawed and replaced by civil ceremonies. Many churchmen were sent to labor camps and interrogation centers or secretly assassinated. In Rumania more than 400 Greek Orthodox, Roman Catholic, and other priests and religious servants were secretly arrested on one night, January 7, 1951. These operations were orchestrated by Moscow, as a step toward clearing the way for a society in which Marxism would be the sole religion.

The Roman Catholic Church, because of its close ties to the faithful, its historic ability to mobilize large population groups, its huge international membership, and its financial power, is considered by Communist governments to be a dangerous threat. The neutralization of the Catholic Church is a cardinal task for every Communist government, even in countries where there are relatively few Catholics, such as Rumania. There the Catholic bishops began to be confined to monasteries in 1948. The campaign against Catholicism culminated in a show trial organized in Bucharest by the Soviet forerunner of the KGB and the Rumanian political police in April 1951. The Vatican was accused of anti-state plotting and espionage on behalf of the CIA and other Western intelligence organizations. A number of Catholic clergy were sentenced to jail, official relations with the Vatican were broken, and the seat of the Papal Nuncio was closed.

In the 1950s operations against the Catholic Church inside the Soviet bloc began to be closely coordinated by the Kremlin. A fanatical and experienced member of the Politburo in each country was put in charge of measures against the Catholic Church. In Rumania it was Emil Bodnaras, a former colonel in the Soviet Army during World War II whose real name was Bodnarenko. In 1945, backed by the Red Army, he had been the main person behind the overthrow of the recently elected Rumanian democratic government. Bodnaras remained in charge of measures against the Catholic Church until his death shortly before my defection in 1978.

By 1949, special departments charged with supervising the activities of the Catholic Church had been created in all Soviet-bloc security forces. Every Catholic Church building and religious servant became a target. An operation coordinated by Moscow placed microphones in every Catholic church, especially in the confessionals and priests' residences. In Rumania, they were still there at the time of my defection.

THE FIRST COMMUNIST DYNASTY

Is Rumania really a maverick?

Should the West support "maverick" Rumania? Within the limits of Marxist-Leninist principles and Warsaw Pact obligations, Bucharest does display a certain degree of independence from Moscow, deciding its own day-to-day foreign and domestic policies. The nature of this administrative independence is strongly influenced by the kind of personal relationship existing at any given moment between Rumania's leader and the top man in the Kremlin.

Under Nikita Khrushchev, who was considerate of Rumania's leader, Bucharest took pains to inform the Kremlin about all its overt and covert decisions. Leonid Brezhnev, however, ignored the Rumanian leader, an extension of Brezhnev's earlier career as First Secretary of the Moldavian Soviet Socialist Republic, where he forcibly ejected the Rumanians living there after the province came to the Soviet Union following World War II. As a result, Ceausescu kept Brezhnev at a distance. Under Yuri Andropov and now under Mikhail Gorbachev, who seems to show less rigidity toward him, Ceausescu has evidently resumed closer ties with Moscow.

It is true that Rumania's political position within the Warsaw Pact embodies a degree of genuine independence and is an irritant to the Soviet Union. Until now, however, the pragmatic purpose of that posture has been solely to increase Ceausescu's personal stature and to attract Western money and technology to help build Communism in Rumania.

Rumania has today the second-most orthodox Marxist domestic policy in the whole Warsaw Pact, topped only by Albania, in the entire world. The West's support to Rumania over the past seventeen years, since its spectacular reaction to the Soviet invasion of Czechoslovakia, has not brought about any change in Ceausescu's policies toward his own people, in terms of the economy, the standard of living, or human rights. Rumania's political police are now the most oppressive in the entire Soviet bloc. The ratio of security forces to the total population is one to fifteen, higher than that in any Western jail.

In order to export more fuel, presidential decrees signed in November 1984 to forbid the illumination of the streets at night and drastically restrict the use of private automobiles throughout the whole country. According to the Western press, during this past winter the highest temperature permitted indoors in all public buildings in Rumania, including hospitals, was only 40 degrees Fahrenheit, which reportedly caused the deaths of numerous newborn babies in maternity hospitals.

Despite these dramatic signs of economic distress, Rumania has not stopped its politically motivated practice of providing long-term, low-interest—4 percent—credits to Third World countries.

In another recent announcement, the Greek newspaper *Acropolis* called attention to confidential negotiations taking place for the sale of Aristotle Onassis's famous personal yacht *Christina* (now *Aristoteles*), which was given to the Greek government after his death. It is to be purchased as a presidential yacht for Ceausescu. One of the most publicized yachts in the world, the 325-foot *Christina* is fitted with such niceties as a canary-yellow amphibian airplane on the upper deck, a lapis-lazuli fireplace, and bar stools covered with whale foreskin, which may strike only a Ceausescu as not being too much.

At the same time, Ceausescu's messengers have been visiting the United States and other Western countries asking for new financial assistance and the renewal of most-favored-nation status, all of which they claim is vitally needed to support Rumania's independence.

Portrait of Nicu

Now 67 years old, Ceausescu is thought to be seriously, perhaps terminally ill. His death, though, would not necessarily mean that control of Rumania would pass from the Ceausescu family.

Among Ceausescu's most likely successors are his wife, Elena, and his son, Nicu. First deputy prime minister and head of the National Council for Science and Technology, Elena has been called by the Rumanian press "a scientist of world reknown." Nicu was once hailed by the newspaper Rumania Libera as being a part of "the line of great continuity of the revolutionary, patriotic spirit."

In the small portrait that follows, Nicu is at the Ceausescu's Bucharest residence. Located on Primaverii Street, it is enclosed by a nine-foot, gray-brick-and-concrete wall. Ceausescu has a weekend home in nearby Snagov, a summer home in Neptun on the Black Sea, and a winter home near Predeal in the Carpathian mountains.

Ceausescu continued silently on the fast walk with me through his Bucharest garden, without looking at me or at anything around him. We passed around the indoor swimming pool, a massive, modern building constructed of concrete and glass, illuminated now in the evening. Through the open sliding door I could hear noisy rock-and-roll music and then splashes, not loud enough to have been made by someone diving but too loud to have been made by someone swimming.

As we passed the open door, I glanced inside to my right and saw Ceausescu's son Nicu throwing Scotch bottles into the pool. He was probably drunk again. Nicu has been a hard drinker ever since his middle teens, when he would often disappear from home and be found days later, drunk as a lord, at some friend's house or in some seedy restaurant. At that time he would drink anything, from tsuic—a strong plum brandy similar to slivovitz, and the Rumanian national drink—to Cointreau or champagne. Now he drinks only Johnny Walker Black Label Scotch.

A passionate automobile driver, Nicu has demolished at least a dozen cars on his drunken sprees, killed one young Rumanian girl, and injured many people.

Lady Macbeth of Transylvania

When we returned from a reception and dinner given by the mayor of New Orleans during the 1978 visit to the United States, Elena was in good spirits. Ordering her favorite champagne, she said, "I had an interesting conversation with the 'mayoress.' You know, Nick? They are serious people. They don't want abortion. The 'mayoress' said that there's an anti-abortion movement in all of Louisiana and that the Catholic Church played an important role in it."

Draining her glass at one swallow, she continued: "Church or no, I've told you

many times, Nick, that we should sign a presidential decree prohibiting abortions in Rumania and obliging every family to have at least four children."

Elena asked for another glass of champagne and emptied it before going on. "Everybody agrees that you are the greatest contemporary statesman and economist. Even the mayor, who met you for the first time tonight, said that you were a visionary, a personality that would live for centuries. A man like you is born once every 500 years."

Elena got yet another glass of champagne. "How do you feel, being so big, so important, and yet the head of such a little country? Only Albania is smaller than our country. If we sign such a decree, in less than ten years Rumania will grow to at least 40 million people. It will be entirely different then," she concluded.

"Hey, woman, be serious—shut up," said Ceausescu, laughing but flattered.

That was not the first time I had heard Elena trying to push through an anti-abortion law. During the countless hours I spent with her, I often saw her dreaming. Her most cherished dream is to become president herself in Rumania as her idol, Isabel Perón, did in Argentina. She dreams of having her name go down in history as the only woman president who during her presidency doubled the population of her country.

In the summer of 1977 Elena sent me to Paris for two weeks with her daughter, Zoia, in order to arrange there for an "accidental" meeting with the man she had selected to become Zoia's husband. A passionate methematician, Zoia is a genuine dissident, fighting against her father's cult of personality and her mother's reign of terror.

One evening, when we were together in a striptease nightclub in Montmartre, Zoia exploded, having understood very well what was going on: "I don't want my husband to be picked by anybody but myself. I don't want to spend my whole life just having babies. I want a life decided by myself, not by ridiculous rules and laws. If I hear the harpy trying just once more to persuade Papa to sign an anti-abortion law, I'll crack her skull open. She doesn't know how to do anything else but dream about becoming a queen over 40 million idiots!"

GOODWILL GAMES—MOSCOW 1986

Mr. DOLE. Mr. President, this morning, I had the privilege of welcoming five of the world's greatest athletes, who will be participating in the goodwill games, a summer international multisport event which will take place every 4 years. The Soviet Union will host the inaugural games in Moscow July 5-20, 1986, and the United States in 1990. More than 5,000 athletes representing over 40 countries will be participating in this new quadrennial competition.

I was also honored with a goodwill games flag from visiting athletes: 1984 Olympic U.S. gold medal swimmers Rowdy Gaines and Nancy Hogshead; triple jump world record holder Willie Banks; the captain of the 1984 gold medal water polo team, Terry Schroeder; and Russian track star Viktor Saneyev, who won the Olympic gold medal in the triple jump in 1968, 1972, and 1976.

The goodwill games will mark the first time since 1976 that Soviet and American athletes will participate in summer world class events. This is an important step toward establishing even more of an athletic bond with nations around the world.

On the heels of the successful Geneva summit between President Reagan and Soviet General Secretary Gorbachev, I could not think of a better way in which to foster mutual cooperation among nations around the globe.

As ambassadors of the goodwill games, these young athletes are participating in a 20-city national and international tour. I know their enthusiasm, which was so evident in our meeting today, will generate broad support for the games.

As a former athlete myself, I know that athletics has a way of breaking down barriers. Therefore, I hope those participating in next year's games will compete together in the spirit of good will and sportsmanship.

THE WHITE HOUSE REPORT ON NICARAGUA

Mr. DURENBERGER. Mr. President, congressional approval of $27 million in funding for humanitarian assistance for the Nicaraguan democratic resistance reflected growing disenchantment with the dictatorial actions of the Sandinista regime and was a clear signal of our commitment to help those fighting to bring democratic change to that country.

During the most recent congressional debate on Nicaragua in June, there was considerable concern in the Congress that the United States continue to pursue a peaceful solution to the regional conflict in Central America through negotiations. At the same time, many of us in the Congress strongly urged that effective and comprehensive measures be taken to ensure that those we assist in the democratic resistance are maintaining acceptable standards of human rights performance.

Reflecting these concerns, the legislation approving humanitarian assistance to the United Nicaraguan Opposition [UNO] requires a report every 90 days from the President of United States efforts to promote a negotiated solution in Central America and on alleged human rights violations by the Sandinista government and the Nicaraguan resistance.

While progress in both areas is important, I am especially concerned about the human rights performance of all of the parties that are engaged in Nicaragua's civil war. The reimposition of a state of emergency by the Sandinista government on October 15 served as a final confirmation of the autocratic basis of Sandinista rule. Since that action, hundreds of religious activists, labor leaders, journalists, businessmen, and opposition politicians have been detained, interrogated, and threatened by Sandinista authorities. These antidemocratic actions only confirm the growing international understanding of the true nature of the Sandinista regime. It is clear that Sandinista security officials, such as Interior Minister Tomas Borge and Deputy Interior Minister Luis Carrion, fear democracy and abhor freedom, except for themselves. We should not expect much progress in human rights from people like Borge and Carrion.

This is why it is doubly important to me that the Nicaraguan democratic resistance must be held to a higher standard than its opponents. The abuses of the Sandinistas cannot justify other abuses by individual members of the resistance forces. The tactics of terror—torture and atrocities—must not be countered by more terror. With our commitment to the cause of the democratic resistance, in the form of open U.S. funding, comes the obligation to demonstrate that that cause is one of freedom and civilized conduct. The Nicaraguan people deserve an alternative to terror, and if the democratic resistance is to succeed in its objectives, it must offer that alternative.

In the past several months, there have been a number of improvements in the area of human rights by anti-Sandinista forces. I want to take this opportunity to support their efforts to establish human rights commissions at various levels. I'm especially pleased that a man of Arturo Cruz's stature has undertaken special responsibility in promoting better human rights practices among the resistance forces. The establishment of UNO's Human Rights Commission under Ismael Reyes, the former head of the Nicaraguan Red Cross, and the adoption of a code of conduct are both positive developments.

It is vitally important that the Reagan administration continues to strongly encourage these developments and to strengthen the democratic resistance's human rights organizations. In my view, some of the $27 million in humanitarian assistance provided by the Congress could be well spent in furthering these objectives, and I would urge the administration to fund carefully considered projects in this field. It would be especially helpful to have onsite reports from designated human rights officials on human rights offenses committed by resistance forces or by the Sandinista regime itself. These reports should be circulated as widely as possible so that Americans can become better informed about the human rights situation in Nicaragua.

I am looking forward to the next 90-day report for further evidence that the democratic resistance is serious about its commitment to human rights through punishment of human rights offenders and promulgation of a healthy respect for accepted international human rights practices among its troops.

It appears that UNO has made a good start in improving its human rights performance over the past several months. Just as important, the November 6 report implies that both the administration and UNO are fully aware of the importance of this issue to all Americans. UNO must now demonstrate that it is committed to living up to the promise contained in the President's report—it must move beyond good intentions and preliminary steps into the practical application and institutionalization of good human rights practices and monitoring in the field.

The State Department's Nicaraguan Humanitarian Assistance Office [NHAO] has achieved impressive results in a very short time. NHAO was created by an Executive order on August 29. During the month of September, NHAO's staff was assembled and Ambassador Robert Duemling was selected as NHAO's director. In less than 3 weeks of operation, NHAO has issued $13.25 million in program grants. Of this total, $10.8 million has been committed to specific purchases, and $4.4 million has actually been paid out.

At the same time, UNO has determined the allocation of resources through its requests to NHAO. The financial assistance to UNO has been spent as follows: 40 percent for clothing, 25 percent for food, 15 percent for gear—cots, canteens, tents, et cetera—10 percent for medicine and medical equipment, and 10 percent for transportation.

NHAO is getting aid through to the democratic resistance, but it is also scrupulously observing the guidelines imposed by Congress. U.S. funds go only for authorized goods and services. All commercial transactions are carefully scrutinized for such elements as competitive price and value received. Deliveries are closely monitored to prevent diversions. Detailed records of all transactions are kept, along with signed receipts of purchase.

Despite these successes of UNO and NHAO, several problems remain to be resolved. Transportation of supplies from the United States to Central America has been subject to complications and delays. The administration and NHAO are now trying to resolve these transportation snags. Second, UNO's lack of vehicles creates problems in moving supplies to forward areas and in extracting the wounded from battle zones in time to save their lives or to avoid the necessity of amputations. To make the aid more effective, NHAO must be permitted to supply vehicles to UNO for general use.

Our humanitarian assistance must be seen in the proper context. At the present level of funding, aid is keeping the democratic resistance alive, but it is not enough to tip the balance given the vastly superior resources available to the Sandinistas. Just as important, UNO has demonstrated an ability to attract ever-increasing support from the Nicaraguan people. UNO is a popular movement that has demonstrated its commitment and its vitality.

We must therefore begin to consider what further assistance is appropriate and in our interest. On the one hand, we must avoid inducing a debilitating dependency by UNO on the United States; on the other, we must demonstrate our own commitment and staying power, and not allow this program to simply disappear on March 31.

Officials in both Washington and Managua realize that 1986 will be the critical year in the battle for Nicaragua. If the Sandinistas are able to consolidate their rule by the end of next year, we may have another Cuba in the heart of Central America. If UNO is able to become truly unified and to bring the conflict to all parts of Nicaragua, then there may be hope for the democratic forces.

Mr. President, I ask unanimous consent that the President's November report as well as an article on human rights in Nicaragua from the Washington Post be entered in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EFFORTS TO PROMOTE A SETTLEMENT IN CENTRAL AMERICA AND IN NICARAGUA[1]

It has been the consistent view of the United States that the domestic and foreign policies of the Sandinista National Liberation Front (FSLN) are the root source of inter-state tensions in Central America. Sandinista policies are also the cause of the internal conflict in Nicaragua. Those policies have created a democratic resistance in Nicaragua. Those policies led the resistance to conclude that change in Nicaragua would be possible only through a resort to arms. Sandinista backing of insurgent groups, in the form of organization, command and control, training, communication and logistical support, has been the major factor in the level and duration of conflict elsewhere in the region, especially El Salvador. Both the domestic and foreign policies of the Sandinistas are at issue in the Contadora process, which is seeking a regional peace settlement among the five Central American states.

The United States seeks to change those policies in four ways that would benefit peace in Central America. We seek:

Termination of all forms of nicaraguan support for insurgencies or subversion in neighboring countries;

Reduction of Nicaragua's expanded military/security apparatus to restore military equilibrium in the region;

Severance of Nicaragua's military and security ties to the Soviet Bloc and Cuba and the return to those countries of their military and security advisers now in Nicaragua; and

Implementation of Sandinista commitments to the Organization of American States to political pluralism, human rights, free elections, non-alignment, and a mixed economy.

The United States has sought to achieve these objectives in two principal ways:

We have supported a verifiable and comprehensive implementation of the September 1983 Document of Objectives of the Contadora process as the best hope for achieving an enduring regional peace; and,

Consistent with Contadora principles,[2] we have urged the Sandinistas to enter into direct talks with the Nicaraguan democratic resistance and civil opposition.

U.S. SUPPORT FOR CONTADORA

As Secretary of State Shultz informed the International Court of Justice in August, 1984:

"The United States fully supports the objectives already agreed upon in the Contadora process as a basis for a solution of the conflict in Central America. The objectives of United States policy toward Nicaragua are entirely consistent with those broader agreed objectives and full and verifiable implementation of the Contadora Document of Objectives would fully meet the goals of the United States in Central America. . . ."

By design of Contadora's participants, the United States does not take part in the Contadora process. In October 1982, three months before Contadora's inception, the United States and seven other democratic states of the region sought to engage Nicaragua in a multilateral diplomatic dialogue. But the Sandinistas declined to receive the Costa Rican Foreign Minister, acting as emissary for the group, on the grounds that a dialogue with a group including the United States would be structured to its disadvantage. When Colombia, Mexico, Panama, and Venezuela subsequently initiated the Contadora process, they chose not to include the United States in order to meet this Sandinista concern. Informed of this decision through diplomatic channels, we indicated our understanding and support for this initiative.[3]

The means available to us to support these regional negotiations as a result are necessarily indirect. Our support has taken various forms. Since Contadora began, we have made it clear repeatedly, both publicly and privately, that we support Contadora objectives. The President expressed that support authoritatively on April 27, 1983, before a Joint Session of the Congress.[4]

---

[1] Aspects of these efforts are also treated in Part III of United States Department of State Special Report No. 132: " 'Revolution beyond Our Borders': Sandinista Intervention in Central America." September, 1985.

[2] The Document of Objectives and all three drafts of a Contadora agreement provide for dialogue to promote national reconciliation.

[3] Ironically, Nicaragua in time objected to Contadora on the grounds that the United States was not a participant. This was a major reason why the Manzanillo talks were undertaken. President Ortega is reported to have suggested U.S. participation in the Contadora process during meetings with other Latin American leaders in New York, in October, 1985.

[4] The President stated U.S. support again in a July 23, 1983 letter to the Presidents of Mexico,

Shortly thereafter the President created the position of United States Special Envoy for Central America to give focus to that support and make it more effective.

Former Senator Richard Stone served as Special Envoy from May 1983 to February 1984. Ambassador Harry W. Shlaudeman was appointed U.S. Special Envoy in March 1984 and has served continuously since that time. In twenty months Ambassador Shlaudeman has made 34 trips abroad and held 179 separate exchanges with ranking officials.

The United States sought to support Contadora directly during nine rounds of bilateral talks with the Government of Nicaragua June-December 1984. Those talks were undertaken at the request of the Contadora Group for the express purpose of facilitating a successful outcome of the Contadora process. Nicaragua sought to use the talks to negotiate a bilateral settlement with the United States in lieu of a Contadora agreement. In January 1985 the United States declined to schedule further discussions pending demonstration that Nicaragua was prepared to negotiate seriously within the Contadora framework.[5]

U.S. SUPPORT FOR NATIONAL RECONCILIATION IN NICARAGUA

National reconciliation through dialogue in countries with armed insurgencies is a fundamental principle of the Contadora process. It was explicitly accepted by all five Central American states, Nicaragua included, in the September 1983 Document of Objectives. Although they signed the document of Objectives, the Sandinistas have consistently rejected dialogue with the Nicaraguan democratic resistance.[6] The Sandinistas seek instead to portray the crisis in Central America as deriving from United States hostility toward the Nicaraguan revolution. We believe that the Sandinistas' refusal to deal directly with their own people and with the legitimate concerns of their neighbors constitutes a major roadblock to peace in Central America.

Both the internal and external opposition have proposed dialogue. On February 22 the internal opposition set forth the conditions under which a national dialogue could be successfully conducted. These included the lifting of the state of emergency;[7] freedom of expression; a general amnesty and pardon for political crimes; restoration of constitutional guarantees and the right of habeas corpus; guarantees of the safety of members of the resistance movement who participate in the dialogue; and the implementation of these measures under the supervision of guarantor governments.

On March 1 the externally-based opposition (including representatives of the FDN, the Miskito group MISURA, ARDE, and prominent democratic civilian leaders such as Arturo Cruz) proposed a national dialogue to be mediated by the Nicaraguan Catholic Church. It included a mutual in situ cease-fire and acceptance of Daniel Ortega as President until such time as the Nicaraguan people decided on the matter through a plebiscite. On March 22, the Nicaraguan Catholic Church hierarchy (Episcopal Conference) issued a communique reiterating its support for a national dialogue and declaring its willingness to act as a mediator.

President Reagan on April 4 undertook an initiative to support these possibilities. A key feature was the offer to refrain from providing military assistance to the democratic resistance if the Sandinistas accepted the March 1 offer. Although the Sandinistas rejected (and continue to reject) dialogue with the democratic resistance, the President's initiative did serve to focus attention on this fundamental issue.[8]

In the context of Congressional consideration of the Administration's request for humanitarian assistance for the Nicaraguan democratic resistance, the President in a June 11 letter to Representatives Robert Michel (R-Ill.), Dave McCurdy (D-Ok.), and Joseph McDade (R-Pa.) stated that:

"I recognize the importance that you and others attach to bilateral talks between the United States and Nicaragua. It is possible that in the proper circumstances, such discussions could help promote the internal reconciliation called for by Contadora and endorsed by many Latin American leaders. Therefore, I intend to instruct our special Ambassador to consult with the governments of Central America, the Contadora countries, other democratic governments, and the United Nicaraguan Opposition as to how and when the U.S. would resume direct bilateral talks with Nicaragua. However, such talks cannot be a substitute for a church-mediated dialogue between the contending factions and the achievement of a workable Contadora agreement. Therefore, I will have our representatives meet again with representatives of Nicaragua only when I determine that such a meeting would be helpful in promoting these ends."

Ambassador Shlaudeman conducted such consultations with the governments of Central America and the Contadora Group in visits to the region in late June and early July, and in early September with the governments of the Contadora Support Group (Argentina, Brazil, Peru, and Uruguay). The Contadora Group and Support Group governments generally favored resumption and the Contadora Group publicly called on the United States to do so on July 22. Costa Rico, Honduras and El Salvador did not favor such a course (Guatemala did not express a strong view one way or the other). These Central American countries argued that the Manzanillo talks had distracted from and undermined the primacy of Contadora talks where they are the negotiators; that U.S.-Nicaraguan bilateral talks legitimized Sandinista efforts to portray the Central American crisis as a U.S.-Nicaraguan conflict amenable to full resolution through arrangements between those two countries; and that it would be particularly inappropriate for the United States to resume such talks in the aftermath of Nicaragua's disruption of Contadora negotiations in June.[9] Ambassador Shlaudeman also discussed the question with the leadership of the United Nicaraguan Opposition, which opposed resumption in the absence of the Sandinistas undertaking a serious dialogue with UNO. The subject was also regularly discussed in meetings with other interested governments during this same period.

On July 26, 1985, in Mexico City, Secretary Shultz explained the U.S. attitude toward national reconciliation and a resumption of bilateral talks with the Sandinistas as follows:

"Nicaragua's purpose [in the Manzanillo talks], as now, was to negotiate bilateral accords dealing on a priority basis only with its security concerns. The Nicaraguan communists refused then, as they refuse now, even to consider dialogue with the Nicaraguan democratic resistance. These conflicting purposes were never reconciled and hindered progress from the start.

"The United States ultimately concluded that the talks were detracting from instead of contributing to a comprehensive Contadora settlement. In deciding in January of this year not to schedule further meetings we made it clear that we were not closing the door to their possible resumption under appropriate conditions. On June 11 the President made public his readiness to have United States representatives meet representatives of Nicaragua when such a meeting would promote a church-mediated dialogue between the contending factions in Nicaragua and a workable Contadora agreement. . . .

"We will continue to consult closely with all parties with a view to judging the appropriateness of a resumption of bilateral talks. We strongly urge Nicaragua to begin a church-mediated dialogue as proposed by the United Nicaraguan Opposition and to return to multilateral negotiations within the Contadora Process to continue work on a comprehensive and verifiable regional accord."

THE CONTADORA PROCESS IN 1985

As 1984 came to a close, two draft agreements were under consideration within the Contadora process: a September 1984 revision of a June 1984 draft; and an October 1984 draft (the "Tegucigalpa" draft) that defined the position of Costa Rica, Honduras, and El Salvador. Following a period of private consultations among the participating governments, the Contadora Group scheduled a resumption of negotiations for mid-February. Nicaragua's refusal to respect the right of asylum, however, created a dispute with Costa Rica that prevented the February meeting from taking place. The dispute was resolved in March 1985 through Contadora Group mediation, and negotiations among Central American plenipotentiaries resumed in April.

The April 11-12 meeting resulted in agreement in principle on revised verification procedures. All five Central American governments reserved the right, however, to propose modifications. A second meeting, May 16-18, was devoted primarily to discussion of approaches suggested by the Contadora Group for resolving outstanding security issues. The May meeting focused in particular on those elements of the October

---

Panama, Colombia, and Venezuela—the four Contadora Group countries.

[5] See "Revolution Beyond Our Borders," pages 29-30.

[6] The following statement by Tomas Borge, quoted in Daily Barricada, June 27, 1985, is characteristic: "We will negotiate with the Contras on the day the right wing parties and COSEP count all the grains of sand in the sea and all the stars in the sky. When they finish we will ask them to count them all again."

[7] First imposed in March 1982; additional civil liberties were suspended October 15, 1985.

[8] The President's April 4 initiative is described in: (1) "President Reagan Supports Nicaraguan Peace Process," United States Department of State Current Policy No. 682, April 4, 1985; (2) "U.S. Support for the Democratic Resistance Movement in Nicaragua," April 10, 1985: Unclassified Excerpts from the President's Report to the Congress Pursuant to Section 8066 of the Continuing Resolution for FY-1985, PL 98-473; (3) "The New Opportunity for Peace in Nicaragua; "April 17, 1985: Prepared Statement by Assistant Secretary of State Langhorne A. Motley, before the Subcommitte on Western Hemisphere Affairs of the House Committee on Foreign Affairs; and (4) "The Nicaraguan Peace Process: A Documentary Record;" Department of State Special Report 126,April 1985.

[9] See discussion of June Contadora meeting below.

1984 "Tegucigalpa" proposals of Honduras, Costa Rica, and El Salvador that the Contadora Group judged could be incorporated into the September 7 draft without difficulty. There reportedly was consensual acceptance of some of these non-controversial suggestions, particularly in the preambular section of the working draft.

At the conclusion of the May meeting, the Contadora Group governments circulated a proposal to resolve the more difficult security issues for consideration at the next meeting, in June. When the June meeting convened, the Nicaraguan delegate insisted that Contadora discuss renewed U.S. support for the Nicaraguan democratic resistance and refused to discuss the Contadora compromise proposal. Contadora Group efforts to have the Nicaraguan delegation reconsider were unsuccessful. In this situation, the June meeting was adjourned.

Nicaragua's disruption of the June meeting caused a suspension in the plenipotentiaries' negotiations that was to last four months. In July, the Contadora Group foreign ministers met in Panama to consider how the damage could be repaired. In a July 22 communique the Contadora Group Foreign Ministers announced their intention to consult bilaterally with each of the Central American governments in lieu of resuming talks.

The foreign ministers also called on Nicaragua and the United States to resume bilateral talks and on Costa Rica and Nicaragua to initiate a bilateral dialogue on a continuing series of Sandinista Army incursions into Costa Rican territory. After protesting innumerable such incidents in bilateral channels in vain, Costa Rica was prompted by a May 31 incident in which two Costa Rican Civil Guardsmen were killed on Costa Rican soil to seek an OAS investigation and condemnation of Nicaragua. The investigation established the facts, which pointed to Sandinista Army responsibility for the deaths. The OAS report refrained from stating that conclusion explicitly, however, and the OAS resolution deplored the incident instead of condemning Nicaragua and endorsed Nicaraguan and Costa Rican bilateral border talks within the Contadora framework. Costa Rica, which has relied on the Inter-American System for its national security, felt let down by the lack of forceful action and has been unwilling to hold the talks unless the Sandinistas satisfactorily explain the incident. Further incidents—in which Sandinista planes dropped bombs and fired a rocket into Costa Rican territory—took place on July 26 and August 21.

Three of the Central American governments—Costa Rica, Honduras, and El Salvador—on August 1 welcomed the visit of Contadora Group vice ministers and jointly proposed that the negotiations among plenipotentiaries should be reconvened as a prior step to developing a third draft. They proposed that the talks be strengthened by meeting in more prolonged sessions that would give the meetings a "permanent character." Following consultations August 3-8 between the Contadora Group vice ministers, Costa Rica, Honduras, and El Salvador formally reiterated this proposal September 4. The three governments also stated their view that the key remaining issues to be resolved were national reconciliation, arms and troop level reductions, and verification.

Nicaragua's disruption of the June meeting and the suspension of plenipotentiaries' talks produced generalized concern that the Contadora process was in difficulty. Special Envoy Shlaudeman consulted with the Contadora Group and democratic Central American governments following the aborted meeting in June to urge that the meetings of plenipotentiaries be reconvened. Ambassador Shlaudeman also expressed the U.S. view that any procedural or substantive inducement to Nicaragua to return to the process would invite further disruption and counseled patience. Ambassador Shlaudeman was asked by one Contadora Group government if the United States would, at an appropriate opportunity, publicly reaffirm its support for the Contadora process. The Secretary of State Shultz did so on July 26, in Mexico City:

"The United States fully supports efforts to achieve a political solution to the Central American crisis. We have given strong support to the efforts of the Central Americans themselves, assisted by the Contadora Group, to achieve a negotiated settlement. In our view, there exists in the Contadora Document of Objectives a fair, comprehensive and balanced framework for such an outcome. We expressed our support for a comprehensive and verifiable implementation of the Document of Objectives when it was agreed in September 1983. We reaffirm that support today."

The suspension of talks prompted expressions of support for Contadora from other governments as well. Following consultations with the Contadora Group governments, the governments of Argentina, Brazil, Peru, and Uruguay on July 28 formed a "Contadora Support Group." The foreign ministers of these governments met with the Contadora Group foreign ministers in Cartagena, Colombia August 23-25 to consult on how that support could be provided most effectively. A joint communique issued by the eight governments stated that there would be regular consultations among the governments in support of the negotiating process but did not, by mutual agreement, contemplate the direct participation of the Support Group governments in Contadora deliberations.

Ambassador Shlaudeman visited Buenos Aires, Montevideo, Brasilia, and Lima, the four Support Group capitals, September 10-13 to convey U.S. support for Support Group activities. The Department of State had made an official statement on August 26 welcoming formation of the Support Group, following the meeting in Cartagena. In his discussions, Ambassador Shlaudeman suggested it would be useful for the Support Group to consult directly with all the Central American governments; to urge the Sandinistas to accept the proposal of the United Nicaraguan Opposition for a church-mediated dialogue; and to meet directly with UNO leaders to form first-hand judgments as to their purposes and programs. He also briefed the Support Group governments on the Manzanillo talks and outlined United States views on the requirements for an effective and lasting peace in the region.

Costa Rica, Honduras, and El Salvador jointly requested a meeting with the Support Group governments during a September 12-13 meeting of Contadora process foreign ministers in Panama. The Support Group foreign ministers declined the request, however, out of concern that such a meeting not interfere with the Contadora process itself.

The four Contadora Group foreign ministers presented the five Central American foreign ministers a third draft of a Contadora agreement at a meeting in Panama September 12-13. The nine ministers agreed to convene negotiations on October 7, 1985 with the aim of reaching final agreement in a period not to exceed 45 days.[10] It was also agreed that discussion would be devoted exclusively to the timing of entry into effect and duration of commitments; control and reduction of armaments; verification in security and political matters; military exercises; and operational matters that must be addressed in order to implement an agreement. It was further agreed that incidents or developments in the region would not be discussed in the meetings or condition the participation of any delegations. The Contadora Group ministers stressed that the Central American states have exclusive responsibility for reaching agreement.

The first round of talks were held October 7-11, 1985 on Contadora Island, off the coast of Panama. A second round of talks was held October 17-19.[11] A third round is currently scheduled for November 6-9. While various delegates have characterized the talks in comments to reporters, the participating governments have refrained from issuing any joint statements or communiques.

U.S. DIPLOMATIC CONTACTS WITH NICARAGUA

The United States has continued, since declining to schedule further meetings in the Manzanillo talks, to have diplomatic contacts with Nicaraguan government officials, in Managua, Washington and other capitals. Secretary Shultz, for example, met with Nicaragua President Ortega March 2 in Montevideo, during the inauguration of President Sanguinetti. Vice President Bush spoke with President Ortega during the inauguration of President Sarney of Brazil March 16. There have been a number of contacts between Ambassador Bergold and Sandinista Government officials, as well as contacts at a lower level. In Washington, there have been meetings between Nicaraguan Ambassador Tunnermann and National Security Council officials and with Assistant Secretary of State for Inter-American Affairs Elliott Abrams.

The United States sought a meeting for Ambassador Shlaudeman with a high-level Nicaraguan official on the margins of the United Nations General Assembly this fall. The Nicaraguan Government initially accepted a meeting between Ambassador Shlaudeman and Assistant Secretary Abrams and Foreign Minister D'Escoto. The Nicaraguan Government then proposed, however, to send a lower ranking official to the proposed meeting. Ultimately, Nicaragua accepted the U.S. suggestion that Ambassadors Shlaudeman and Tunnermann meet in Washington. The two ambassadors met on October 29 and October 31, 1985.

In the October 29 meeting Ambassador Shlaudeman informed Ambassador Tunnermann that the United States would be prepared to resume bilateral talks if the Sandinistas were to accept the March proposal of the United Nicaraguan Opposition for a church-mediated dialogue and cease-fire. Ambassador Shlaudeman said that progress in this dialogue would make it possible to resolve U.S.-Sandinista bilateral problems. Ambassador Tunnermann responded on October 31 that the Government of Nicaragua

[10] It has been suggested by some Contadora Group government officials that this refers to negotiating, not calendar, days.

[11] Several delegations noted the presence on Contadora Island during the talks of German Sanchez, an official of the Americas Department of the Cuban Communist Party.

rejects dialogue with the democratic resistance.

THE PRESIDENT'S INITIATIVE ON REGIONAL CONFLICTS AND THE U.S.-SOVIET EXPERTS' TALKS

On October 24, in his address to the United Nations General Assembly, President Reagan presented an initiative on regional conflicts that is intended, in part, to support the Contadora process and an end to the conflict in Nicaragua.

President Reagan's initiative aims at achieving peace and internal reconciliation, ending foreign military involvement, and fostering economic reconstruction in five of the most pressing international conflicts: Afghanistan, Cambodia, Angola, Ethiopia and Nicaragua.

The President's plan sets forth a comprehensive and flexible framework for cooperation toward these goals among the warring parties themselves, between the U.S. and the Soviet Union, and among other interested parties. The plan, which would complement and bolster existing peace-making efforts, involves action at three levels:

The starting point is a process of negotiation among the warring parties themselves. "The form of these talks may and should vary," the President explained, "but negotiations—and an improvement of internal political conditions—are essential to achieving an end to violence, the withdrawal of foreign troops and national reconciliation."

The second level involves joint United States-Soviet talks about how best to support the ongoing talks among the warring parties, when those negotiations make genuine progress. "In every case," the President said, "the primary task is to promote this goal: verified elimination of the foreign military presence and restraint on the flow of outside arms."

The third level entails an international effort to welcome these countries back into the world economy. The President pledged the United States would respond generously to their democratic reconciliation with their own people, their respect for human rights, and their return to the family of free nations.

This plan puts the primary responsibility on the parties in conflict themselves to reach accommodation; as the President points out, it is not for the United States or the Soviet Union to impose solutions. Yet it also provides a framework for the Soviet Union to cooperate with the United States in helping to bring peace to Nicaragua.

Pursuant to a 1984 presidential proposal, the United States and the Soviet Union held experts' talks on Central America and the Caribbean October 31-November 1 in Washington. The talks were the fifth in a series of such exchanges on regional issues. Previously experts' meetings (at the level of Assistant Secretary) treated East Asia, Afghanistan, the Middle East and Southern Africa.

The purpose was to clarify U.S. policy, making it clear that the United States intends to defend its interests, and thereby reduce the possibilities of unnecessary conflict. The talks held so far have been useful in understanding the Soviet position and making the Soviets understand the U.S. position. As the foregoing indicates, the experts' meetings were held under the rubric of the President's 1984 proposal, not the 1985 initiative on regional conflicts, and were in no sense negotiations.

ECONOMIC AND TRADE MEASURES

Both the National Bipartisan Commission on Central America and the Congress have recommended use of trade and economic measures to promote a resolution of the conflict in Central America and Nicaragua, and we have regularly consulted with our trading partners and allies on this question. Positive economic incentives for Nicaragua to resolve its internal conflict have formed an integral part of every proposal the United States has made to the Sandinistas since they came to power in 1979. The President's October 24 initiative on regional conflict (see above) proposes generous economic aid where democratic national reconciliation takes place.

Even prior to the United States embargo imposed in May, 1985, Nicaraguan trade with the United States, Latin America, and other traditional trading partners had been declining because of Nicaragua's lack of credit worthiness. The composition of foreign aid to Nicaragua had also changed dramatically, with the Soviet Bloc replacing the West as primary credit suppliers and as aid donors. Any increased aid from Western donors is likely to go to regional institutions such as the Central American Bank for Economic Integration (CABEI). Neither CABEI nor most of the multilateral financial institutions are presently approving new loans to Nicaragua owing to its serious payment arrearages to many of these institutions. Nicaragua's dependence on the Soviet Union and its allies is expected to continue to increase, although not at levels sufficent to offset its economic decline.

HUMAN RIGHTS ISSUES

THE NICARAGUAN DEMOCRATIC RESISTANCE

The Sandinista regime's intolerance of dissent has resulted in a growing democratic resistance movement in Nicaragua. The most prominent leaders of this movement had been leaders of democratic sectors in the broad coalition which eventually overthrew former Nicaraguan President Anastasio Somoza. They were forced into opposition by the Sandinistas' betrayal of the promise of a pluralistic system, one of the principal goals for which the 1979 revolution was fought. Refusing to pursue internal reconciliation, the Sandinistas instead have taken increasingly repressive measures to silence the democratic opposition and consolidate a totalitarian system. As a result, increasing numbers of Nicaraguans from all walks of life have felt compelled as a last resort to take up arms against the regime. Today, the democratic resistance has approximately 18,000 men and women under arms and shows every indication of continuing to grow in strength.

Resistance forces have been charged by the Sandinista regime with a wide range of human rights abuses, from forced recruitment to rape and summary execution. These allegations have received broad coverage in the government-owned media and have been disseminated abroad through international human rights organizations and foreign groups active in Nicaragua and sympathetic to the Sandinista regime. Many of these allegations are either false or greatly distorted. Some excesses, however, including instances of forced recuritment and summary execution of military prisoners or, in certain cases, Sandinista officials and regime informers, may well have occurred. It is also clear that individual soldiers in the course of combat have committed random abuses or atrocities. Such violations are unacceptable, and resistance leaders are keenly aware of the necessity of improving the performance of their troops in this area. The principal resistance group, the United Nicaraguan Opposition (UNO), has taken measures to eliminate human rights violations committed by soldiers subordinate to its direction.

As in any conflict, there has been a serious lack of reliable information on human rights abuses that occur in isolated combat zones. While UNO has begun to record instances of abuse by its personnel, as well as remedial or punitive measures taken in response, such information was not in the past collected on a systematic basis.

Heretofore, the only regularly received allegations of resistance violations have come from Sandinista sources. These allegations have been biased, grossly exaggerated and often false. This conclusion is supported by residents in communities where atrocities allegedly have been committed and by the testimony of Sandinista defectors who were directly involved in implementing official policy. A key element in the Sandinista campaign has been the fabrication of charges of human rights abuses and, in some cases, attribution to the resistance of atrocities actually committed by Sandinista forces. The following cases illustrate these tactics:

In April 1985 U.S. Embassy personnel in Honduras, seeking information concerning resistance abuses, interviewed a number of Nicaraguan refugees. One woman related that a Cuban operating with Sandinista troops had executed seven farmers in her home village in December 1983 after an attack by the resistance. The farmers were considered resistance sympathizers by the authorities. The murders were publicly attributed by the authorities to the resistance. The true facts were later circulated by residents who had witnessed the killings.

In a complaint filed through his mother in the summer of 1985 with the independent Permanent Commission on Human Rights, a Sandinista soldier stated that he had been severely pressured by military authorities to issue statements claiming he had been abused while held captive by the resistance. He said that although he had been exposed to resistance political views, he had been well treated and given medical assistance. He was asked if he wanted to join the resistance, but when he refused he was escorted some distance from the camp and released. The soldier refused to make the statements sought by the authorities. He was then beaten badly and turned over to State Security. The soldier stated that he had been warned that he would be held in jail until he cooperated with the authorities in their disinformation campaign.

A Sandinista Army deserter, now fighting with the resistance, said he decided to go over to the other side when his unit carried out orders to execute two campesinos specifically for the purpose of blaming yet another atrocity on the "Contras."

According to those on the scene, a government press story that FSLN and neighborhood defense committee members had been brutally murdered in an August 1, 1985 "Contra" attack on Cuapa was false. Witnesses said the encounter was a military-to-military engagement which left a number of Sandinista soldiers dead; there were no civilian casualties. Following the fight, the resistance troops held a town meeting with residents, after which they left. Nevertheless, there were press reports that the "Contras" had not only murdered innocent civilians, but skinned their faces. It appears that the Sandinistas mutilated the bodies of some of their own casualties to substantiate such a charge.

The incidents cited above represent cases where available information suggests that the facts have been purposely distorted by the Sandinista regime. In most instances, however, it is not possible to confirm or deny allegations presented by the regime, a situation that should be partially remedied by more complete information being collected by UNO.

There is reason to believe that the resistance has in the past abducted civilians. Statements from a number of sources who have themselves been taken by the resistance indicate a pattern in which civilian prisoners, under reasonable humane circumstances, are exposed to "political indoctrination" (i.e. lectures on resistance goals, abuses of authority by the Sandinistas, etc.), given food and medical treatment, and offered one of three choices: joining with the resistance; accepting refugees status in another country; or returning to their homes.

An example is provided in the case of seven members of Sandinista "education brigades"—squads of young adults who provide basic education in rural areas—who were taken prisoner by the resistance at various times and places. Rather than return home, they have chosen to remain with the armed opposition. In letters sent to their families through the Red Cross in April 1985, the former brigadistas speak openly of their opposition to the policies of the Sandinista regime and their desire to see a free and democratic Nicaragua. Several of them vociferously reject allegations of opposition abuses. The Sandinistas continue to use the "kidnapping" of these and other brigadistas in propaganda charges against the resistance.

There have been civilian casualties from resistance attacks, in some cases as a direct result of the Sandinista policy of placing civilians in situations in which they are likely to be endangered during attacks on legitimate military targets. This was true, for example, in the July 1985 deaths of eight women who were being transported in a military vehicle, along with soldiers, to visit their sons at the front.

There is no reliable information to confirm that military prisoners have been executed by resistance forces, although such executions may have occurred. Summary executions are contrary to accepted rules of conflict, regardless of the circumstances contributing to the practice.

Since its establishment in June 1985, UNO has taken steps to prevent human rights violations by establishing an office of human rights to educate troops on proper conduct towards both civilians and prisoners of war. During their basic military training, UNO troops receive one hour of instruction daily on human rights based on the Geneva Conventions, the American Convention on Human Rights, UNO's "Code of Conduct," and the "Manual of the Combatant." The "Manual of the Combatant" emphasizes humane treatment of enemy prisoners and wounded and respect for the property and well-being of innocent civilians. UNO's "Code of Conduct" sets forth specific punishments for criminal acts, including those against civilians.

Arturo Cruz, a member of the UNO Directorate, has been assigned special responsibilities for overseeing measures to promote respect for human rights by UNO forces. Ismael Reyes, the former President of the Nicaraguan Red Cross, has been named head of the UNO Human Rights Commission. UNO has also created a "red cross" society to promote the humane treatment of military prisoners. In establishing this informal "red cross" society, UNO leaders have emphasized in communications with the International Committee of the Red Cross the organization's intent to abide by the provisions of the Geneva Convention of 1949, in particular those regarding the humanitarian treatment of prisoners, enemy wounded and civilians.

UNO/FDN also has corresponded with the International Committee of the Red Cross to institute a regular mechanism under which prisoners can be released and/or exchanged. Although a decision is pending on the UNO/Nicaraguan Democratic Force (UNO/FDN) request for assistance in this endeavor, a number of prisoners have already been released. On May 13, 1985, 17 prisoners were released in the presence of witnesses in the towns of La Batea, El Espabel and El Cacao. Another nine were set free on September 19, again in the presence of witnesses, in the Somotillo/Rio Negro area of Chinandega Department. While comprehensive information is lacking concerning conditions of imprisonment, it is possible to confirm that some, such as the Sandinista soldier mentioned earlier, are detained under humane conditions.

UNO has provided Red Cross offices lists of Sandinista prisoners and dead and information regarding persons reported missing. It has forwarded letters from Sandinista prisoners. UNO has also invited the Inter-American Commission on Human Rights to send a representative to observe the conduct of its forces in the field.

A recent report prepared by the Director of the UNO Commission of Human Rights reviews twenty-one cases in which members were accused under the "Code of Conduct" of crimes ranging from theft to homicide and lists punishments accorded those found guilty. Of the 21 persons whose court-martials are addressed in the report, 19 were convicted and two found innocent. The two murder cases were a case of accidental shooting and a "crime of passion" involving only members of the FDN. In one of the cases, the defendant had stolen a horse and a pistol from a Nicaraguan civilian. Because of his mistreatment of a civilian, the normal two-year sentence was doubled.

Nineteen UNO/FDN combatants are reported currently held in detention facilities at resistance camps, serving sentences imposed in accordance with the "Code of Conduct." resistance members have also been expelled from the movement for criminal actions which may have involved human rights abuses. The punitive measures taken against human rights offenders and the efforts underway to improve the resistance record clearly indicate that the resistance leadership does not condone human rights violations and has taken positive action to prevent their occurrence.

THE SANDINISTA REGIME

On October 15, Daniel Ortega announced a new State of Emergency suspending virtually all civil liberties in Nicaragua. The decree signaled an escalation in the assault on basic freedoms, providing further legal underpinning to the consolidation of a totalitarian regime. The 1982 State of Emergency was partially lifted in 1984 as part of pre-election atmospherics; in reality, the policy of intolerance towards dissent continued in force through arbitrary arrests, detentions, and interrogations and the forcible disruption of religious, political, private sector, and labor activities. The new decree suspends the following rights and freedoms:

"Freedom of expression; freedom of the press; the right of assembly; the right to trial by jury; the right to be considered innocent until proven guilty; the right of habeas corpus; freedom from arbitrary imprisonment; freedom of movement; the right to form labor organizations and to strike; the right to found and advance community, rural and professional organizations; and the right to found and advance cooperatives.

It was subsequently clarified in the National Assembly on October 30 that certain rights are to remain in effect—the right to a jury, the right to an attorney, and the right to habeas corpus—but only for those not accused of crimes against "the security of the nation and public order." The decision as to what constitutes a crime against national security or public order rests with the Sandinista authorities, and it is apparent that ordinary political and civic activities are being placed in that category.

The Sandinistas have offered several rationales for the further oppression of the Nicaraguan people, among which they include the need to protect the public against the armed resistance. There would seem to be a striking inconsistency in attempting to close ranks against an opponent—particularly one allegedly enjoying little or no public support and whose defeat, according to the regime, is imminent—by launching an assault on the public at large. Analysis of the rising level of domestic unrest in the months preceding the announcement suggests that the actual motive was a sense that diminishing public support for regime policies had reached a dangerous level.

The crackdown was particularly directed at the Catholic Church, traditionally one of the strongest institutions in Nicaragua. The October 15 decree followed a series of Sandinista actions against the Catholic Church, including the forced induction of eleven youths preparing for the priesthood; armed raids on the broadcasting facilities of Radio Catolica and disruption of transmissions of Cardinal Obando y Bravo's homilies; confiscation of the newly-published Church newspaper La Iglesia and seizure of the printing equipment used in its publication; and occupation of the Church Curia Social Services offices. The authorities have now intensified the attack not only on the Church—some of the most prominent leaders of which have been vilified as counterrevolutionaries in the government press—but on virtually all other sectors of the opposition.

Agents of State Security have rounded up leaders of political, private sector, labor, and Church organizations, subjecting them to interrogations and threatening further action should they fail to observe the new prohibitions. One labor group, the Nicaraguan Workers Central (CTN)—associated with the Social Christian Party—has been closed down and three of its officials arrested and interrogated; political leaders have been warned against the issuance of public statements or holding of political meetings; and thousands of worshippers have been prevented by force from attending masses given by Cardinal Obando. Over a hundred persons have been rounded up and paraded as the centerpiece in the Sandinista campaign against the "internal front," another justification offered by the Sandinistas for their actions against the public. The policies now in force are clear evidence of the regime's totalitarian goals, and underscore the growing level of popular alienation from the regime.

A sinister backdrop to these actions has been provided by the revelations of a recent Nicaraguan director, Jose Alvaro Baldizon. The former chief investigator of the Special Investigations Commission, an immediate subordinate to Interior Minister Tomas Borge, Baldizon has offered detailed information, as well as supporting documents, indicating that the Sandinista regime engages in massive violations of human rights as a matter of policy. According to investigations carried out by Baldizon himself, the regime has sanctioned the summary execution of hundreds of Nicaraguans perceived to be "potential enemies of the revolution."

Specific cases investigated by Baldizon concern the application of "special measures" (execution) to 150 Miskito Indians and 300 campesinos, religious activists and political opponents. The most well-known of the Sandinistas' victims was Jorge Salazar, former Vice President of the Superior Council of Private Enterprise (COSEP), who was gunned down by State Security in 1980. Baldizon stated that weapons were placed in Salazar's vehicle after he was killed to lend credence to the charge that Salazar was planning armed insurrection in Managua. Baldizon further states that the policy of assassination has not been codified in a strict and highly-secret system of regulations governing the selection and execution of "potential enemies," authorization for which must be obtained in writing from Interior Minister Borge or his first deputy, Luis Carrion.

Baldizon's charges do not stand alone. They are complemented by a considerable body of information concerning Sandinista atrocities, some of which confirms the specific cases cited by Baldizon. The following examples represent only a small part of the information available on such abuses:

On April 16, 1985, forces of the armed resistance attacked the Atlantic Coast town of Bluefields, during the course of which they freed prisoners held at the local garrison. While some of those freed fled with the resistance when the Sandinistas counterattacked, about 20 unarmed youths took shelter under a building. The Sandinista Army took the prisoners into custody. Town resisents testify that the bodies of all of the youths were subsequently seen in a pile of "contra" corpses put on display as an example to local residents.

The Sandinistas have carried out extensive mining of border areas and around villages vacated at their orders. Although the ostensible purpose of the mining is to deny use to resistance forces, in fact many of the victims have been persons fleeing to the safety of Honduras. Indian villages in Mosquitia were similarly mined, and Indian guerrillas have stated that at least six persons have been killed by the mines when returning to their homes under Sandinista auspices.

According to a complaint filed with the Sandinista-sponsored human rights commission, several persons at the Carcel Modelo at Tipitapa went on a hunger strike in January 1985 to protest their continued detention on charges of which they were innocent and the conditions under which they were being held. As a result, they were brutally beaten, tortured, and held in isolation. There are other reports of mass executions of prisoners, including eight who headed an uprising at the Zona Franca prison in 1981.

Another complaint, filed with the independent Permanent Commission on Human Rights, relates the torture of Sofonios Cisneros Leiva, a 60-year old engineer and community leader, at State Security facilities. Cisneros was arrested the night of May 14, 1985, following a meeting he organized to discuss parental concerns over the forced Marxist indoctrination of their Church-schooled children. Cisneros was tortured by Lenin Cerna, head of State Security, who threatened to kill Cisneros, warned him to remain silent concerning his arrest, and had him dropped off naked on the Masaya highway.

According to residents in several villages, Sandinista troops have conducted deliberate attacks on civilians in order to attribute the atrocities to the resistance. For example, in March 1985 a hand grenade was thrown by Sandinista troops into a house at Los Cerritos, killing a husband and wife and their two children. In other cases, the forcible relocation of families from areas of popular support for the resistance has been accompanied by the burning of family homes and possessions, slaughter of livestock, and physical brutality against those reluctant to depart. There have been reports that persons who have refused to leave have been shot as an example to others. Resistance forces frequently report the use of indiscriminate fire by the Sandinistas in counterattacks, leading to the deaths of numerous civilians.

A Nicaraguan employee of the United Nations, Javier Ivan Blandon, disappeared while on a visit to Managua in January 1985. We understand he had come into conflict with the Sandinistas over his travel documents. Blandon's body was later returned to his family in a sealed coffin, with the official explanation that he had been killed in an Air Cubana crash. His name was on a passenger list shown to the family. Baldizon states that Blandon was murdered by State Security, and that the cooperation of the Cubans was enlisted in having his name added to the passenger list of a recent airline crash.

Martha Lidia Murillo Vallejo, a nine-year old from Jinotega, related to Honduran authorities that her father was shot by the Sandinista military in November 1984 while he and the family were picking coffee. The reason: he had refused to join the military. The rest of the family, including children, fled from the scene and were also killed. Martha escaped and hid with her uncle, who later took her to the Honduran border. There he was shot by Sandinista soldiers, and Martha was bayoneted in the neck. When she regained consciousness, she was hit in the head with a rifle butt and left for dead. She was found by resistance forces, who carried her to a nearby home. The facts of the massacre were confirmed by an official from Jinotega.

In July 1985, Sandinista soldiers near San Isidro reportedly tortured to death Ismael Cantarero because he refused to join the Patriotic Military Service. Cantarero's hands and feet were cut off.

Although the incidents related above represent only a fraction of the evidence available concerning the deliberate violation of basic human rights by the Sandinistas, there has been remarkably little publicity given to these abuses. Indeed, several reports from private human rights organizations and activists either ignore entirely Sandinista abuses or dramatically understate the significance of those abuses. Statements by Baldizon and other Sandinista defectors indicate that this imbalance is at least partially a result of a skillful, highly-organized official disinformation program.

Mateo Guerrero, a former Executive Director of the Sandinista-sponsored human rights commission (CNPPDH) who has received asylum in the United States, has publicly discussed the way in which the organization has evolved into a a propaganda tool for the regime. While the CNPPDH has always faced serious restrictions on its ability to investigate allegations of official abuses, in January 1985 CNPPDH was specifically ordered by the Foreign Ministry to cease any further efforts to do so. Guerrero further states that on several occasions reports actually written by the Foreign Ministry were published as CNPPDH documents. CNPPDH was instructed to lend full assistance to persons or groups favorably disposed to the regime who were preparing human rights reports.

In the case of Reed Brody, a New York attorney, this assistance included the payment of all expenses, including food and lodging, provision of a chauffeured car, arrangement of all interviews and provision of a list of "appropriate" cases for investigation. Mr. Brody nevertheless explicitly stated in his introduction to the study "Attacks by the Nicaraguan 'Contras' on the Civilian Population" that, although the idea for the report was conceived by the law firm of Reichler and Appelbaum (a registered agent of the Sandinista regime), neither he nor any other member of the investigations team received any form of compensation or reimbursement for their expenses, travel and living expenditures having been paid by the team members themselves. Brody's disclaimer conceded only that the team stayed in a house belonging to the regime for "part" of the visit and had used office space provded by CNPPDH. Another defector has stated that Brody selectively edited his evidence to eliminate any statements supportive of or favorable to the resistance. As a rule, inquiries to the CNPPDH and other official agencies from human rights organizations concerning allegations against the regime are satisfied by providing deliberately false information deflecting or significantly mitigating the charges.

In an effort to ensure the "correct" ideological perspective within CNPPDH, two purges of membership have been engineered by the regime. By 1982, many of the original members were replaced, in some cases because their defense of human rights per se was too vocal and too independent. Edgar Macias, a leader of the Popular Social Christian Party, went into exile after being labeled a "U.S. intelligence agent." He was followed by Ismael Reyes Rojas, president of the Nicaraguan Red Cross, whom the Sandinistas accused of embezzlement and counterrevoilutionary activity. In July 1985, following Guerrero's defection, the entire membership was changed. The new members were all staunch supporters of the FSLN.

In further illustration of the CNPPDH's role as a propaganda arm, we note that in 1984 only two reports were issued, both of which addressed only allegations of resistance abuses. Concerning the regime, the documents stated only that it "was operating under a declared state of emergency." In 1985, no reports had been issued as of August. On the other hand, if the CNPPDH does not carry out investigations into abuses, it does play a vital role in meeting with foreign delegations for the purpose of denouncing the resistance. In January 1985, Alejandro Bendana of the Foreign Ministry announced to CNPPDH members that he would personally direct the group's activities in order to promote an international of-

fensive by the Sandinistas to denounce alleged abuses of the resistance.

Baldizon adds counterpoint to Guerrero's report, stating that the CNPPDH was routinely denied access to any information concerning official abuses. He explained that his own extensive investigations were used to create elaborate cover stories, precise to the detail, which explained away Sandinista atrocities by showing the victims had fled to other countries, been killed by the resistance, or been killed while escaping. In a few instances, for the sake of credibility, individual soldiers were "found guilty" of abuses and brought to justice in show trials at which they received lengthy prison terms. (Baldizon states that these men were later quietly released, after attention had subsided, and sometimes were given government jobs in other areas of the country.) Such disinformation has been regularly disseminated to international human rights organizations.

HUMANITARIAN ASSISTANCE FOR THE NICARAGUAN DEMOCRATIC RESISTANCE

On August 29, 1985, the President signed Executive Order 12530 creating the Nicaraguan Humanitarian Assistance Office (NHAO) for the purpose of disbursing $27 million in humanitarian aid to the Nicaraguan democratic resistance. On September 9, the President designated Ambassador Robert W. Duemling as Director of NHAO.

The NHAO staff consists of the Director, five supervisory and two clerical personnel, all detailed on a non-reimbursable basis from federal agencies (State, AID and USIA), with the exception of the Director, whose salary is reimbursed to State from the humanitarian assistance program funds. Office space in a government-leased building is charged to program funds, but furnishings and equipment have been borrowed at no charge. Administrative support, including legal advice from the Office of the Legal Adviser, is provided by the Department of State.

The Executive Order assigned responsibility for policy guidance to the Secretary of State and his designees. The Secretary has established a Senior Inter-Agency Group, chaired by the Under Secretary for Political Affairs, to establish basic policy and exercise oversight of NHAO activities; policy guidance for day-to-day NHAO operations is provided by the Assistant Secretary of State for Inter-American Affairs, who chairs an inter-agency group that assures effective coordination.

As a matter of policy, the United Nicaraguan Opposition (UNO) was designated to be the initial recipient for humanitarian assistance distributed by NHAO. UNO is an umbrella organization which brings together the largest number of anti-Sandinista political and paramilitary elements. It is led by Adolfo Calero, Arturo Cruz and Alfonso Robelo; its principal components include the Nicaraguan Democratic Force (UNO/FDN), the Armed Forces for Revolution in Nicaragua (UNO/FARN), and a coalition of Atlantic Coast Indians and Creoles (UNO/KISAN). Using UNO as a conduit for assistance serves the policy objective of encouraging cohesion within the democratic resistance; it also simplifies administrative procedures and restrains administrative costs.

METHOD FOR FUNDING

NHAO is disbursing funds for four basic categories of goods and services: food, clothing, medicine and medical care, and equipment. NHAO also provides funds for transporting supplies to the field.

Funds for these goods and services are being provided to UNO through a series of grants, each of which obligates a fixed amount of humanitarian assistance funds for the use of UNO, subject to certain terms and conditions. While the grant gives UNO a conditional legal entitlement to the funds, NHAO retains actual possession of the funds and administers their disbursement. To date, three major grants totaling $5.5 million and a smaller grant of $25,000 have been issued. Once a grant has been issued, UNO identifies the goods or services it needs and a suitable vendor, and negotiates the terms of a proposed sale to UNO. These terms are set forth on a pro forma invoice which UNO submits to NHAO. The pro forma invoice is reviewed by NHAO to ensure that the goods or services are humanitarian assistance within the meaning of the law, and that the payment requested is appropriate for value received. NHAO also monitors the quantity of items, to assure against an oversupply so substantial as to suggest a possible risk of diversion. If the proposed purchase is approved, NHAO authorizes UNO to make the purchase. NHAO signals its approval to the vendor through issuance of a letter of commitment. After shipment or delivery has been verified, NHAO pays the vendor directly from UNO grant funds.

Monitoring and verification of procurement and delivery take several forms, depending on location. Within the United States, NHAO representatives are able to make on-site inspections of supplies as they are aggregated for shipment to the field. To monitor supplies and services contracted and delivered abroad, NHAO relies on reports from all available sources to confirm that actual transactions conform to the relevant documentation.

DELIVERY INCIDENT

On October 10, an UNO charter flight paid for by NHAO carrying supplies purchased under NHAO auspices landed apparently without permission in Tegucigalpa, causing the Honduran Government to take custody of the cargo. Discussions between the American Embassy and the Honduran Government resulted in the cargo being released and returned to the United States.

SUMMARY OF PAYMENTS

Following is a summary of NHAO disbursements and commitments to pay, through October 31, 1985.

NAHO Grants to UNO (to be disbursed through letters of commitment): Grant 601, $1,000,000 (Issued October 3, 1985); Grant 602, $1,500,000 (Issued October 15, 1985); Grant 603, $3,000,000 (Issued October 29, 1985); Total $5,500,000.

In addition to the above three grants for food, clothing and medical supplies, NHAO issued a small fourth grant signed October 17, 1986 for $25,000 (Grant 641-001) to fund an UNO office in Washington, DC. The grant stipulates that the activities of that office must be strictly limited to the provision of liaison services between UNO and NHAO to facilitate the operation of the program. This liaison office grant differs from the other three in that it permits UNO to receive a small advance payment of cash to cover administrative expenditures, which expenditures must be documented and justified before further cash advances are made.

UNO expenditures from grants through October 31, 1985:	
Total humanitarian assistance..	$4,660,928
Food	1,257,189
Clothing	2,070,807
Medical	553,421
Equipment	639,561
Transport	139,950
Total UNO Liaison Office expenses	7,500
NHAO expenditures through October 31, 1985:	
Total administrative expenses..	23,640
Direct personnel costs	13,374
Travel	4,800
Office rent	3,666
Telephone toll calls	1,200
Miscellaneous	600
Grand total	4,692,068

[From the Washington Post, Dec. 15, 1985]

SANDINISTAS INTERROGATE OPPONENTS—300 REPORTEDLY HELD FOR QUESTIONING

(By Edward Cody)

MANAGUA, NICARAGUA.—Sandinista security officials have tightened censorship during the past two months and, through arrests and interrogations, have issued a series of tough warnings to leading dissidents in political parties, labor unions and the church.

The increased pressure against government opponents has taken place in the framework of stiffened emergency restrictions decreed Oct. 15 by President Daniel Ortega. Measures flowing from that decree have created an atmosphere of heightened determination by the Sandinista leadership to block political opponents from any actions that could assist, even indirectly, U.S.-sponsored rebel forces fighting to overthrow the government.

Lino Hernandez, a lawyer who heads the antigovernment Permanent Human Rights Commission, estimated that more than 300 persons have been summoned for interrogation by the Interior Ministry's General Directorate for State Security since the Oct. 15 order and that about 20 remain in jail. The Rev. Bosco Vivas, auxiliary bishop of Managua, said that total includes "not fewer than 100" Roman Catholic lay activists and 50 priests.

The others have been mainly political party leaders, evangelical ministers and union activists, according to diplomatic sources, Hernandez and interviews with those called in. In addition, U.S. officials have reported that 17 Nicaraguan employes of the U.S. Embassy have been summoned for interrogation, and diplomatic sources said a few Nicaraguan employes of the Honduran and Venezuelan embassies here also have been called in.

Jimmy Hassan, a lawyer and evangelical preacher who heads the Campus Crusade for Christ in Nicaragua, said he was taken away at gunpoint by security police who showed up at his house at 6 a.m. on Oct. 31. After searching his office in his presence, police released him at 2 p.m., Hassan said, but then returned to his home at 11 p.m. with an order for him to report to House 50 in the General Directorate for State Security complex at 8 a.m. the next day.

As Hassan recalled it in an interview, he was accused of being "proimperialist" and "a friend of the [U.S.] embassy" during interrogation by several officers that lasted intermittently until 6:30 p.m., when he was released. Neither Hassan nor a number of other detainees interviewed this week reported physical abuse, although several complained of rough treatment and threats of long prison terms for opposition to the government.

Ortega, in announcing the broadened suspension of civil liberties, said it was necessary to combat an "internal front" working to support the anti-Sandinista guerrillas. With-in days, more than 120 persons were arrested in the countryside on charges of carrying messages among rebel units, the government announced. Since then, 50 more have been arrested on similar charges, according to reports reaching Hernandez's office.

Hernandez said the approximately 300 additional detentions were designed to intimidate political dissidents and encourage them to fall in line with government policies or leave the country.

"I would say the state of emergency was not directed against the armed counterrevolutionaries, but against civic opposition to the government," he said in an interview, "What they are doing is closing the little space that remains."

Luis Rivas Leiva, a leader of the opposition Social Democratic Party who was summoned for interrogation Oct. 20, said the government is tightening up political controls because "they want all the energy on the military front."

"What they have been unable to achieve with mercenary, forces, the imperialists try to achieve through their agents," said Deputy Interior Minister Luis Carrion in explaining the expanded restrictions Oct. 20. "They are trying to achieve it through open, cynical and insolent political activity."

Deputy Commander Omar Cabezas, a high-ranking Sandinista security official and author of a popular memior about his life as a guerrilla, said in explaining the interrogations of a dozen evangelical pastors that their sermons were being used to encourage draft resistance in defiance of the law.

Responding to expressions concern by related U.S. religious groups, Cabezas asked why such "uproar" should focus on Nicaragua when security forces in countries such as Chile and El Salvador murder dissidents instead of interrogating them and releasing them after a few hours or days as Nicaragua has done.

"This was the great punishment, the great sanction, that we applied to them," he said in a news conference.

"Yes, we have called in Catholic priests and told them they were violating the laws," he added later "It's the least we can do. They were violating the law. These people not only speak ill of the Patriotic Military Service [the draft], but they also invite others to refuse to serve. This is called incitement to crime in Nicaragua, and in any other country."

Bishop Visas said some lay Catholics summoned for interrogation belonged to committees preparing visits to provincial towns by Cardinal Miguel Obando y Bravo, the country's leading symbol of opposition to Sandinista rule. Since his ascension to cardinal last May, the popular prelate has been making such visits almost weekly.

Although they often took on the air of rallies during the summer, since Oct. 15 the government has forbidden outdoor ceremonies connected with the cardinal's appearances, Vivas said.

Jaime Chamorro, editor of the opposition newspaper La Prensa, said during the same time the amount of censored news has risen from about 40 percent to 60 percent of what his staff tries to report. In addition, he said, the Interior Ministry's Communications and Media Department has launched a new effort to present distribution of censored articles, which La Prensa regularly makes available to embassies and foreign correspondents.

The department head, Capt. Nelba Blandon, warned Chamorro in a letter Nov. 27 that such distribution is against the law and that if he continues he risks being held responsible under the Maintenance of Order and Public Security Law. To back up the warning further, Blandon suspended publication of the newspaper for two days this month.

FOOD AND DRUG LEGISLATION

Mr. GORE. Mr. President, for over 100 years, the Food and Drug Administration and its predecessor, the Bureau of Chemistry, have stood for public protection. From the Pure Food and Drugs Act of 1906 to the Infant Formula Act of 1980, the Congress has sought to ensure and enhance the health of the American people. Because of the importance of its mission, FDA has often endured intense scrutiny, both from the Congress and from the general public. It decisions have been heavily debated, but most often upheld. Through it all, the FDA has developed a worldwide reputation for professionalism, and a striking reputation within the Congress of the United States for being accountable for its actions.

But now increasingly that reputation is being called into question and doubt. Over the past 5 years, while other agencies have come under considerable public scrutiny and criticism for their failure to adequately protect the public health, often substituting politics for science, similar workings at the FDA have been ignored. Through the dry words of the Federal Register, the administration has launched a quiet revolution that, in my view, threatens to undermine one of the best health protection agencies in the world. This silent regulatory coup is wrong—for industry and for the public—and it should be reversed.

I. THE INTEGRITY OF THE POLICY DEVELOPMENT PROCESS

Over the last 5 years, there has been substantial erosion in the integrity of the policy development process at FDA. Because the Agency does not exist in any statutory sense, in 1982, then Secretary of Health and Human Services Richard Schweiker, in what must really be considered a landmark decision, withdrew the long-standing authority delegated to the commissioner for administering the Food, Drug, and Cosmetic Act through a simple notice in the Federal Register. This was his right under the law, but it has had several detrimental effects. First, by placing DHHS in the position of continually second guessing agency decisions, people tend to involve themselves in problems they know nothing about. A clear example of this, is my opinion, is the recent "Herbalife" episode, involving unsubstantiated health claims. Yet there is substantial evidence that the responsible and predictable scientific judgments of the experts at EDA were set aside. In their place the issue was handled in the Secretary's office, primarily by people who have no experience in the field. The result has been a flip-flop in FDA's position that has left the public confused and has cost the FDA in terms of credibility.

Allowing the Department of HHS into FDA decisionmaking has led to other irresponsible decisions with respect to the public health. Consider the problem of salmonella and camphylobacter in raw milk. There is simply overwhelming scientific evidence that unpasteurized milk is a threat to the small population that drinks it on a daily basis. Yet Secretary Heckler reversed unanimous recommendations from her scientific advisers and kept the Agency from enforcing its regulations in this area. According to Judge Gesell, the Department's reasons were "lame at best and irresponsible at worst."

One can only imagine what such incidents do to the morale of dedicated professionals. More important, they illustrate a disregard for accountability and a simplistic notion that science can simply be wished away when the politics of the situation are uncomfortable.

The FDA policy process is in disarray. Career officials at the Agency no longer believe that their views matter in the ultimate decisions. This belief will eventually corrode, if it has not already, the quality of their analysis. The competent people will leave the Agency, and that will be a sad thing for the American people.

The loss of integrity in policy development will also hurt industry. Moving the locus of decisionmaking up the ladder from the Agency to the Department will result in less timely decisions as fewer, busier people feel they must review all policies. It will hurt because it will produce a regulatory process that is unpredictable. I believe in the long run it would be far simpler to deal with a process that is predictable and works from a reliable set of rules, than one that can turn 180 degrees with a change of party in the White House—or a change in Secretary at the Department.

II. THE REGULATORS AND EXTERNAL OVERSIGHT

The specter behind the problems is in the Office of Management and Budget, the Darth Vader of the Federal Government. I consider it intolerable that critical decisions affecting the public health are made at the OMB. I was glad to learn recently that the Department will shortly announce regulations regarding aspirin and Reyes syndrome. But the delays that have occurred are an abuse of power and process. It is intolerable that an

OMB official was singlehandedly able to stop a major decision, and then gloat about it.

When officials with no training in any of the relevant technical disciplines are making the decisions, why should anyone even bother with the FDA? Such preemptory decisionmaking will only reduce accountability, and rob the FDA of the good people it needs to make the right decisions. This hurts consumers and industry. The fact is that the OMB will not and cannot make every decision. But if one constructs a policy environment in which people know their views will be overridden from outside, the incentive to make responsible decisions will disappear. The OMB cannot make drug and food additive decisions intelligently. It cannot decide whether new recombinant DNA products present substantial risks. Without a competent and responsible FDA, progress will be strangled—because the Congress will never repeal the laws that require premarket approval. The public would not stand for it.

III. THE ROLE OF ENFORCEMENT

This administration has undercut the enforcement apparatus of the FDA. Not only have overall enforcement actions declined during the past 5 years, but some laws are deliberately not being enforced.

Consider, for example, the regulations that speak to FDA's statutory role to ensure "honesty and fair dealing with the consumer." Whether or not one supports detailed food labeling standards, the fact is, these responsibilities are not being enforced. As a result, many firms are gaining an unfair advantage in the marketplace over those that continue to obey the rules. Nothing could diminish respect for the FDA faster than the presence of major market discrepancies in this area. If this administration believes these standards and regulations are no longer important, they should send Congress a legislative proposal to repeal them. The Agency should not decide for itself to pursue a policy of calculated nonenforcement. That can only invite the kind of situation that ultimately developed at the EPA.

IV. THE LEVEL OF REGULATORY RESOURCES

One of the sorriest things about the FDA today is its helpless shortage of money and people. It is easy to talk about managing more efficiently. But the same people who talk about speeding up the drug regulatory process deprive the Agency of the resources to do it. The Secretary makes glowing statements about a planning process that will prepare the Food and Drug Administration for the challenges of the 21st century. Yet at the same time, the Agency is being decimated in the budget process. This is not management; it is public relations masquerading as management.

Certainly, we must make sacrifices to balance the budget. But let's find savings that represent real efficiency—not penny-wise actions that will cost society much more down the road.

V. POLITICS AND PROFESSIONALISM

In the past, from my seat on the Energy and Commerce Committee in the House of Representatives, I have been a strong supporter of vigorous oversight. I believe that Members of Congress have a duty to hold the executive branch to its responsibilities, and even to light a fire under people at times.

But I don't think this power gives me or any other Member of Congress the right to dictate priorities to a separate but equal branch of the Government, or to twist scientific data in a way that justifies my particular social policy position. I am always willing to learn from people who devote themselves with single-minded attention to a given set of subjects on a daily basis.

I fear that some people in the administration don't understand this distinction. If we want to assure that some semblance of public confidence in the Government will remain after the Reagan revolution, we must begin to restore faith in the value of public service, and distinguish between politics fought in the open, and deals made behind closed doors.

VI. THE STATUTORY BASE

As we look toward the second century of public protection under this regulatory system, we must come back to the basic objectives and procedures of the statutes. Clearly, some tinkering can be done to improve a fundamentally good statutory base. In light of what I have laid out earlier, there is also the need for a major conceptual overhaul in the way the FDA does its work.

In the category of tinkering, I put such items as simplifying the medical device laws to bring them in tune with the realities of resources, even if those resources can be expanded. The public might also be better served by a food safety law that permitted a phase-out, rather than immediate removal, of substances that flunked the Delaney test.

At the same time, we need tougher labeling requirements to inform consumers of potential health problems. The Agency needs the same authority the Department of Agriculture already has, to subpoena records in cases of recall. In the case of human drugs, the post-marketing surveillance problem needs to be reconsidered. In all of these issues, I know that the Congress will entertain reasonable suggestions, if only the administration comes forward to debate modifications in public.

On a more fundamental level, I am reminded of my friend JOHN DINGELL's comment about the importance of process in law. "You go ahead and write the substance," he says, "and I'll write the procedure. I'll beat you every time." Now is the time to pay more attention to process when it comes to public protection and the role of the FDA. In this context, I intend to propose legislation after the holiday break that will:

First, establish the Food and Drug Administration as an intrinsic part of the Food, Drug and Cosmetic Act. The Commissioner of Food and Drugs should be a Presidential appointment, serving at the pleasure of the President. I believe as a practical matter, that the FDA will probably need to remain a part of a Cabinet Department, but the Commissioner should be free of the political control now being exerted by HHS and OMB.

Second, clarify the roles of the Cabinet Department and the Executive Office of President in regulatory decisionmaking. In my view, the FDA should have the ability to propose regulations without interference from the Office of Management and Budget. OMB, and other parts of the executive branch, should have the opportunity to work with FDA and all interested groups, during the comment period, as long as these workings are disclosed.

Third, the FDA should be reauthorized every 5 years by the relevant committees of the Congress, and it should be given an authorized level of funding that serves as a realistic target for both the budget committees and the appropriations process.

Fourth, the FDA Commissioner should report directly to the Congress, on a yearly basis. The Commissioner should be required to turn his action plan into a real management agenda for which he is accountable to the Congress. The Senate Government Affairs, and other relevant committees, should hold annual oversight hearings concerning all Agency operations.

Mr. President, the Food and Drug Administration is too important to the health of the American people to let it die a lingering death, sapped of its best people and responsibility. The Congress need not launch a witch hunt to place the blame for the current discouraging state of affairs. The responsibility rests squarely with the administration. It is unlikely that the people in charge will change, when it is clear that their objectives are being carried out. The only answer then, is for the Congress to make its wishes known through both legislation and oversight. I urge my colleagues to support a return to the ideals of professionalism and accountability that made the "Poison Squad" and its successors the epitome of progressive government and effective public protection.

APPOINTMENT BY THE CHAIR

The PRESIDING OFFICER. In accordance with Public Law 93-29, as amended by Public Law 98-459, the Chair appoints Russell Mills, Ph.D., of Kansas, to the Federal Council on the Aging.

CONGRESSIONAL CALL TO CONSCIENCE FOR SOVIET JEWS AND CHRISTIANS

Mr. KENNEDY. Mr. President, I would like to call the attention of my colleagues to the case of Dr. Anatoly Koryagin. This Soviet psychiatrist has been sentenced to 7 years hard labor plus 5 years of internal exile and is now near death in the Christopol prison.

Dr. Koryagin has opposed the psychiatric abuse of political prisoners such as the system of labeling dissidents as insane and treating them with drugs in mental hospitals. He refuses to sign a false document which denounces his evidence of such abuses. This courageous man is close to death because of his mistreatment and his series of hunger strikes.

Organizations such as the American Psychiatrics Association, Amnesty International Action for Soviet Jewry, and Physicians for Social Responsibility are deeply concerned about Dr. Koryagin. An article by Peter Reddaway, "The Case of Dr. Koryagin," in the October 10, 1985, edition of the New York Review of Books explains Dr. Koryagin's plight fully. I ask unanimous consent that the full text of this article be placed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Review of Books, Oct. 10, 1985]

THE CASE OF DR. KORYAGIN

Fears are mounting that the psychiatrist Anatoly Koryagin is near to death in the notorious jail of Chistopol in central Russia. Letters that have reached the West from his wife and a friend indicate that he is so weak that unless he is given expert medical care he could die at any time.

Dr. Koryagin has been in prison for the last four years for actively opposing the political abuse of psychiatry. The abuse takes the form of labeling dissidents as mad and forcibly treating them with drugs in mental hospitals.

Koryagin is an unfanatical man of forty-seven, married to another doctor and the father of three boys. His motives are human compassion and a strong concern for medical ethics. His sentence of seven years' hard labor plus five years internal exile was longer than those imposed on other members of his human rights group, evidently because he was the only psychiatrist in it and the authorities were anxious to intimidate his fellow psychiatrists into silence.

Koryagin had examined sixteen dissidents who had been labeled mentally ill for their dissent, and found that the diagnoses were false. His main report on his work was published in the British medical journal, "The Lance", and has just been printed in the book "The Breaking of Bodies and Minds", edited by Eric Stover and Elena O. Nightingale (W.H. Freeman). In recognition of his work and his courage Koryagin has been elected an honorary member of the World Psychiatric Association and of leading psychiatric and scientific bodies in Britain, America, France, Canada, and elsewhere.

Ever since his arrest Koryagin has been subjected to a gradually escalating series of psychological and physical pressures, then to outright beatings. The unconcealed aim has been to force him to sign a false statement denouncing his own evidence of psychiatric abuse. Since this aim has been thwarted by his consistent refusal to go against his conscience, the authorities have evidently begun to consider bringing about his death.

Their technique has been to isolate him from other prisoners; then, by putting mental and physical pressure on him, provoke him into his only means of self-defense, the hunger strike. Then, although Soviet regulations require them to keep him alive through force-feeding, they keep him hovering on the brink of death, too weak to start eating again without expert help, even when he wants to. The apparent hope is that his heart will eventually give out and he will die. In that event the authorities will have documentation to "prove" that they did everything they could to preserve his life. This interpretation of their behavior is confirmed by the new letters from Russia I have mentioned as well as by the fact that several other political prisoners have died in similar circumstances in the USSR in recent months.

No friend or relative has seen Koryagin since September 1983. For a year up to last June no communication of any sort was received from him. Then his wife got a letter containing advice on how to bring up the children, but with no information on his own condition. He may, it is feared, have written it in anticipation of his death

The letter from his wife, Galina, who lives in the Ukrainian city of Kharkov, was written last November but only recently received in the West. She refers to a six-month hunger strike begun in December 1982, and comments that "it was only by some miracle that he survived: his life hung by a thread." Then a family visit was allowed in September 1983:

When I saw Anatoly, there was nothing in my heart but horror—fear for his life, compassion, and anguish at my powerlessness to help him.

The visit lasted two hours; for about an hour I couldn't speak, because of the convulsions in my throat. The talking was done by him, his mother and the children. I immediately understood, without words or explanation, what had happened. He was like a medusa, so bloated that his neck was wider than his face. It was covered with oedemas caused by protein starvation.

Throughout his imprisonment he's been constantly reduced to a state of extreme weakness . . . by the torture of cold, hunger and sleep deprivation, of harassment, humiliation, mental agony, and even beatings. So it's hard, even terrifying for me to imagine how he is now (after a new hunger-strike).

The letter from Koryagin's friend, which was written in June and reached the West last week, is an appeal to doctors throughout the world. The author is well known to Koryagin's friends in the West, but, in the current repressive climate in the USSR, prefers to remain anonymous. Extracts from the appeal follow:

"I remember Tolya Koryagin as a tall, handsome, broad-shouldered man, with a good-natured smile. That's how he was when first he entered our house, and that's how he looked when I saw him last, not long before his arrest. It's terrifying what they've turned him into during his years in prison—a virtual corpse, bloated from almost continuous hunger-strikes, sprawled on a crude prison cot. . . . They beat him brutally."

There are no words to describe the pain and humiliation of artificial feeding. Andrei Sakharov (the famous physicist), according to his family's reports, gave up his hunger-strike last year after a month: "It was too torturous," he explained.

Anatoly Koryagin has been on hunger-strike for nearly a year. He is slowly dying in the Chistopol prison. His family is suffering dreadfully in Kharkov.

I appeal to all the doctors of the world, and also to each of you individually. Today your colleague, the doctor Koryagin, is near to death because of his loyalty to the Hippocratic Oath. Today he and his family need your immediate help. Tomorrow it may be too late. I ask you to do everything to secure the immediate emigration of Anatoly Koryagin and his family from the USSR.

I suggest that as this can't be done by normal means, you make the Koryagin family's immediate emigration an absolute condition of any cooperation with the health organizations of the USSR.

You have the real chance to save a human being's life. Peter Reddaway

A FIFTH PROTOCOL

Mr. PELL. Mr. President, the one concrete result of the recent Geneva summit between President Reagan and General Secretary Gorbachev was an agreement to expand people-to-people contacts between our two countries. This proposition is of considerable significance.

Expanding exchanges between the United States and the Soviet Union has both a lofty and pragmatic dimension. Ideally, exchanges should contribute to peace. As Senator William Fulbright put it when introducing legislation creating the Exchange Program that now bears his name, if a larger number of the world's people knew and understood each other, "they might develop a capacity for empathy, a distaste for killing, and an inclination for peace." Hopefully, as Americans and Russians get to know each other as people, each side will be that much more hesitant about blowing up the other.

As a pragmatic matter, each side will adopt more realistic and more workable policies toward the other if the policymakers have a better understanding of the other's society. For this reason, I myself have made several trips to Moscow in recent years to talk to the Soviet leadership, and I have encouraged my colleagues to do likewise.

For similar reasons, I have strongly supported efforts to increase exchanges between the younger genera-

tion of political and economic leaders in the two countries. One very fine program, now underway, is being conducted by the American Council of Young Political Leaders and the Committee of Youth Organizations of the U.S.S.R. This exchange brings Democratic and Republican elected officials together with the Young Komsomols, the younger Communist Party leadership.

A key problem of many United States-Soviet exchanges is, however, a lack of full reciprocity. As Prof. Richard Gardner points out in a recent New York Times op-ed piece, the domination of the Soviet Academy of Sciences over the Soviet-American dialog has led to a frustrating lack of symmetry. While American groups contain those with access to the highest levels of government, Soviet participants rarely include officials responsible for policy or the rising stars of the Communist Party.

While an exchange like that by the American Council of Young Political Leaders partially addresses this problem, I concur with Professor Gardner that a more comprehensive approach should be considered. Professor Gardner proposes the creation of a new Soviet-American Institute based in Washington and Moscow, and headed by cochairmen of the highest standing and access.

Soviet participants in any exchange will of course be the most dedicated Communists. I believe, however, that even in this case exposure to Americans and to our free society is bound to have some beneficial impact. If a new United States-Soviet Institute can contribute to raising United States-Soviet exchanges to a higher level, it could make a valuable contribution indeed.

Mr. President, I ask unanimous consent that Professor Gardner's article, "A Fifth Protocol," be inserted in the RECORD. I commend it to my colleagues.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Oct. 22, 1985]

A "FIFTH PROTOCOL"

(By Richard N. Gardner)

Despite Moscow's dramatic arms control proposal last month, we are unlikely to see breakthroughs on the four Summit agenda items to which the United States is giving priority—arms control, regional political issues, trade and human rights. But the interests of both sides could be served by a "fifth protocol" that would provide for a new and more satisfactory channel of communication between American and Soviet leadership groups.

For generations, the Soviet Academy of Sciences has virtually monopolized the dialogue with the American academic, scientific and business communities. This has led to a frustrating lack of symmetry in communication, for despite the high quality of some of its scholars, the Academy is neither independent of the Soviet Government nor representative of its senior decision makers.

While American groups serve up an array of past and future policy makers or people with direct access to the highest levels of government—people such as Harold Brown, former Secretary of Defense—the Soviet side is usually represented by figures such as American expert Georgi Arbatov. They are generally well informed, cooperative and friendly. But we who participate in these meetings rarely see a senior official responsible for Soviet defense or arms control policy, a rising leader of the Communist Party, much less a present or likely future member of the Politburo. Surely a more authoritative Soviet channel can be found than the Academy of Sciences.

So here is an idea for Mr. Reagan to float in Geneva. Let the two governments create a new Soviet-American Institute, headed by Soviet and American co-chairmen who have access to the highest levels of their governments, with headquarters in Moscow and Washington. The Institute would organize small seminars for periods of a week or more. These would discuss not just hot political items—the Middle East, for instance—but also global questions such as the environment and economic development, where present policies are less rigid and the scope for cooperative action large.

Institute members from both sides would be expected to produce serious reserch papers, not the familiar propaganda statements. Most important, the Soviet co-chairman would be expected to mobilize the rising stars in the Soviet political, military, and economic establishments, just as the American co-chairman would be expected to deliver key members of the Congress, businessemen, labor leaders and academics.

Such a "fifth protocol" would not substitute for existing unofficial channels in the Soviet-American dialogue. But it would help assure that future Soviet leaders spend time in the United States and acquire a network of influential American contracts before reaching the pinnacles of power. It would also help our emerging leadership learn more about the men who will rise to power in Russia. And it would represent a quantum leap forward in the avenues of mutual information and understanding.

STRATEGIC DEFENSE INITIATIVE

Mr. HEFLIN. Mr. President, on December 3, 1985, I gave a speech to the American Security Council regarding the strategic defense initiative. I believe there might be information in the speech which could be useful to Members of this body. Therefore, I ask unanimous consent that this speech be printed in today's RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

SPEECH OF SENATOR HOWELL HEFLIN BEFORE THE AMERICAN SECURITY COUNCIL, DECEMBER 3, 1985

Now that much of the fanfare which accompanied the Reagan-Gorbachev summit has subsided, we can assess in realistic terms the results and long range impact of that historic meeting. In my mind, there is no doubt but that the summit was a success for many reasons and I heartily congratulate President Reagan.

Why do I believe the summit was successful from the U.S. point of view? First, the leaders of the world's two great superpowers met face-to-face, eyeball-to-eyeball, and came away with a better understanding of each other's views on important issues. Second, President Reagan and Secretary Gorbachev pledged to accelerate arms control negotiations and called for a 50% reduction in nuclear arms by each side. Thus, at the very least, the two leaders established a framework for limiting nuclear weapons when negotiators meet again in January. Third, Reagan and Gorbachev agreed to future meetings which will further ease tensions and provide a continuing dialogue between the two nations. Fourth, the Soviet Union is now fully aware of President Reagan's resolve to go forward with the research and development of strategic defense technologies.

While this meeting promises a thaw in U.S.-Soviet icey relations, a new realism nonetheless pervaded at this summit in which both sides acknowledged the ideological and sociological differences between these two countries. Such issues as human rights, arms control, Poland, Afghanistan and the Strategic Defense Initiative will not be easy to resolve. However, both men discovered that the Soviet Union and the United States can, to some degree, do business together.

I was particularly pleased with the President's refusal to bow to the pressure on the Strategic Defense Initiative. Our country has embarked upon a program to counter the Soviet nuclear ballistic missile threat with defensive measures. It is intended to be defensive only and should not be compromised for mere promises or modest changes in the status quo. And while we can applaud the President's commitment to SDI, there are nonetheless many battles ahead on this program, many of which will be fought in the Halls of Congress. For the next few minutes, I would like to discuss some of the important SDI issues which will no doubt be heatedly debated over the next several years.

One of the most immediate and important concerns for those of us who support the SDI program is it's cost. Future costs of the program are actually unknown at this stage because no one knows what research will develop. For the years 1985-1989 the predictions are that the Pentagon will require more than $26 billion for the SDI program. However, some critics of the program argue that this figure is far too low and that by the beginning of the next decade SDI could command up to one-third of the total research funds. It is feared by these critics that this would severely hamper new defense projects. Obviously, frequent and periodical examinations and evaluations of costs and programs will be required, however, research should go forward at this stage.

I think what must be kept in perspective, despite attacks on SDI to the contrary, is that the goal of the program is to protect America. U.S. Strategic Defense has been drastically underfunded for many years. Thus while, the U.S. has cut back on funding for defense since the 1972 Anti-Ballistic Missile Treaty, the Soviet Union has not. It is also important to remember that SDI is not a totally new program but is the result of integrating a number of projects ongoing within the DOD and other agencies under one umbrella organization.

Thus far, proponents of SDI in the Congress have rallied each year to defeat attempts to cut the program below what is

feasible to maintain its goals and objectives. However, I expect attacks on SDI to continue each year when Congress considers the defense funding bills.

A second important issue is the argument propounded by SDI critics that the program may violate the spirit of the Anti-Ballistic Missile Treaty. This treaty was signed by the Soviet Union and the United States in 1972 as an acknowledgement by both sides of the futility of building terminal stage intercept systems to guard against warheads delivered by ballistic missiles. It was seen as a major step toward ending the arms race in that offense would no longer be required to build more weapons to saturate the defense. The treaty permitted each side to build an anti-ballistic missile defense around a single site and to continue research into ABM systems. However, the building of new components was prohibited under the treaty.

In my opinion, and that of many experts, the charge that the SDI program constitutes a breach by the United States of the ABM treaty is totally unfounded. SDI is a comprehensive research program only and does not include development or testing inconsistent with the treaty. No decision on development or deployment of the system has been made and will not be made until we know the results of the research. Nothing in the ABM treaty prohibits this type of research. With the SDI program the United States is merely investing in research of a wide range of technologies such as computers, sensors, radars, high energy particle beams and lasers. If a comprehensive, strategic defense system proves not to be feasible, the program should nonetheless result in many important technological spinoffs. It is also important to remember that the Soviet Union is pursuing research very similar to our SDI.

According to Soviet Military Power, DoD's analysis of the Soviet Union's military programs indicates that Russia could field a space based prototype laser for use against satellites by the end of the 1980s. Furthermore, space-based laser systems for ballistic missile defense could be ready for deployment by the Soviets "after the year 2000."

A third issue which has yet to be fully debated is one raised by the Administration itself, and that is whether the SDI technology will be deployed in some kind of cooperative effort with the Soviet Union. The Reagan Administration has maintained that SDI is purely a defensive system and should not threaten the balance of power. To reinforce this point, Administration officials, including President Reagan, have stated that the system, if deployed, would be shared with the Soviet Union. The President has even proposed that the U.S. might share it's strategic defense technology while it is still in the research and development stage.

Although there would, no doubt, be many stringent requirements placed on sharing our SDI technology with the Soviet Union, I nonetheless believe we must be extremely cautious about sharing our military secrets with hostile countries. SDI represents the most sophisticated technology being developed in our country and sharing it with the Soviet Union could prove to be extremely dangerous. I'm afraid that the United States may, down the road, regret sharing nuclear technology with other nations given the current threat of nuclear proliferation among third world countries. We must raise the flag of caution in this area and do nothing that could ultimately threaten the security of our country.

The fourth issue I want to discuss with you is one I have talked about since the inception of the Strategic Defense Initiative, and that is the need to maintain an evolutionary approach to strategic defense. An evolutionary approach to strategic defense means stepping up the pace of research on advanced, long range defense concepts such as directed energy devices while continuing work on more mature, near term ballistic missile concepts. The United States must maintain the option of deploying a BMD system of relatively mature technology within a decade.

Under the terms of the ABM Treaty, both the United States and the Soviet Union have the right to build a limited missile defense system with up to 100 interceptor missiles. Soon after the treaty was signed the Soviet Union began to deploy a ballistic missile defense system around Moscow and today it is fully operational. The Soviets now have the capability to protect Moscow from a limited missile attack. The United States on the other hand, would be helpless if it were attacked by nuclear missiles. The ability to respond to unforeseen national and international developments quickly and effectively constitutes one of the greatest reasons for pursuing conventional, near term BMD research. A ballistic defense system would allow the United States to counter an accidental or erroneous launch of a nuclear missile and provide the time necessary to make vital decisions.

Maintaining the option to deploy a BMD system is also an appropriate response to the ongoing and extensive Soviet anti-ballistic missile effort. The Soviet Union has had a very active BMD program for many years. As I noted earlier, they are also engaged in extensive research on lasers and neutral particle beams for their strategic defense. It is vital to our nation's security that we provide a deterrent to any Soviet decision to expand its ballistic missile defense capability beyond that permitted by the ABM treaty.

Last year the Army successfully demonstrated the capability of a non-nuclear missile to intercept and destroy an incoming warhead outside the earth's atmosphere. If we are to maintain this momentum, it is essential that the Strategic Defense Initiative Organization vigorously pursue research on near term deployment options. The option of deploying a BMD system around Washington, D.C., as the Soviets have done around Moscow, is one which should be seriously investigated. Washington is the seat of power for the free world and yet would be extremely vulnerable to missiles launched by Soviet submarines off the U.S. coast.

A BMD system may also be needed to enhance the survivability of America's land-based ballistic missile forces, particularly the MX missile. For a number of years we progressively developed the technology necessary to defend any ground-based ICBM. Our technology has progressed to the point that an effective system could be engineered. Also, BMD is not exlcusively related to a specific MX basing mode, or even exclusively to the MX. Its components could be packaged to defend either fixed or deceptively based ICBMs. A mobile ICBM launcher must have a base or bases.

The decision of whether to deploy a BMD system for point defense does not have to be made at this time. Such a determination would necessarily be based on a number of factors. However, in order to maintain the option of deploying such a system in Strategic Defense Initiative Organization must reemphasize near term, conventional BMD research and development.

The problems of mounting deficits which will no doubt result in budgetary cuts and possibly cuts in military spending, dictates an evolutionary approach to SDI development. Otherwise, near term successes, which are crucial for a sustained SDI effort, will be lost as well as a thus far successful investment of billions of dollars over a ten year period in BMD research.

CONCLUSION

Today the world is confronted by an awesome military balance between two great superpowers. That balance is constantly changing as technologies are developed by both sides which place at risk present systems. In my judgement, development of a strategic defense system would do much toward accelerating a nuclear ballistic missile disarmament. If our SDI technologies do prove feasible and a defense system can be both cost effective and survivable it would ultimately increase a potential attacker's uncertainty about the likelihood of a successful attack, which would enhance deterrence. If each side neutralizes the other's offensive ICBM capability, the threat of ICBMs must be reduced. We all agree that the United States must pursue equal and verifiable agreements with the Soviet Union to produce real reductions in the nuclear arsenal of both sides. The SDI can be a crucial means by which such agreements can be reached.

RECESS UNTIL 2 P.M.

Mr. WILSON. Mr. President, I ask unanimous consent that the Senate stand in recess until 2 p.m.

There being no objection, the Senate, at 12:53 p.m., recessed until 2 p.m.; whereupon the Senate was called to order by the Presiding Officer [Mr. MATTINGLY].

VETO OF TEXTILE AND TRADE BILL

Mr. HEFLIN. Mr. President, I am terribly disappointed that the President has vetoed the textile and trade bill.

Our Nation is in the worst trade crisis in more than half a century. This year we may have a trade deficit of more than $150 billion.

This legislation is important for the American people; it is important for the American economy. It aggressively attacks the unfair trading practices by other nations and the weak enforcement of American trading rights.

The list of Alabama communities with textile and apparel plants idle, dark, and closed grows every month. Other mills have been forced to reduce their work force and shorten their workweek.

In the last year alone, 12,000 Alabamians have lost their jobs in this industry.

It is the duty of Congress and the President to provide for a level playing field for our international trade activity. With this veto, again the U.S. State Department and the international bankers have flexed their muscles and

have shown they control the White House.

THE PRESIDENT'S VETO OF THE SHOE AND TEXTILE BILL

Mr. SASSER. Mr. President, I am saddened and frustrated by the President's action in vetoing H.R. 1562, the shoe and textile bill.

Once again, the President has shown his utter disregard for our citizens who are losing their jobs due to imports. Once again, the administration has shown that it has no trade policy. Once again, we see American industries sacrificed on the alter of free trade.

Well, Mr. President, they are worshipping a golden idol. There is no such thing as free trade in the international marketplace. Every nation has in place trade restrictions. Every nation helps its industries with subsidies, with restrictive licensing laws, with currency manipulation, or with quotas.

What this administration doesn't seem to realize is that it is presiding over the deindustrialization of America in the name of free trade. They assume that there is some magic point at which the United States will be free from further import penetration. Well, when do they think we will reach that point? We have seen industry after industry squeezed out by imports—shoes, textiles, electronics, televisions, steel, and automobiles.

The administration seems to think that it is all right to crumple up certain industries and throw them away. They seem to think that these unemployed workers can just get another job in another industry that somehow will never be touched by imports.

Well, that just isn't true. It is not only old industries that are falling to imports, new industries—computers, computer chips, semiconductors, are facing the same pressures. In 1980, U.S. high technology exports stood at $26.6 billion, and were on the increase, helping to offset the declining surpluses in other segments of the American economy. By 1984, American high technology exports had fallen to a mere $6.2 billion—and during the third quarter of 1984, the United States for the first time, ran a deficit in high technology trade. The sharp drop in the 1984 high technology trade surplus stemmed from a 44-percent jump in imports against a 9-percent rise in exports.

Mr. President, there is no magic cutoff point for import pressure. There is no industry that is too sophisticated for our trading partners to target.

The administration is fond of talking about the new jobs that have been created in the last few years of high imports. But let's take a look at those jobs. Over a third of them have been created in three areas: temporary services, sales clerks, and fast food. Is that what this administration envisions as our future industrial base, safe from imports? Do they think that our trading competitors can make a semiconductor but not a hamburger?

We simply must develop a coherent trade policy. We must offer short term assistance to some industries to help them regain their competitiveness as well as develop programs to cure the long term structural components of the trade deficit.

H.R. 1562 offers the chance to address the short term problem of industries that need assistance to regain competitiveness.

For the shoe industry, it would provide a period of stability so that they can further modernize their industry to compete with imports. The industry isn't asking for this relief so it can sit back and do nothing. They have offered an aggressive 5-year plan to improve their plant and marketing techniques and thus improve competitiveness.

For the textile and apparel industry, H.R. 1562 says we are going to enforce our trade agreements. We are going to make our trading partners adhere to the treaty they signed. A good deal of the problem in the textile and apparel industry is due to the fact that the administration keeps telling country after country that they don't have to live up to the multifiber agreement. It's bad enough to stand around and do nothing and lose an industry to imports. In the case of textiles and apparel, we're giving it away.

As I travel around my State of Tennessee, I continually see the effects of shoe imports on our citizens. Seven shoe facilities were closed in Tennessee last year, and another five have closed so far this year. In these towns, shoeworkers are already out of work or will be put out of work in the near future. I talk to individuals who have lost their jobs in the communities where they have lived and worked for years. And they face the future with no prospects of new jobs.

Tennessee is the fifth most important footwear producing State in the country. The industry employs about 10,000 workers in 25 factories and generated in excess of $96 million in payroll dollars last year. We simply must preserve these businesses and these jobs for our citizens.

The footwear industry is the leading employer in 6 counties in Tennessee and is among the top 3 employers in another 14 counties. It is a significant industry in 28 counties; 24 of these 28 counties have populations under 50,000; 16 of them have populations under 25,000.

My State of Tennessee ranks eighth in the textile and apparel industry. It employs over 87,000 people, with a payroll of $658 million. The facilities there are facing the same pressures from imports as those in other States. In the first 8 months of this year, textile and apparel imports have cost over 7,500 Tennesseans their jobs.

But these figures are more than mere statistics. They represent real people and real jobs. The closing of a shoe, textile, or apparel factory can be devastating to a local community. Many such facilities are located in rural areas. They are often the major employer in the area—areas which have few comparable jobs to which workers may transfer their skills. Many people are prevented by family obligations and ties from moving to a new area—especially when there is no guarantee that they will not face the same situation sometime down the road.

These hardworking citizens deserve the help that this bill can provide.

While the hour is late in this session, we are going to be back here next year, and I hope the first order of business will be a comprehensive trade debate. It's time to take a hard, cold look at our trade laws, because they're certainly not working now.

In my view, a coherent trade policy must be developed to curtail the serious injury from imports being suffered by industry after industry. I intend to be an active participant in that debate.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER [Mr. GORTON]. Without objection, it is so ordered.

The Senator from Idaho is recognized.

Mr. SYMMS. Mr. President, are we still in morning business?

The PRESIDING OFFICER. The Senate is in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE FARM BILL

Mr. DOLE. Mr. President, we want to get on the conference report on the farm bill momentarily. The distinguished chairman of the committee is on his way and Senator ZORINSKY and others who wish to speak on the conference report are ready.

I think it is well to point out that I happened to witness the vote on the House floor. And, having witnessed a number of votes on farm bills on the House floor, I do not recall any with the margin that this bill had of 325 to 96; and not voting were 14.

But I think the encouraging thing was most farm State Members sup-

ported the bill. I think all but one Republican on the House Agriculture Committee supported the bill. I do not know how many Democrats, but all but seven or eight supported the bill. The one conferee who voted against the bill did sign the conference report and voted for the conference report. It had not changed any since that time.

So I believe, overall, the message was fairly loud and clear that this bill does represent a bipartisan effort. It may not be perfect legislation. Farm bills never are. There will be another one, I assume, and it may not be perfect, either.

But it would be my hope that we could move quickly on the farm bill. I believe the President will sign it. I hope he would have a signing ceremony where he would sign both the farm credit legislation and the farm bill together. It would seem to me that would be sort of a double-barreled message to farmers of America that the President is concerned about their welfare, as he is.

If we can move quickly on this conference report this afternoon, then I hope that before we all take off we could join the President in the ceremony which is not only symbolic but I believe would send a genuine signal to America's farmers.

Mr. President, let me extend my thanks to all members of the conference—Republicans and Democrats, Senators and House Members—because it was a long, long period, and a long, long session. Particularly, I commend the chairman of the conference, the Senator from North Carolina, Senator HELMS, for his patience and understanding.

It seems to me that we were able to put together, in most cases, a satisfactory solution to everyone's problem. In some areas, of course, there are still strong differences of opinion but, overall, I found the attitude among conferees of both parties and both bodies to be very positive. And that, in itself, reflects well upon agriculture and the challenge ahead as we help farmers who are in deep distress.

FOOD SECURITY ACT OF 1985—CONFERENCE REPORT

Mr. HELMS. Mr. President, there is a conference report at the desk to accompany H.R. 2100, the farm bill, and I ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing vote of the two Houses on the amendments of the Senate to the bill (H.R. 2100) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to continue food assistance to low-income persons, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes; having met, after full and free conference, have agreed to recommend and do recommend to their repective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Carolina?

There being no objection, the Senate proceeded to consider the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 17, 1985.)

Mr. HELMS. Mr. President, after an entire year of work, 26 days of hearings, 38 days of markup, 12 days of floor debate, and 8 marathon conference sessions, the conference report on the 1985 farm bill is before us.

Mr. President, I have reflected upon this past year. I recall, right after the November elections, it became clear that I would again have the duty as chairman of the Senate Agriculture Committee to oversee the drafting of a farm bill, and it was at that time that I stated my conviction that it was time for a change in farm policy. I recall saying over and over again that what American agriculture needs most is a course toward market orientation that would restore competitiveness to U.S. agriculture.

Mr. President, I think that this farm bill, entitled the Food Security Act of 1985, is the beginning of a transition to market-oriented farm policy.

Now, in all honesty, the bill is not exactly what I would want if I had the right and authority to prepare a bill precisely to my specifications, but it is a good bill.

There are many important reforms in this bill, but the most important aspect is that this bill will restore the United States as a strong competitor in world markets and thereby increase exports of U.S. farm commodities. No longer will our Nation encourage farmers to produce commodities just to be sold to the Government for storage. U.S. agriculture will now head back to the free market concept which should never have been abandoned in the first place.

This 5-year bill reduces loan rates for wheat, feed grains, cotton, and rice, sets target prices for those program commodities, reauthorizes other commodity programs, extends and expands export programs of the U.S. Department of Agriculture, contains strong, new soil conservation provisions and improves the effectiveness of the credit programs of the Farmers Home Administration.

This bill, as approved by the conference, is the beginning of a slow, but decisive, transition to market oriented farm policy. The significance of the 1985 farm bill is that Congress has begun the process of correcting the failures of past farm policies. A new era of hope is in store for American farmers.

Passage of this legislation marks the starting point for the return of the American farmer as a strong competitor in world markets. By allowing for reductions in the basic price support mechanisms and giving the Secretary of Agriculture authority to make additional reductions when competitive conditions warrant, Congress has made a commitment to a vigorous export policy for U.S. agriculture.

The legislation sends a clear and unmistakable message to countries which have been using export subsidies to unfairly increase their share of world markets: the American farmer is back as the major competitor in world markets.

The loan rate reductions in the bill are supplemented by a strong export title which expands current export programs and creates new tools for the Secretary of Agriculture to use to promote U.S. exports.

At the same time, farm income protection will be maintained at record levels in order to assist farmers financially during the transition to market-oriented pricing of their products.

In all candor, the bill is not without its flaws. Anybody who has examined it or who has watched the process this year as this bill took shape realizes that the target prices are still set at high levels, and in a way that directs billions of dollars in taxpayer subsidies to support the income of the largest and wealthiest farmers. In a time of massive budget deficits and the need to reduce those deficits, this kind of policy just does not make sense. These high support levels will also induce large surplus production, which can only delay for several years longer a solid recovery in the farm economy.

Equally in candor, Mr. President, the cost of the bill is also very high—well over the congressional budget resolution and slightly higher than the $50 billion the President has indicated would be acceptable for the farm program portions. The cost of the Commodity Credit Corporation programs under the provisions of the bill are estimated to be about $52 billion in fiscal years 1986–88.

But, on the other hand, the bill makes historic reforms in conservation policy. It makes U.S. agriculture more efficient by protecting our soil and water resources and ensuring that the most productive land will be used, and not abused.

Important reforms are even made in the dairy program. The price supports will be reduced over the life of the bill, reducing Government costs, helping to balance supply and demand. I am extremely disappointed, though, at the imposition of a milk tax in the bill.

Despite the shortcomings I have described, the bottom line is that this

bill makes many significant and effective reforms in farm policy. It signals the intention of Congress to make a decisive transition to market-oriented farm policy. At the same time, there are important reforms yet to be made. Congress must continue to try to reduce the cost of farm programs by devising a way to more effectively limit large subsidies to those producers least in need of assistance.

The bill is not perfect, but it does make many important farm policy reforms that must be enacted into law. To the best of my knowledge, Congress will be in session next year, and the following year, and it would be my hope that some of the policy problems not fixed in this piece of legislation could be addressed at that time.

But the fundamental reforms made in this bill are historic. It will put U.S. agriculture back on the road to competitiveness, and that achievement alone makes this a worthwhile bill. I urge my colleagues to support this conference report.

Mr. President, as much as I am pleased by many of the advancements that were made in farm policy, I am disappointed by the budget-busting increases that were adopted for the Food Stamp Program.

Let me say at the outset, neither the Senate position nor that taken by the Senate conferees was for reducing overall food stamp benefits. The Senate bill proposed to continue indexing of food stamp benefits, which automatically increases costs by over half a billion dollars annually. The sole benefit reduction proposed in the Senate bill was similar to one in the House bill; both Houses were in agreement about the need to provide greater consistency with the Aid to Families with Dependent Children Program [AFDC] in treatment of income under the Job Training Partnership Act, which would result in modest benefit reductions for certain households receiving such income. The only other significant spending reduction in the Senate bill is the proposal to tighten the administration of the program by requiring States to lower the rate of overpayments which presently takes place—costing taxpayers over $900 million annually. The Senate bill proposed that States accept more responsibility for their mismanagement of food stamp spending.

However, it become obvious that the House conferees were insistent that food stamp spending be increased—indeed, increased above and beyond cost-of-living increases. They wanted increased eligibility so that food stamp rolls could be increased beyond the 20 million people who receive monthly benefits currently. They wanted increased deductions and new deductions (used to calculate food stamp benefits) which will drive up overall food stamp spending.

Frankly, Mr. President, I could scarcely believe that such increases were being proposed less than a week after Congress took the seemingly important step of setting long-range objectives for deficit reduction by adoption of the Gramm-Rudman-Hollings balanced budget legislation. Instead, the net result of food stamp spending will be to add over $1 billion to the deficit over the next 5 years because of new food stamp spending. Thus, the deficit targets established by Gramm-Rudman-Hollings are $1 billion more difficult to achieve as a result of the irresponsible actions urged upon the conference by certain members.

The conferees not only ignored Gramm-Rudman-Hollings, they ignored this year's budget resolution—so resolute was their desire to expand food stamp spending. If certain members are not going to enforce our present budgetary restraint, I cannot be too optimistic that they will abide by the future restraint that Gramm-Rudman-Hollings is supposed to bring.

Mr. PANETTA, the distinguish chairman of the House Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition, insisted that this year's budget resolution made room for the increases desired by the House. However, with all due respect such assertions are only partially accurate. While it is true that increased spending could be made for the Food Stamp Program, such increases could take place only to the extent that offsetting reductions are made—according to the budget resolution.

I quoted to the conferees, unpersuasively I must report, from a letter from the Senate Budget Committee Chairman, Mr. DOMENICI, that makes this abundantly clear. I ask unanimous consent that the letter from Senator DOMENICI be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON THE BUDGET,
Washington, DC, September 10, 1985.

Hon. JESSE HELMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HELMS: As the Agriculture Committee proceeds over the next several weeks to mark up legislation to reauthorize the food stamp and other nutrition programs, I thought that it would be useful to summarize for you what is assumed for food and nutrition programs in Senate Concurrent Resolution 32, the first concurrent resolution on the budget for fiscal year 1986.

The Senate-passed budget resolution assumed savings of $1.7 billion in budget authority and outlays, fiscal years 1986-88, for food and nutrition programs. The House-passed resolution assumed additional spending of $1.2 billion in budget authority and outlays, fiscal years 1986-88, for food and nutrition programs.

The conferees on the budget felt that additional spending for these programs was warranted only if the funding could be provided without damaging the overall deficit reduction effort. The conferees provided room in the budget to allow up to $1.2 billion in additional budget authority and outlays, fiscal years 1986-88, for programs under the authorizing jurisdiction of the Senate Agriculture Committee—i.e., food stamps, child nutrition, special milk, and supplemental feeding for women, infants and children [WIC]. To prevent total Federal spending from rising due to this action, the budget conferees assumed additional savings of $1.2 billion in budget authority and outlays, fiscal years 1986-88, in programs under the spending jurisdiction of the Agriculture Subcommittee of the Senate Appropriations Committee.

SENATE CONCURRENT RESOLUTION 32 ASSUMPTIONS

[Dollars in millions; change to the baseline]

	Fiscal year—			Total 1986-88
	1986	1987	1988	
Authorization:				
Agriculture Committee:				
Budget authority	+400	+400	+400	+1,200
Outlays	+400	+400	+400	+1,200
Appropriation:				
Agriculture Subcommittee:				
Budget authority	−400	−400	−400	−1,200
Outlays	−400	−400	−400	−1,200
Net budgetary effect:				
Budget authority	0	0	0	0
Outlays	0	0	0	0

As your Committee determines how best to provide food and nutrition assistance, I hope that you will consider the strong feeling of the Senate conferees that any increase in funding for these programs be offset with equal savings in these or other income security programs. An economy that falters under the weight of massive federal deficits would be hard-pressed to provide assistance to the needy and hungry in America.

Sincerely,

PETE V. DOMENICI,
Chairman.

Mr. HELMS. Mr. President, unfortunately, the conferees did not heed the conditions which Senator DOMENICI and other budget conferees specified earlier this year. It should be noted that both the continuing resolution and the tentative conference report on the Agriculture appropriations Act do not contain reductions in spending to accommodate the increases pressed by the House. Our obligation, failing any offsetting reductions, was to abstain from increased food stamp spending, but I regret to say that is not what the farm bill conferees did in this area.

Instead of resisting increased spending, the conference report embraces it. Over $1.1 billion in increased food stamp spending will take place over the next 5 years—over and above the $67.7 billion that is scheduled to be spent on the Food Stamp Program.

The following table outlines the spending contained in the conference report for the Food Stamp Program and the nutrition assistance block grant for Puerto Rico.

ESTIMATED COSTS OF FOOD STAMP AND NUTRITION ASSISTANCE FOR PUERTO RICO PROVISIONS, AS ADOPTED BY THE HOUSE-SENATE CONFERENCE

[By fiscal year, in millions of dollars] [1]

	1986	1987	1988	1989	1990	5-yr total
BUDGET RESOLUTION BASELINE

[1] Prepared by staff of the Committee on Agriculture, Nutrition, and Forestry, using budget figures from the CBO and administration.
[2] May 1, 1986, effective date.
[3] The CBO baseline (above) assumed indexation of the current grant in each year. The administration's baseline assumed continuation of the Puerto Rican grant at $825,000,000 annually.

The table demonstrates that food stamp spending will be increased $823 million over the next 5 years—using estimates prepared by the Congressional Budget Office.

With regard to Puerto Rico, new spending of $278 million will take place during the next 5 years. However, this increase is actually attributed as being a "savings" by the Congressional Budget Office. Only in Washington can such budgetary gimmicks be accepted with a straight face. The Puerto Rico block grant is $825 million annually. The block grant was established by the 1981 reconciliation legislation (to be effective the following year) in order to reduce spending in Puerto Rico which at that time had the largest portion of the food stamp program (over 10 percent of the entire program) and the highest portion of the population on food stamps (over 50 percent of the population).

The Congressional Budget Office "assumed" (on its own) for purposes of preparing its "baseline" this year for future spending that the block grant would be indexed over the next several years—resulting in increased spending of almost $600 million over 5 years. In effect, the CBO built into the baseline an assumed increase in spending.

Inasmuch as neither the administration nor the Senate bill provided for an increase in the Puerto Rico block grant, CBO "scored" the Senate bill with a "savings"—for the fact that we did not increase Puerto Rico's spending.

The conference report proposes to "save" some money by increasing the Puerto Rico block grant less than CBO "assumed." In effect, an increase in spending (in fact) can be termed by the Congressional Budget Office as a reduction (according to their "scorekeeping"). The double irony is that the conferees decided that since they had "saved" some money by not increasing Puerto Rico as much as CBO had predicted, they might as well spend the "savings" by yet additional spending in other parts of the Food Stamp Program.

The net result is that actual increased spending is $1.1 billion, but CBO "scores" the result as an increase of only $523 million.

Unfortunately, the $1.1 billion is the real effect—on taxpayers on the deficit, and on the long-term ability to control Federal spending.

I regret to say that we are already seeing the first of what is likely to become countless ploys to evade the impact of the Gramm-Rudman-Hollings legislation. Two of the proposals for increased spending proposed in the House bill were advanced in the conference report from October 1, 1986, to May 1, 1986. The reason? To get the increases in quickly—before the pressure from Gramm-Rudman-Hollings can come to bear—and to build up next year's baseline so that attempts to restrain spending next year will be termed "cuts" in the food stamp program. Inevitably, these new increases will be targeted to be eliminated early next year. Proponents of high food stamp spending will charge that the program is being "cut," when, in actuality, such "reductions" would only restore the program spending to where it was before the conference report's binge.

MEANINGFUL NEW WORK PROGRAMS

Well, Mr. President, enough of the bad news. Let me at least report on the glimmer of a silver lining contained in the food stamp title. For the first time in the history of the Food Stamp Program, the conference report institutes a substantive work policy for able-bodied food stamp recipients. In addition to the optional workfare authority that already exists in the Food Stamp Act, the conference agreement requires States to institute meaningful work programs for able-bodied recipients. It is a program that is not a mere paper-shuffling exercise. Rather, the new work policy to be implemented nationally will allow States a great deal of flexibility in designing and operating programs to assist able-bodied members of food stamp households to gain skills, training, or work experience that will increase their ability to obtain regular employment.

One of the concerns we had on the Senate side was that this would be a paper tiger—one that looked good on paper but had no real teeth to it. But from our negotiations with Mr. EMERSON concerning the expected operation of the program, I believe we have come to an understanding as to what this program will do and how it will work. While the Emerson work program affords the States a great deal of latitude in designing their programs, the Secretary of Agriculture will have the final authority for approving or disapproving a State's plan based on its substance.

The Secretary will review a State's submitted plan of operation and judge whether the components of the proposal meet the program's goals. For example, in the area of exempting those required to register for work and being covered under the work requirements of this program, the Secretary shall review the categories and persons proposed to be exempted from these requirements. In deciding whether the State used prudent judgment, the Secretary will evaluate the rational basis on which a State proposes to exclude from the plan's coverage certain categories of persons. In other words, States should show a rationa. basis for exemption of persons from coverage under this program. Similarly, the Secretary's review shall include the components of the State's Employment and Training Program. Thus, the Secretary's review is of a substantive nature to ensure that the program components are meaningful and of value. It is important that the persons involved in the Emerson work program be engaged in job activity of substance.

In this way, Mr. President, we can be assured that we will have the appropriate kind of review and oversight that was envisioned and agreed to when the Emerson program was devel-

oped while preserving a State's flexibility in designing its plan of operation. I believe this aspect in and of itself is one of the better provisions in the Food Stamp Program's reauthorization. At this point, Mr. President, I would ask unanimous consent to insert into the RECORD a transcript of the conference concerning the Emerson work provision. I believe it is an enlightening discussion related to this most important aspect of the bill, and I believe it will further delineate what the conferees' understanding was when this provision was adopted. The discussion includes references to Mr. John Bode, the Assistant Secretary of Agriculture for Food and Consumer Services. I ask unanimous consent that the conference discussion be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Mr. EMERSON. At the point we recessed we were on employment and training and Chairman De la Garza had suggested that the amendment that I was going to offer was indeed included in the proposal that was made and accepted, and I had said if we are referring to Document Number 1, Item 17 with a separate piece of paper marked Number 17 that then we were in agreement and no further action was necessary, and I would just like to get a clarification if that is, indeed, what we were talking about.

Mr. FOLEY. That was my understanding.

* * * * *

Mr. PANETTA. We agreed that the Emerson approach on the employment program is the one that we are accepting here.

Mr. EMERSON. If I may say, the proposal that Senator Dole and Chairman Panetta and I, and I think Senator Helms' people, have all been in the loop on, and I thought we had it completely worked out.

We have made, in the course of the discussion, some concessions to the Senate position that we felt were acceptable.

Senator DOLE. You liked this better do you not, John, than the Senate version?

Mr. BODE. Certainly not better than the Senate version, but in terms of getting something taken care of, it is preferrable to get it out.

The CHAIRMAN. Well, John, I guess what we are talking about is closing the loopholes that states may use to exempt practically everybody from the work requirement, is that right?

Mr. BODE. Yes, sir, as we understand this provision, the Secretary has authority ultimately on approval of the plan and that involves a substantive review to assure that the goals that states have a rational basis for excluding groups or categories of able-bodied people from the program and also a rational basis for the design of the types of activities that would be done in the program.

Mr. PANETTA. I would move, just to get to the situation, I would move that the House recede on this element with the Emerson amendment on the work requirement which, as I understand, moves towards the Senate position.

Mr. EMERSON. That is correct.

The CHAIRMAN. Before we accept, I still have to get somebody—I do not know what—

Mr. FOLEY. Mr. Chairman, maybe just to put it over to your side for your consideration, maybe we ought to just, without objection, the House will recede with an amendment.

The CHAIRMAN. Very well.

John, you are going to have to walk me through this, you and Mr. Boney, perhaps. What is the difference between his proposal and the Senate's.

Mr. BODE. Well, under his proposal, it is very clear, first of all, that states have much broader discretion in the design of what employment activities, employment and training activities are done.

The states have broader discretion in deciding which portions of the able-bodied food stamp recipients, how many of them, are subject to entering into the program, but still ultimately the Secretary has authority on all of those factors in determining that whether in their accumulated program are substantial and in meeting the goals of the Act.

Finally, the Senate has specific percentages of the work registration population that has to be served, has to be served in this program. The House provision allows greater flexibility for phasing that in.

Mr. PANETTA. I think this proposal adds a requirement if I am not mistaken on that.

Mr. BODE. Yes.

Mr. PANETTA. Bill, do you want to indicate what that is?

Mr. EMERSON. Our understanding is that the Secretary shall set minimum performance standards which shall vary according to such factors described by the Secretary including program characteristics and the types of programs chosen.

Such standards can vary from state to state and shall take into consideration the cost to states and the degree of participation by exempt persons. In addition, such standards will relate to those required to participate in an employment and training program and not either permanently or temporarily exempt.

Now, that is a compromise between the House and the Senate position. I mean, we have moved towards the Senate.

Mr. PANETTA. We are mandating now that all states have to set up work programs, that the Secretary will have the discretion to determine how those programs are implemented and whether they are sufficient in terms of responding to that mandate.

And thirdly, we are recommending that the Secretary can establish flexibility on that mandate up to 50 percent.

Mr. EMERSON. Yes, and the reason we want flexibility, frankly, is to bring more people into it. If we are more flexible, we think we are going to have more people participating; at least, based on evidence that we deduced from hearings that we had that is the case.

The CHAIRMAN. Does this exempt for 30 days any requirement for participation?

Mr. BODE. As I recall, Senator, it does not build in the 30 days specifically because there is greater discretion for the states to design it.

The CHAIRMAN. It lets the states drag their feet if they want to?

Mr. BODE. Well, to us, that has been the key point, Senator. If states, and that is why the Secretary ultimately having the authority to disapprove the plan if it does not meet the objectives was important, and we felt that was key in getting the issue resolved.

And that accommodation has been made so the Secretary can disapprove a plan if it is not substantial.

The CHAIRMAN. States may temporarily exempt additional persons an categories of persons based on participation of 30 days or less? That does not make sense.

Mr. BODE. From exemption.

The Chairman. But it is hash anyway you eat it. I do not know what the thing means.

Mr. FOLEY. Mr. Chairman, I gather what they are trying to do, and correct me if I am wrong, is not put somebody in a work program where there is the requirement of supervision and everything else if they are just going to be in the program for a couple of weeks or three weeks. I think it is a de minimis rule in terms of the administrative complications of the workforce program.

When you get long term or medium term food stamp recepients that have to be brought into it, but if there is a snow storm or something like that, and I do not know what the conditions were and people would be on a very temporary food stamp program of very short time, it would not be worth putting them in and out of the program, workfare program, just for mechanical reasons.

One other point, I guess. As I hear the Department saying, they feel a little better about these flexibility questions because the Secretary has authority to review all of them to decide if there is too much flexibility and too many loopholes, and it is his responsibility to decide whether this program works or does not, and if he decides it does not, he disapproves it.

Mr. BODE. Yes, sir, and we are supportive of states having a lot of flexibility in designing the concepts that states can—

Mr. FOLEY. So that you can look over what they do and decide whether it meets the objectives if the Secretary thinks they are reasonable in terms of the program objectives and in terms of the conditions as designed by the states, but the Secretary retains the final authority to say yes or no on the program.

Mr. BODE. Yes, sir.

The CHAIRMAN. Now, where did this come from?

Mr. DE LA GARZA. Mr. Emerson's.

The CHAIRMAN. Now, this is not here so—

Well, that ought to meet your concerns fairly well.

Now, you are not going to sit on your hands and let the states get by with murder or continue to get by with murder, are you?

Mr. BODE. No, sir. I am sure I would be up here right away if I hear about it.

The CHAIRMAN. Well, do not come here. Go to the states with a baseball bat.

Mr. BODE. We will work very diligently with the states to assure that each state has a good substantial program.

The CHAIRMAN. We will want a report from you after this is implemented a little while. Okay. Without objection.

Mr. HELMS. Mr. President, the conference report adopted an amendment to provide explicit authority for the Secretary to approve or disapprove State requests to exempt food stamp recipients who have participated 30 days or less. However, as the foregoing conference discussion indicates, it is understood that the Secretary has ultimate authority to approve the overall structure of a State's employment and training program.

We wanted to make absolutely certain that States will not be able to evade the provision by trying to

exempt virtually all of their recipients from it, or setting up meaningless paper exercises that pretend to be work efforts. We have seen meaningless work efforts before. It would be my hope that the Secretary will exercise keen oversight in encouraging States to begin innovative approaches. These approaches will be appreciated not only by the taxpayers but by many of the recipients who stand to benefit greatly from the new employment and training program. While we grant the Secretary the flexibility to delay the establishment of performance standards—for up to 18 months—I would hope that he would not delay, and that he would implement the program as soon as possible.

On another matter where the conferees grant the Secretary discretion to delay implementation, I would hope he would be equally reluctant. Both Houses passed provisions that require State and local governments to stop the practice of imposing food sales taxes on food stamp purchases. Currently over $100 million of the Food Stamp Program is funneled indirectly to State and local governments in about 17 States through these sales taxes now paid for with food stamp coupons.

The Senate bill provided that this practice should stop on October 1 of the year in which the next session of the legislature meets, following enactment of the farm bill. The conference report specifies the next regular session of the State legislature, and provides that the Secretary may grant waivers up until October 1, 1987, by which time all States must be in compliance. The waivers could be granted if the State can show, to the satisfaction of the Secretary, that implementation of the "no tax" policy would have an adverse and disruptive effect on the administration of the Food Stamp Program or would provide inadequate time for retail stores to implement changes in sales tax policy. In my judgment, the Secretary should not be left the discretion to waive such important changes in the law, and I would hope that he would be more wary of using the waiver authority. He should certainly notify States about the change in law, but the decision about how those affected States will comply with the law is one that ultimately rests with the Governors and legislators in those States, not with the Secretary.

Mr. President, there is an area of the bill that I would like to clarify for the record because it is a complex issue and I believe we need to be clear as to what we mean. The conference agreed to a 6-month moratorium on the collection of quality control sanctions while mandating a concurrent 1 year study of the quality control system. The moratorium is to be in effect for 6 months only and then the Federal Government shall resume its collection procedures. This is an important point because while the moratorium is to be in effect for only 6 months, the study is to run for a longer period.

The moratorium does not preclude the Secretary from establishing claims against States under the error rate sanction system during that period. Nor should the moratorium or the rulemaking cause the courts to suspend judicial reveiw of established claims at any time.

Section 1541 also requires that two studies of the quality control system be undertaken and that a rulemaking be performed based on those studies. Finally, any revisions in the qualtiy control sanction system that are made in that rulemaking will be implemented 2 years after enactment. Following implementation of any system changes, the Secretary shall make any adjustments in claims that have been asserted or collected for excessive error rates before implementation of the revised quality control procedure so those claims conform to what would have been claimed under the revised system, as best the Secretary, in his discretion can make such a determination.

The conferees do not intend for actual collections of sanction claims or administrative or judicial review of those claims to be effected in any manner by the required studies and rulemaking.

The Department must have an effective operational mechanism to enforce compliance and prudent management in the Food Stamp Program, and the quality control system is the best means by which this can be accomplished. Therefore, USDA shall promptly resume collection of the quality control sanctions after the 6-month moratorium and not be encumbered in its appropriate oversight responsibilities by waiting for the study to be completed and acted on.

I want to make it clear for the record that with regard to the section on retail food stores and wholesale food concerns that the sale of such an entity to a bona fide purchaser is to intend an arms length transaction and not simply a "fair market price" which the legal term "bona fide purchaser" usually connotes. What the conferees were intending to address was to prohibit the sham sale of stores by a program violator to someone other than a legitimate business interest. We are concerned with program violators trying to evade sanctions by setting up a sham sale. As such a bona fide purchaser is intended to reflect this fact, not just that the buyer paid the fair market price.

In the section related categorical eligibility of AFDC recipients for the Food Stamp Program, there was no intent to change the factors by which persons could not comply with the provisions of this act and still become eligible for Food Stamp Program benefits. Specifically, households that become ineligible due to failure to cooperate in providing information needed by State agencies to determine or review eligibility would not be considered categorically eligible, nor would households whose ineligibility is due to transferring assets in order to qualify. Such households would be covered by current regulations.

This is an important point, Mr. President, that I want to make sure is understood. We certainly do not want to have a situation where someone could refuse to cooperate and then receive food stamps, and I am sure that we conferees had no such intention.

The bill also specifically addresses in how State, local, or private educational benefits are counted as income. However, since almost all of such educational aid provides students with funds which may be used for living expenses connected with attending college, as the student determines appropriate, such educational aid even where spent on necessary books or supplies would not be excludable as a reimbursement from income. Where the student receives a fund of money to be used for all future educational expenses—including living expenses such as food or rent—each dollar is "provided for living expenses," although it may be used for necessary books, and is not excludable as a reimbursement. This same principle has been properly applied by the courts to Federal educational assistance. *Shaffer* v. *Block*, (Sixth Circuit 1983); *Burkett* v. *Block* (Sixth Circuit 1985); *Reichley* v. *Block* (District Court, Colorado, 1985); and *Malone* v. *Block*, (District Court, Iowa 1985).

Neither the computational budgets used by colleges to compute the amounts of aid, nor the award letters colleges issue to announce the awards, preclude students from using general grants or scholarships which they receive for living expenses connected with attending college. Thus, such aid was, and still will be, properly counted as income unless spent on tuition or mandatory school fees and will not represent an excludable reimbursment even where spent on necessary school supplies or books.

With regard to the resource limitations provision and inaccessible resources, only the portion of an asset that is encumbered by a lien is inaccessible to the household. Only the equity value of an asset—fair market value less any liens or other encumbrances—is to be counted toward the household's resource limit.

Section 1454 of the Senate bill amended section 1114 of the Agriculture and Food Act of 1981 by specifying the inclusion of dairy products, wheat or wheat products, rice, honey,

and cornmeal as being among the CCC commodities made available at no charge or credit to food assistance programs. This change in no way relieves the Secretary of his duty to prevent displacement of like or similar commodities with those donations as required by section 203(a) of Public Law 98-92. Only after taking whatever precautions the Secretary, in his discretion, deems necessary will the Secretary act to distribute these commodities without credit or charge.

The Temporary Emergency Food Assistance Act of 1983 was amended by extending through June 1987 the requirement for the Secretary to enter into agreements with private companies for processing of commodities into end-use products. This extension does not preclude the Secretary from exercising his authority under section 10 of the Child Nutrition Act of 1966 to prescribe such regulations as he may deem necessary to carry out programs authorized under the act and the National School Lunch Act including the requirement for States to process commodities into end-use products. Processing encourages the consumption of surplus commodities by converting them into products that are more desirable to recipient agencies than bulk commodities in unprocessed forms.

The processing of bonus commodities is to continue through the NCP program until expiration of that program approaches. Processing of entitlement commodities is to be expanded. The Secretary is expected to undertake a rulemaking to require States to provide entitlement commodity processing. We certainly do not want States to regress in their own level of commitment to commodity processing, especially in the case of entitlement commodities.

I thank the Chair.

I yield the floor.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. Mr. President, before the Senate takes final action on the farm bill conference report, I think it is important that the Senate take cognizance of the severe financial situation facing our Nation's farmers. Many of my colleagues have heard all this before. Certainly, the tragic deaths in Iowa just a few days ago focused new attention on the seriousness of conditions in the rural America.

But these facts and figures bear repeating as we consider farm legislation in this body for the last time this year. We will shortly adjourn the 1st session of the 99th Congress, perhaps as early as tomorrow. As we prepare to depart for home and holidays, the Midwestern Farm Belt is awash in foreclosures and bankruptcies.

Farm sales have become epidemic in my State and many other States, and bank closings are so common that they no longer make the front pages. Violent incidents involving distressed farmers occur with alarming frequency.

Agriculture Department figures show that nearly a third of all U.S. farms have high debt loads, are unable to pay their bills, or both. Twenty percent have both a negative cash flow and problems making loan payments. Since 1981, land values have declined almost 50 percent in Iowa and Nebraska and 40 percent in Ohio, Illinois, Indiana, Minnesota, and Missouri.

As a result of such conditions, it is no exaggeration to say the very existence of our family farm system is in doubt. And this crisis affects far more than just the farmer. In rural America today, this crisis affects the banker, the feed and fertilizer dealer, and the supermarket operator. In Nebraska, it even affects the local school system. Today, in my State, we hear of an increasing number of school districts in financial trouble; farm bankruptcies and plummeting land values have caused property tax payments to drop off sharply.

A recent study by Wharton Econometrics concluded that today's farm debt crisis, if not resolved will trigger "higher interest rates, lower employment, reduced gross national product, lower personal income and a larger Federal deficit." Specifically, this study states that farm loan losses of $25 billion over the next 4 years would increase the Federal debt $21.5 billion, increase short-term interest rates 1.25 percent, reduce employment by 275,000 jobs, and reduce the GNP by $50 billion over 8 years. So, ultimately, the entire economy will suffer if nothing is done to aid the farmer. To quote President Dwight Eisenhower, "Without a prosperous agriculture, there will not be prosperous America."

BACKGROUND

Mr. President, 4 years ago, speaking in this Chamber, I called our last general rewrite of Federal farm programs a "blueprint for farm failures." Regrettably, I was all too prophetic with that remark. And today, with conditions much more deteriorated in the Farm Belt, we give final consideration to another multiyear farm bill.

The conference report on H.R. 2100 is the culmination of nearly 2 years of effort toward comprehensive legislation spelling out Federal farm policies and programs through 1990. It is the product of hundreds of hours of hearings before the House and Senate Agriculture Committees and months of committee markups. Dozens of alternatives were considered during floor debate.

These discussions were held at a time when there exists a severe depression in the farm economy in many parts of the Nation and a time when there are unprecedented budgetary constraints in Washington. Despite marked differences of opinions over which direction farm programs should take, the committee of conference agreed to a report on the 1985 farm bill after 8 days of negotiations.

Mr. President, this legislation is not all I would have liked to see in a new farm bill. At a time of severe financial problems in the Farm Belt, the bill does not do everything that is necessary to assure farmers of an adequate safety net of income protection. At best, this is a hold-the-line measure that will help buy time for agriculture to work its way out of its current crisis. Still, that is far better than the complete turnaround in farm programs sought by the administration.

Many of the things that would do the most to aid financially strapped farmers are, of course, beyond the scope of any farm bill. These include tax changes affecting the strength of the dollar, a reduction in the Federal deficit that will lead to a decrease in interest rates, and a more aggressive attitude on exports.

SALIENT PROVISIONS

The wheat and feed grains titles of the bill are of key importance to farmers in my area. They reflect a blend of the "market-oriented" approach to farm programs and the "safety net" concept of income protection. The commodities programs are established for 5 years.

Loan rates for 1986 are established initially at $3 a bushel for wheat and $2.40 for corn, with mechanisms in all years that would lower them further in order to provide competitive pricing. For 1987 through 1990, initial loan rates would decline by no more than 5 percent in each year, with the increased deficiency payments resulting from reductions in the initial loan rates for each year exempted from the $50,000 payment limitation.

Income protection is provided by what is in effect a 3-year freeze in target prices over the life of the bill. Target prices are established at $4.38 per bushel for wheat and $3.03 per bushel for corn through 1987, with a total reduction of 5 percent spread over 1988 and 1989. For 1990, target price levels would decline by 5 percent from the previous year's level. However, under the bill the target prices for wheat and feed grains would never be less than $4 and $2.75, respectively.

Without doubt, one of the most difficult conflicts to resolve in conference was the acreage reduction portion of the bill. The House and Senate bills contained different provisions. Specifically, the House provisions established a minimum level of acreage reduction, while the Senate bill provided a maximum level. The compromise was to establish statutory maximums and minimums between which the Secretary of Agriculture can adjust acreage reduction levels as he determines necessary. The lower limits will prevent the Sec-

retary from moving toward a "full production" commodity program, while the upper limits will restrict authority to increase unpaid acreage reductions above established levels.

Specifically, to qualify for benefits in a year in which carryover wheat stocks exceed 1 billion bushels, wheat producers would be required to reduce acreage as follows: In 1986, a maximum diversion of 25 percent—including a mandatory minimum reduction of 15 percent, a mandatory in-kind paid diversion of 2.5 percent, and a further reduction at secretarial discretion of 7.5 percent; in 1987, a maximum reduction of 27.5 percent—including a mandatory minimum of 20 percent and a further 7.5 percent at the Secretary's discretion; and for 1988-90, a maximum of 30 percent—including a mandatory minimum of 20 percent and 10 percent at the Secretary's discretion. For the 1986 wheat crop only, the Secretary would be required to offer growers who planted before announcement of the program a chance to idle an additional 10 percent of their base in return for payments.

For feed grains, if stocks exceed 2 billion bushels of corn, the 1986 reduction would be a maximum of 20 percent of which 12.5 percent would be a mandatory minimum, a mandatory paid-in-kind diversion of 2.5 percent, and a further reduction at secretarial discretion of 5 percent. For 1987-90, the maximum would be 20 percent—including a mandatory minimum of 12.5 percent plus up to 7.5 percent at the Secretary's discretion. For all grains, the Secretary would have discretionary authority to offer producers a further voluntary paid diversion beyond the basic requirements of the bill. The bill also requires the Secretary to allow haying and grazing on diverted acres in 1986 and grazing in 1987-90 if State agricultural stabilization committees require it. The Secretary has discretionary authority for haying in 1987-90.

Mr. President, as I stated earlier, the 3-year freeze and the floors for target prices will provide critically important income protection for farmers as lower, market-oriented, loan rates make U.S. farm commodities more competitive in world markets.

Of particular interest to Midwestern farmers, this bill gives the Secretary of Agriculture discretionary authority to establish mandatory production controls on wheat, in favored in a farmer referendum. I fought hard for—and would have much preferred—language requiring the Secretary to hold a referendum among wheat growers on mandatory controls.

Personally, I am convinced that mandatory production controls offer the only real hope for bringing the supply of farm commodities in line with demand and keeping prices above the cost of production. However, the discretionary authority in this bill does give the Agriculture Department one more tool to use in shaping farm programs over the next few years.

The bill does require the Secretary to conduct—by August 1, 1986—a survey of wheat farmers to see if they favor mandatory production controls on wheat as a means of adjusting production and increasing the price wheat farmers receive for their production. The parliamentary rules of the conference prevented us from requiring a similar survey of feed grain producers. However, the statement of the managers accompanying the conference report notes that the Secretary could, in his discretion, conduct a similar survey of feed grain producers, and I urge the Secretary to conduct that survey as well.

It is time we listened to farmers in fashioning farm programs and the surveys will be extremely important in the establishment of future production adjustment programs for wheat and feed grains.

Mr. President, at the outset of the conference, I indicated that possibly the one prerequisite for securing my vote for the bill would be the inclusion of authority in the legislation for the Secretary of Agriculture to proclaim marketing quotas and establish a mandatory production control program for wheat, subject to approval by wheat producers voting in a referendum.

There is a surplus of grain commodities in this Nation, together with many other agricultural commodities. That surplus places pressure on prices. Before the bottom of prices is reached, we must have supply management.

General Motors, Ford Motors—any manufacturer—will stop manufacturing when they create surpluses of a product above and beyond which they have no capability to sell. That is good business, because to oversupply a nation with new product depresses, the price of that product to the extent that the producer eventually goes broke or becomes bankrupt.

Condominium builders in this city, apartment builders, and home builders all know that when there is a glut on the market of whatever commodity, it depresses the price of that commodity. It is pure, basic economics. That is why I feel so strongly that production controls are necessary. We have attempted to do it voluntarily for many years and we have a supply of more agricultural products than we know what to do with. If I wanted to be in a business this coming year, it would be in the business of building places to store surplus commodities, because we are going to have plenty of them.

The conference report includes many other items I worked hard for through the Senate's many months of deliberations on a new farm bill. Some of them, I'm pleased to say, are taken from my omnibus farm bill, S. 1051, or from amendments I offered in committee or on the Senate floor.

Chief among these are, first, a 3-year, $490 million program to reduce interest rates on farm loans and, second, landmark conservation programs, including tough sodbuster and swampbuster provisions and a conservation reserve that would retire from production up to 45 million acres of highly erodible land.

The interest rate reduction program would aid hard-pressed farmers with loans guaranteed by the Farmers Home Administration. The Agriculture Department and private lenders would share equally in the cost of the reduction. The Government could pay for 2 percent of the overall "buydown" or one-half of the total, whichever was less.

The sodbuster program denies price supports and other farm program benefits to farmers who plant on fragile land in violation of the terms of the program. A "grandfather clause" exempting land used for crops between 1981 and 1985 would terminate for most farmers by 1990. The companion swampbuster program would deny farm benefits to those who, in the future, convert wetlands to crop use.

The sodbuster and swampbuster provisions are extremely important to those of us interested in conserving our precious natural resources. Conversion of marginal grassland to cropland is more serious in the Great Plains but it is a problem all over the country. Nationwide, 45 million acres of highly erodible land have already been brought into production and another 247 million acres could be cultivated.

Loss of wetlands takes its toll on wildlife and recreation and is a serious problem in Nebraska. My State is one of the five in the Nation that have lost more than 90 percent of their natural wetlands, most of it through conversion to cropland. Nationwide, 14.7 million acres of wetlands were destroyed from 1955 to 1975, 80 percent of them drained or filled for farm use.

The sodbuster and swampbuster programs are needed for economic reasons as well as for conservation. It's time Government stopped subsidizing the cultivation of land not suitable for farming. It just adds to our surpluses and further depresses commodity prices.

The long-term conservation reserve has been called by Agriculture Secretary John Block the "largest single soil conservation initiative in the history of American agriculture." It would allow farmers to contract with USDA to return highly erodible soils already in crop use to less intensive uses such as grass or trees. Growers would receive cash or in kind land rental payments plus payments cover-

ing a part of the cost of land treatment measures. There would be a $50,000 limit on annual payments to farmers under reserve contracts.

OTHER PROVISIONS

Other provisions of the conference report I worked hard to see enacted include:

A nationwide "check-off" program to finance research, promotion and advertising of pork products. This provision, which results from an amendment I offered, should be a great benefit to pork producers. It is an excellent example of self-initiative and self-reliance on the part of hog producers, who desire to improve the viability of their industry.

Protections against further cuts for the grassroots Agricultural Stabilization and Conservation committees that for 50 years have provided farmers with timely information on Federal farm programs. The ASC county and community committees operate within the local communities to inform their neighbors about farm programs and help see that these programs are administered by fairness and equity. This provision maintains a viable committee system while making the program cost effective.

Authority to make certain surplus government grain available free or at reduced cost for processing into ethanol.

Discretionary authority for a strategic ethanol fuel reserve.

Extension of the Soil and Water Resources Conservation Act requiring the Agriculture Department to produce assessments of soil and water resources in 1995 and again in 2005.

Provisions assuring that sugar growers continue to receive Government support payments when sugar processors—through whom the payments pass—go bankrupt.

FOOD STAMP PROGRAM

The bill reauthorizes for 5 years the important Food Stamp Program. The bill includes changes in the program that will make the program more accessible to farmers in States like Nebraska that are experiencing extremely adverse economic conditions.

Under the current Food Stamp Program, eligibility of self-employed households is largely determined on the basis of the previous year's income and not on the basis of the circumstances of household at the time that an application for assistance is made. Therefore, a large number of farm households do not qualify for assistance even though they may have no money available to feed their families. This problem will be corrected by allowing a household's current circumstances to be considered in determining eligibility.

Another hinderance to the availability of the program to economically troubled farm families involves the deductibility of farm losses in determining eligibility. Under the current program, many farm families—who are otherwise eligible and need immediate assistance—do not qualify because income earned off the farm cannot be offset by losses in the farming operation. This is true even though the off-farm income must be used to pay for the losses from the farming operation and is not available to the family to meet their household needs. The bill will correct this situation by allowing farm losses to be offset against other income of the household.

CLEAR TITLE

The bill attempts to address the so-called double jeopardy problem whereby a purchaser of farm products may have to pay twice for commodities because of a financial dispute between the producer/borrower and lender.

Under the bill, a purchaser of farm products includes a buyer, commission merchant, or selling agent. The bill provides that a purchaser of farm products can take free of a security interest created by a seller, even though the security interest is perfected and even though the purchaser knows of the existence of such interest unless, First, within 1 year before the sale of the farm products, the purchaser has received from the secured party or the seller, written notice of the security interest; and second, the purchaser has failed to perform the payment obligations.

Similarly, in those States that choose to set up a central filing system rather than providing for prenotification, a purchaser buying farm products takes them subject to a lender's security interest if first, the purchaser agent did not register with the Secretary of State—or a designee of the State whose duties include the making or keeping of records—as a potential purchaser and the lender has filed an effective financing statement; or second, the purchaser (i) received written notice from the State that specifies the seller and farm products that are subject to an effective security interest, and (ii) did not obtain waiver or release of the security interest from the secured party.

Additional seller obligations are provided for under the bill as well as a provision that requires the Secretary of Agriculture to promulgate regulations within 90 days after the bill is signed in order to facilitate those States that have, or intend to, set up a central filing system. In providing the Secretary with the authority to certify State central filing systems, Congress also provided guidelines for the Secretary to follow in determining whether or not a system is in general compliance with the requirements. The Secretary should be fair and reasonable in making such determination for those States that have already or are in the process of implementing a central filing system.

I am most concerned with the clear title language that provides that what constitutes receipt of notification shall be determined on the basis of the buyer's resident State. I believe that such a determination is better left to the States.

I would like to see the clear title provision work and I urge purchasers, lenders, and States to make an effort toward making the concept successful.

CSFP AND TEFAP

Nebraska is one of several States that has a Commodity Supplemental Food Program [CSFP] under which low-income women, infants, and children are provided with certain commodities. Under the bill, Nebraska's CSFP agencies, with the approval of the Secretary and under certain conditions, will be permitted to provide commodities to low-income elderly.

The Temporary Emergency Food Assistance Program [TEFAP] is reauthorized for 2 years. Under this program, the Secretary releases CCC commodities to States allowing for disposal of government-held surplus commodities to prevent waste as well as providing food assistance to low-income households. In addition to authorizing appropriations of $50 million for each of the fiscal years, effective January 1, 1987, the bill will, among other things, first, require State matching on a dollar for dollar basis, except for States that have no regular session of their State legislature by that time, the deadline would be October 1, 1987; second, limit the matching requirement to those funds that a State retains at the State level and devotes to State-level activities (to the extent the State pays for the direct expenses of local distribution, the matching requirement would not apply); and third, in determining whether the State match has been met, allow in-kind contributions by a State to be counted according to procedures approved by the Secretary for certifying these contributions.

CONCLUSION

Mr. President, this bill is hardly a cure-all for farmers. In no way will this bill resolve the very serious problems facing agriculture today. Rather, as I said earlier, it is at best a hold-the-line measure. It should help buy time for agriculture to work its way out of its current economic dilemma. And, as I also indicated earlier, it is far better than the wholesale dismantling of government farm programs favored by the administration.

It should be pointed out that any additional delay in acting on this bill will serve no useful purpose. Not enacting a bill will only further the decline in Farm Belt land values and worsen the problems of the Farm Credit System.

Also, while this measure is a 5-year farm bill, conditions in the farm economy will undoubtedly require us to

revise these programs in another year or two. In the meantime, the freeze on target prices represents the maximum income protection we could negotiate for farmers this year.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I again want to compliment the chairman, Senator HELMS, and the ranking Democrat on the committee, Senator ZORINSKY. I also want to repeat in case Members do not know what the vote was in the House. It was 325 for the bill, 96 against, and 14 not voting. From a party standpoint, voting yea, 131 Republicans and 194 Democrats. Voting nay, 47 Republicans and 49 Democrats. Not voting, 4 and 10. The message of that vote, I believe, is fairly clear. Having been in the House 8 years and having been here for some time and having been involved in a lot of farm bills, I cannot recall a vote as lopsided as this one on a farm bill.

I cannot speculate why each Member voted for or against the bill, but I can indicate that it has broad bipartisan support.

We have come to the moment of making a judgment. We know for certain that not every farmer in our States will like the bill, so we have to decide whether we want to vote for something that I believe offers income protection, market orientation, flexibility, and contains a lot of good provisions that are never mentioned in the media, whether it is Food for Peace, whether it is export programs, research and development, or other programs that play a very important role in agriculture.

We find ourselves getting hung up around here on how high is the target price. Is it going to be 1 cent higher, 2 cents higher, or 3 cents higher? Many times we lose sight of good policy in farm legislation that may mean more to the farmer than whether it is 1, 2, 3, 4, or 5 cents more in target price or loan rates, whatever it may be.

I am very pleased to support this bill. I believe it will provide protection for the American farmer. I believe that farmers in the past in many areas have been in distress. If you go back and look at the speeches made in 1981 and 1977, with some changes you could just about use the same speech. Every time we pass a farm bill we know that there are farmers out there who are in difficulty, and who have real problems. It is more significant now than ever. Our responsibility is greater now than ever.

By voting on the farm credit bill last night and the farm bill today, it seems to me that we have again demonstrated our concern for American agriculture in a bipartisan way.

I assume there will be a rollcall vote on the conference report. If not, that is something else. But if there is, I hope it is unanimous. It may not be unanimous. There may be some who represent large urban areas who feel that it will cost too much.

I am advised that the final tally, and it is sort of a moving tally, the latest final tally is $51.95 billion.

I am also advised that the bill weighs 13 pounds. That figures out to about $4 billion a pound.

If you want to read it, you may want to know how many hundreds and hundreds of pages it is. It is a very lengthy document.

The Chairman now has it in his hand. In any event, it is heavy.

Mr. President, it is with great satisfaction that I now join my colleagues in considering and hopefully passing the conference report on the 1985 farm bill. This legislation was just passed by the other body at about 1:45 p.m., this afternoon by a bipartisan majority of 325 to 96. I hope we can now follow suit and send it to the President who, I understand, is favorably disposed to sign it into law.

There have been many difficulties and obstacles overcome in developing and reaching a working consensus on this bill. The critical problems in our agricultural economy, which have been increasing in severity over the past 5 years, cannot be reversed so quickly, nor can legislation alone provide answers to our concerns with the international trading system, the strength of the dollar, and the impact of Federal deficits on the dollar and on commercial interest rates.

The problems of American farmers and ranchers are real, and they are present even as we are considering this legislation. I would only say that there are a number of very positive features in this farm bill that should not be ignored, either by farmers, by the general public, or by the national press which is covering this deliberation.

LONG-TERM CONSERVATION RESERVE

I would cite the landmark establishment of a 40-million acre conservation reserve as a major contribution toward long-term land management and toward conserving our rich inheritance of natural resources for posterity. The conservation reserve could well become the foundation of future efforts to balance our agricultural productivity with world demand for farm products.

FLEXIBLE LOAN RATES TO RESTORE EXPORTS

Another single achievement in this bill is the establishment of flexible loan rates that can respond fully to variations in the international prices of our principal agricultural commodities. Under the 1981 farm bill, we have watched almost helplessly as the strong dollar and price cutting by our major competitors have virtually cut U.S. farm exports in half. We have, in effect, had the worst of both worlds—holding prices at below our production costs while failing to attain price levels that can reduce heavy, price-depressing stocks.

Using the tools available in this bill, the administration can now respond to these conditions and make clear the intention of the United States to be fully competitive for world markets over the long-term. This message is of key importance, both to our competitors and to our customers abroad. We simply cannot afford past policies in which sometimes we sought out export markets and other times slammed the door on them.

A STABLE INCOME SUPPORT PROGRAM

And the key to sustaining this long-term commitment to exports, Mr. President, is to assure our producers a stable base of income support. There has been great concern expressed over the course of this debate over whether we can afford to maintain the current level of target prices to grain and cotton farmers, and for how long. The focus of discussion and, occasionally, disagreement in the Agriculture Committee, on the Senate floor, and in conference was whether we would have a 1, a 2, or a 4 year freeze on target prices.

Like most issues that become tied to numbers, we were able to resolve the so-called target price "freeze" question by splitting the difference. So we have what amounts to a 2½-year freeze in the bill. The level will remain at the 1985 level for 1986 and 1987, decline 2 percent in 1988, 3 percent in 1989, and 5 percent in 1990. What is really important, however, is that Government support for farm income will be held relatively constant while we make a determined effort to get demand back into our supply-demand relationship.

OTHER POSITIVE BENEFITS

I could cite numerous other positive features in this legislation, Mr. President. They include an additional $8 billion in funding for export credits and credit guarantee programs, renewal of the Food for Peace Program, continued support for the Food Stamp Program, a compromise on the clear title issue, and a major resolution of the animal welfare differences.

I would take exception with those critics who argue that this legislation is just "more of the same" with regard to noncompetitive prices and inadequate income support for farmers. The administration costed this bill out on the assumption that the competitive prices under the so-called Findley amendment and the marketing loan would be fully achieved. I anticipate that the program details for 1986 crops, which should be forthcoming by the end of the week for wheat, will reflect these provisions.

So I believe, Mr. President, that those of us who are aware of the serious difficulties in the farm economy, and who share responsibility for developing farm policy that responds to

them, can take some degree of pride in having wrested a fair and balanced package through the legislative process this year. In so doing, I want to give particular praise to the distinguished chairman of the Agriculture Committee, Senator HELMS, and the distinguished ranking member, Senator ZORINSKY. Without their daily dedication to moving the process forward through months of hearings, mark-ups, and floor debates, I know that none of us would be ready to vote on this bill today.

Let me also thank the other members of the committee, its professional staff on both sides, and the personal staff for members both on and off the committee for their almost tireless efforts.

I also want to comment on the Food Stamp Program reauthorization.

Mr. President, most of the focus in the debate thus far this year has been on the agriculture section of the 1985 farm bill. However, S. 1714, the Agriculture, Food, Trade and Conservation Act of 1985 also contains a 5-year reauthorization of the Food Stamp Program, as well as extensions of the Commodity Supplemental Food Program and the Temporary Emergency Food Assistance Program. As chairman of the Subcommittee on Nutrition, the Senator from Kansas has a great interest in all of the Federal nutrition programs.

FOOD STAMP PROGRAM BACKGROUND

Mr. President, unlike previous years, when we were dealing with significant program changes and budget reductions of about $2 billion in 1981, and nearly $900 million in 1982, budget issues no longer dominate the policy debate for the Food Stamp Program. By improving the targeting of benefits, implementing administrative reforms and going after fraud, waste, and abuse, we were able to achieve about 7 billion dollars' worth of savings for the fiscal period 1982–85.

This year's reauthorization process mainly focused on fine-tuning the program and making certain that it is working effectively—that low-income Americans who depend upon this program for food assistance are being reached, and that benefits are adequate. By adequate, it is important to clarify that food stamps were intended to provide a minimum diet, based upon the so-called thrifty food plan.

According to the Director of the Center on Budget and Policy Priorities:

> For some time, there was a fair amount of debate between those who argued that cuts in the food programs had caused a large upsurge in hunger and those who denied that a hunger problem existed. I think the evidence increasingly indicates that both of these positions were mistaken. The problem of hunger is real, but it is caused by many factors. Federal budget cuts in food programs were not the principal cause here.

FOOD STAMP PROVISIONS OF FARM BILL

Mr. President, as I have stated, the 1985 farm bill contains a 5-year reauthorization of the Food Stamp Program. The major provisions include an employment and training program, and modest benefit increases targeted to the working poor. There are also some program reforms in the administrative area, as well as a further strengthening of existing tools to eliminate fraud, waste, and abuse. An enhanced computerization provision, added as a floor amendment sponsored by the distinguished Senator from Minnesota [Mr. BOSCHWITZ], and myself, will encourage States to develop and implement a plan to automate their administration of the Food Stamp Program. This should help States reduce their error rates through the use of computerized issuance and eligibility determination systems.

EMPLOYMENT AND TRAINING PROGRAM

One area of the Food Stamp Program which has always been weak is that of work requirements for able-bodied recipients. Under current law, able-bodied food stamp recipients between the ages of 18 and 60 who do not have dependent children under age 6 are merely required to register for work and participate in job search. During the conference, the gentleman from Missouri [Mr. EMERSON], the ranking minority member of the House Nutrition Subcommittee, and I offered a compromise on the Employment and Training Program contained in the Senate bill, which was accepted by the conferees.

The provision contained in the 1985 farm bill would provide a "mini-block grant" to the States to implement a work program for able-bodied food stamp recipients. States must now initiate some kind of work program tailored to the needs of their food stamp population. This program may be structured from a variety of options, including job search, job clubs, and workfare. The Secretary of Agriculture has the authority to approve or disapprove State work plans. Also, the Federal Government will now provide $40, $50, $60, $75, and $75 million for fiscal year 1986 through fiscal year 1990, to help pay for the administrative cost of such State-designed programs. If a State chooses to spend more on this effort, there will be a Federal match.

BENEFIT INCREASES FOR WORKING POOR

Mr. President, during previous budget cycles in 1981 and 1982, the working poor were the group most affected by many of the changes in the Food Stamp Program. Therefore, the 1985 farm bill contains some modest benefit increases targeted to the working poor. The conferees adopted a proposal to increase the earned-income deduction from 18 to 20 percent—a provision contained in both the 1984 and 1985 Domestic Food Assistance Acts which I introduced along with many of my colleagues on both sides of the aisle. The Domestic Food Assistance Act of 1984 also contained proposals similar to those adopted by the farm bill conferees. Just about all of these provisions were recommendations of the President's Task Force on Food Assistance.

For quite some time, the assets provisions have needed to be adjusted to accommodate the modern realities of inflation. Therefore, the 1985 food stamp reauthorization would increase the liquid assets limit from $1,500 to $2,000 for nonelderly participants, and the assets limit for a single elderly household would be increased to $3,000, the current limit for a household containing two elderly individuals.

Recent poverty studies have shown that single women with children are the group that is the most vulnerable and has the most serious economic problems. Under current law, the shelter and dependent care deduction are combined. This legislation would create separate shelter and dependent care deductions, imposing a limit of $160 and $147 per month, respectively.

Further, self-employed farmers would be able to deduct their losses in order to be eligible to receive food stamps. In the past, this had been a barrier to their program participation in these tough economic times.

Since 1981, the Food Stamp Program in Puerto Rico has consisted of an $825 million block grant. This bill would provide for a 1-year freeze, and three-fourths of an inflation increase for the next 4 years.

FRAUD PROVISIONS AND ADMINISTRATIVE IMPROVEMENTS

Mr. President, there are many provisions in this conference report designed to help eliminate fraud. One of these provisions would allow the Secretary of Agriculture to require photo identification cards where necessary to protect program integrity, provided the measure is cost effective. Further, fraud detection units would be established in large metropolitan areas to prevent, detect, investigate, and assist in the prosecution of fraud.

In areas prone to high error rates, the Secretary of Agriculture would be permitted to require a State to carry out new or modified certification procedures, including the use of automatic data-processing systems. Further, every adult household member must sign a food stamp application under penalty of perjury, stating that all the information in the application is true; each adult member of a food stamp household would be jointly and severally liable for the value of any overissuance of food stamps, based on intentional misrepresentation.

OTHER PROVISIONS

Other provisions of interest would prohibit banks from charging retail grocery stores a fee for handling food stamps. This was a proposal originally introduced as a separate bill by both

of the distinguished Senators from Minnesota.

A floor amendment introduced by the Senator from Washington, [Mr. EVANS], and accepted by the Senate, providing for a 2-year moratorium on the collection of error rate sanctions owed by the States to the Federal Government was reduced to a 6-month moratorium, but the provision for a study of the underlying food stamp quality control system was retained.

There is another provision that would increase the purchasing power of food stamp recipients in States that charge a sales tax on food. States that engage in this practice will not be allowed to participate in the Food Stamp Program if they continue to charge a sales tax to food purchased by recipients after October 1, 1987. This concept was contained in both of the Domestic Food Assistance Acts, which the Senator from Kansas introduced in the last 2 years.

CONCLUDING REMARKS

Mr. President, deliberations on the Agriculture, Food, Trade, and Conservation Act of 1985, have continued over a period of many months, beginning late in the spring of this year. We are now on the last day of the first session of the 99th Congress, and the Senator from Kansas is pleased to see that this conference report will be brought to a vote on final passage today. This legislation will benefit farmers and food stamp recipients alike. It is the result of many compromises along the way, and the final product is one that no member of this body is probably completely satisfied with. Yet it contains something of interest to all those actively involved and concerned with these issues.

I would like to commend the distinguished chairman of the Agriculture Committee and the ranking minority member for their untiring patience throughout this lengthy process. It is also appropriate to thank the distinguished Senator from Minnesota [Mr. BOSCHWITZ], for his leadership in the nutrition program area. We have spent many months working on the 1985 farm bill and food stamp reauthorization, and a special thanks should go to the staff of members of the Agriculture Committee.

I urge my colleagues to vote in favor of this conference report on the Agriculture, Food, Trade and Conservation Act of 1985. This 5-year reauthorization will be one of the most significant accomplishments of the 99th Congress.

The Food Stamp Program is another important part of the farm bill, a very important part of the farm bill. It is very important to many people in urban areas. I hope some of my urban colleagues will take a look at some of these provisions that will affect their States even though they may not be particularly concerned about cotton, rice, soybeans, honey, wool, or some other price-supported commodity.

We believe that we should have done more on the spending reduction side in food stamps, but again, there were some good policy changes made. The work requirements were tightened up in accordance with the suggestions of the Representative from Missouri, BILL EMERSON. There were a number of other changes made in the food stamp section which, I believe on balance are sound. Many were recommended by the Presidential task force a couple of years ago. Again, it was a give-and-take proposition.

I happen to share the view of the chairman. I think we need some block grant pilot projects going into some of these States to see if we can save on the cost of the program and give the States more flexibility. About 17 States have claimed they would like to do that. There is not even any discretionary authority in this bill for that kind of approach, but sooner or later, it will come.

Mr. President, there has been some discussion that somebody might raise a point of order on this bill. I hope that is not the case, but if it is, I hope we have the votes to do whatever we need to do—either to waive the point of order or reverse the ruling of the Chair. If that comes, it will come under some new technical problem caused by Gramm-Rudman. We are ready to address that.

If somebody wants to try to kill the farm bill, we are here to protect it. If somebody wants to reduce the cost, make that point of order, we are here to debate it. But I would say on balance that we believe this represents, as it has many times in the past, the best efforts of Democrats and Republicans working together under the leadership of Senator HELMS of North Carolina and Senator ZORINSKY of Nebraska for the last several months.

We have had a lot of heated debates on this floor. A lot of fingers were pointed on both sides about who was holding it up, who was not letting us meet, why we did not do it before the recess. We have a chance to do it now before adjournment. It is not very early. It is a little late for wheat farmers, but they would rather have it now than not at all.

I join my colleagues in urging support for the conference report and hopefully, very soon.

Mr. MELCHER. Mr. President, the bill before us is a minimal bill. I want to include such happy remarks about, well, we have passed a great farm bill, for instance, in my Christmas card to farmers. I want to say in that Christmas card with Happy New Year salutations to farmer friends, but I would not say, that 1986 promises to be a grand and glorious year.

No, I would not do that. I would not do that based on this bill, because what we have done is sort of said, well, we have kind of reversed the concept that was put forward, passage of this bill will reverse the concept that was put forward by the administration early this year when they unfolded their proposal and presented to Congress a bill that was designed to eliminate farmers.

In fact, the Secretary of Agriculture was very candid. He said, in response to questioning by media reports, "Yes, there are too many farmers and market conditions and such may result in 18 to 20 percent of them being eliminated over the next 2 or 3 years."

Mr. President, that is pretty sad, that sort of statistic, if you want to look at it that way, a rather dry, narrow way of looking at it, that sort of statistical reporting by the Secretary of Agriculture. But if you are one of those 15 to 20 percent of the farmers that might be eliminated over the next 2 or 3 years, it is your way of life, it is your livelihood, it is the place where your family lives, it may have been in the family for generations before you. It is a sort of signature on a huge report card of your entire life. It says "F" for failure.

Yet the administration did present a bill that would not only recognize the elimination of farmers, it would help eliminate them—I said "help," help eliminate them. So, in some respects, over the past year, this bill could be viewed as a sort of turning point—a turning point away from where we have the Department of Agriculture statistically sort of figuring out what happens when you eliminate 15 to 20 or 25 percent of the existing farmers and ranchers of this country over the next 2 or 3 years.

So we have in this bill simply a framework for the rescue of the remaining American agricultural industry. I said, "industry." That is a little bit more than just farmers and ranchers. Within that framework, it is obvious that much remains to be done. I am speaking about a 5-year farm program, the whole kit-and-caboodle of all those farm programs, as a framework. If we are going to help this most basic industry survive, we must, first of all, recognize that this bill, this framework bill, is just the opening round, granted that this round lasted all this year. I think it is fair to say that we have drawn the line now; we retreat no farther, and we must fight. We must fight it out on this line no matter how long it takes us in 1986 and 1987 and 1988— whatever it takes.

The reason we must do that is not just to keep those farmers and ranchers on the land, it is also because we have been seeing the landscape of America changing. All across the rural countryside of the United States, we see community after community invariably shrinking and it shrinks as

farmer after farmer or rancher after rancher leaves the land.

It is a social change that is not desirable and it is a type of social change that, if it goes on unchecked, will change America forever. That I cannot countenance. I cannot believe it would be good for the United States. And I do not believe that we can allow it to happen. Despite whatever Gramm-Rudman means for American agriculture in 1986, or 1987, and however long Gramm-Rudman lasts in its present form, there may be special steps—I believe there will be required special steps to take on behalf of American agriculture. I say that again in its broader form on behalf of rural America.

Despite how bad the credit situation is for the survival of both the producers on the land and the businesses that serve them in rural America, I believe it will be absolutely essential that we take whatever steps are necessary for their reasonable survival.

And so I repeat, our work is just starting for American agriculture and we will see a lot of it necessary in 1986. While we have drawn the line now, we will have to continue to fight it out in this Chamber and in the House Chamber through 1986 and 1987 and as long as it takes to resuscitate the agricultural endeavors of this country.

Now, Mr. President, I am not going to take long to make my comments. I want to conclude by drawing to the attention of the Senate some of the things you might not have noticed in this bill. Some made remarks about how long it is and how much it weighs, and that is true but nobody is ever going to know everything in detail. But some of the things you might miss I would now like to draw to your attention.

First of all, there is in the bill about six different ways to export surplus commodities from the United States that are additions, enlargements, or new export programs either through donations or commercial sales or a blending of the two. I must note in particular that Public Law 480 is endorsed and broadened with more minimum tonnages than we have had in the past. Section 416, the other donation program, is very greatly broadened with more commodities that can be used for these donations.

A very significant point that should be noted about 416 is that we allow the Secretary of Agriculture to utilize it as a donation program along with a commercial sale—in other words, tying the two together. That is something which could be very beneficial in the years to come for American agriculture and the development of markets as well as helping friendly countries with their nutritional needs.

Another point that might be missed in perusal of the bill is that we have provided for a special assistant to the President to both expedite and coordinate the agricultural food aid programs as well as agricultural trade in general. A point you might miss is that that special assistant will be given full cabinet rank. He will not be advised and consented to by the Senate, which is unusual for a person of that rank but, believe me, that is the way the bill calls for it. He will have a pay equal to any of the other secretaries.

Another point that is perhaps overlooked because it is not expected to be found in a farm bill is the sodbuster provisions. It is something we have sought to enact in this Chamber for 2 years. I trust this bill, when it clears the Senate, will be signed by the President. The sodbuster provisions will prevent those who break up highly erodable land from participating in the farm program.

But added to that is also what we call the swamp-buster provisions which provide the same limitations on anybody who is breaking up swamp land to be put into agricultural production. They, too, will not be able to participate in the farm programs under the terms of the bill.

Fourth, and not the most insignificant point but unless you look carefully for it you will not be aware of it, is that in the animal welfare amendments included in the farm bill we require research institutions which use primates in their experimentation to provide for their psychological well-being. You might wonder, Mr. President, what does "psychological well-being" mean. Let me tell you what is in the report. The report says that the psychological well-being of primates means they will have adequate space. That is vitally needed. If you look at where some of these institutions keep the chimps or monkeys or the apes which they use in research, you will see that they are often confined to very small quarters. But also the report states that the psychological well-being of primates means they not only have the space but they have interesting things to do, so they are not bored to death just waiting to be part of man's quest through true research for better lives for all of us.

Lastly, a point you might miss is on the whole-herd buyout plan. If you do not know what the whole-herd buyout plan is, I will explain to you that that authorizes the Secretary of Agriculture to buy entire herds of dairy cows in order to get them out of production and reduce the dairy surplus. It is a new concept.

I am not sure how well it will work, but an interesting point made twice, if not thrice, during the conference committee negotiation by one of the Assistant Secretaries of Agriculture was that when the Secretary of Agriculture buys out the whole herd from a dairy farmer, it also means he cannot remove the dairy barn and the milking parlor from the premises but neither can the dairy farmer continue to utilize that dairy barn or milking parlor. I do not know exactly what they are going to do in the dairy barn or the milking parlor after the herd is gone. I suppose they could use it for barn dances, if it is the right kind, or they could use the milking parlor for sort of a family room away from the house. Kids could use it for their parties. I do not know. I hope that would be acceptable to the Secretary of Agriculture as he buys out these whole herds from dairy farmers. I hate to think that the Secretary of Agriculture would have to review and examine and inspect periodically the use of those dairy barns or milking parlors to make sure they fit whatever regulations the Secretary of Agriculture is going to draw up for their future use.

Mr. President, with that I conclude my remarks. I will support the conference report. I hope it is adopted, and I assume with quite a degree of confidence that the President will sign it.

Mr. COCHRAN. Mr. President, I hope Senators will vote for this conference report. It offers the best hope we can provide to farmers throughout America that they will be able to operate at a profit. It is a very strong effort to put profit back into farming.

The centerpiece of the effort is market enhancement, to make America more competitive in the international marketplace but not at the expense of farm profits. That is hard to do. But there has been developed a strategy of a marketing loan that is found throughout this legislation which authorizes the Secretary of Agriculture to permit the repayment of nonrecourse loans by farmers at rates that are equal to the market, the market value of the commodities, rather than the loan rate which was originally set in the legislation for the harvest loan. This is new. The only crop for which it is mandated for the 1985 crop year is rice. In the other commodities, it is authorized for the 1986 crop year and later.

In my judgment, this is going to permit America to become competitive again in the international marketplace, but there will be a sharing of the financial burden to become competitive. Farmers will not have to bear the entire financial burden themselves. Our Government will continue to assist by making up the difference between the loan rate and the market price at the time the loan is redeemed.

This does two things. It lowers the effective price of U.S. commodities at the market. It forces the sale of those commodities in the international marketplace and does not require their forfeiture to the Government. The Government saves money because it does not have to pay storage costs; it does not have to pay interest. It moves

these commodities into the international marketplace.

I think it also sends a very strong signal around the world that America is going to stay in the farming business. There were some who were arguing at the beginning of this debate last year that America ought to limit production so severely that prices are forced upward because of reduced supplies. Most felt, however, that this would take us out of the international market. It would require the idling of huge amounts of acreage. Some said that if we are not going to sell at all in the international marketplace, we would have to idle as much as 40 percent of all cropland throughout the country.

There is another key feature of this bill, and it is that we continue to make a commitment to agriculture that there will be income support and a structure for maintaining a reasonable supply of food for our domestic consumption, at reasonable prices. I think everybody realizes that the consumer has an important stake in the outcome of this farm bill, too, and this bill recognizes that, and is sensitive to those interests as well. But it also sends a very strong signal to farmers in this country that we in Congress recognize that if the American farmer goes down the drain, America goes down the drain, too, and we are not going to permit that to happen.

There are some miscellaneous provisions in the conference report that I think are significant. There is a solution at last to the dispute between the maritime industry and the agriculture industry over cargo preference.

There is a compromise reflected in this conference report that ought to put an end to the litigation that has been going on for the last few years over the applicability of cargo preference to certain commercial type shipments. We basically have provided in this bill that cargo preference will not apply to commercial type transactions and the shipment of commodities under those transactions, but it will apply to the extent of 75 percent of the shipments in concessional type transactions, such as Public Law 480 and the like.

We hope that this provision will be funded by additional appropriations to the Department of Transportation to pay for that extra 25 percent of the concessional-type shipments. If that funding is not forthcoming, then these provisions and these changes will be a nullity.

There is another provision of the conference report that I think Senators should notice, and that is the clear title provision, which puts to an end the continuing disagreements and concerns that have been expressed over the preference that is given in domestic transactions involving agricultural commodities as among lenders and purchasers and farmers.

We have established in this conference report that a purchaser of agricultural commodities takes title clear of any lien interest, unless that lien interest has been disclosed to the purchaser in writing by the lender, or unless the lender has sent in his notice and filed it with a central filing system that can be created under the authority of this legislation by the States. Many States already have moved in this direction and find that it is a more satisfactory way to protect the interests of lenders, farmers, and purchasers than the old uniform commercial code.

The fact is that section 9 of the Uniform Code had become ununiform. Some 21 States opted to change the provisions, and no one can know what they are from one State to another without doing exhaustive research, trying to find who has liens on which growing crops or on whose livestock. It was a mess.

I think that by the adoption of this conference report, we will have improved that area of the law for all concerned. It had the support in conference of the representatives of the Banking Committee, those who were involved in developing the legislation here in the Senate. We were trying to protect the interests of buyers, lenders, and farmers, and I think we succeeded.

Mr. President, before I yield the floor, I want to thank, in a most sincere way, the staff members who have worked harder than any group of staff members I have ever observed in the development of this legislation, in the passage of it, in the drafting of language, in the conference, and in getting this all together in the proper form to present it to the House and the Senate today. It has been a massive undertaking by the staff of our committee, led by George Dunlop and Bob Franks, the legal counsel; also, our personal staff members, such as David Graves, who is on my staff; and Carl Rose, who is the staff director on the minority side.

They have all done a magnificent piece of work. I commend them and thank them and congratulate them for the work they have done and the professional way in which the work was done.

I also have to say that none of this would have been possible without the very skillful and brilliant leadership of the leaders of our committee—the chairman, Senator HELMS; Senator DOLE; and Senator ZORINSKY. They had to put together from a disparate group of suggestions and ideas provisions that have been sifted through, analyzed, and have now come together in the form of this conference report to the Senate. I think it is a brilliant piece of legislative work, and I congratulate and compliment them.

Mr. PRYOR. Mr. President, after almost a year's work, we are finally about to take final action on the 1985 farm bill. For over 11 months, the Senate Agriculture Committee has listened to economists, administration officials, representatives of farm groups, and, most important of all, farmers themselves. We have tried to ascertain their thoughts on what a new farm program should contain. These thoughts were at best conflicting, and it was rare for more than one or two groups to agree on any one specific approach to a new farm program.

Maybe what made this process even more difficult is that we were operating in a crisis atmosphere. Farmers are going bankrupt, rural banks—and the Farm Credit System—all find themselves struggling for survival. And the country itself is facing a debt of trillions of dollars.

It has been an emotional experience for me to travel through Arkansas meeting with thousands of farmers, many of whom are losing their farms. However, the reality of our great budget deficit and what it is doing to our economy dictates that all decisions have to be made within the realm of a limited budget.

As a member of the Senate Agriculture Committee, and this year a conferee on the farm bill, I have had an opportunity to be involved in the development of this year's legislation. I have never taken part in a more difficult or complicated exercise in my political career. Although I may change my mind by this time next year, at this point I would say that rewriting the complex Tax Code looks easier now than the "push and pull" gymnastics involved in the farm bill rewrite.

Mr. President, I represent an agricultural State that is almost completely dependent on the farm economy for its own financial health. I have tried to be as effective an advocate and spokesman for the agriculture community as I could be during the months of discussion and debate.

Because of our overall budget restraints, from the very beginning of our consideration of the 1985 farm bill, we were forced in our discussions to deal not with raising the farm safety net for our farmers, but on just how low we could take this net without having wholesale bankruptcies and foreclosures. We had to try to determine why the American farmer, the most efficient in the world, cannot compete with foreign agriculture and why our farmers, as well as their lenders and suppliers, are facing such disastrous problems.

During the last 11 months we have all looked for some avenues to make our farmers more competitive. We have examined several new concepts

to allow our farmers to get a price for their goods.

Both the Senate and House Agriculture Committees and the resulting conference looked at scores of alternatives to solve this puzzle, trying always to fit the pieces together within the budget framework.

I am quick to say that this is not the bill I wanted. But under the circumstances, it is much better than it might have been. I believe it falls short in providing the kind of safety net income protection for farmers that I think is needed. But it does offer some new approaches for making American agriculture more competitive and to return a fair price to our farmers.

I am proud that the marketing loan concept that Senator COCHRAN and I proposed has become a part of the price program. I believe this experiment will prove successful and that it will eventually become an integral part of other commodity programs. It will increase exports and provide a fairer price to the farmer, while reducing the drain on the Federal Treasury.

The inclusion of this program is one of the reasons I will vote for this bill today. It doesn't contain all the solutions, and for sure we will be working on farm legislation again next year. But to merely extend the current farm programs would have been even worse. That bill, which I voted against in 1981, helped mire agriculture in its present crisis and provided no new tools for farmers to start regaining lost markets.

Writing farm legislation is a lot like climbing a ladder. We must take it one rung at a time. I look at this bill as the first step. To vote it down runs the risk that farmers would end up with a much worse program. And with Gramm-Rudman looming over our shoulders and a Congress that is becoming less and less rural oriented, we can't put off approaching that first rung of the ladder any longer.

The survival and the economic vitality of the farm community—and, Mr. President, of the country as a whole—depend now on how we continue the process of taking it one rung at a time.

Mr. President, we have a little town up in the mountains of north Arkansas, in Marion County, named Yellville.

One Saturday each year, usually during the fall, Yellville, AR, does a unique thing, and I must say that it is very controversial. Yellville, AR, has become the scene of the annual turkey drop. They have a big parade, and they fly an airplane over the town—it is a small town—and they start dropping turkeys out of the airplane, about 500 feet over the town.

All the townspeople go out there and wait for the turkeys to drop. On the wing or the leg of each turkey is a little certificate. It might be for a free lawnmower from Joe's Lawnmower Shop, or a free homemade pie from Mary's Pie Shop, or it might be a sofa from Joe and Bill's Furniture Store.

But whatever the case may be, as to these turkeys that drop from the sky and these people who stand under them and try to catch a 25-pound turkey, dropped from 500 feet up in the airplane, sometimes the recipients of these turkeys made out a lot worse, I might say, than the turkeys themselves do.

Mr. President, a lot of people today are going to refer to this bill as a turkey and they are going to say that we have flown low and we have thrown this turkey out, and now the farmers are supposed to stand there and catch the turkey.

Mr. President, I wish to say that I also, as my colleague from Mississippi, as the distinguished chairman from North Carolina, and the ranking member of the Agriculture Committee from Nebraska, and those other Members of the Senate who have spoken this afternoon for and against this farm bill and those who will definitely follow my brief remarks, must say that I understand the threat of a Presidential veto after 11½ months of a gestation period which has now presented us with that 13-pound baby which sits over there in its crib, that with the parameters of a budget resolution which have constrained and restrained us working very closely and tightly within a budget that is extremely severe, I must say to my colleagues that I believe that our system has produced the best farm bill under the circumstances that we could produce at this time.

I also wish to say that if I wanted to make myself very popular back home and maybe across America with a lot of farmers, I would vote against this bill. I would vote against this bill because all of us know that this farm crisis that we are in today is a crisis that is not going to improve dramatically because of this bill; nor are we going to see dramatic changes take place in the agricultural community across America for possibly the next 12 months. We are in serious times and we have produced a farm bill to the best of the ability of the members of the Agriculture Committee of the Senate, and the conferees who worked 8 days and 8 nights, and the members of the staff, without whom we could not have completed and laid this bill on the desk today. This bill would not even be here today except for an exceptional and dedicated staff. I truly believe, Mr. President, that we have produced the best program and the best document humanly possible under our restraints.

When we started this bill back in January, a lot of people said, "Well, wait a minute. Maybe we do not need to make any changes. Let us reenact the farm bill that we now have on the books and extend it for another 2 years or possibly another 4 years."

There was one train of thought that was going through the Senate and the House of Representatives at that time. It said let us just have mandatory controls. Well, that provision was discussed and it did not prevail in our democratic system.

Another train of thought said something like this: let us just not do anything. Let us just get the U.S. Government totally out of agriculture and let the farmers sink or swim on their own.

Mr. President, we have chosen to do none of those particular two examples. We have chosen a bill which I truly believe is an attempt to move back into the export markets and to retrieve many of the export customers that we have lost over the last several years.

I, and I speak as a Senator from Arkansas, have been one of those severe critics of this administration when it comes to agriculture policy. I have from time to time been a severe critic, not personally but professionally, of the policy that our present Secretary of Agriculture espouses, but that is behind us, and on Saturday night at 7 p.m., when the conference finally adjourned after days and nights, and months of discussion, and almost a year of debate, and I think it might be noted, Mr. President, that every member of that conference, Democrat and conservative, Republican and liberal, whoever, chose to vote affirmatively to send this conference report to the floor of the Senate.

Finally, Mr. President, if we were all magicians or if we were inspired or maybe crowned with a divine right theory, or whatever, if we had some extra perception or even some extra money, maybe we could have done a better job. But our system is one that has to work within the parameters that are given us. We can do no more; we can do no less.

I say, also, to the distinguished Senator from Mississippi, Senator COCHRAN, with whom I had the honor of coauthoring something known in the committee as the "Cochran-Pryor marketing loan provision," when Senator COCHRAN and I introduced this concept last spring, I studied what it did and we both thought it would work. We introduced it and it got a lot of flak and people would call me on the phone and say, "What about that marketing loan bill?" I said, "Oh, that is Senator COCHRAN's bill. I just kind of tagged along, and, you know, by typographical error or something I had my name on there."

But the longer I loooked at that bill, and the longer I looked at Senator COCHRAN's proposal on the marketing loan, I truly believed that our rice industry, our cotton industry, and ulti-

mately those other commodities such as wheat, corn, and maybe soybeans, down the line, were going to see what this concept will be able to do in expanding our exports and retrieving those customers we have lost and, by using supply and demand, ultimately increasing commodity prices to the extent that maybe someday we can get out of the area of setting loan rates and target prices.

So, Mr. President, it has been a great honor and privilege for me to have worked with my colleagues on the committee, with the chairman, with the ranking minority member, members on both sides of the aisle, and with the members of the conference, who once again supported this proposal unanimously to send it, all 13 pounds of it, to the floor at this time.

Mr. President, in conclusion, I might note that after we had adjourned the conference on Saturday night, that on Sunday morning the members of our staff came back and for over a 40-hour period, nonstop, began putting this bill together and trying to assemble this huge proposal that will affect our agriculture policy for the next 5 years.

Mr. President, I yield the floor.

Mr. STENNIS. Mr. President, will the Senator yield for just 1 minute?

Mr. PRYOR. I yield.

Mr. STENNIS. Mr. President, I compliment the Senator. I am very glad I got to come here just at this time for a chance to hear the Senator's speech.

I believe he has been speaking so truthfully and correctly about the difficult situation in passing this bill this year on the subject of agricultural products.

I believe that of the years that I have been here, this was the most difficult year that I have known to pass a comprehensive farm bill that had real meaning and possibilities of success.

I wish to commend and thank all of the members who worked so hard, so diligently, from the East, the South, the West, the Far West, everywhere. A lot of hard work went into this bill trying to meet problems and situations. I feel mighty thankful we have the bill. I have supported virtually all phases of the measure.

I commend the Senators highly who have worked on the bill, including my own colleague from Mississippi, Senator COCHRAN, who has been diligent and effective in covering parts of the bill. I commend him for his work.

Mr. PRYOR. I thank my colleagues from Mississippi.

The PRESIDING OFFICER (Mr. ABDNOR). The Senator from Nebraska is recognized.

Mr. EXON. Mr. President, this is an extremely important bill that is going to have extreme effects on rural America. So I hope that we understand what we are doing on this bill when the vote comes.

Yesterday I was in this Chamber and indicated the rapidly deteriorating situation in Nebraska, and that is for the record.

As we approach the vote on this bill I have two or three questions that I wish to ask the managers of the bill and anyone else who would care to respond. But before doing so I today cite another reason for the crisis situation that we are in in agriculture today and not only agriculture but the businesses and the people who live in rural America.

It is summed up basically by an excellent article that appeared recently in the Sioux City Journal. It is about a very knowledgeable farmer and farmbanker in Nebraska whose name is Vince Rossiter.

Mr. President, I ask unanimous consent that, at the conclusion of my remarks and when I yield that floor, the full article be printed in the RECORD, including the article entitled "Banker Blames Government Inaction, Debt," along with an article subtitled, "Nebraskans Seek Parity."

The PRESIDING OFFICER. Without objection it is so ordered.

(See exhibit 1.)

Mr. EXON. Mr. President, I first want to compliment the managers of the bill. I am not a member of the Agriculture Committee, but I have been working very closely with them. I was in and out of the conference with the House of Representatives. I know that our Members and especially our staff worked extremely hard on this, and particularly staff continued into the wee hours of the 3 days following the conclusion of the conference to get the bill in a form that it could be considered first by the House of Representatives and now by the U.S. Senate.

In reviewing the vote in the House of Representatives, I noticed that a rather high number of those who opposed that bill in the House of Representatives were from farm States. So, while it is true that there was bipartisan support for this in the House of Representatives, a major portion of the opposition over there came from Members of the House of Representatives that represented farm States.

Let me first say that my colleague from Nebraska, ED ZORINSKY, fought very hard in that conference and tried to get some things done that were not accomplished. I compliment ED ZORINSKY and the other Members for holding fast for what they thought was proper.

Unfortunately, they did not get as much done as I think would have made this bill acceptable. But, nevertheless, they worked extremely hard. If we could just have gotten some give on some points. If we could have recognized, for example, that if we could get to some kind of a mechanism to mandatory control of production or at least steps significantly in that direction, rather than the watered-down approach to even the referendum by wheat growers as to whether or not they want to go to mandatory controls, I could have been more enthusiastic about this bill.

But I reference again the item by Vince Rossiter in the Sioux City paper. Again, it comes home to roost that there is no way out of this situation. There is no way out of it with extended credit. There is no way out of the thing by simply bailing out the Farm Credit System. The only way out of the difficulties of rural America today is to get some profitability into the hands of the food producers.

I believe the key question about this bill, therefore, is not to what extent it busts the budget or does not bust the budget. I think the key question is whether or not this bill before us, which we will be voting on sometime today, as I understand it, raises farm income for any one of the following years: 1986, 1987, 1988, 1989, and 1990.

My first question of anyone who is in a position to answer: Will this bill improve farm income in any of those years?

Mr. President, I pose the question once again because obviously no one heard me: Will this bill improve farm income in 1986, 1987, 1988, 1989, and 1990?

Mr. ZORINSKY. I would like to answer my distinguished colleague from Nebraska. If properly administered by the administration, this bill has the potential for increasing profit. Based on past history, the odds might be against that. however, the discretionary authority that is vested in the Secretary of Agriculture and the Department of Agriculture gives numerous options to make that happen. As a matter of fact, this bill, for instance, would give him the discretionary authority to implement mandatory production controls on wheat, which my colleague from Nebraska has just indicated he would like to have included in the bill. The Secretary does have that option under the bill. Were he to use that, I would say that I would be able to answer the Senator's question affirmatively. Obviously, the choice of those discretionary options has a great deal to do with the profitability of agriculture in the future.

Mr. EXON. Let me ask another question of my colleague, then. I appreciate his frank and forthright answer. During his discussions, or any discussions that he knew of between the present Secretary of Agriculture, who is the only one that we have had under this administration, during the discussions around the measure before us, which the Secretary of Agriculture was intimately involved in, or previously, has there been any indication whatsoever, has there been one iota of hope expressed directly or indirectly

by the Secretary of Agriculture that he might use some of the tools at his disposal that my friend from Nebraska has just cited?

Mr. ZORINSKY. Well, the Secretary has indicated to me, I might relate to my good colleague from Nebraska, that he is hopeful agriculture will turn the corner and farmers will be able to earn a profit in the marketplace. However, he did not indicate in which manner. He did not indicate how; he did not delineate any plans in the near future.

However, the results of the wheat poll—the mandatory requirement that the Secretary conduct a survey of wheat farmers to see if they favor mandatory production controls—may change the Secretary's mental attitude toward implementing production controls and help the profitability of agriculture.

But, in answer to the Senator's question, I have found throughout the entire evolution of this farm bill that everybody wants to increase the prices for commodities for farmers. Many people are on different tracks on how to get there. Unfortunately, my differences with the administration and Secretary Block were on how to get there. I felt we have to have new innovative ways to do that, whereas it appears he is satisfied to let the failed practices of the past control the future.

Mr. EXON. I thank my friend from Nebraska. I would simply comment that, from his answer, I only took it that the answer to my question as to whether or not the Secretary of Agriculture had ever indicated in any fashion that he was prepared, ready, anxious, or would move to production controls to raise prices, I think the answer to that is no. Because I do not believe that he has ever indicated that he thinks that is the proper course of action. To the contrary, this administration has always taken the position that they did not want any kind of controls; that they were for fence-row to fence-row production as much as they could because that would eventually lead the price of grains down to a point where we could—and I use their words—"be competitive in the international marketplace."

What they are really saying is that the farmers of the United States should be able to produce grain as cheaply as they do by hand in mainland China, where the average wage is something around 18 or 19 cents, and they do it all by hand and they have no equipment and no costs therewith.

I also say this is the same Secretary of Agriculture—and that is why I object to this measure that allows too much flexibility, and too much control for the Secretary of Agriculture—who not more than 2 years ago was in the room over there suggesting that we cut target prices on wheat so that he would not have to pay out as much money, and that he could reduce the loan price of wheat if we would simply put the target price which unfortunately and over my objections we did.

There is one other question that I think we have to keep in mind as we look to the future. This is my last question, Mr. President. When I get the answer to this one, I will yield the floor.

It is not just what is in this farm bill and how much money we are going to spend. But it is tremendously important, for the planning for not only 1986 but in future years, to the farmers who have to work with their lenders to see what they can do, and what their budgets are. It seems to me that whatever this bill does or does not do we will be facing a near-term reduction in whatever amount of money we appropriate for this bill because of Gramm-Rudman. I suspect that at least will happen in the February to March 15 period of next year when Gramm-Rudman triggers about a $11 billion-plus decrease in the budget for 1986, a reconciliation, if you will.

When you knock out—and eliminate, if you can, and as Gramm-Rudman does—over 50 percent of the budget and say that is sacrosanct, it cannot be touched, then you come with under 50 percent of the budget, and you start whacking out $11 billion there, it appears to me from rough calculations that would require maybe a 5-percent reduction in all budgets including agriculture in the spring of next year.

At the very same time we will be tied up with the message from the President of the United States that Gramm-Rudman requires, to cut another $35 billion out of the next fiscal year. What I am saying is I think it is fair that we level with the American farmer, and have an understanding as to what this bill does or does not do.

I do not think we can argue with the fact that Gramm-Rudman, good, bad, or indifferent, hangs like a meat ax or a meat cleaver over all appropriations including agriculture.

So whatever we outline here, whatever we do, whenever we come to figuring cash flow as to if I raise so many bushels on so many acres how much money will I have to meet my debts and retire my loan payments, and if I am going to have anything left, it seems to me there is no way that figuring cannot be done on a realistic basis given the uncertainty of Gramm-Rudman.

My question is, Is it not possible or is it not probable that Gramm-Rudman and its budget approach in the spring and in outyears is going to do great harm to whatever amount of moneys we are attempting to appropriate here with regard to a 5-year Farm Program?

That is my question. Can anyone answer it for me?

Mr. ZORINSKY. I would like to say to my colleagues from Nebraska that quite obviously any cut in any budget severely constrains its effectiveness, and its ability to operate. If we had the guts a long time ago to start reducing the deficits and the budget, maybe today's farmers would be paying 5 percent interest which would certainly more than offset any 5-percent cut in the budget next year. It is a hypothetical question. Obviously any cut in anyone's budget can terminate programs, can hurt budgets and can hurt the effect of any program—quite obviously.

The ultimate responsibility for making budget cuts rests with Congress. Gramm-Rudman did not repeal the Constitution.

I would hope that come next year we do not have to trigger Gramm-Rudman, and have the ability ourselves to face what I have heard the American people tell me time and time again; that is, Mr. ZORINSKY, we are not overtaxed. We are overspent in Washington.

So I just feel at this point it is difficult to describe what problems would be created by Gramm-Rudman.

Mr. EXON. Can anyone else answer the question for me as to whether or not Gramm-Rudman with its automatic triggering action is going to have an effect on the agricultural community? I did not come here to argue that we should not cut spending. What I am arguing, and what I argued for yesterday, was the fact that Gramm-Rudman and the whole process that we are going about did not make an even cut. As I said yesterday, there is great joy in most of America today—merry, merry Christmas and all that good cheer. There is no good cheer in the Farm Belt today. How many people in America today would be having a merry Christmas if they felt that their total assets had deteriorated by 50 percent in the last 4 years?

I am trying to get across to the U.S. Senate that we are going about this in an uneven manner. I do not buy the fact that we have to make some reductions as we go through this overall process.

What I am trying to get at is this bill we are passing today is generally understood, I think, in rural America as doing this when in fact we are misleading them by not coming up front and saying whatever we do in this bill it is going to be something less.

I agree with my colleague from Nebraska. I hope we do not have to make $11 billion in cuts in February. But we have already been told that we are going to have to do that. We have already had outlined in Gramm-Rudman that we are going to have to cut spending by $35 billion a year for 5 years. It seems to me, Mr. President, that Gramm-Rudman hangs like a

meat cleaver over the agricultural budget, in what it is going to do to a sector of our economy that has already been devastated.

Since I cannot get the answer to the question, at least I tried.

I yield the floor.

EXHIBIT 1

BANKER BLAMES GOVERNMENT INACTION, DEBT

(By Joan Burney)

HARTINGTON, NEB.—V.E. Rossiter Sr., chief executive officer of the Bank of Hartington, has been an activist for the cause of the family farm all his banking life.

He has served as president of the National Organization for Raw Materials, has also given numerous speeches and participated in a number of meetings in Washington, including a recent one with Paul A. Volcker, chairman of the Federal Reserve Board.

Rossiter said "What Governor Branstad has done to correct this problem will be lost in history and soon forgotten in the economic chaos that is just ahead of us—unless we restore the primary income created in monetizing farm and other raw materials to 100 percent of parity immediately."

He said he didn't care to speak directly on Branstad's action. "I'm sure he has done as much as he can do . . . to persuade President Reagan to release his stranglehold on the throat of American agriculture.

"On the other hand I am painfully conscious of the fact that the midwestern governors have had three or four years to consider 'mininmum pricing' legislation where the several midwestern states would be permitted to supplant the federal government in a farm-price-support program. When it passed the legislature of South Dakota three or four years ago, Governor Janklow vetoed it. Of all the midwestern governors, Governor Perpich of Minnesota was the only governor to actively support state level 'minimum farm pricing' legislation.

"The Nebraska state legislature has prepared a bill and the agricultural committee has approved it, but it has found no support from the Nebraska governor nor members of the legislature in the last two sessions.

"You would think that if the midwestern governors really wanted to deal with underpriced farm raw material, the primary source of state tax revenues, then they would do something in the way of minimum pricing and legislation at the state level."

Rossiter said midwestern governors appear to be insincere in their political efforts to help the ailing agricultural economy within their states, and they are dishonest if they criticize President Reagan for doing nothing for the farm economy, if they are not willing to supplant mismanaged and ineffective farm programs at the federal level with carefully managed and effective, state-administered farm programs which will support our farm economy, and the national economy.

He says, "I personally anticipate tragic economic consequences for rural America, and metropolitan America as well, by the unconscionable delays in dealing with the pricing problem of the farm economy. Agriculture's share of national income has declined 85 percent from the 1943-52 average. The share of national income earned by small unincorporated businesses and professional people has declined 59.1 percent. The share earned by individual owners of rental property has declined 25.7 percent. And the share earned by corporations before taxes has declined 23.2 percent from the average share of each national income dollar earned from 1943-52" Rossiter says he feels these figures are significant and show that everybody should be concerned. He said, "The point here is that agriculture earned 100 percent of parity farm prices on the average during the 1943-52 period and all sectors for the economy prospered.

"Today we have the greatest distortion of individual sector share of national income that has prevailed since records have been kept. This distortion was created by the dislocation of income due the private enterprise sectors, which was siphoned off by the increasing interest costs on an unprecedented public and private debt injection into the economy. The purpose was to 'stabilize' the economy over the past 32 years, but the effect has been rampant destabilization."

Rossiter said, "The result is an increase in public and private debt in the United States from $550 billion in 1952, to $7.1 trillion at the close of 1984. An increase of 46.5 trillion of debt in 32 years. The net result because of this dislocation is that with all private enterprise sectors losing income to service debt, interest income to individuals share of national income has risen 661.9 percent from the average from 1943.52.

"This in an unprecedented example of gross mismanagement of our national economy by the Republicans and Democrats alike. The debt incurred must be paid out of future income or it will cause economic collapse and it will be abrogated, cancelled and charged off against the capital assets of the nation."

NEBRASKAN SEEKS PARITY

HARTINGTON, NEB.—V.E. Rossiter Sr., chief executive officer of the Bank of Hartington, said "What Governor Bradstad has done to correct this problem will be lost in history and soon forgotten in the economic chaos that is just ahead of us, unless we restore the primary income created in monetizing farm and other raw materials to 100 percent of parity immediately."

He said he didn't care to speak directly on Branstad's action. "I'm sure he has done as much as he can do . . . to persuade President Reagan to release his stranglehold on the throat of American agriculture."

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. HEFLIN. Mr. President, the peanut title, as reported out by the Senate-House Committee conferees, reauthorizes and improves upon the Peanut Program provided in the 1981 farm bill. These improvements are considered necessary by experts in the peanut industry. Since the provisions of the peanut title of the conference report, the Senate bill and the House bill are almost identical to the peanut title of the bill I introduced, I feel I am the proper Member of Congress to explain the provisions of the final bill which includes the improvements of the existing law.

Mr. President, I would like to briefly outline these improvements or modifications for clarification.

First, the bill seeks to be more flexible in regard to meeting increased market demand, by giving the Secretary of Agriculture discretionary authority to adjust the national poundage quota by the amount he estimates that domestic edible, seed, and related uses of peanuts would exceed the statutory level of 1.1 million tons. Increases in the national quota are required to be apportioned among the States so that each State's poundage quota is equal to the percentage of the national poundage quota allocated to farms in the State for 1985.

It is the intent of the conferees that the State Agriculture Stabilization and Conservation Committees shall determine the basis for allocation of such poundage quota released. The State Agriculture Stabilization and Conservation Committee is more aware of the situations and conditions that exist in their respective States and are, therefore, in the best position to determine how the quota reallocation should be made on a basis of fairness, equity, and need. There may be some conditions prevailing in some States and not in others that should be taken in account in making allocations of poundage quotas.

Second, the bill further expands provisions that establish poundage quota for farms that currently do not have a farm poundage quota. Under the bill, a farm poundage quota for the 1985 crop and for each farm on which peanuts were produced in at least 2 out of the last 3 crop years. In addition, if the national poundage quota is increased by the Secretary, poundage quota would be allocated equally to both quota and nonquota growers.

The bill also provides for reduction of a farm poundage quota if the quota was not produced in 2 of the last 3 years. Voluntary release of quota is also permitted. Quota that is reduced for failure to produce or voluntarily released would be allocated to all farms that produced peanuts in 2 out of the 3 last years.

Third, the bill increases the marketing penalties to 140 percent of the support price for producers and handlers. Previously, handler penalties were 120 percent of the support price. Also, penalties of 140 percent of the support price are imposed on importers of additional peanuts which have been exported from the United States.

Fourth, some physical requirements for exported additional peanuts have been relaxed to improve overseas sales potential.

Fifth, the deadline for contracting for the export or crushing of peanuts has been changed from April 15 to August 1 to allow growers more time to assess their planting and marketing objectives before making commitments on contracts.

Sixth, the bill gives the Secretary authority to adjust the support rate for 1986, based on changes in the index of prices paid by farmers over the past 5 years.

51-059 O-87-3 (Pt. 27)

The national average quota support rate for the 1986 crop of quota peanuts shall be the same as the national average quota support rate established for the 1985 crop of quota peanuts, adjusted by the Secretary by a percentage equal to the percentage increase in the index of prices paid by farmers for commodities and services, interest, taxes, and farm wage rates, 1977 equals 100, for the calendar year beginning January 1, 1981, through calendar year ending December 31, 1985. This adjustment shall be made by adding any increase determined by the percentage of any increase for the 1981-85 calendar years to the quota support rate, $559 per ton for 1985. The index, 1977 equals 100, of prices paid by farmers is compiled and published on a monthly and annual basis by the Crop Reporting Board, Statistical Reporting Service of the U.S. Department of Agriculture.

The Secretary of Agriculture has already gone through the formula outlined in the farm bill and has determined that the quota support for the 1986 crop will be $615 per ton. In a letter to the House of Representatives, dated September 18, 1985, the Department of Agriculture outlined its position on six aspects of the farm bill. In writing about peanuts, this letter specifically stated among other things:

The Committee Bill would set the 1986 quota price support level for domestic use equal to the 1985 level (559 per ton) adjusted by the change on the cost of production. This price is currently estimated at $615 per ton—well above the estimated 1984 farm price of $506 per ton.

After the Senate Agriculture Committee reported its bill, Senator JESSE HELMS, chairman of the Committee on Agriculture, Nutrition, and Forestry of the U.S. Senate, requested the Department of Agriculture's position on the committee-approved bill. John R. Block, Secretary of Agriculture, responded to this request by a letter addressed to Senator HELMS dated September 26, 1985. On page 4 of that letter, under the heading "Peanuts," the Secretary wrote, among other things, the following:

Peanuts—The Committee-approved bill would extend the present peanut program with some modifications. The legislation would set the national poundage quota at estimated domestic edible, seed, and related uses, but in no case could the quota be less than 1.1 million tons. The legislation would set the 1986 quota price support level for domestic use equal to the 1985 level ($559 per ton) adjusted by the change in the costs of production. This price is currently estimated at $615 per ton—well above the estimated 1984 farm price of $506 per ton. The 1987-89 quota price support level is tied to changes in cost of production. As a result, the legislation would substantially increase both the national poundage quota and the quota support level. . . .

In writing that the 1986 quota support level is currently estimated at $615 per ton, the Secretary was expressing displeasure with the committee-approved bill on peanuts and, obviously, the purpose was to try to influence the Senate to change the Senate committee-approved bill. In making this evaluation, the Secretary had to adjust the support price from the 1985 level of $559 a ton upward to reflect the percentage increase in the index of prices paid by farmers for commodities and services, interest, taxes, and farm wage rates for the period beginning January 1, 1981, through December 31, 1985. It is assumed that the estimation was made around August 1, 1985, or September 1, 1985. The reason for the use of the words "currently estimated" was that the year 1985 was not completed at the time the Secretary made his review. Thus, it would appear that if a different review of the period from January 1, 1981 through to-wit: September 1, 1985, were to produce a different figure for the final program figure, then the Department would be guilty of making one estimate for political expediency to support its political position and a different one for program purposes. I trust the Department would not desire its integrity to be so questioned.

For each of the crops years 1987 through 1990, the national average quota support rate shall be the same as the preceding year, adjusted to reflect any change in the national average cost of production of peanuts, excluding any change in the cost of land, for the calendar year immediately preceding the crop year for which the quota support rate is being determined. However, in no event may the national average quota support rate for any of the 1987 through 1989 crops (a) exceed by more than 6 percent of the national average quota support rate for the preceding crop.

Annual adjustments in the national average quota support rate shall be based on the national average cost of production of peanuts calculated by the Economic Research Service and reported annually in the publication, "Economic Indicators of the Farm Sector." The committee is aware that the Economic Research Service considerably changed its cost of production formula as it pertained to peanuts in 1983. This action by the Department affected the determination of the quota support rate contrary to the intent of Congress in the Agriculture and Food Act of 1981. It is the intent of the committee that the Department of Agriculture use the same formula and the same reporting format, as used to calculate the quota support rate for 1985, in determining the cost of production of peanuts, as it pertains to adjustments in the quota support rate, throughout the life of this act.

Seventh, the bill modifies the provision of law relating to area pools and the buy-back from the pools. Currently, farmers may place additional or quota peanuts in the areas pool and allow them to be redeemed by shellers into domestic markets within 72 hours. The provision sometimes allows additional peanuts in one pool to displace quota peanuts in another pool. Higher priced quota peanuts remaining in the pool may be crushed, at Government expense. In the past, three separate pools—Southwest, VC, and GFA—operated independently regarding the buy-back provision even though redemptions in one area could affect other pool profits. The bill provides that the buy-back will remain intact, but a loss sharing requirement will exist among the three pools. Losses sustained from quota peanuts in a pool must be offset by profits from additional peanuts in that pool first. If there is inadequate profit from additionals, profits from segregation 2 and 3 pools must be used to offset losses in the quota pool. If a deficit still remains, then income from the other two pools will be used to offset the losses. This pool arrangement is designed to reduce Government cost exposure.

The conferees have improved upon this position by including a technical amendment that would further insure that the Peanut Program does not result in substantial cost to the Commodity Credit Corporation.

Under current law and regulations, and the provisions of the conference approved bill, "additional" peanuts that Commodity Credit Corporation has acquired at additional peanut loan rates can be sold for domestic edible use instead of export or crushing uses. This eligibility of additional peanuts for the domestic edible market occurs under a practice known as buy back. Under current law and regulations, additional peanuts can be bought back from CCC by the producer or his assignee. After the buy back occurs, these additional peanuts become eligible to be sold into the domestic edible market. Since the domestic edible market is limited, then quota peanuts which CCC has acquired can be displaced from the domestic edible market, because of the sale of additional peanuts for domestic edible use under buy-back procedures. When such displacement occurs, CCC has to sell quota peanuts for export or crushing at a much lower price—additional peanut price. In other words, CCC may be forced to sell quota peanuts for export or crushing at approximately the additional peanut support price, that is, $148 a ton, where normally quota peanuts would have sold for approximately $559, thus causing a loss to CCC.

The purpose of this amendment is to prevent loss to the CCC and, thus direct that the regulations promulgated by the Secretary of Agriculture be written or changed in a manner to pre-

vent any substantial increased cost to the CCC which could result under buy-back practices. This amendment also goes further than just directing regulation promulgation for it requires the Secretary of Agriculture to operate the buy-back provisions in a manner so that they do not result in substantially increased cost to the Commodity Credit Corporation.

This buy-back practice is practically the only form of Government cost associated with the Peanut Program. The House and Senate both have taken steps to reduce any possible losses to the Commodity Credit Corporation by establishing area pools for distribution of marketing gains and losses. This provision commonly called national compliance will provide that losses in area quota pools will first be offset by gains in the same area additional pool. If there remains a loss in any area quota pool. Any gains in other area pools must be applied to this loss. However, if the Secretary promulgates proper regulations and/or operates the buy-back procedure in a manner where there is no increased cost to the CCC, then there may not be a need for pool offsetting.

The amendment in no way interferes with the Secretary's authority to implement and administer the Peanut Loan Program. It does, however, provide the Secretary authority to prohibit or curb all practices dealing with the storage or disposition of any peanuts owned or controlled by the Commodity Credit Corporation that result in substantially increased cost to the Government.

Thank you, Mr. President.

Mr. President, I also ask unanimous consent that a letter dated September 26, 1985, addressed to the Honorable JESSE HELMS, chairman of the Committee on Agriculture, Nutrition, and Forestry of the U.S. Senate, Washington, DC, signed by John Block, the Secretary of Agriculture, which is referred to in the statement that I made on the change of the peanut title be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
Washington, DC, September 26, 1985.

Hon. JESSE HELMS,
Chairman, Committee on Agriculture, Nutrition, and Forestry, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your request regarding the Department's position on the Committee-approved bill entitled, "The Agriculture, Food, and Conservation Act of 1985", which was reported out of Committee last week.

As we both know, the development of a 1985 Farm Bill has been a long and arduous process. I have been encouraging the debate beginning with the Agricultural Summit in July 1983. At that time, I stated that agricultural policy had reached a critical point—a watershed period. I also stated that if appropriate agricultural policy is not developed in the 1985 Farm Bill, there could be irreparable damage to our farm and agribusiness economies, and thus the total economic standing of the U.S. Given the recent situation of bumper crops, low commodity prices and the overall depressed rural economy, I am convinced of that premise now more than ever.

Earlier this year, I forwarded to the Congress the Administration's farm legislation. That legislation contained the following objectives:

A long-term consistent agricultural policy which will allow farmers to make realistic investment and production decisions.

Increase U.S. competitiveness which allows farmers to effectively compete in international markets.

Movement toward market orientation that allows farmers to respond to market signals, rather then responding to artificial support rates set by Government programs.

Provides for a compassionate transition from our current programs to a policy of less government in the agricultural sector.

Exercise fiscal restraint by providing income benefits to those most in need to reduce the budget deficit.

While the bill does contain some provisions that are market-oriented and contain sound policy principles, the current version of the bill violates many of the Administration's objectives.

Specifically, I would like to address the major provisions of the Committee-approved bill and provide you with the Administration's position and their potential economic impacts.

MAJOR PROVISIONS

Loan Rates—The legislation does provide for authority to reduce loan rates by establishing them at 75-85 percent of the most recent 5-year average, but not more than 5 percent from the previous year's level. In addition, it provides discretionary authority for the Secretary to lower loan rates an additional 20 percent (the so-called Findley amendment) if the average market price is less than 110 percent of the loan rate. The Administration supports these provisions and commends the Committee in recognizing the need for U.S. agriculture to become more competitive in international markets.

Marketing Loans—The Secretary is required to permit repayment of loans at the lower of the loan rate determined for the crop (prior to Findley amendment) and the higher of 70 percent of the loan rate or prevailing world market price. The Administration opposes mandating this authority but would not object to its provisions on a discretionary basis. Large budget outlays would be incurred if the loan contracts are paid back at less than the loan rate, despite the fact that a floor is placed on the marketing loan. In addition, payments resulting from the lower loan repayment level are exempt from the current $50,000 payment limitation. Together, with the portion of payments resulting from the Findley Amendment, almost 30 percent of all producer payments will be exempt from the payment limit for the 1986 crop.

Target Prices—The Committee-approved bill freezes target prices for wheat, feedgrains, cotton and rice for four years. In addition, due to the tiering of the wheat target price, the effective target price is actually 12 cents above the current level of $4.38 per bushel. The Administration is adamantly opposed to these provisions. Freezing target prices at current levels for the 1986-90 crops is a perpetuation of past failed policies that will have serious consequences on the size of acreage reduction programs, farmers' production decisions both in the U.S. and abroad, foreign governments' interpretations of U.S. policies, and Government costs.

The prevailing argument used by some members of the Committee and others is that it is necessary to have high target prices in order to maintain farm income. In other words, there are some who believe that high target prices will address both the farm income and farm credit situation. There is a serious misconception that much of agriculture benefits from income supports. About 90 percent of all direct Government payments for the 1984 programs went to wheat, feedgrains, cotton, rice, and dairy farms. Yet, these farms account for less than a third of total farm marketings. And, considering that overall only about 50 to 60 percent of these producers participated in the program, 90 percent of farm program payments went to producers that account for less than 20 percent of farm marketings.

More importantly, of all producers who are experiencing both debt to asset ratios of 0.4 or more and have negative cash flow, only 47 percent actually participated in farm programs. As a result, only 17 percent out of each dollar spent for 1984 commodity programs went to producers who were under financial stress and therefore directly benefited from farm income support assistance payments. Other more targeted approaches are far more appropriate to aid this group.

Acreage Reduction Programs—Because target prices are frozen at high levels, incentives to expand production capacity will continue unabated. To contain this growth in production and stocks, extensive annual acreage reduction programs would be required. The magnitude of these reductions would be similar to those under a continuation of current programs, meaning that at least 45 million acres of grain, cotton and rice would likely be idled annually. This approach has had the effect in the past of openly inviting our competitors to expand production and take away our markets.

Marketing Quotas and Referendums—The proposed legislation contains provisions to poll producers to determine support for a referendum and national marketing quota for wheat. The Administration is opposed to any form of mandatory supply controls. Mandatory controls will result in higher prices of wheat and render U.S. exports noncompetitive without large subsidies. Wheat acreage would have to be reduced about 50 percent to achieve desired trigger carryover levels. Import restrictions would have to be applied to processed products such as flour and bakery products in order to prevent cheaper foreign products from undercutting those made from expensive U.S. wheat. Expenditures for inputs—seed, energy, fertilizer, pesticides and machinery—would drop about $10 billion during the 1987-89 period.

Diary—The bill contains provisions which would allow the current support price ($11.60 per cwt.) to remain in effect until January 1, 1987. On that date, the support price must be reduced 50 cents per cwt. If the Secretary estimates that surplus removals of dairy products are projected to be 5 billion pounds or more in the next 12 months. On January 1, 1988, and thereafter, the support price must again be reduced if removals are at or in excess of 5 billion pounds. In addition, if the Secretary estimates surplus removals on January 1, 1988 and thereafter to be 10 billion pounds or more, the support price must be reduced $1.00 per cwt.

The Administration is supportive of this approach, but believes it is necessary that the legislation provide authority to reduce the support price in 1986 if surpluses continue to exist.

Presently, the combination of increased cow numbers, increased feeding, higher productivity, and lower feed costs are driving a strong expansion in milk production. U.S. milk production for the 1984/85 marketing year ending September 30 is projected at 139.0 billion pounds, exceeding the record level of 138.8 billion pounds in the 1982/83 marketing year. CCC purchases are projected to exceed $2 billion. More importantly, preliminary estimates for the 1985/86 marketing year indicate milk production will increase to 143.0 billion pounds and CCC purchases exceeding 13 billion pounds. This projection is based on maintaining the current support price of $11.60 per hundredweight throughout the 1985/86 marketing year. It is clear that with no adjustment in the support price during 1986, there will continue to be increased production, continued high levels of CCC purchases and excessive government costs.

Sugar—The legislation extends the current program and would set the minimum loan rate for raw cane sugar at 18 cents per pound, the current level with upward adjustments for inflation and rising production costs. The Administration is opposed to an extension of current law for sugar.

This legislation would perpetuate a heavy burden on U.S. sugar consumers, industrial uses, and refiners of raw sugar and would further penalize foreign exporters to the United States. High sugar prices also encourage the shift to lower-cost rival sweeteners and provide manufacturers of sugar-containing products with a major incentive to relocate outside the United States taking the jobs with them.

Domestic market prices for raw sugar are currently about 21 cents a pound, far in excess of the world price of approximately 5 cents a pound. Even if the world price reflected the 1984 estimated average global production cost of 14 to 16 cents a pound for raw sugar, the current U.S. market price would still be 5 to 8 cents (24 to 38 percent) higher.

The Administration would support lowering the sugar support price each year over the next three years. This would provide sugar cane and beet producers with income support, while at the same time, addressing the concerns of sugar users.

Peanuts—The Committee approved bill would extend the present peanut program with some modifications. The legislation would set the national poundage quota at estimated domestic edible, seed, and related uses, but in no case could the quota be less than 1.1 million ton. The legislation would set the 1986 quota price support level for domestic use equal to the 1985 level ($559 per ton) adjusted by the change in the costs of production. This price is currently estimated at $615 per ton—well above the estimated 1984 farm price of $506 per ton. The 1987-89 quota price support level is tied to changes in cost of production.

As a result, the legislation would substantially increase both the national poundage quota and the quota support level. Because total edible supplies are not considered in setting the national poundage quota, quota supplies would likely exceed demand in years with larger than normal year-end stocks. The bill would require forecasts of domestic edible use each year; if over-estimated, this would result in program costs to the Commodity Credit Corporation (CCC). The proposal would halt the marginal progress made toward market orientation through annual quota reductions under the 1981 Act by imposing a floor on the national poundage quota.

Finally, the proposal continues to penalize U.S. consumers of roasted and salted peanuts, and peanuts used in domestic products such as peanut butter and peanut candy. It has been estimated that the price premium on quota peanuts, compared with additional peanuts for export use, caused consumers to pay an additional $170-$200 million for peanuts used in domestic products during 1982-84. Moreover, this premium caused an estimated 14 percent increase in the price of peanut butter. As the spread between quota and additional peanut prices continues to grow larger than 1981-83, U.S. consumers will be penalized even further.

Wool—The bill extends the current provisions for the wool and mohair program. In addition, it establishes a payment limit of $50,000 per person on the total amount of wool and mohair payments. The Administration supports the latter provision. In 1984, 0.6 percent of the total payees received more than $25,000 each, which accounted for one-third of all payments. A large number of these payees received more than $50,000.

Wool production continues to decline as support prices have increased faster than market prices, making the wool industry noncompetitive. The result is continued growth in budget outlays as price supports continue to exceed market-clearing levels. Thus, the Administration supports efforts to set the wool support price level based on past market prices.

Honey—The legislation freezes the honey price support at the 1985 level of 65.3 cents per pound. For the 1987-91 crop years, the loan rate is established at 85 percent of the most recent 5-year average of farm prices or 50 cents per pound whichever is higher. In addition, the Secretary would be required to permit loans to be repaid at levels below the loan rate. Finally, the Secretary may provide deficiency payments to producers who forgo obtaining a loan in return for payment.

While the Administration is supportive of establishing price supports based on past market prices, we are opposed to mandating the use of marketing loans or providing deficiency payments to honey producers.

High price supports for honey have resulted in large takeovers of domestic honey by the CCC at a current cost of around $100 million annually. U.S. honey is no longer price competitive in world markets and can only become competitive in domestic and world markets if price supports are phased down to market-clearing levels.

Conservation Reserve—The Committee-approved bill requires the implementation of a 25-30 million acre reserve which would retire erodible cropland. Contracts would range from 7-15 years and payments would be made with either cash or in-kind commodities. In addition, the legislation contains sodbuster and swampbuster provisions to prevent cultivation of highly erodible land and converted wetlands.

The Administration is very supportive of this provision but would prefer a program level of 20 million acres as originally proposed by the Administration.

Food Assistance Reserve—A food assistance reserve is created which may have up to 500 million bushels of wheat and feedgrains, but not less than 200 million bushels of wheat for humanitarian needs. The current Farmer-Owned and Food Security Reserves would be repealed. The Administration supports these provisions.

$50,000 Payment Limitation—The bill contains provisions that exempt the portion of payments made to producers due to a reduction in the loan level under the so-called Findley Amendment. It would also not include any gain realized by the lower loan repayment level at 70 percent of such loan rate. The Administration is opposed to these provisions. In 1984, 95 percent of all program payees received less than $25,000. However, 5 percent of all program payees received more than $25,000 and accounted for almost 40 percent of the total payments. As a result of these provisions, almost 30 percent of all producer payments would be exempt from the payment limit for the 1986 crop. The Government would incur potentially large budget exposure and provide additional income support to a very small group who already receive a disproportionate share of the total payments. We favor instead applying the $50,000 payment limitation to all payments.

Export Provisions—In the area of commercial export activities, the mandatory authorization of various levels, including $1 billion for intermediate credits in FY 86-89, are inappropriate because they preclude the Department's ability to respond to changing market conditions. Furthermore, we believe that the present export credit authorities are adequate to meet our export objectives when coupled with price competitive commodities.

No new authority is needed for export bonus programs. The Department is currently implementing such a program over a three-year period using existing authority under the CCC Charter Act. At the minimum, Section 106(a)(1) should be amended to make the authority for export bonus programs discretionary.

In the area of overseas food aid, we continue to strongly believe that we can best achieve our goals for the P.L. 480 Title I private sector local currency initiative by using the existing Title I staff and procedures rather than by reinstating local currency sales under this authority. This will save delays and costly duplication. The targets, such as those in this provision, often slow the process of signing Title I agreements and exporting commodities.

The Administration continues to strongly support the Food for Progress concept. However, we strongly believe it should be carried out through the existing P.L. 480 program structure.

Our final major concern is the establishment of a Special Assistant to the President for Agricultural Trade and Food Aid. Such a position is duplicative and will, inevitably, lead to confusion and unnecessary expense.

Food Stamps—The Food Stamp and Commodity Distribution provisions will enhance the operation of the food stamp and commodity distribution programs. In particular, the employment and training provisions adopted by the Committee will aid food stamp recipients in more quickly finding gainful employment. While the Department would have preferred a more extensive program, we regard the Committee's employment and training proposal as solid progress. Similarly, the strengthened error rate provisions will be a valuable mechanism to help reduce high food stamp error rates. Although we support the improvements in the error rate system in the final Committee bill, we prefer the error rate provisions

passed by the House in H.R. 5151 and initially agreed to by the Committee, as a more positive approach to reducing food stamp errors. We also support the provision to simplify current procedures regarding State's standard utility allowances. The Committee bill is more equitable than current law since it will recognize the receipt of Low Income Energy Assistance payments in determining shelter expenses deductions.

The Administration does not favor continuation of $50 million in administrative funding for the Temporary Emergency Food Assistance Program (TEFAP). However, we recognize the Committee's requirement that States share TEFAP administrative costs as a reasonable compromise that will promote prudent management of the program.

Farm Credit—The Administration proposes that all farm loans, except disaster emergency, be consolidated into a single program that would be phased into an all-guarantee program by fiscal year 1989. The transition would be made as follows: Fiscal year 1986: $2 billion insured, $2 billion guaranteed, fiscal year 1987: $1.5 billion insured, $2.5 billion guaranteed, fiscal year 1988: $1 billion insured, $3 billion guaranteed, and fiscal year 1989: $4 billion guaranteed.

We believe that insured loans should not be made to refinance long-term real estate debt and that new borrowers to the Farmers Home Administration (FmHA) will be better served by utilizing the guarantee program. The changes being made in the guaranteed loan regulations have the enthusiastic support of the private sector lending community, and the program will be used much more widely than in previous years.

In keeping with FmHA's mission as lender of last resort, the exception to this policy should be farmers whose current loans are with banks or Production Credit Associations (PCA's) that fail and who are "credit homeless".

Emergency loans should be made only in counties where crop insurance is not available and should be capped at $200 million a year for each of the four years.

COMMODITY PROGRAM COSTS

The commodity program provisions in the bill reported by the Committee has been estimated by USDA analysts to cost about $55 billion over the FY 86-88 period covered by the Congressional Budget Resolution and $85-$90 billion over the life of the bill FY 86-90. Mr. Chairman, I am grateful to you for your leadership in attempts to reduce government costs, though it is clear that virtually no attempt was made on the part of some Members to meet the budget mark of $35 billion. Rather, in the final actions prior to reporting the bill, additions to outlays were mandated through a four year target price freeze. Thus, the bill would be more costly than current law if it were enacted and allowed to operate unchanged through the 1989 crop year. The current law has averaged about $12 billion per year in price support spending and it was projected to average about $16 billion per year over the next four crop years. The bill reported by the Senate Agriculture Committee is projected to average $17-$18 billion over the same period.

PROPOSED ADMINISTRATION AMENDMENTS

In an effort to establish long-term sound agricultural policy that meets the objectives of the Administration, I will forward to the Senate the following amendments for consideration on the Senate floor:

Target Prices—This amendment would freeze target prices for the 1986 crop year and provide for a 5 percent decline each year thereafter. This amendment will provide for a gradual transition to farmers to a more market-oriented farm program. The gradual reduction in target prices will reduce incentives for increased production and reduce the need for acreage reduction programs. As target prices are reduced, acreage reduction programs could be phased out over a short period of time. Lower target prices would also reduce incentives for foreign producers to maintain or expand production in competition with U.S. producers. Finally, this amendment would result in significantly lower budget outlays. Some $2.3 billion could be saved over the life of the bill if this amendment were adopted.

Wheat Referendum and Quotas—This amendment would strike the language requiring the Secretary to conduct a producer poll to determine support for a referendum and national marketing quotas for wheat.

Dairy—This amendment would require that on January 1, 1986, the support price must be reduced 50 cents per cwt. if the Secretary estimates that surplus removals of dairy products are projected to be 5 billion pounds or more in the next 12 months. The existing provisions of the dairy legislation would remain intact. With adoption of this proposal, CCC outlays would be more than $950 million less over the FY 86-90 period. Consequently, CCC purchases of dairy products would be 6 billion pounds less over the same period. Commercial use would expand by 3 billion pounds. Most importantly, it will send dairy producers and processors the necessary signal in 1986 that the surplus capacity needs to be reduced and milk production moved toward supply-demand balance.

Peanuts—This amendment would phase out the current two-price peanut program—quota and additional price supports. During this phase-out, the quota for domestic edible peanuts would be set at 800,000 tons in 1986, 600,000 tons in 1987, 400,000 tons in 1988, and eliminated for the 1989 crop. Correspondingly, price supports for quota peanuts would be reduced to $500 per ton in 1986, $480 per ton in 1987, and $460 per ton in 1988. The price for additional peanuts would be set at the discretion of the Secretary of Agriculture at a level not to result in any cost to the Government. After 1989, the Secretary of Agriculture would set one support price for all peanuts that would result in no Government losses.

This program would virtually eliminate CCC outlays compared with the average of $40 million per year over the past 10 years, reduce production cost since quota rent accounts for about 30 percent of the cost of production, and save peanut consumers over $200 million per year.

Sugar—This amendment is aimed at a rational lowering of sugar support levels to bring them more in line with competitive world market conditions. The amendment would accomplish this by keeping the loan level for the 1985 crop at 18 cents a pound for raw sugar, then reduce the loan gradually by 1 cent per year through the 1988 crop, and holding the loan level constant for the duration of the bill. Thus, the loan level would be 18 cents a pound for the 1985 crop, 17 cents for the 1986 crop, 16 cents for the 1987 crop, and 15 cents for the 1988 and subsequent crops. In addition, it would put the sugar program on the same basis as other crops by eliminating transportation charges from the calculation of the market stabilization price. This amendment would require processors (borrowers) to pay the Government the transportation cost on raw sugar forfeited to the CCC, thereby reducing the effective market price by around 2.5 cents a pound.

With sugar consumption at 7 to 8 million tons a year, savings to sugar users and consumers would total $4.2 to $4.8 billion for the period 1985/86 through 1990/91. The 30 percent of U.S. households with the lowest incomes would benefit the most under this amendment as they spend about 35 percent of their gross income on food. Also, manufacturers of sugar-containing products would have less incentive to relocate abroad, particularly to Canada where tariffs are minimal and there is not quota on sugar imports, and U.S. employment would benefit.

Lower support levels would also correct imbalance in U.S. sugar imports which have dropped to only 26 percent of total U.S. sugar use as a result of the growing isolation of the U.S. sugar market from international competition. Historically, U.S. imports have averaged 40 to 50 percent of our sugar needs. In addition, foreign exhange earnings from sugar exports are critical to the economic stability of many less developed countries, especially those in Latin America and the Caribbean that are highly dependent on revenues from sugar exports to the United States.

$50,000 Payment Limitation—This amendment would place a $50,000 payment limitation on *all* direct payments made by the Commodity Credit Corporation to producers including payments due to lower loan rates or lower loan repayment levels. The number of producers affected by imposing this payment limitation on all direct payments is relatively small. Only 1 percent of the corn producers would be affected; 2 percent of the wheat producers; 20 percent of the cotton farmers; and 42 percent of the rice producers. However, over the period FY 86-88, nearly $1 billion could be saved through this proposal.

Reduced Farm Payment Acreage—This amendment will reduce the acreage on which deficiency payments are made so that it does not exceed that acreage needed to meet demand and maintain reasonable carryover stocks. Deficiency payments will not be made on acreage used to produce surpluses. If farm payment acreage is reduced in this manner, about $6 billion could be saved from the deficiency payments in the Senate Committee bill as currently written. With the combination of a 1-year target price freeze, a total of $7.3 billion could be saved from the two amendments.

Wool—This amendment would provide for authority to phase down price supports to market clearing levels over the life of the Bill.

Honey—This amendment would also provide for authority to reduce the price support level to market clearing prices over time.

Mr. Chairman, with the adoption of these amendments, we will be able to formulate sound agricultural policy that will also exercise the necessary fiscal restraint.

In summary, if agriculture is to share in the economic recovery, we have an obligation to provide sound, long term agricultural policy. That means agriculture must regain its competitiveness in international markets and have policy tools that do not encourage excess production when the market place indicates otherwise. It also means providing income benefits but targeting them to most in need. Finally, the Federal government must, once and for all, reduce our budget deficits to provide relief to agriculture through lower interest rates,

continued low inflation, and a moderation of the value of the dollar. Farmers deserve no less. Indeed, We have an obligation to them to accomplish that.

It is my sencere hope that we can work together toward an acceptable solution. I urge you and other members of the Committee and the Senate to complete action on the bill as soon as possible so that our Nation's farmers will be able to adequately plan for the 1986 crop.

Sincerely,

JOHN R. BLOCK,
Secretary.

Mr. HEFLIN. Mr. President, I would like to take a moment to express my disappointment with the soybean title of this farm bill. The American soybean farmer has been devastated by the House-Senate conference committee on the 1985 farm bill.

I noted in the morning press the attitude expressed by the soybean farmers in Alabama. Ted Johnson, the president of the Alabama Soybean Growers Association said, "Soybean growers in Alabama will be a thing of the past." One of my State's leading soybean farmers, Bill Dixon, said the program approved by the conferees will be a double blow to soybean farmers and those who rely on them. "This will have an adverse effect not only on soybean producers, but on all agriculture-related businesses. He also said, "It's the first time in my life that I'm wondering just where do I go from here."

The acreage payment included in the Senate-passed bill generated some hope for the financially-stressed soybean farmers. I was informed at one time that the Secretary of Agriculture stated that the FAIR Program, which included the payment of $35 per acre, was cost-neutral. If a farmer accepted the acreage payment, he bypassed the opportunity to place his soybeans in the CCC loan. With fewer soybeans stockpiling in the Commodity Credit Corporation, the USDA would not be subject to storage cost or the risk of soybeans being forfeited to repay the loan.

There is a great deal of evidence that the State Department, Treasury Department, and the international bankers undermined the Soybean Program because they were worried the plan threatened loans made to Brazil and Argentina.

Mr. President, I cannot speak for every Member of Congress, but I was elected to protect the farmers of Alabama, not the farmers of Brazil and Argentina.

I was also very disappointed to learn that the conference committee dropped an amendment I offered on the floor and was approved by the Senate, which would have prevented the U.S. Government from funding grants or loans to foreign countries to enhance production of foreign soybeans in competition with American soybean producers.

The conference committee also modified another Heflin amendment which established a marketing loan program without lowering soybean loan rates. This provision would have given the Secretary of Agriculture authority to implement a plan to make U.S. soybeans competitive in world markets without lowering loan rates to the farmer. The conference version, however, effectively legislates lower soybean prices for the farmer.

The Soybean Program, as adopted by the conference committee at the urging of the U.S. State Department and the international bankers, lowers the loan rate and produces an atmosphere that will result in the soybean farmer receiving less and less for a bushel of soybeans in the world market.

Mr. President, I think the statement of George Fluegel, president of the American Soybean Association, best sums up my feelings on the soybean program contained in this bill. It represents an "outright disaster in many parts of the United States. Congress totally ignored America's soybean farmers."

Mr. BOSCHWITZ. Mr. President, I rise in support of the farm bill conference report.

The farm bill sure is not everything I had wanted it to be but it is certainly much better than reverting to preexisting law and also it can be truly said that in farming—where decisions of farmers and their lenders are quite long range—having a policy in place is very important.

The bill is expensive, but there was no reasonable way to avoid that. The bill will allow us to be competitive in world markets and that is a great plus.

Perhaps most of all the farm bill is behind us and not looming ahead in an election year. Maybe Gramm-Rudman will cause us to revisit it, but at least that will occur with a policy in place and that policy as incorporated in the 1985 farm bill is better than what we have even if it is not everything that we want. Changing farm policy is not easy but the 1985 bill is certainly a step in a longer policy.

I will vote for the bill and recommend that you do so, too.

POLICY GOALS: WHAT HAPPENED TO THEM

The following policy goals were in the Boschwitz-Boren bill and not shared by everyone, but they will give you a better sense of the overall bill.

Protect farm income. The bill does this very well. In virtually every commodity there is not 100 percent protection at present levels, but very close—closer than I thought we could get and stay within budgetary constraints.

Be competitive on world markets. The bill certainly authorizes—but does not mandate—the tools to make us market competitive, and the Secretary says he is going to use them. Since the alternatives of not using those tools is for the Federal Government to buy just tons of grain, I am satisfied that they will be used.

Full production. Senator DAVE BOREN and I were almost alone in our concern for the infrastructure of agriculture—the truckers, rails, barges, exporters, fertilizer and seed people, the grain elevators, processors, et cetera—which employs an enormous number of people who rely more on the volume of agricultural production than on the price. The theory is that if you "set aside"—take out of production—enough land, you will reduce the supply, increase prices to farmers, and reduce the cost of the farm program to the Government. That is what they have been doing for the last 4 years and you can judge the success for yourself—huge costs. Nevertheless, that theory was continued in the new farm bill. I just plain lost—though the Secretary has a lot of discretion on this issue and he says he opposes large acreage reduction programs—his four predecessors who served from 1960–80 said set asides were "futile" and all we do is give away world markets. Well, if the Secretary carries through, we may have a chance here. But you have to score this as unlikely.

Free up planting. Now so much is planted for Government programs, rather than for the market. We actually did as well as could be expected here and a full-scale abandonment of planting requirements without a parallel abandonment of the program itself was perhaps an unreasonable, and may have been an undesirable, goal.

Freezing bases and yields. Increasing acreage bases and crop yields to take advantage of program payments have been a large element in spiraling costs of farm programs. We froze yields and gave the Secretary the authority to freeze bases. This is a very significant accomplishment.

Returning agriculture to the free market. Not as much was achieved in this area as I hoped for—but a slow transition was indeed begun, and it sure is necessary. Four to five years ago about 20 percent of production was enrolled in farm programs. We expect it to be up around 90 percent in 1986. A transition—that is too slow in my judgment—to reverse this was begun. My efforts to let the farmer benefit from the market as prices rise didn't meet with success.

Meeting budget goals. We did a fairly reasonable job here—but who is to know. Budget outlays in agriculture are based on predictions about the weather, economic conditions, currency values, commodity prices, plus crops and yields throughout the world all for the next 5 years. That is a lot of variables over a long period. We did as well as could be expected and if the rains favor us—well, who knows.

SPECIFIC COMMODITY GROUPS

Target prices and loan rates. Target prices on all major commodities were kept at the same level for 1986 and 1987—except rice which was frozen for only one year—reduced by 2 percent in 1988, an additional 3 percent in 1989 and an additional 5 percent in 1990. Loans—which establish the market floor—were reduced 5-10 percent in 1986 (see specifics below) plus an additional 10 percent in wheat and feed grains in 1986 only. For the purpose of figuring the loan, that 10 percent would "snap back" in 1987. Then there would be a 5-percent reduction in 1987 and 5 percent each year thereafter—on a formula reflecting market prices. There is considerable authority to lower loans much further, though the farmer's income—the space between the target and the loan—would be fully protected. It is not quite as complicated as it sounds.

Corn, the target remains at $3.03 in 1986 and 1987, $2.97 in 1988, $2.88 in 1989 and $2.73 in 1990—per bushel. In 1986, the loan goes to $2.16—from $2.55 presently—and then down 5 percent each year thereafter—the 5-percent reduction figured on a $2.40 level—with considerable authority to lower it still further to market clearing levels if necessary. On the basis of targets and loans, farm income is well protected in corn, but the set asides are raised as follows:

	Percent
Minimum:	
1986	12.5
1987-90	12.5
Triggered:	
1986	5.0
1987-90	7.5
Paid:	
1986	2.5
1987	.....

There is no payment for set aside acres except the initial 2.5 percent. The triggered set aside comes into effect if the carryover stocks exceed 2 billion bushels. Since there is presently a $3.03 target and a 10-percent set-aside, leaving the target the same and increasing the set-aside reduces farm income—albeit slightly if the trigger is not reached. In 1986 the trigger will be reached and per bushel income effectively reduced 17 cents a bushel.

Wheat, the target is $4.38-$4.38-$4.29-$4.16-$3.95 per bushel over the next 5 years. In 1986, the loan goes to $2.70—from $3.30 presently—and then down 5 percent each year thereafter, the 5-percent reduction figured on a $3.00 level with considerable authority to lower it still further to market clearing levels if necessary. Farm income is well protected above the loan to the target prices. The set aside program is:

Minimum:	
1986	15.0
1987	20.0
1988-90	20.0
Triggered:	
1986	7.5
1987	7.5
1988-90	10.0
Paid:	
1986	2.5
1987	.....
1988-90	.....

Nothing is paid except the 2.5 percent. The triggered set aside comes in if the carryover stocks equal 1.0 billion bushels. Since this year there is 20 percent unpaid set aside and next year there will be 22.5 percent—more thereafter—wheat growers also take a small income cut.

Soybeans have no target or set aside, only a loan. The official loan will be $5.02-$4.77-$4.52-$4.50—per bushel—but the Secretary has a 5-percent discretion below those figures (but not below $4.50) if necessary to maintain market competitiveness. Next year the loan will surely be $4.77. Below that a marketing loan is authorized which allows a farmer to repay a loan at the market price—so if he borrows $5.02 and the market is $4.60 he can repay and satisfy the $5.02 loan for $4.60 with the interest forgiven. It will make our soybeans competitive on world markets.

Cotton, the target price—per pound—is $.81-$.81-$.79-$.77-$.73 from 1986-90. The loan starts at $.55 and can't go below $.50. Then there are mandatory provisions that make cotton competitive on the market again, and farm income is protected. Set asides for cotton—triggered by carryover stocks—are 20 percent and 7.5 percent is discretionary. We did the right thing for cotton, too, though cotton took its full share of adjustments.

Rice, the target price—per hundred pounds—is (approximately—$11.90-$11.66-$11.30-$11.06-$10.70 from 1986-90. The loan rate goes down to $7.20 and then 5 percent a year with a $6.50 minimum. We made rice competitive in 1985 by changing its program immediately which was smart in my judgment, as there is no use just putting the darn stuff in storage. We should have done it for all crops but USDA hit the ceiling. Rice took its full share of adjustments with other crops. The rice set aside is 30 percent and a discretionary 5 percent is available.

Dairy, the 1986 support price—per hundred pounds—is $11.60. In 1987 the support level is $11.35 until October 1 when it drops to $11.10. There is a $.40 assessment—paid by the farmer—in 1986 and $.25 until October 1, 1987. The assessment pays for a whole-herd buyout—a dairyman may bid his whole herd out of production—which will reduce production—and hopefully raise the price at least as much as the assessment. In 1988 and beyond the Secretary has the discretion to lower prices $.50 a year if there is still overproduction—and if the CCC is buying more than 5 billion pounds of milk a year. Unfortunately, the price of fluid milk may rise—even in 1986 due to ill-advised changes in the marketing orders!

Honey, loan rates were reduced by $.64-$.63-$.60-$.57-$.54 (per pound) from 1986-90. A marketing loan was authorized which will cut the cost of the program in half, make our honey price competitive, and end the need for imports.

Sugar, we froze the loan rate for the life of the bill. The 1986 import quotas were extended for 3 months, and in years after that the Secretary is directed to continue operating the program at no cost to the Government. Frankly, if you have voted against the sugar program in the past, we have not given you any reason to vote for it in the future.

Tobacco, is not covered by the farm bill, though most people think it is. However, in the reconciliation bill tobacco loan rates were dropped 16 percent and the program continues at no cost to the Government.

Peanuts, the program is unchanged and operates at probably no cost to the Government—except for the administration of the program at USDA.

EXPORT PROGRAMS AND PUBLIC LAW 480

Export credits

First, $5 billion of short-term (6 months to 3 years) export credit guarantees (GSM-102) are mandated in each year, fiscal year 1986-fiscal year 1990.

Second, $500 million of intermediate term (3-10 years) export credit guarantees (GSM-201 and GSM-301) are mandated in each of fiscal year 1986-fiscal year 1988, with up to $1 billion in fiscal year 1989 and fiscal year 1990.

Third, mandates $325 million in direct credit funds (GSM-5) or commodities in fiscal year 1986-fiscal year 1988 to combat competitor subsidies. (These funds could be used in the blended credit program.)

Export Subsidy (PIK), $2 billion in commodities owned by the CCC are mandated to be used over 3 years to combat foreign subsidies. The Secretary must seek to use 15 percent of the commodities on meat and poultry exports.

Public Law 480 (food for peace), there are presently three titles. Title I covers concessional sales made at market prices but at very low—or no—interest and long—up to 40 years—terms. Title II covers donations. Title III is a concessional sale where repayment is forgiven if the money received by the recipient county in selling the grain—within its own borders—is used to fund development projects. The total outlay is about $2 billion with nearly one-half in title I and nearly one-half in title II—perhaps 5 to 7 percent in title III. Adjustments to the program were modest and aimed at raising minimum levels and allowing title I repayments to be used for private sector developments in the coun-

try that we are helping. It is an excellent program, it does a lot of good and should make us all proud.

Section 416 (surplus commodity donations), has been greatly increased both in the required tonnage—650,000 annually—and by including all surplus commodities owned by the CCC. At least 150,000 must be dairy, 500,000 must be grains, and 75,000 tons of those amounts must be used in the new Food for Progress Program which will encourage agricultural policy reform in the recipient countries. It is another program that brings great credit to our country.

Cargo preference rules did require 50 percent of all shipments "generated" by the Federal Government to go on U.S.-flag ships. U.S.-flag ship rates are often three times as high as international rates. This was always thought to apply to Public Law 480 and other donations only. In February of this year a Federal judge decided that cargo preference applied to export credit and subsidy programs. In conference we increased the 50 percent to 75 percent on Public Law 480 and donation programs, but exempted from cargo preference export credit and subsidy programs. Our effort on the Senate floor to protect the Great Lakes was weakened by the farm bill is still worth voting for.

Conservation

The conservation provisions will be very popular with environmentalists and hunters because for the first time we have included both the necessary incentives to get erodible land into a conservation reserve, and the teeth to deny any Federal farm aid to those who persist in plowing up erodible land. The reserve will be 40-45 million acres within 5 years. In 1990 the so-called sodbuster provision becomes effective. This means that after January 1, 1990, a farmer must use an approved conservation plan on his erodible acres, or he will be ineligible for any Federal program benefits on all his acres—a good provision.

Agricultural credit

We made two well-intentioned efforts in this bill to improve the situation facing farmers and their lenders. One was to sweeten the current FmHA debt adjustment program by providing a Federal interest rate buydown of up to 2 percent if the lender agrees to match it. Commercial banks and Production Credit Associations could qualify if they also agreed to write down some principal or further lower interest rates in order to make the farmer cash flow. Loans under this program would then be eligible for up to 90 percent guarantees by the FmHA. Unfortunately, the program is not large enough.

Our second effort was to make some changes in the FmHA's internal procedures, in an effort to make them a more accountable agency, as well as more efficient. Time will tell if we were successful here.

Food stamps

The House had been $1.4 billion over current services. The Senate bill was $600 million under current services. We settled at $350 million over current services. We went up $950 million. The House came down $1,050 million. These figures are not per year—the Washington Post story was wrong—but a total over 4 years.

The major reforms made in the Food Stamp Program by the conference committee include: An employment and training program; enhanced computerization; modest benefit increases targeted to the working poor; and, additional provisions to eliminate fraud.

The employment and training program would be a "mini-block grant" to the States to institute a work program for food stamp recipients. Under current law, able-bodied recipients between 18 and 60 who do not have dependent children under six are required to register for work and participate in job search. States will now be allowed to structure their own employment and training program. The Federal Government will provide $40-$50-$60-$75-$75 million in the next 5 years to aid the States, plus a match if the State spends more on its work program.

The enhanced computerization provision will encourage states to develop and implement a plan to automate their administration of the Food Stamp Program.

Benefit increases targeted at working poor. Food stamp eligibility and benefit levels are based on gross income substracting a number of set deductions. To be eligible for food stamps your gross income cannot exceed 130 percent of the poverty level and you net income—less the deductions—cannot exceed 100 percent of poverty. The deductions include a standard deduction—$95 per month—excess shelter and dependent care deduction—$139 per month—18 percent of earned income, and a medical deduction for the elderly and disabled.

The benefit increases targeted to the working poor included: Making the dependent care deduction a separate deduction up to a limit of $160 per month, increasing the shelter deduction to $147, and increasing the earned income deduction to 20 percent. In addition, the asset limit of $1,500 was increased to $2,000. The asset limit for the elderly of $3,000 was extended to single elderly. A list of the benefit increases and their budget impact follows.

Elimination of fraud. The provisions designed to help eliminate fraud include: allowing the Secretary of Agriculture to require photo identification cards where needed to protect program integrity and where cost effective; fraud detection units would be established in large metropolitan areas for detection, investigation, and assistance in prosecution of fraud; in areas where payment error rates impair the integrity of the program the Secretary of Agriculture would be permitted to require a State to carry out new or modified certification procedures; an adult household member must sign under penalty of perjury that everything in a food stamp application or report is true; each adult member of a food stamp household would be jointly and severeally liable for the value of any overissuance of food stamps.

Senator DURENBERGER's provision to prohibit banks from charging grocery stores for handling food stamps was included in the bill.

Senator EVANS' 2-year moratorium on the collection of error rate sanctions owed by the States to the Federal Government was shortened to 6 months. The study of the error rate and quality control system suggested by Senator EVANS will be done.

Sales tax on food stamp purchases. States that charge a sales tax on food stamp purchases will not be eligible to participate in the Food Stamp Program if they continue the practice after October 1, 1987.

Puerto Rico has a block grant of $825 million for food stamps. That figure has been frozen since 1982. It would remain frozen in 1986, and then go up at three-fourths of the rate of inflation. We show a savings on the following chart because CBO scored it assuming a full inflation increase.

Job Training Partnership Act income is presently exempt in figuring whether a person's income qualifies for food stamps. A good deal of JTPA income will be included. This saves $112 million over 4 years.

On balance this is a fair compromise that improves the integrity of the food stamp program while protecting the benefits of those most in need.

I again urge my colleagues to support this conference report. It is not everything I wanted, but it is better than reverting to existing law and it will allow our farmers to make their plans, which is very important.

Mr. President, I ask unanimous consent that the following chart be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FOOD STAMP COMPROMISE

[Budget impact—millions over current services]

	Fiscal year—				
	1986	1987	1988	1989	Total
Disability definition	$1	$1	$1	$1	$1
Deduction losses of self-employed farmers[1]	0	1	2	2	5
Job Training Partnership Act income	−27	−28	−28	−29	−112

FOOD STAMP COMPROMISE—Continued

[Budget impact—millions over current services]

	Fiscal year—				
	1986	1987	1988	1989	Total
Increase earned income deduction [2]	21	51	53	55	180
Increase shelter deduction to 147 [2]	14	36	37	39	126
Separate child care deduction [2]	7	16	16	16	55
Increase asset limit to $2,000; $3,000 for single elderly [2]	22	77	115	121	335
Employment and training	4	4	4	4	16
Speed up collection	0	−45	3	0	−42
Puerto Rico (1 year freeze, then three-fourths of inflation)	−38	−49	−60	−70	−217
Provide information at SSI offices [1]	0	1	1	1	3
Total	4	65	144	140	353

[1] Effective October 1, 1986.
[2] Effective May 1, 1986.

Mr. MATSUNAGA. Mr. President, I rise to speak in support of the conference report on the farm bill, H.R. 2100, and to congratulate and commend the conferees for accomplishing an almost impossible task. As a consequence, we are enacting today a historic farm bill which will set the course for American agriculture for the next 5 years. This legislation is being enacted at a time of almost unprecedented depression in our Nation's agricultural community. While the measure demonstrates congressional concern, I am aware that many of the problems in agriculture are beyond the powers of this Congress to resolve during a period of falling farm prices and burgeoning Federal deficits.

Mr. President, I am especially pleased to note that the bill, as finally agreed upon by the conferees, provides assurance to the most economically important agricultural producers of my State, our Hawaiian sugarcane farmers, on two critical points: First, that they will have a basic support program continued at the current level and, second, that this program will be operated without cost to the Government—an assurance as important to them as it is to the American taxpayer.

In this connection, I wish to compliment the Senate conferees for standing firm on the Senate provision that the sugar program continue to be operated at no cost to the taxpayer. This is vital, not only to avoid an increased burden on the taxpayers of our country, but to assure our domestic sugar producers as well that they will receive the price support level intended by Congress.

During the first years of the current program, the Department of Agriculture operated the sugar program with a net gain to the Government and with a price to our sugar producers equal to or higher than the loan rate. Unfortunately, however, the administration failed to administer the program in a like manner in 1985, with a result that the Department ran up a loss of more than $100 million while our domestic industry sustained a loss of many more millions of dollars.

In setting the 1986 quota the administration actually increased the quota from the 2.2 million tons which were imported in fiscal year 1985, to 2.33 million tons for 1986, despite the fact that domestic consumption declined with the shift by soft drink makers from sugar to 100 percent high fructose corn sweetener, except in Hawaii where consumers are sophisticated enough to demand "the real thing." In taking such action, the administration also disregarded the anticipated increase in domestic production due to improved yields. That increased import quota brought about a sharp reduction in price which has seriously injured the earning prospects for our domestic sugar industry.

The language adopted in the Senate version of the farm bill, which is retained in the conference report, and which mandates an extension of the current quota for an additional 3 months, plus a no-cost operation of the program beginning at the end of this current quota year, is, therefore, of the most crucial importance. The sugar industry in my State of Hawaii will lose many millions of dollars this year, despite record yields of more than 12 tons of sugar per acre and despite strenuous cost cutting efforts that have reduced costs by some 12½ percent since passage of the 1981 Farm Act. The Hawaii sugar industry, despite its world-renowned efficiency, is expected to lose money again in 1986, although its losses will be sharply reduced by the extension of the current quota. However, the farm bill, as agreed upon in conference, offers hope for the future, thanks to the retention of the Senate no-cost language. That language should assure that our Nation's sugar farmers will receive the 18 cents per pound which Congress intends, and, what is more important, they will get that price from the market, not from being forced to forfeit sugar to the U.S. Government.

Mr. President, I want to thank those responsible for achieving this important legislative victory for our sugar producers and, indeed, for taxpayers and over the long haul for consumers as well. I particularly wish to thank our distinguished majority leader, the senior Senator from Kansas, Mr. DOLE, for his active role in securing this happy result. It offers very real hope for the future of our domestic sugar industry.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

ILLINOIS FARMERS DESERVE BETTER

Mr. DIXON. Mr. President, when I first came to the Senate, one of my initial speeches in this Chamber was a plea for an increase of a dime a bushel for my Illinois corn farmers. That speech was made 4 years ago, Mr. President, when we were in the process of passing the 1981 farm bill.

Much has happened in the agricultural economy since we developed legislation to bolster farm income. Because of events and economic factors largely beyond their control, farmers in Illinois and elsewhere in our Nation have seen farm income evaporate and the rural economy deteriorate to the worst point we've seen since the Great Depression.

Now, after 11 months of effort, we have fashioned a new farm bill to guide us during the next 5 years. My first question, of course, has to be whether this bill is good for the farmers of Illinois. After a careful review of the bill's provisions which directly impact on Illinois corn and soybean farmers, I have reluctantly concluded, Mr. President, that this is not the bill that the Illinois farmer needs in order to continue farming.

Much of the media attention and our attention has been directed during the last couple of years at the farm credit crisis. There truly is such a crisis, Mr. President, but the problem results from a lack of adequate income. If the farmer can get a decent price for his products, then the credit crunch will begin to disappear. What does this 1985 farm bill do for farm income? Unfortunately, this bill moves it in the wrong direction at the wrong time. The net effect of the bill is to lower Government loan support prices for corn, soybeans, and wheat, among other commodities.

It is true that the loan rate for corn for 1986 is set at $2.40 per bushel. That level, however, is 15 cents less than our current loan rate. In addition, there is a mandatory requirement that the Findley amendment be utilized to reduce the loan rate an additional 10 percent. That maneuver knocks another 24 cents off of a bushel of corn. In relation to the current loan rate for corn, we suddenly discover that we have lopped 39 cents off the price of corn. My Illinois farmers do not need that, and they cannot stand that, because we are talking about $2.16 corn in 1986.

What about soybeans? Well, here things are a little better for 1986 and 1987, because the loan rate is maintained at $5.02 per bushel. The Secretary, however, has discretionary authority to reduce the loan level up to an additional 5 percent if he decides such a cut is necessary to maintain markets. Downward adjustments in the loan rates can begin in 1988, with

the result that the loan rate can drop to a level of $4.50 per bushel.

The soybean market has already shown us in recent weeks what havoc we can create by the approach we take to commodity prices. I have to say that a drop of 52 cents—from $5.02 to $4.50—even if it occurs over time, cannot be viewed as a good deal for Illinois farmers.

The loan rate for wheat in 1986 will be at $3 per bushel. A mandatory requirement that the 10-percent Findley provision be invoked in 1986 effectively reduces the loan rate to $2.70 for wheat.

Another element in this bill which threatens to lower prices for Illinois farmers is the provision relating to acreage reduction programs [ARP's]. Even when the loan rate for corn stands at $2.16 per bushel, which is already low, there are three other monumental problems. The first is the imposition of a 12½-percent minimum ARP. The second is a 2½-percent mandatory PIK set-aside. The third is the additional discretionary authority for the Secretary to require the farmer to set aside 5 percent more acreage. If we add these three items together, Mr. President, the corn farmer could be forced to idle 20 percent of his acreage—twice the percentage required under current law. The result cannot be anything but even lower prices. As we set aside twice as much acreage in the outyears, Illinois farmers will start receiving less and less income for their crops.

Let me cite a quick example. If a farmer's acreage base for corn is 100 acres, and the farmer planted 90 acres in 1985, then he could plant only 80 acres in 1986. We say we are freezing the target price. We cannot say, however, that we are freezing income supports, because we are increasing acreage reduction programs by 10 percent. With fixed production costs, this means the farmer with the 100-acre corn base is getting the same payment on 10 percent less acreage, which, in turn, means he is receiving 10 percent less income.

This movement toward lower prices is unacceptable to me, and as farmers begin to operate under the terms of this bill, I am sure that my Illinois farmers will likewise find it unacceptable. Lower farm income is the wrong way for us to be heading at this time in American history.

In today's Chicago Tribune, Christopher Drew offers a vivid example: "On a 500-acre Illinois corn farm with a typical yield of 128 bushels per acre," the increased set-asides, he says, "will mean a $3,200 to $9,600 drop from this year's total revenue of $193,920." He also mentions that the "increased set-asides * * * will cut the farmers' output and could lower their earnings by 5 to 15 cents a bushel from the $3.03-a-bushel target price. * * *"

There are other examples I could cite, Mr. President, but I think my point has been made. This bill moves in the direction of lowering prices at the most inopportune time. It is my understanding that Congress has never before reduced support prices for the commodities I have discussed. Illinois farmers—indeed, farmers across the Nation—need income, not lower prices. I favored a 4-year freeze on price supports, and I was satisfied with the 4-year freeze which was the key element in the original Senate farm bill which came out of the Agriculture Committee for our consideration.

My dilemma in looking at the farm bill before us is that I must cast a vote on an entire package. We cannot vote on separate sections. That posture poses a problem for me, as it does for others, because there are many good provisions in this bill. I like many of the mechanisms for improving our export sales of farm products. I like the sodbuster and swampbuster provisions. Some of the proposals I have made are embodied in both the export and conservation sections of this bill.

I am especially interested in the cargo preference section, because those of us who are Great Lakes Senators waged a very long, tough battle here on the floor of the Senate to establish a floor under the amount of Government-shipped commodities through our Great Lakes ports. These shipments are important to Midwestern farmers and the Great Lakes maritime industry.

As far as Great Lakes ports are concerned, the cargo preference provisions in the farm bill are bad. In Great Lakes country, we would have been far better off to have returned to the old cargo preference posture. As I mentioned, we won the fight on the floor of the Senate to require a minimum amount of Government-shipped commodites to go through the Great Lakes. The conference committee weakened what was a less than adequate—but a fair—proposal, by saying that such protection for shipping levels on the Great Lakes will occur only if it does not impact on other ports. As a practical matter, we probably cannot help the Great Lakes without some small harm to other ports. We desperately need to halt the decline in shipping on the Great Lakes. With the bill in its present form, we have not achieved the objective we had, at one point, accomplished. Our task thus remains unfinished, but we have not given up the fight.

The legislation also contains a separate section designed to bolster our Farm Credit System. We have already dealt with that problem by adopting a separate bill. Restoring confidence and liquidity to the Farm Credit System is absolutely essential to the recovery of our agricultural economy. Farmers, lenders, and rural businesses must be made aware of Congress' determination to maintain a viable farm credit program in this country.

While we have successfully completed action on the Farm Credit System bill, I am terribly disappointed with the administration's opposition to my amendment to the farm bill which would have allowed a private sector initiative whereby rural banks could mark down farm loans to present collateral levels, with the proviso that losses could be written off over a 30-year period rather than taking a massive loss in 1 year. This legislation makes eminently good sense. The farmer can stay on his land by avoiding foreclosure, while continuing as a customer of a rural bank that remains financially strong. I emphasize again my disappointment that this proposal lost on a vote of 44 to 47, failing by only 3 votes to provide financial stability to the private sector of farm lending, as we have for the Farm Credit System lenders.

There are some favorable elements in this bill, but they are outweighed by far too many negative factors. There is no reason for me to belabor the point with a lengthy discussion. The principal difficulty for me is that the net effect of this bill is to lower farm income. Illinois farmers and related businesses and industries cannot afford continuing low prices. We must restore farm income. This bill does not do that in the immediate future, and it is the immediate future that will determine whether many of our farmers will survive or whether the number of farm sales and foreclosures will continue unabated.

I have felt compelled to outline in some detail what my problems are with this bill. I want it fully understood that my vote against the bill is made with great reluctance, but it is cast with the knowledge that what Illinois farmers need is income, and I cannot in good conscience support legislation which does not provide income for our Illinois farmers at the most critical juncture in our agricultural history.

We could have done better, but we did not. Since we did not, I cannot lend my support to farm legislation which makes a bad situation worse. My hope is that we rectify our mistakes when we return for our 1986 session. By then, we will have come to the realization that what we are doing here today simply doesn't do the job. Our Illinois farmers deserve better.

Having set forth these concerns about this important legislation, I will reluctantly vote no on the bill.

I ask unanimous consent that Christopher Drew's article from the Chicago Tribune be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Chicago Tribune, Dec. 18, 1985]

FARM EXPERTS MIXED ON NEW BILL BENEFITS

(By Christopher Drew)

A huge new farm bill lays the groundwork for gradually reviving foreign interest in American grain exports, but it will mean modest cuts in income for most farmers and won't save nearly as many troubled farms as its legislative sponsors had hoped.

That is the reaction of leading farm economists and trade officials to the five-year bill that emerged from nearly a year of intense debate.

Passed by a House-Senate conference last weekend, the bill is expected to win final approval from both chambers Wednesday. It then will be sent to President Reagan, who once threatened a veto but now is considered likely to sign it.

"I see this farm bill as one that moves us toward market realities, but at a fairly slow pace," said Mark Drabenstott, chief farm economist at the Federal Reserve Bank of Kansas City, Mo.

While such a shift is positive, he said, "the bill probably will continue to put most of the benefits in the hands of farmers who are not highly stressed, and that's a disappointment."

Noting that most polls show strong public support for helping troubled farmers, he said, "I think if people really understood when they send in their tax checks on April 15 that their money is going to large cotton farmers in California who have a larger net worth than they do, they'd feel differently about it."

The experts also predicted mixed results from a new plan to pay some dairy farmers to get out of their surplus-ridden business.

The highlight of the bill, according to the economists and trade leaders, is its requirement for immediate cuts of 15 to 20 percent in corn and wheat price supports. The bill also gives the market-oriented Reagan administration power to cut an additional 10 percent if needed to bring U.S. grain prices back into line with world trading levels.

The cuts, the first since the complex web of support programs was put into place in the 1930s, could offset dramatic price hikes caused partly by the surprising strength of the U.S. dollar in recent years. They also could discourage further expansion by low-cost South American producers.

Still, demand for grain in key importing nations remains relatively weak, and there seems little prospect for much growth soon.

Consequently, said Michael Hall, the Washington representative for the National Corn Growers Association, the support cuts may break a five-year skid in U.S. export sales, but they probably won't help lead to a broad recovery for several years.

To protect farmers from the price cuts, legislators voted to freeze separate income-subsidy rates, called target prices, for two years. The government pays farmers the difference between market prices and the higher target rates, so freezing the rates will force it to give them larger checks to offset losses from the lower market prices.

Still, most grain farmers probably will suffer modest cuts in income under the bill. That's because legislators increased the amount of acreage that farmers must set aside to qualify for the subsidy programs. Corn farmers, for instance, will have to set aside 12.5 to 17.5 percent of their acreage next year, compared to 10 percent in 1985.

The increased set-asides, designed to ease burdensome surpluses and limit government costs, will cut the farmers' output and could lower their earnings by 5 cents to 15 cents a bushel from the $3.03-a-bushel target price, Hall said.

On a 500-acre Illinois corn farm with a typical yield of 128 bushels per acre, that will mean a $3,200 to $9,600 drop from this year's total revenue of $193,920.

Rep. Thomas Foley [D., Wash.], a prime architect of the bill, defended the cuts as a small price to pay for continued government support in an era of budget-cutting in Washington. He also pointed out that the cuts would have been much greater if Congress hadn't blocked the administration's original plans to phase out the income subsidies.

Drabenstott, the Federal Reserve economist, agreed. But he also argued that the legislators' failure to target more of the benefits to the most troubled farmers may have hastened, rather than prevented, the demise of many of them.

Critics ranging from conservative Sen. Jesse Helms [R., N.C.] to liberal farm groups have complained that only 20 percent of the subsidies now go to farmers in serious trouble.

The reason is that the payments typically have been used to encourage production cutbacks in times of surplus rather than as vehicles for income transfers. So the biggest checks generally have gone to the largest farmers with the most acreage to set aside.

Mr. McCONNELL and Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. McCONNELL. Mr. President, I rise in support of this conference report. In my experience during a period of private law practice and as judge-executive of a local government of some size, and I have never been around a subject more complicated than American agriculture and in particular in a year like this, in which times were difficult and many farmers were in trouble. I think it shows the true mettle of our leadership that at a time like this, when American agriculture is truly in a different situation, we are able to produce a farm bill that I am optimistic will improve conditions on the American farm.

I thank the ranking minority member of our committee (Mr. ZORINSKY) and in particular, the distinguished chairman of the committee, the Senator from North Carolina (Mr. HELMS), with whom I have worked on many issues, for their truly outstanding leadership in the development of this farm bill in what quite possibly is the worst year for the farmer since the Depression.

I personally support the conference report in spite of some reservations I have, but I do not think anybody could have done any better than our leadership in this year on this issue. I particularly thank the chairman for his outstanding work and gladly support the conference report.

Mr. HELMS. Will the Senator yield?

Mr. McCONNELL. I yield to the distinguished Senator from North Carolina.

Mr. HELMS. Mr. President, of course, I thank the distinguished Senator from Kentucky for his remarks, but let me say for the record that I have never seen a Senator come here who has participated so quickly in the delicate and difficult matters as the Senator has described in the agriculture bill. I want to say to Senator McCONNELL that he is already a fine Senator and it has been my privilege to work with him. I thank the Senator.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, as we meet here this evening to discuss the farm bill, everybody is talking about the merits, what a great solution it is, and nobody remembers that subject we were on about a week ago. That was the Gramm-Rudman bill. Gramm-Rudman was going to help us balance the budget.

Well, it is my understanding that this bill violates section 311 of the Budget Act as amended by Gramm-Rudman. Sixty-one people voted for Gramm-Rudman and I have not heard any of them out here making the point that the farm bill is $2.5 billion over Gramm-Rudman, over the budget; therefore, this body should not be passing it. If you who voted for Gramm-Rudman—I fortunately did not. But if you who voted for Gramm-Rudman were as sincere in your convictions and your concerns as you indicated just a couple of weeks ago, where are you today?

I pose a parliamentary inquiry without raising the point, but as a parliamentary inquiry, I ask of the Chair whether or not this bill violates section 311 of the Budget Act as amended by Gramm-Rudman and therefore, if raised, would be subject to a point of order.

The PRESIDING OFFICER. The Senator is correct.

Mr. METZENBAUM. Mr. President, can I say any more? I am right that it violates Gramm-Rudman.

You came out here and you went to the wall and you battled and you insisted that this was the solution, and the editorial writers all over the country wrote about Gramm-Rudman solving the problems of balancing the budget and we were going to move forward and by 1990, we were going to have a balanced budget. OK, stand up and be counted. Let me hear from you.

I am not going to raise the issue because I did not vote for that Gramm-Rudman provision and I do not think that it is good law. But 61 of you thought it was good law. If you thought it was good law 10 days or 2 weeks ago, why do you not think it is

good law today? Why are you not raising the point out here on the floor of the Senate?

Many of us have said that those who were so anxious to vote for Gramm-Rudman would run for cover just as soon as the issue comes before the Senate and they have to bite the bullet. Well, tonight is the night to bite the bullet. Tonight is the night to determine whether or not you meant what you said when you passed Gramm-Rudman.

The Parliamentarian has already indicated that it is indeed subject to a point of order. If you believe as strongly as you indicated just a couple of weeks ago that Gramm-Rudman was the solution to our Nation's economic problems and balancing our budget, now is the time to stand up and be counted and be heard and to raise the point. I stand not because I am opposed to the farm bill; I am not opposed to the farm bill. I stand because I am so concerned that some people come out here and make great speeches and go all over the country and say how they are going to balance the budget and they need to do something for the country and it needed to be done and we have to face the music and therefore, we are passing Gramm-Rudman; therefore, our deficit is only going to be $141 billion in 1987 and it is going to go down in 1988 and by 1990, we are going to have the budget in full balance.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. METZENBAUM. I do indeed yield, Mr. President.

Mr. DOLE. The Senator has left off the name HOLLINGS all through there. [Laughter.]

Mr. METZENBAUM. As usual, my colleague from Kansas is right on target—the Gramm-Rudman-Hollings bill. Whether it is Gramm-Rudman or Gramm-Rudman-Hollings, it seems to me when things are going well and the editorial writers are saying great things, it is Gramm-Rudman. But when it comes to a point where nobody is willing to live up to the terms of that bill, my distinguished colleague, the majority leader [Mr. DOLE], wants to point out that there is indeed a Democrat who was a party to the measure.

I guess it is a fact that there were a number of Democrats who voted for Gramm-Rudman-Hollings. This one, I am proud to say, did not.

But if you meant what you said before, let me hear from you tonight.

Mr. HARKIN. Mr. President, will the Senator yield for a question?

Mr. METZENBAUM. I do indeed.

Mr. HARKIN. The Senator makes a good point. To those who came out here and said Gramm-Rudman was a solution to our problem, here we are with a farm bill that is over budget.

The question I pose to the distinguished Senator from Ohio is this: This farm bill, so-called farm bill, received pretty wide support, as indicated by the majority leader. It got a big vote in the House, although I note a number of Midwestern Congressmen voted against it. That will tell us how this farm bill is going to affect the Midwest.

But it did receive a lot of support. There are a lot of lobbyists out there. A lot of powerful people support this bill—processors, shippers, a lot of big actors out there support this farm bill. I guess the question I have for the distinguished Senator from Ohio is this: What is going to happen, looking down the road to early next year, when maybe a bill comes on the floor that does not have all those powerful lobbyists behind it—that maybe is for the handicapped; maybe it is to help the poor; maybe it is to help the elderly; maybe it is a bill for education for the disadvantaged. Maybe it is a bill to provide some feeding programs for the poor and maybe it is going to be slightly above budget. Does the Senator think this place will be as quiet or as silent on a point of order as it is right now? I ask the distinguished Senator from Ohio, what does he think will happen at that point? Will there be then a rush to embrace Gramm-Rudman or will we have the same kind of silence from those 61 who supported Gramm-Rudman?

Mr. METZENBAUM. Oh, no, I am happy to respond and say that you may count on it. When the issues have to do with funding for the handicapped or for the poor or for educational programs or for any one of a number of other programs that the Senator alluded to, there will be a lot of people over there who will be happy to raise the point of order that it violates Gramm-Rudman-Hollings, but this farm bill is a different story. The Senator, indeed, makes the point, and makes it very well, that come tomorrow when it is not the farm bill and when there are programs having to do with the nonfarm members of our community, those who live in urban centers, there will be an indifference to their problems and everybody will be rushing to make the point of order. When the cities are cut back by billions of dollars from revenue sharing programs and if the program exceeds by a dollar the provisions of Gramm-Rudman in the budget, they will be out here on the floor making the point of order, and everybody will come here with tears streaming from their eyes saying they are sorry they have to do this but under the banner and the flag of Gramm-Rudman-Hollings they have no alternative but to stand up and say that this is too much. "We must balance the budget."

But it depends on whose back the budget is to be balanced. In this instance nobody, nobody who has supported Gramm-Rudman is on this floor raising the issue. I say their words do not speak as loudly as their actions with respect to the matter of supporting budget balancing, supporting Gramm-Rudman-Hollings.

Mr. BUMPERS. Will the Senator yield just for a comment?

Mr. METZENBAUM. I do indeed.

Mr. BUMPERS. Does the Senator from Ohio have the floor?

Mr. METZENBAUM. I do have the floor.

Mr. BUMPERS. I have the utmost appreciation for what the Senator is saying, but I think the Senator paints with much too broad a brush. No. 1, I do not know of any segment of the economy in this country that is suffering more right now than the farm economy. No. 2, I have been one of those people who has tried to be congnizant of and sensitive to the needs of all people. I voted for revenue sharing and I have tried my very best to keep faith with what I think the national character of this country ought to be, with a view toward what kind of a future we want for the country. And so while I think the Senator makes a very good point, I hope he is not suggesting that every farm State Senator, and particularly farm State Senators who support this bill, are somehow or other suspect about every other segment of this Nation. I would deeply resent such a comment as that. You cannot go into eastern and southern Arkansas as I have done for the past 5 years and look into the eyes of people who have spent their entire lives trying to build an estate, trying to make a decent living and trying to leave something for their children, you cannot experience the trauma they have been experiencing and believe this bill is any panacea to the farm community of this country. It is nothing more nor less than a holding action. And while I would be reluctant to demoralize the farm community further, I will say that 15 to 20 percent of the people who are now farming and who may get another chance to farm in 1986 as a result of this bill will not be around after 1987. I thank the Senator.

Mr. METZENBAUM. I am happy to have the comments of the distinguished Senator from Arkansas. I think he is aware of the fact—I do not know at which point he arrived on the floor, but I am not attacking the farm bill, and I share his concern about the farmers of this country. I think all of us do. I am concerned about every American, whether they be on the farm or live in an urban area, and how they are able to attain a quality of life to which they are entitled. What I am talking about has nothing to do with the farm bill. What I am talking about is Gramm-Rudman-Hollings, that

great majestic piece of legislation that after a lot of turmoil and a lot of battling back and forth suddenly finally became the law of the land when the President signed it. All I am saying is where are all those who paraded under the banner of Gramm-Rudman-Hollings tonight? How come they are not out here defending the implementation of that piece of legislation as well as the enactment of the law in the first instance?

● Mr. MATHIAS. Mr. President, I would like to express my appreciation to the chairman of the Agriculture Committee and the other members of the farm bill conference committee for their cooperation in ensuring our Nation's defense against the potential agricultural disaster represented by the Africanized honeybee.

I understand that the conference committee has stated the concern of the Congress that more research is needed into ways to deter the Africanized bee, also known as the killer bee, and has directed the Agricultural Research Service to make the necessary funds available to conduct this research. Could I ask the manager of the farm bill if my understanding is correct?

● Mr. HELMS. The Senator's understanding is correct. The so-called killer bee, besides being a threat to the lives of animals and people, could wreak havoc with American agriculture because farms and orchards rely upon the peaceful varieties of bees for pollination. The manager's report accompanying the conference report makes clear our concerns on this point and instructs ARS to undertake new research into means of heading off severe disruption to agriculture, and I will be interested to review the progress of this research during the committee's oversight hearings next year.

Mr. MATHIAS. I thank the chairman for his assistance.●

Mr. BOREN addressed the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. BOREN. Mr. President, I associate myself with the remarks that were made just a few minutes ago by the distinguished Senator from Arkansas. As he has been going around his State, I have been visiting with the farm families of our State. I hope that our colleagues, as they vote on this particular measure, will bear in mind the massive social upheaval that is occurring across this country in the rural areas. I was called this morning by a reporter in my home State and asked to comment on the demographic shift that is occurring in my State as people are moving out of the rural areas and into the cities. They are moving because they are losing their farms. Now, on the eve of the Christmas season at Enid, OK, for example, in the heart of the Wheat Belt in my State, in that one small geographical area, there are 150 foreclosures on family farms pending. I talked with one farm wife the night before last, now in her late 1960's, who told me that she and her family had and operated a particular farm, one of our more productive farms, in the eastern part of our State for over 50 years. She tearfully told me on the phone that they were on the verge of losing that farm; that not only did she not know what her family would do but she did not know what six other families that had worked with them on that farm, for over 30 years in some cases, would do either. We read about the tragic story of what happened in Iowa for one farmer in his sixties, a solid member of the community who took the life of his beloved wife, the life of a neighbor, the life of the banker in the local community, and his own life because of the desperation that he felt in not knowing how to begin his life over when he was losing everything he had worked his entire life to achieve. He did not have other skills. He did not know another way of life. It was not easy for him to be uprooted, moved into some urban area and a totally different way of life for which he had never been prepared.

We are facing across this country a series of heartbreaks and a social upheaval of monumental proportions that deserve the sympathy and understanding of all of us. It is not only a matter that demands our emotional empathy, our understanding, and the expression of the concerns of our hearts. It is also a matter that deserves our attention as economic policymakers.

I am reminded of what began in this country in 1926 in the agricultural sector, and I am also reminded of the great flurry of activity at the peak of the stock market in 1929. I am reminded of what is happening in the Farm Belt now and what is happening on Wall Street now.

I am reminded of the fact that agricultural land is deflating in my home State at the rate of 36 percent a year and that there are literally hundreds of financial institutions across this country whose economic health is dependent upon stabilization of the value of the land that stands behind those loans.

More than 4,000 banks in this country have 25 percent of the total loans or folios, depending upon the stability of the value of the agricultural land.

Mr. President, we face a very serious situation. I do not think any of us should fool ourselves by believing that this farm bill is going to solve the problems. It is not going to abate the crisis we have in rural America.

If you figure the income levels for the average family sized wheat farm, for example, this bill will just about hold those income levels where they have been this year for the next 2 years. The best thing you can say about the bill is that it is much better than the first conference committee proposals, which would have dropped family farm income by approximately 12 percent next year. But when we are facing such a serious crisis on the farm, how in the world can we say that maintaining the status quo is adequate? It is not. We are going to be feeling the financial and economic effects and the social effects rippling all across this country over the next 12 months, and we will be back here next year, I believe, facing again an economic emergency in the agricultural sector.

There is some hope for this bill, and it is in the area of the discretionary authority given to the Secretary. I read an editorial within the last couple of days about this farm bill that described it as a new beginning, in terms of an innovative policy. It could begin to be a change in policy if the Secretary of Agriculture would use the discretion that is given to him—if, for example, he will use the discretion to target the benefits to the family-sized farm.

We adopted an amendment on the floor of the Senate, a bipartisan amendment, which this Senator joined with others in offering, that would have saved our precious budgetary dollars, as discussed by the Senator from Ohio, by not paying high price supports to hobby farmers who derive 98 percent of their income from sources other than agriculture. When we have family farmers going out of business in a desperate situation, how can we justify wasting our dollars to give higher and higher benefits to those who simply drive out of the towns and the cities on the weekend and dabble as hobby farmers?

How can we justify spending our precious dollars to prop up huge corporate farming operations? The Secretary in this bill is given authority to target family-sized farms and make more effective use of the dollars. If he would use that discretion, this bill could begin to move us in the right direction.

The Secretary is also given direction to move the vast amounts of grain we have in this country onto the world markets to help us in an aggressive way to get back our share of the world market. The United States has been the patsy of the world too long. We have guaranteed the price to producers in other nations who have been producing full out. We have been storing surpluses for the rest of the world, while they laugh up their sleeves at us and drop their prices enough to seize the market from us, while we, in effect, are storing their surplus grain. If the Secretary would use the discre-

tionary authority, we could move in the right direction.

My concern is, will the OMB allow the Secretary of Agriculture to use that discretion? In order to save a lot of money over a 4- or 5-year period, under the ill-conceived accounting devices we often use around here, there will be a tendency to score some costs in the first year of operation of such a program.

So I am fearful that the new beginning which was described in an editorial in one of our leading newspapers may well not occur. It will not occur if the Secretary does not boldly use the discretion given under this farm bill.

Will this bill be a warmed-over retread of a failed policy or will it be at least the beginning, a start, in the right direction? Much depends upon the actions of the Secretary and the extent to which he uses the discretionary authority that is there.

So far as this Senator is concerned, I can only repeat that this is not an adequate farm bill. I do not denigrate the work that has been done by the conferees, who have spent hours and hours laboring over this matter. They have worked hard. We have some fine Senators on that committee who care about agriculture and understand its importance to the rest of the economy. This Senator cannot say, in conscience, that it is going to solve the problems.

I think we should alert the American people that the problem is not going to go away, that merely assuring the status quo so far as income levels are concerned for a sector that is already in serious crisis is not enough.

As I listened to the Senator from Ohio talk about the budget, I could not help think to myself that if you could single out one group of people in this country who have been the victims of the budget deficits more than any other group, who would it be? It would be the farmers. The budget deficits have so overvalued our dollar that that development has absolutely destroyed the export market for agricultural products.

We have people here who get up early in the morning and work hard all day long. As a man said to me as I walked back to my office the night before last;

> I don't understand how our farmers, who work so hard, who are not looking for a Government handout but who work as hard as any people in this country, who are productive, who have kept pace in terms of scientific and technical developments, would be handed such problems. It isn't fair.

No, it is not fair, and our farmers have suffered more than anyone else because of the Government deficits and Government policies we have followed—programs that have overvalued our dollar, embargoes that have been imposed upon them.

When we talk about budgetary equity, I think we should realize that even under the Gramm-Rudman proposal, about 55 percent of all spending is exempt—not agriculture, but about 55 percent of all the rest of the spending is exempt—from automatic cuts. The farmers are willing to do their part.

This bill represents a sharp reduction in cost from a continuation of current law.

Has defense been trimmed from current law? Have the social programs been trimmed from current levels of spending? No.

In terms of what has actually happened around here, the farmers have again and again been asked to do their part. Others have been exempted and, because they have been exempted, we have not done anything to really get the deficit down. The farmers are then destroyed.

Then we have the question raised as to whether or not they are doing their part from a budgetary point of view.

They are the innocent victims of our own failure to be responsible in dealing with the budget overall.

The defense budget has fences built around it. We cannot touch sacred cows like Social Security even for those people who are in the upper income levels, and, as we all know, just because people are over 65 it does not automatically mean that they are in lower income levels. Yes, I want to protect those who are at the poverty level. We have been afraid to even touch those who are millionaires if they happen to be over a certain age because we have allowed certain areas of the budget to become sacred cows politically and untouchable.

So when it comes to fairness, Mr. President, I do not think it is fair to single out that part of society which is suffering the most right now through no fault of its own and to say that it should bear the burden by itself while we exempt so much of the remainder of the budget from any sacrifices at all in terms of trying to get our budgetary house in order.

We will be revisiting this issue next year. I hope we can do better. I hope one of these days we will take action that will give the farmers a chance to earn a fair enough income that we can turn the depression in the agriculture sector around; but regrettably this bill will not do that, and as we vote on it no Member of the Senate should be deluded into thinking that it will.

Mr. LAUTENBERG. Mr. President, today the Senate is considering the conference report on the farm bill. It is one of the first measures to come before the Senate with significant budgetary consequences, since we passed Gramm-Rudman.

What do we see? It is over budget. It is way over budget.

CBO has done a preliminary estimate. The farm bill is $2.5 billion over current services in fiscal year 1986. It spends $2.5 billion more than if we just left current programs in place, $2.5 billion.

But that is not all. It is $4.5 billion over where we should be. It is $4.5 billion over the level for farm programs assumed in the budget resolution that we passed last summer. It is roughly $4.5 billion over what the Agriculture Committee was allotted in the budget resolution.

Now, that budget resolution assumed a deficit of $172 billion. Well, we know we are not going to come near that number. In fact, according to the latest CBO scorekeeping, we have already overshot the target by close to $19 billion, $16 billion from spending, close to $3 billion from a shortfall in revenues. So, we are close to $19 billion over, based on laws that Congress has already passed, and the President signed.

The farm bill adds another $2.5 billion to that.

Supporters of the farm bill say it does not add to the deficit. They say it cuts the deficit; that it saves money. That it saves $11.2 billion over 3 years even if it costs $2.5 billion this year. They say it makes it back and more in 1987 and 1988.

Mr. President, this is a time-worn statement and one we hear over and over again in Congress. It is the kind of mentality that has gotten us into the deficit hole we are in.

But, the implications of approving this bill are broader. And Senators and the public should know this. By approving this farm bill, we not only add to our deficit. Under Gramm-Rudman, once we approve this conference report, we will be picking the pockets of other programs to pay for the bill.

Mr. President, that is because today we are over budget. And under Gramm-Rudman, that means cuts this year, not in 1987, not in 1988. Come January, the CBO and OMB will sit down and figure it all out. They will figure out how far over we are, and how much to cut.

The more we spend on price supports, the less we spend on education, the less we spend on environmental protection, the less we spend on the defense of our Nation.

We have all read about that tragic story of the farmer who shot his family and then shot himself. It is a story of despair, of hopelessness. Some say this farm bill will help tragedies like that.

But what of the families in New Jersey exposed to the dangers of toxic waste? What of the displaced industrial worker who will be denied job training? What of the poor but aspiring student who wants to pursue his or her education? What of the young

child or senior citizen who needs federally assisted medical care? These too are stories of despair. The more we spend on price supports, the less we spend on these programs, on job training, on health care, on education. And, Mr. President, unlike the farm programs, all of these programs have already been subject to the budget cutting knife this year. All have been cut already in fiscal year 1986. That means that Gramm-Rudman cuts imposed on these programs will come on top of cuts already made, while future Gramm-Rudman cuts on farm programs will be protected by the cushion provided by this bill.

Ironically, it is a cushion on top of a cushion. The cuts that Gramm-Rudman would impose on farm programs will not even hit price support programs, not in 1986 anyway, not if the farmers sign up fast. Any contracts signed before February 1, when the sequester order is issued, will be safe this year. In fact, even if a farmer does not sign up, but another farmer growing the same crop does, then they are both exempt. So, if some wheat farmers sign up, then all the wheat farmers are exempt from Gramm-Rudman.

Mr. President, we are playing a zero sum game. A vote to break the budget here, is a vote to cut education, air traffic safety, the FBI, the CIA.

There is another point. Gramm-Rudman puts a limit on how much we will cut next year automatically. The Gramm-Rudman Act says if we are as much as $20 billion over the deficit set in the budget resolution, then cut, cut back roughly $12 billion of that.

What if Congress and the President spend $25 billion over the deficit set in the budget resolution? The answer is still, cut just $12 billion. Now, what does that do? It puts us further into debt. We could top our target by $30 billion, and the result would be the same, $12 billion in automatic cuts in 1986, next year, reaching our target for fiscal year 1987, a target of $144 billion, will be that much harder.

We are not talking about insignificant savings. We are talking about savings that could prevent major cuts in other programs.

The Senate should start exercising its responsibilities now. Gramm-Rudman did not just authorize automatic spending cuts. It did not just authorize Congress to give away its control. It made changes in how we exercise our own power, it made changes in our own controls. Under section 201(B) of the Gramm-Rudman Act, this farm bill conference report should be out of order. Out of order because it breaks the budget that Congress passed. Out of order under section 311 of the Budget Act, as amended by 201(B) of the Gramm-Rudman Act.

Now, the Budget Act says if a point of order is made, the Budget Act can be waived, but only if three-fifths of the Senators agree. That means 60 Senators, not three-fifths of those voting—three-fifths of the entire body. The farm bill got just 61 votes when it passed the Senate. It might be a pretty close vote.

But, I am told, a Senator intent on passing the bill has another route. He can appeal the ruling of the chair. Submit it to a vote. For that, the Senate needs just a bare majority. But if the chair's ruling is appealed, and if a majority overturns the chair, then we have no more section 311 point of order. We set a precedent that renders a control, no control.

Do I think there are 51 Senators who want the farm bill that bad? So bad that they would undermine Gramm-Rudman so soon after enactment? Are there 51 Senators who want the farm bill so bad, that they would set a precedent that says $2.5 billion over in outlays is not over in outlays?

Unfortunately, I do.

For that reason, I will not make a point of order.

Mr. President, I yield the floor.

Mr. DOLE. Mr. President, I just want to take a second. I know there are other speakers. But I would like to get some indication that we could have a vote on this matter. I thought most people wanted to go home for the holidays. Apparently, I was mistaken. So we are prepared to stay here well into the evening, if necessary.

We still have the continuing resolution, reconciliation, plus some other minor resolutions that people might want to discuss. They were able to dispose of this conference report in the House today, with 435 Members, in about an hour. We have been on it for nearly 3 hours.

I certainly do not want to shut anyone off, but I wonder if the managers might be able to get an agreement that we vote by 6 p.m. on final passage.

Mr. HARKIN. Mr. President, I have been waiting for 2 hours to get recognition. I am constrained to object to that. I do not think I will take more than 10 or 15 minutes.

Mr. DOLE. Maybe I can find out how many speakers there are.

Mr. ZORINSKY. If the majority leader would allow us to check with the minority leader.

Mr. DOLE. Why do we not let people speak, but I hope we might be able to have a vote by 6 o'clock.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Mr. President, I first of all want to join with others who have complimented the distinguished chairman of the committee, the Senator from North Carolina, for his stewardship of the bill throughout the year. It has not been an easy task. We have had some long days. I know that the chairman was frustrated at many times because a quorum would not show up in the committee meetings. I shared that frustration with him many times.

But I also want to add again for the record, as I have done before, that at no time during this long markup of this bill did the chairman exhibit anything other than the greatest courtesy and indulgence toward all members of the committee. I know that the chairman and I have had some very strong disagreements on certain aspects of this bill. Again, I say for the record that at no time was this Senator ever cut off at any time from either offering an amendment or from debating at length those amendments that I supported or opposed. And for that I am most grateful.

Again, I compliment the chairman for exhibiting a great deal of patience and forbearance during a long markup session. It does not, however, say that we still do not have some strong disagreements on the contents of the bill.

I also want to compliment the distinguished ranking minority Member on our side, Senator ZORINSKY, from my neighboring State of Nebraska, for exhibiting the same kind of patience and forbearance as the distinguished chairman of the committee in keeping us there during the long markup sessions. He was successful in insuring that, on our side, we did, I think, on the vast majority of occasions, have a majority there during the markup sessions. So I want to again compliment the Senator from my neighboring State for his stewardship on our side of the aisle on this farm bill for a long year. I know there were times when his health was not the best and yet he stayed here and worked on the bill to see it through.

But, Mr. President, I have said and maintained since the first day of the first hearing of this bill back in the spring of this year that I would stake out a position and the position would be this: that I could not, in conscience, vote for any farm bill, nor could I vote for any amendment to a farm bill, that would cut farm income any less than what it was right now. Mr. President, that is exactly what the conference report does. It cuts farm income.

I would like to point out what it does to a typical Iowa farmer. Even though the target price has been frozen for 2 years, an Iowa corn farmer next year has to retire 75 percent of his land to qualify for the program than he did this year. After next year, he will have to retire 100 percent more of his farmland to qualify than he did this year. So the farmer's overall income in Iowa is going to decline, even though the target price has not been reduced.

I had my staff run a study of a typical Iowa corn farmer with a 300-acre

corn base. Next year, that farmer will have about an 8-percent cut in his gross income—some $8,000. And that does not count inflation. If inflation goes up by 3 percent, then that could be as much as an 11-percent cut; or, if there is a 4-percent inflation, that could be as much as a 12-percent cut in the gross income of that Iowa corn farmer. But, nonetheless, even if there is no inflation, there will be an 8-percent cut in the income of that Iowa farmer.

Mr. President, Iowa farmers cannot stand to have their income cut any further. And it is not just the farmers, but it is the bankers, it is the small business people, it is our educational system, it is the whole structure of our society in the State of Iowa that cannot stand another 8-percent cut in the income of these farmers.

Mr. President, I would point out, in all honesty, that this conference report is better than what the Senate passed. This conference report is slightly better than what was originally passed by the Senate. For example, under the Senate bill, that same Iowa corn farmer with the 300 acre corn base would have had his income cut next year by 10-percent, not 8-percent. So this bill is just a little bit better.

The Senate bill, for example, had a 5-percent cut in the target price in 1988 and a 10-percent cut in 1989. The conference report has a 2-percent cut in 1988 and a 3-percent cut in 1989 and a 5-percent cut in 1990. So this bill, for the corn farmers, is slightly better than what came out of the Senate, but it still cuts farm income.

I might point out also that the wheat farmers in the Midwest also have a cut in their income; not as bad as the corn farmers, but wheat farmers will also have a cut in their income next year.

Now, it has been pointed out that the vote in the House was tremendous in favor of this bill. But, as I said earlier, if you look at the Midwest, there were a considerable number of Midwest Members of the other body that voted against this bill. And that ought to tell you something when those in the Midwest begin voting against it.

As far as I can see, the bill that passed the Senate and this conference report is an anti-Midwest farm bill, because that is where the biggest cuts come. So, as I said, Mr. President, I should not say this is better than what came out of the Senate, I should say it is not as bad. This is not as bad as what was originally passed by the Senate.

What came out the Senate is not as bad as what the President sent down earlier this year. But that is not saying much. It is like the difference between, as I said earlier, a puff adder snake and a rattlesnake. I guess the bite of the puff adder kills you in just a few seconds, and a rattlesnake takes slightly longer. But the effect is still the same.

This farm bill for the farmers that I represent is like the bite of a rattlesnake. We have had a warning. The warning is there. It is going to be an 8-percent cut in the farm income next year.

What it is going to mean is more and more farmers are going to go under, and more and more farm families are going to be driven off their farms. This farm bill continues the misguided policies of the past. There are those who say this is a great break with the past; somehow this charts a new course in agriculture—far from the truth. This continues the same old policy of reducing farm income from what the farmers get for their products, and trying to make it up with appropriations from U.S. Treasury. The only difference is that those appropriations next year and the next year are going to be less and less. But it is not a change in the fundamental policy of what we have had.

Mr. President, the debate over this farm bill has not been a budget debate. I am going to have more to say about that later on the point of order. But this has not been a budget debate. Maybe it should have been. If it had been a budget debate, we might have gotten a different kind of farm bill. But this has been a debate over philosophy.

For example, this bill calls for an estimated $52 billion over the next 3 years, and that is not all. We are going to be back next year for probably a minimum of $10 billion just to help bail our the Farm Credit System. We will be back again for more assistance to banks, to small businesses that are going to go under because of the further drop in the farm income. So it has been a debate on philosophy.

I asked the Secretary of Agriculture once in a meeting that took place in the Capitol about this, whether budget was controlling or whether philosophy was controlling. He tried to say well maybe they want to get it under the budget. I said if you do, what we should have is a farmer referendum, and have a supply management program. Well, no, that was against their philosophy. So it has been a philosophical debate, not that they want to bring it under budget, but that they want to continue the same misguided policies of the past.

The philosophy basically is two pronged. The first prong in the philosophy says there are too many farmers. We have to get rid of some of them. The second prong of that philosophy says commodities are too high priced, and we have to reduce the price of those commodities.

I believe neither is true. I believe our family sized farmers are an economic asset to this country, and not an economic drain. I believe our family farms are a viable economic unit of production, and not something that has to go by the wayside.

Mr. President, there has been a lot of talk about the death of the family farmer, that it is a thing of the past. There is a fine article in the Des Moines Register this morning entitled "Obituary for Family Farm Is Viewed as Premature."

Mr. President, I ask unanimous consent that this article from the Des Moines Register of this morning be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Des Moines Register, Dec. 17, 1985]

OBITUARY FOR FAMILY FARM IS VIEWED AS PREMATURE

(By Dixon Terry)

The fight is over. Family farming is dead. This is the implicit message in the remarks of Dean Kleckner, Iowa Farm Bureau Federation head, in a Des Moines Register interview. This would seem a dramatic turnabout for an individual who, until a little over a year ago, refused to acknowledge the existence of an agricultural crisis.

Stranger still, Kleckner's gloomy predictions come right at the time of the Farm Bureau's seemingly successful lobbying effort in Congress to pass a 1985 farm bill that would assure lower prices, increased bankruptcy and the grim future he foresees.

Kleckner's "free market" future would leave farming in the hands of those farmers who can grow corn for less than $2 per bushel. In effect, the occupation of farming would be restricted to those who are wealthy in terms of land and other capital, or those who would farm as a hobby while earning a living in town.

Even if the jobs were there for the great majority of us who would fall into the second category, farming for nothing on nights and weekends is not a heritage to pass on to the next generation.

Posing farm-price levels well below the average farmer's production costs as the standard of efficiency effectively slams the door on farming as a full-time occupation and continuing way of life for the majority of Iowa farm families.

This is a phony standard that fails to recognize that farmers in general have successfully incorporated most of the advantages of technological innovation into family-sized operations. As a policy goal, $2 corn favors those advantaged by inheritance, tax breaks or outside capital and puts control of the land in fewer hands.

Judging the future of agriculture by such narrow standards ignores the tremedous psychological, social and environmental costs involved with moving in the "free market" (that is, corporate dominated) direction.

Loss of farmers means declining rural communities and increased unemployment. Industrialized agriculture, with its drive for all-out production and increasing chemical dependence, holds an unacknowledged but costly inefficiency in the deterioration it causes in soil and water resource base. Farm families as steward of society's most vital resources can never be replaced.

Kleckner's "tough talk" is the last thing Iowa's farmers need right now. Counseling

farmers to adjust to such a grim future can only increase the growing sense of desperation in the countrywide and contribute to the occurrence of more personal tragedies.

Since the national Farm Bureau leadership is spouting the same line, this appears to be a position from the organization hierarchy with a purpose behind it. The purpose seems clearly to be to convince us that the farm-policy fight is over.

The bureau leadership has used its full lobbying force this past year working with the grain trade, the ag-supply conglomerates and the rest of the agribusiness establishment to defeat in Congress the producer referendum on higher prices and supply management advanced by a national grassroots farm movement. Now it wants to consolidate its gains. It wants us to believe the fight for farmers to choose their own destiny is dead.

But even as Kleckner spoke, the House of Representatives was passing by a vote of 220-to-200 an amendment to the budget resolution attached by Appropriations Chairman Jamie Whitten that in two paragraphs summarizes the guts of the Harkin farm bill and directs the secretary of agriculture to implement it along with a moratorium on foreclosures. Tiring of Congress' failure to help farmers, Whitten took the initiative and the House supported him over the opposition of the administration.

Regardless of the outcome of this particular attempt, one point must be understood. The battle is not over. The national coalition of organizations working for fair prices is growing monthly in strength and intends to come back again and again with the same demand.

The 36 senators who supported Senator Tom Harkin's proposal provide a very powerful base on which to build. Without a doubt, emergency farm legislation will be proposed after the end of the year to replace the disastrous farm bill now emerging in Congress.

This is the message that Iowa needs. There is hope for a future that includes more farmers, not fewer, and healthy rural communities. The hope lies in the power farmers already have demonstrated in Congress. The power lies in unity and organization.

The Iowa Farm Unity Coalition has successfully brought together statewide groups including farm organizations, organized labor and all the major church denominations to form a common force as part of this national farm movement.

This winter the coalition will continue to build this kind of unified effort on the local level through county Farm Unity committees. We must first unite in our communities to support each other emotionally and materially through this difficult time. At the same time, we must strengthen our battle in Washington and in the Statehouse. There is a role for everyone to play, whether they belong to Farm Bureau, the American Agriculture Movement or none of the above.

Iowa farmers need real hope, not tough medicine. By countering despair with constructive action, the Farm Unity Coalition offers hope through empowerment. The future direction of farming is a political decision in which we all can participate.

Mr. HARKIN. I believe any obituaries on the family farm really are premature. We will be back. There is a prairie fire growing out there in the countryside amongst those who see what is happening to our family farm structure. It used to be just a few farmers. Now it is growing larger and larger. Now it is not just the farmers. Now it is the smalltown bankers. It is the implement dealers. It is the farm supply businesses now. It started in Iowa. Now it is growing to other States.

But more and more we are finding a growing support for some kind of a supply management program that will preserve the family farm structure.

I believe the support for this will grow rather than dwindle.

The point on the price of commodity prices being too high, I have one message to those who represent a more urban constituency. This cheap food farm bill—that is what it is—may look pleasing in that it will keep the price of food cheap but I believe that is really a short-term relief masking a longer term, more serious problem; that is, the concentration of land in fewer and fewer hands, the destruction of our soil base, and the outmigration from our rural areas to the cities, all are going to weigh more heavily upon those in urban areas than trying to get more income for the farmer through a higher price for his commodities.

Again, I point out that giving the farmer a little bit higher price for his commodities I think would be the best and fairest way to do this and, quite frankly, I think it would be cheaper when you compare it to the number of tax dollars or deficit spending that this country is going to engage in trying to support to some minimum level of income for those farmers that are not now getting enough money for their commodities.

Let me say just a word here about the farm credit bill that recently passed and is now on its way to the President for his signature. But again that farm credit bill is just an extension of the same philosophy that is in this farm bill. The farm credit bill that came through is fine for the Farm Credit System. It is fine for the bondholders. And I suppose there is going to be a little bit of trickle down to help the farmers. But it does not really help the farmers restructure their debt. That is what we need. The Senator from Minnesota, I, and others joined in an amendment that would have done that—would have helped the farmer restructure his debt, and stretch it out over a long period of time.

We were not successful in that. So again the farm credit bill is going through. Money will flow out of the Treasury but it will not help the farmers a bit.

Next to last, let me make a point on the international impact on this farm bill. Reducing our farm income in this country, and depressing the price of our farm commodities is going to do the same thing throughout the world: it is going to decrease the income to farmers in other countries; it may cause unrest, chaos and violence in many countries around the world.

Last, Mr. President, we fought all year for peanuts. I do not mean peanuts specifically. I mean peanuts figuratively in trying to get more for farmers. We have tried to mitigate the damage to farm income. We have tried to mitigate what the President sent down earlier this year—his farm bill that was dead on arrival. But his farm bill was introduced. It sort of set the standard by which we then operated which was how much could we mitigate the damage rather than what could we do to get farm income up.

Next year, Mr. President, Gramm-Rudman, as others before me have said, is going to come down the pike, and more cuts will come in the farm program. There have been those who have said time and time again that we need a long-term consistent farm program. Here we are passing a 5-year farm bill, but Gramm-Rudman will be here next year and there will be further cuts in the farm programs again next year, making our farm policy even more unstable and unpredictable.

So for those who think that this conference report is going to get them something, all I can say is do not go to the bank yet. Do not count on it because Gramm-Rudman is coming down the pike. We are going to have more cuts next year.

Finally, Mr. President, I want to talk about the point of order. It has been raised by at least two Senators prior to now. And, Mr. President, this possible point of order I think is intriguing.

If I thought that by raising a point of order it would change the direction of this farm bill, I would raise the point of order. If I thought that a point of order would redirect this miserable policy that we have, I would raise the point of order. If I thought that by raising a point of order that we would get a change in philosophy that would help raise farm income by getting a better price in the marketplace for what the farmer sells rather than pushing it down, if I thought that would happen, I would raise a point of order. But that will not happen.

However, there is another reason for raising a point of order. It has to do with responsibility and accountability.

I have long believed that those who hold public office ought to be held accountable for the votes that they cast and be responsible for those votes. People who voted for Gramm-Rudman, though I did not, people who supported Gramm-Rudman and think that is the way we ought to go, perhaps there ought to be an accounting for that and they ought to be held responsible for that vote.

So here we have a bill that exceeds the budget authority, subject to a point of order.

But, again I have to ask the question, if I raise the point of order, would it really hold people accountable for the actions that they took on passing Gramm-Rudman?

Again I would have to say no. What would happen is two things: The ruling of the Chair would be appealed and there would be 51 votes to do so. I have no doubt there would be 51 votes. I would probably vote to overturn the ruling of the Chair myself because I never supported Gramm-Rudman. Or there would be a motion made to waive the Budget Act. There would probably be 60 votes and, again I would be one who would support it myself because I was not one who supported Gramm-Rudman.

So, for those reasons, I, too, will not raise a point of order. But there will come a time next year when this body will have to be held accountable and responsible for the action they took on Gramm-Rudman.

Mr. President, in conclusion, I will vote against this farm bill because it decreases farm income. It raids the Treasury. It increases the deficit. In no way will it help us get out of the mess that we are in in rural America today.

Mr. ABDNOR. Mr. President, I am going to vote in favor of this conference report today, but I do not do so in the belief that this Congress or the administration have done America's financially pressed farmers any great favors through this legislation.

This farm bill falls short of recognizing and acting toward the economic crunch faced by the agriculture sector. It does not take into consideration the fact that we are faced with a crisis in agriculture equivalent in economic pain and suffering to the 1982 recession that prompted Congress to spend over $1 billion in assistance.

Congress has not acted as compassionately now as it did then. It has not answered the needs of our farmers and ranchers, of rural America. But in considering this bill, I have to ask myself one question: What is our alternative?

I want to make it clear that I am not faulting the conferees for the work they have done on this legislation. Some of this body's strongest agriculture advocates served on that conference committee. They worked for 8 solid days on this legislation, and they decided that this was the best legislation achievable given the circumstances they were working under. I am not going to quarrel with their judgment.

It would be very easy for me to vote no on this bill, and say I am going to get something better for the farmers and ranchers in my State. That would make me quite a hero back home. It would also be a cruel hoax on those farmers and ranchers, because there are no better alternatives out there that are either viable or achievable.

Given the urban orientation of this Congress and the inclination of many in this town to make deep slashes in the agriculture budget if given half an opportunity, I shudder to think of what might happen if we defeat this bill and give them that opportunity.

Now, Mr. President, I am not going to stand here and demagog this legislation and say that it is 100-percent negative. If it did not have some very substantive redeeming factors, I could not vote for it.

This bill contains "sodbuster" provisions, something a lot of us have waited for a long time. It will help prevent outside tax shelter-seeking investors from coming into States like South Dakota and breaking up our fragile lands and exacerbating soil erosion problems. This provision, combined with what I hope will be the eventual passage of my legislation restricting those who seek massive tax writeoffs through farm operations, will change the face of American agriculture for the better.

This bill contains strong soil conservation provisions, a long-term conservation reserve program under which farmers would contract for periods of 10 to 15 years to return 40 to 45 million highly erodible acres to less intensive uses, like grass or trees.

It includes increased credit and promotion moneys for farm exports, something that is absolutely vital if we are going to begin regaining our share of the world agricultural market.

And I like to think that I made this bill significantly better through the adoption of four of my amendments, amendments that protect farmers from the costly impact of the Environmental Protection Agency's leaded gas ban; that help transport Emergency Feed Program grain stocks to sparsely populated areas of the country; that address inequities with winter wheat insured by the Federal Crop Insurance [FCI]; and that investigate how possibly declining grain quality standards affect our farm exports.

Mr. President, let me note that it disturbs me that the conferees dropped the student aid amendment I offered to this bill. I am advised that my amendment was dropped because similar language is contained in another bill. In actuality, Mr. President, my provision is included in two other bills: H.R. 3128, the reconciliation measure, and the Senate Labor and Human Resources Committee bill to reauthorize the Higher Education Act. I appreciate greatly the assistance I have received from Senators PELL, STAFFORD, HATCH, and KENNEDY on this issue.

Mr. President, if we could state with certainty that the reconciliation measure will be enacted before the New Year, I would not be raising this issue today. I am hopeful that measure will be approved. However, I understand that conferees on the reconciliation bill have reached an impasse that they have been unable to resolve. In the event the conferees do not resolve their differences in time to pass H.R. 3128 before we adjourn, we have lost our only other opportunity to rectify this situation in time to assist those students who are seeking aid for the remainder of this school year.

This farm bill is not, by any means, a bill completely lacking in positive assets. It falls short in that it does not provide what America's farmers need in the dire situation they face. Even then, the bill does enough to buy us time to fight again at a time when the Congress and the administration may be more receptive to the needs of rural America.

To try to get a better bill now by rejecting this one would be utter folly and would give carte blanche to those at the Office of Management and Budget who would shape a bill that would be absolute disaster for American agriculture. I am not willing to do that, and I am going to vote for a bill that represents the best we can achieve under the current circumstances.

Let me close by complimenting the work done by the conferees, and the diligent effort of the chairman [Mr. HELMS] and the ranking minority member, [Mr. ZORINSKY] of the Agriculture Committee throughout this process. They deserve our acknowledgement for a conscientious undertaking of a very difficult task.

Mr. GRASSLEY. Mr. President, I oppose this bill because it will likely reduce farm income in the Midwest.

I had hoped that the conferees could craft a compromise that would at least maintain the safety net for feed-grain farmers. As long as our Government takes actions that disrupt farm markets and refuses to take tough stands against unfair trade practices of our foreign competitors, our farm programs will be costly.

The answer to the problem, however, does not lie with attacking the symptoms of high costs.

I don't have any farmers in Iowa that like to farm for the Government. Iowa farmers pride themselves in their self-reliance. It's only when "Big Brother" Government interferes with farming that Iowa farmers are forced to rely upon farm programs.

Clearly, this conference report is better than what we voted for initially in the Senate. But if my Senate colleagues truly understood the magnitude of the farm economy problems, and understood the real source of those problems, they would vote against this farm bill, too.

Mr. President, the farm bill we are considering today is better than the one which passed the Senate a few week ago. However, it is not a real 3- or 4-year freeze, especially when compared to the 1985 support levels.

The target price, which is the only real income support in this bill, will be reduced after 2 years in this bill. Instead of 3 or 4 years with a $3.03 target price, farmers will witness a reduction to $2.97 in 1988, $2.88 in 1989, and $2.75 in 1990. Target price stability was essential under this bill because the loan rate is being dropped so dramatically. Both farmers and their lenders will certainly need to depend on Government programs for their income stability. Without a freeze in target prices they will be making decisions based on projections instead of known factors.

In addition to the target price reduction there is an increase in the set-asides required to be in these commodity programs. In 1985, our corn farmers were required to set aside 10 percent of their crop acres to be in the farm program. In 1986 under this bill farmers will be required to set aside at least 15 percent and up to 20 percent, with 2.5 percent of that being a paid diversion. In the out years, set-asides could be as high as 20 percent without any paid diversion. This increase in the set-asides will seriously undermine many farmers' ability to make a profit.

Primarily it is for these reasons that I cannot support this bill even though it is an improvement over the Senate bill. When I voted to send the farm bill to the conference committee in November with a 2-year freeze, I fully expected at least a 3- or 4-year freeze in target prices because the House bill contained a 5-year freeze. Agriculture in my State is in worse economic shape of any in the country. To help my farmers recover from the crisis they are now experiencing, we needed stability in this farm bill. This bill does not guarantee us stability, in fact it guarantees us reductions which I cannot accept.

Mr. QUAYLE. Mr. President, today, the Senate is completing its work on the conference report on the 1985 farm bill, an omnibus package of legislation that will set in place for the next 5 years our Federal policies for farm income protection, export promotion, farm and rural development credit, international food assistance and domestic nutrition programs.

Frankly, Mr. President, I have very mixed emotions about this bill. On the one hand, the bill continues financial assistance to farmers who are now experiencing one of the most difficult economic periods in decades. Commodity prices and farm asset values are now at record lows, reflecting drastically decreased agricultural exports, high real interest rates and world crop surpluses. As a result, our price support programs have taken on a renewed importance in stabilizing farm income.

On the other hand, I have witnessed what poorly designed farm programs can do and have done to the long-run health of American agriculture, and I am concerned that this farm bill does not go far enough toward changing the basic method by which we support commodity prices and protect farm income. By encouraging production through volume-based programs, we have brought about changes in production patterns, affecting what commodities are produced and where. In addition, through our loan programs, we encourage increased world production. All of this works to the detriment of our full-time farmers and those parts of our country that enjoy a natural advantage in the production of certain crops.

I am also disappointed with the inability of Congress to say "no" to certain specific interests that survive solely on Federal subsidies. For example, I was successful on the floor of the Senate in offering an amendment to the Senate Agriculture Committee bill to phase out the Honey Price Support Program. This program cost American taxpayers $100 million last year to support the incomes of but a few thousand beekeepers. As a result of the program, with its price support level at over 65 cents per pound compared to a world market price of between 30 and 40 cents, the Federal Government last year was forced to purchase over 70 percent of all domestically produced honey.

With 60 votes in the Senate for such a honey program phaseout, and with all the demands on the farm program that exist, one would think that, at a minimum, the farm bill conference could have produced a compromise that included fundamental changes in this flawed program. But as is too often the case, the House-Senate conference committee took the path of least resistance and preserved much of the subsidy for some 2,000 to 3,000 beekeeper beneficiaries.

Congress as a whole simply must summon the will, as the Senate did in approving my amendment to phase out the Honey Price Support Program, to eliminate wasteful and unnecessary Federal programs. I deeply regret that, in the end, Congress failed this litmus test of its resolve to make a true dent in the cost of the Federal Farm Program.

There are many other problems with this bill. It continues the failed programs of the past in sugar, peanuts, wool, mohair, and others. It also contains one of the most complicated and costly dairy programs in history, which includes a milk tax that I strongly oppose.

Having stated my reservations, let me say that this farm bill does contain several very positive provisions, including an impressive effort to improve competitiveness and promote exports, as well as a strong conservation title. I am very pleased to see that the farm bill conference report includes the Intermediate Export Credit Program that I first proposed in the Agricultural Trade Enhancement Act, S. 171, which I introduced in January.

Given the very gradual move toward market orientation that it provides, this bill could set the groundwork for later, more fundamental reform of our farm programs at a time when the state of the farm economy is more stable. Certainly, there is a need for such a comprehensive reform. The key to such reform is divorcing production decisions from income protection and allowing economic stimuli to direct farm production, rather than commodity price supports.

This farm bill freezes target prices for wheat and feed grains for 2 years and authorizes a very gradual reduction thereafter. In addition, loan rates for these crops are lowered toward a level between 75- and 85-percent of a 5-year average market price.

In so doing, this bill walks a tightrope between three objectives. First, it maintains farm income during a transition period toward market orientation and attempts to protect farmers from the extremes of our current economic climate. Second, it makes our commodities more competitive by lowering loan rates to levels that should put our products back into the market place here and abroad, rather than Government storage. And finally, this bill attempts to accomplish these two almost mutually exclusive objectives within budget guidelines worked out over the last several months in consultation with the administration.

But, one could certainly question whether we have succeeded in producing a fiscally responsible farm bill. The cost of the Commodity Credit Corporation portion of the bill—its price support provisions—is estimated at around $52 billion during the first 3 years of the bill's 5-year life. I would suggest that when one compares the number of farmers in this Nation, regardless of how a farmer is defined, with the unbelievable cost of these programs, it becomes clear that these programs simply cannot be sustained in the long run.

All three of the bill's objectives are important. Market orientation must be achieved if our farmers are to again derive their income from the market and not the U.S. Treasury. I know that the farmers of Indiana want to see conditions again that will allow them to earn their living without the restrictions of Federal Government involvement. They can only do so if we in Congress will finally turn our attention to the real factors prohibiting

competitiveness and profitability, including the strength of our dollar, high real interest rates and conflicting Federal policies.

Mr. President, recognizing that these three objectives are so difficult to achieve together, I will support this farm bill because, given the seriousness of the problems confronting our farm economy, the farmers of Indiana and this Nation cannot afford the luxury of further delay or guesswork. They need a solid foundation upon which to plan for the future, and the farm bill will provide that. Therefore, I would encourage my colleagues to support this bill.

Mr. EAGLETON. Mr. President, the compromise farm bill is not the best legislation in the world, but it is better than two other things I can think of one, the administration's proposed farm program or two, doing nothing at all.

I don't think there was any advantage to holding off until next year to settle on a program. If anything, the budget pressures under Gramm-Rudman will be even more intense then and the chances of getting a good farm program even less.

I think we did the best we could under the circumstances and I am hopeful we can make this program work.

Mr. FORD. Mr. President, in Kentucky, 110,000 people work on the farm, and another 750,000 nonfarm workers owe their jobs to farming. Agriculture in Kentucky has a $3 billion farm gate value, but its associated feed seed equipment, packaging, transportation, processing, wholesaling, and retailing activities make for an $11 billion industry. No other combination of business activities provides nearly as many jobs or as great an economic stimulus.

The 1985 farm bill was meant to be a revolution for agriculture. Those of us in agricultural producing States recognized that agriculture was a crossroad, with a need for a change. However, no change could occur without improving the income for our Nation's farmers.

In anticipation of the 1985 farm bill deliberations, I submitted to the chairman of the Senate Committee on Agriculture, Nutrition and Forestry, a lengthy document expressing my views on what Kentucky needed from a farm bill.

Of overall importance to me was the necessity that the farm bill provide an incentive for young people to farm. They are currently abandoning the family farm in alarming numbers. The last census of agriculture showed that, nationwide, there are 4,200 fewer farmers who were age 25 and under than a few years earlier. For our Nation to have a strong agriculture sector in the future, we must attract and maintain the farmers of tomorrow.

The farm bill had to contain, in my opinion, a balanced approach to long-term programs which are consistent and practical; first, price stability and farm credit reform; second, export promotion and fair terms for imported goods; third, strong soil and water conservation for the farms of future generations; fourth, continued Federal cooperation with State programs; and fifth, emphasis on research and extension programs.

Farming has been good to our Nation since the days when our Founding Fathers bartered with cash crops. The U.S. farmer leads the world in efficiency, now producing 15 times as much as our land yielded in 1930. As a result, American consumers spend less of their disposable income on food than people in any other nation. This is despite the fact that the average farm receipt is only 2 cents for every dollar spent on food.

Mr. President, while agriculture has been exceptionally good to our Nation, we have let our farmers down. Farm debt in the U.S. today stands at an all-time high of $215 billion. It more than doubled between 1977 and 1983. Our farmers deserve more.

The 1985 farm bill, unfortunately does not go far enough to improve the income of our Nation's farmers. However, considering budget constraints and the radical changes proposed by those who favored lower prices and hence reduced farm income as necessary, the final bill is at least acceptable. It could have been a monstrosity.

The freezes in target prices for 3 years does provide certainty for our farmers and their lenders. The 1985 farm bill makes a profound statement that Congress recognizes the income problem of our Nation's farmers.

I am pleased that the bill puts back a floor that is reasonable for our Nation's soybean farmers. Changes could have been made to encourage exports while improving farm income over the long term. Budgetary and time constraints kept this from occurring, but it was imperative that the certainty associated with a minimum floor price be reestablished.

The 1985 farm bill makes a strong statement to foreign nations that practice unfair trade. The U.S. Congress believes in free trade, but will be providing the necessary tools to establish trade that is fair. U.S. commodities, as a result of this bill, will move into the export arena at market clearing prices. However, farm income will be preserved through fair target prices. I support this move to a free market, and while this is a 5-year authorizing piece of legislation, let me say that if in 5 years this move to a free market is not successful, I stand ready to fight for changes in farm programs to assure farmers a fair return on their commodities. The next 5 years is a test to see if these theories hold true and I am pleased that for the duration, income protection is preserved.

I am extremely pleased with the farm credit titles of this bill. The single most important provision contained in this section is a $490 million program whereby the Agriculture Department and private lenders share equally in the cost of reducing interest rates for hard-pressed farmers. Twenty percent of today's farming costs are tied up in interest on loans for 1 year of operation. This interest writedown will go far in benefiting the individual farmers through reduced interest costs.

By far the best provision in the 1985 farm bill is the soil conservation program that—for the first time ever—ties farm program benefits to the way a farmer treats his cropland.

Since Kentucky has one of the top 10 highest erosion rates in the Nation, we can be especially pleased about this historic legislation which will help preserve our land for tomorrow's crops.

The new bill would deny crop price-support loans, subsidy payments, crop insurance and other Federal benefits to any producer who continues to till land classified as a high erosion risk.

Soil conservation programs had actually been targeted for drastic cuts in the administration's 1986 budget proposal. However, it has finally been realized in Washington that soil conservation is actually a very smart program from a budget perspective.

Technological advances are needed in order to restore profitability to the farm sector. The nature of a competitive agricultural environment mandates that continued advancement in the sciences continue. The 1985 farm bill will see to it that adequate levels of research and extension work continues.

I am disappointed that the 1985 farm bill does not contain more specific references on improvements in Federal and State program cooperation. Every State is different. These differences are strengths of American agriculture. We must direct our attention in the future to see to it that Federal and State agriculture programs do more to complement one another.

The 1985 farm bill is not perfect by any stretch of the imagination. The problems in American agriculture are real but they are also diverse. It would be wrong to assume that one piece of legislation could be viewed as a cure-all.

This farm bill, when viewed as a whole, does provide a workable framework for American agriculture. I intend to vote for this bill, given the realities from which it was developed. I do so knowing that improvements for American agriculture must continue to be sought.

I do not vote for this bill assuming that we in Congress will place agriculture in a closet for the next 5 years. I vote for this bill because it was the best that could be achieved and because I believe Congress will continue to be striving for those improvements. Farming is an ongoing process in the fields, and agricultural legislation is also an ongoing process in Congress.

Mr. LEAHY. Mr. President, the new farm bill that will be established under the conference report on H.R. 2100 can do much to improve the financial conditions facing farmers and others who live in rural communities. If properly administered, the new farm bill can boost farm income, while reducing the Federal budget for agricultural programs. Under the provisions of this conference report, farm program costs will represent less of the Federal budget, while still providing farmers program provisions they have sought during the long debate that has led to this conference report. In particular, I am pleased that the dairy program established under the conference report will provide dairy farmers with a supply management program that the industry needs.

The programs and authorities provided under the bill will not provide all of what I believe could be done to insure the improvement and financial soundness of our agricultural economy. But the bill is the best available approach to solving some of the difficult economic problems confronting farmers and the Nation. Financially hard-pressed farmers would benefit from stronger support prices, but, at this late date, it is more important to farmers that the provisions of the farm bill are enacted, thereby providing some stability for farm income and allowing farmers to plan for next year. Farmers need to obtain production financing for next year and dairy farmers need to be able to begin the industry self-help program established in the conference report.

I believe we must make every effort to insure that farming remains a vigorous industry in our Nation. Farming and food production are national security matters. The United States is the most powerful Nation on Earth—indeed, the most powerful Nation in the history of the world. But many nations possess weapons that can inflict terrible damage on the United States. The power to destroy is commonplace in the world today.

Other nations do not possess our agricultural abundance. The United States is the only major military power in the world that can feed itself. We are the only major military power in the world that does not have to import food, that can never be starved by a rival country, and that cannot have its foreign policy, or its domestic policy, or its economic policy shaped by outside forces. That is our unique strength. It is a strength we must maintain.

DAIRY PROGRAM PROVISIONS OF THE BILL

The bill provides both short-term emergency measures to adjust supply and long-term provisions that maintain the vitality of the industry.

Briefly, the price support provisions of the new dairy program:

(1) Require, through January 1, 1987, that the price of milk be supported through the purchase of milk and milk products at a level equivalent to $11.60 per hundredweight for milk containing 3.67 milkfat.

(a) Require, on January 1, 1987, a reduction in the support price of 25 cents per hundredweight, to $11.35.

(b) Authorize the Secretary, on January 1, 1988, January 1, 1989, and January 1, 1990, to adjust the price support of milk. If the Secretary estimates that for the succeeding 12-month period net price support purchases of milk or milk products would—

(i) exceed 5 billion pounds or more milk equivalent, the Secretary would be authorized to reduce the price support level by $.50 per hundredweight.

(ii) be less than 2.5 billion pounds, the Secretary would be required to increase the price support level by 50 cents per hundredweight.

(2) Require collection of assessments to fund the "whole herd buy out" program. Farmers would be assessed 40 cents per hundredweight on all milk marketed between April 1, 1986, and December 31, 1986, and 25 cents per hundredweight on all milk marketed between January 1, 1987, and September 30, 1987.

(3) Establish a whole-herd buyout program—

(A) Beginning April 1, 1986, the Secretary can offer to enter into contracts with farmers submitting bids to make payments to those farmers who agree to sell their entire herd for slaughter or export and idle their productive plant for 3 to 5 years.

(B) Producers wishing to terminate production under the program must supply the Secretary with evidence of their marketing history, and the size and composition of their dairy herd.

(C) Only producers who entered the industry before January 1, 1985, are eligible for this program, except in cases where the producer's entire herd and production plant were transferred by the death of, or as a gift from, a family member.

(D) Civil penalties are provided for in cases where producers make false statements in submitting bids or verifying compliance with contracts, or where purchasers of cattle sold under the program do not slaughter or export them within a reasonable period. Marketing penalties apply to producers who violate the contract.

(E) Orderly marketing of dairy cattle—The Secretary must estimate as soon as possible the number of cattle that will be marketed for slaughter under the program and implement marketing procedures to ensure that greater numbers of cattle are slaughtered in the periods April to August 1986, and March to August 1987 than for other months of the program. The objective is to maintain historical seasonal marketing patterns for red meat producers.

(F) The Secretary must limit the number of dairy cattle marketed for slaughter under the program in excess of the historical dairy herd culling rate to 7 percent of the national dairy herd per calendar year.

(G) The Secretary is given standby diversion/whole herd buyout authority for calendar years 1988-90.

(4) Provide for Red Meat Purchases—

(A) The Secretary is required to purchase 400 million pounds of red meat during the 18 month period the whole herd buy out is in effect. 200 million pounds must be purchased with CCC funds; 200 million pounds must be purchased with funds available through CCC and commodity distribution and other nutrition programs of USDA.

(B) Red meat purchased under this program must be made available to the Department of Defense use, or for export.

5. Revise Marketing Order (Class I Differential)—

(A) Class I differentials are increased in most regions covered by federal milk marketing orders. These differentials, when added to the M-W price, form the guaranteed minimum price for milk sold for fluid consumption. NOTE: A list of the increases, and a map of the Federal order regions, are attached to this summary. The map shows the current differentials.

(B) Service payments to dairy cooperatives and to other handlers who perform "services of marketwide benefits" are authorized. These payments would be made out of the pooled receipts from the sale of milk in each federal order region.

(6) Extend Other Provisions of Law—

(A) Not less that 1 million pounds of surplus nonfat dry milk must be made available by CCC, on a bid basis, to be used in the domestic production of casein.

(B) The Secretary must conduct a study to determine whether casein imports tend to interfere with the dairy price support program. The study must be completed within 60 days of enactment.

(C) Provisions of the Federal milk marketing law relating to authority for seasonal base-excess plans, seasonal takeout-payback plans—commonly known as Louisville plans—mandatory hearings on amendments to milk marketing orders, and the use of milk production capacity as part of the pricing standard used by the Secretary in setting milk prices under a marketing order (through December 31, 1989).

(D) The requirement that the CCC make dairy products available, without charge, to veterans' hospitals and the military (through September 30, 1989).

(E) Authority for indemnity payments to dairy farmers who sustain losses as a result of pesticides, nuclear radiation or fallout, or from other chemicals or toxic substances (through September 30, 1989).

(F) The bill makes clear that the legal status of producer-handlers would not be changed under the provisions of the bill.

CONSERVATION

The new farm bill will do much to conserve our scarce land and water resources. We cannot afford to deplete natural resources that future generations will rely on for agricultural production. To protect this heritage, soil and water conservation programs must be appropriately strengthened and adequately funded. The new farm bill accomplishes many of conservation objectives.

Mr. President, the conference report on H.R. 2100 contains very important provisions that strengthen our soil and water conservation efforts. First, the bill would protect highly erodible land.

The conference report on H.R. 2100 contains the so-called sodbuster bill that makes ineligible for Federal Farm Program benefits any person who produces an agricultural commodity on highly erodible land.

Second, the new bill will protect fragile wetlands. Under the conference report on H.R. 2100, a swampbuster bill would be enacted that applies many of the same sanctions as are levied against persons who farm highly erodible land against persons who farm unsuitable wetlands.

Third, the new farm bill establishes a conservation acreage reserve. The conservation reserve will be used to reduce soil erosion by designating land currently in production that is prone to erosion for a reserve wherein the land is less intensively used. Less intensive uses include pasture, tree growth, or permanent grass. The reserve can be as large as 30 million acres, with 10 million acres required to be placed in this reserve—through contracting with owners and operators of eligible erosion prone land—during crop year 1986. An additional 10 million acres will be added to this reserve during crop year 1987 and another 5 million acres must be added before the end of the 1989 crop year.

FOOD AND NUTRITION PROGRAMS

The Food Stamp Program helps low-income households to stretch limited dollars to ensure a nutritious and adequate diet, as it did in 1961 when President John F. Kennedy established pilot projects that led to the current program.

Unfortunately, the incidence of these human tragedies is on the rise. The number of families and individuals living at the poverty level is rapidly increasing. One of every six children under the age of 6 now lives in a household whose income is at or below the poverty level. Also, there is evidence that malnutrition among the elderly is a serious problem in this country.

This country is blessed with an abundance of food. The Food Stamp Program is a fair and reasonable way to provide needy Americans and their families a part of this abundance.

Throughout the debate on the food stamp reauthorization, I worked to encourage support for provisions that help States to administer the program in a humane and efficient manner, while requiring them to be mindful of accountability and good stewardship of Federal resources.

My goal for the Food Stamp Program has always been to ensure that food stamp dollars are spent properly on food aid for the needy and are not wasted. We must always be vigilant in combinating any sign of waste, fraud or abuse in this program—both to protect taxpayers' dollars and to safeguard the basic integrity and reputation of the program. If we are to be credible in our efforts to maintain the Food Stamp Program, which is the most important nutrition program available to low-income Americans, we must be sure that the program is operated in an efficient manner.

I am concerned that the administration has proposed converting the Food Stamp Program into a block grant at State option—a provision that would end the Food Stamp Program as we know it today. I oppose the block grant proposal, as well as short-sighted work requirements which take away the States' flexibility in developing and administering work and training programs. I oppose increased bureaucratic complexity which would hinder efficient management, and would raise the potential for increased error rates and sanctions.

RESEARCH, EXTENSION, AND TEACHING

A major part of the bill focuses on supporting and improving food and agricultural research, extension, and teaching.

Federal support of the development of agricultural science and technology is a public investment that has paid huge dividends for this Nation and the world—the development and dissemination of new agricultural technology—through cooperative extension and teaching programs—are fundamental missions of the Department of Agriculture.

Congress has the responsibility of providing the necessary tools by which the Department and the scientific community can meet the agricultural research, extension, and teaching needs of our Nation.

Congress first addressed the needs of the food and agricultural sciences in a unified manner in title 14 of the 1977 farm bill.

The 1985 bill will not make radical changes in the Federal policies and programs established under the 1977 bill. The conference report on H.R. 2100 will continue—through fiscal year 1989—funding authorizations for agricultural research, extension, and teaching programs provided under title 14, and will update and fine tune the operation of a number of these programs.

The testimony of witnesses from the agricultural research, extension, and teaching community at the farm bill hearings was clear that coordination of agricultural research and education activities could be improved.

The great strength of our decentralized system of agricultural research and education has been that diverse needs can be addressed. Yet, that decentralization can be a weakness if coordination of efforts is lacking. I look forward to more vigorous efforts to coordinate research and extension programs.

Also, a better system for communication between the Federal and State research systems, and between the research community and the users of that research, is needed. I believe the Users Advisory Board can play a stronger role in this area.

To better focus the expenditure of funds and insure greater communication and coordination within the food and agricultural sciences, the bill extends the terms of the Joint Council on Food and Agricultural Sciences and the Users Advisory Board. In addition, the responsibilities of these key panels are more carefully defined, to ensure the concentration of research and extension efforts in those areas of greatest national needs, and to ensure greater coordination between these two bodies.

The bill will strengthen the role of the States in the research, extension, and teaching programs. It also will give the Secretary of Agriculture additional authorities to improve higher education in the food and agricultural sciences.

I am pleased that the bill includes the provisions of my bill to strengthen the Rural Development and Small Farm Research and Extension Programs. I am particularly pleased that the conference report on H.R. 2100 includes what has come to be known as the "Agricultural Productivity Act" as a subtitle.

The purpose of the Agricultural Productivity Act is to facilitate and promote research on farming systems that are environmentally sound. Under the bill, the Secretary of Agriculture will conduct research, and disseminate the results of that research, on farming systems that hold potential for reducing farm production costs and minimizing the potential for environmental damage. Today, as farm production costs continue to increase, this type of research is needed more than ever. To accomplish cost reduction while protecting the environment by promoting conservation and sensible use of traditional farming practices is sound policy.

The Agricultural Productivity Act establishes a new program of agricultural productivity research. This program would:

Provide for the definition of terms used in the program;

Declare the findings of Congress that the long-term agricultural viability and profitability of the farms and ranches in the United States are dependent on highly productive and efficient agricultural systems; agricultural research and technology transfer activities of the Secretary of Agriculture, State cooperative extension services, land-grant and other colleges and universities, and State agricultural experiment stations have contributed to innovation in agriculture and have a continuing role to play in improving agricultural productivity; agricultural productivity is reduced by annual irre-

trievable loss of billions of tons of top soil through wind and water erosion; many farmers and ranchers are highly dependent on machines and energy resources for agricultural production; public funding of a properly planned and balanced agricultural research program is essential to improving efficiency in agricultural production and conservation practices; and expanded agricultural research and extension efforts are needed to improve agricultural productivity and implement soil, water, and energy conservation practices;

Establish the purposes of the subtitle as being those of facilitating and promoting scientific investigation in order to enhance agricultural productivity, maintain the productivity of land, reduce soil erosion and loss of water and plant nutrients, and conserve energy and natural resources; and facilitating the conduct of research projects in order to study agricultural production systems located in areas possessing various soil, climatic and physical characteristics, and managed using farm production practices that rely on items purchased for the production of an agricultural commodity and a variety of conservation practices, and are subjected to change as the result of such practices;

Require the Secretary to inventory and classify by subject all studies, reports and other materials developed by any person or governmental agency with the participation or financial assistance of the Secretary, that could be used to promote the purposes of the subtitle. In addition, the Secretary is required to identify, assess, and classify existing information and research reports that will further the purposes of the program; provide useful information and to make the reports available to farmers and ranchers, and identify gaps in such information and carry out a research program to fill such gaps;

Require the Secretary, in cooperation with Federal and State research agencies and agricultural producers, to conduct such research projects as are necessary to promote the purposes of the subtitle. In carrying out these research projects the Secretary is required to conduct projects and studies in areas that are broadly representative of United States agricultural production. In addition, the Secretary is authorized to conduct such research projects involving crops, soils, production methods, and weed, insect and disease pests on individual fields or other areas of land. In the case of research projects involving the planting of a sequence of crops, the Secretary is required to conduct the projects for a term of at least 5 years and, to the extent practicable, 12 to 15 years. The Secretary is also required to ensure that producers are aware of the research projects and to ensure that such projects are open for public observation. The Secretary is authorized to indemnify an operator of a project for damages incurred or undue losses sustained as a result of a rigid requirement of research or demonstration under the project that is not experienced in normal farming operations. Any indemnity payment would be subject to any agreement between a project grantee and operator entered into prior to the initiation of such project;

Require the Secretary to establish a panel of experts consisting of representatives of the Agricultural Research Service, Cooperative State Research Service, Soil Conservation Service, Extension Service, State cooperative extension services, State agricultural experiment stations, and other specialists in agricultural research and technology transfer; and to take into consideration the views of the panel before a project under this subtitle is designed;

Require the Secretary to report to the House and Senate agriculture committees within 180 days after the effective date of this subtitle on the design of the research projects established under this subtitle, within 15 months after the effective date of the subtitle on the results of the information study, and not later than April 1, 1987, and annually thereafter on the progress of projects conducted under this subtitle;

Authorize the Secretary to carry out the required information study through agreements with land-grant colleges or universities, other universities, nonprofit organizations, or Federal or State governmental entities, that have demonstrated appropriate expertise in agriculture research and technology transfer;

Require the Secretary to make the information and research reports identified under the information study and the information and conclusions resulting from any research project conducted under the subtitle available to the public through the Extension Service, State cooperative extension services and otherwise as necessary;

Authorize the appropriation of such sums as may be necessary to carry out the subtitle and provide that such sums are to remain available until expended.

CONCLUSION

While the deficit and its secondary effects are problems which must be addressed, we must not let such concerns become our central and only focus. The agricultural problems now confronting this Congress require more than a myopic response from Congress—it requires a certain pragmatism and delicateness of response. We must meet the nutritional needs of our growing population if we are to provide for a strong defense. We must maintain a strong farming industry if our economy is to maintain its past health. The new farm bill will help in this effort.

I urge my colleagues to vote to approve the conference report.

Mr. SYMMS. Mr. President, I wish to speak in support of the farm bill reported out of the recent House-Senate agriculture conference. I commend the conferees. Although I am in substantial disagreement with a number of the actions taken, I feel the conferees produced better legislation than what we started with. Certainly this bill is far from perfect, but I'm convinced that this is good as we can do under the circumstances. Mr. President, I'm normally not inclined to quote the editorials in the Washington Post. However, I'd like to call your attention to the last sentence of a recent editorial. Speaking of the farm bill the Post said, "In a difficult area and in the worst of years Congress has finally acquitted itself rather well." While in my opinion that is an overstatement it is not completely incorrect.

This bill is headed in the right direction. It provides for lowering loan rates on basic commodities and basing these rates on market prices. That is bad news for some of our foreign competitors. For too long they have used our loan rates—set at above market prices—as shelter under which they have steadily increased their share of the world market.

I am very pleased that this bill has an aggressive export title. Mr. President, our agricultural economy can't operate at present levels without substantial export markets. As an example, about 75 percent of Idaho's wheat crop must be exported. Our farmers can compete, head to head, with anyone in the world—if they are playing on a level playing field. However, we're not playing on a level field, On every hand our foreign competitors are heavily subsidized. We're in a vital battle for markets and we've got to support our producers.

The conservation provisions are sound and, in the long run, will be very beneficial. I certainly support them.

The bill has weaknesses and, of course, some very controversial provisions.

I'm very disappointed that the foreign agricultural investment reform amendment that I introduced—and which passed the Senate overwhelmingly—was deleted in conference. It makes no sense for us to loan money, at very low interest rates, to foreign governments to finance agricultural production in direct competition with our own producers. It's especially senseless when we have surpluses and are buying and storing our own surplus crops. Mr. President, FAIR is a good idea whose time is coming. This issue will be back for consideration.

It's also very disappointing to me and my staff that the animal damage control amendment was deleted from the conference report. We felt sure that this amendment would pass without serious opposition. However, we have made substantial progress. Amendment 31 in the continuing resolution, which must be approved before midnight Thursday to keep the Government functioning, contains an amendment that funds the ADC Program in the Department of Agriculture for 1986. I have no reason to believe that this won't happen.

I recognize that the support price levels are open to debate. I know our wheat growers are not totally pleased. However, I'm sure the conferees acted on their best judgment.

The dairy provisions are centainly controversial in Idaho and I suspect in other States. I know the cattlemen in my State are very concerned about the whole herd buyout. I hope adequate provisions will be made to avoid flooding the cattle markets to everyone's detriment. A way has to be found to bring the Dairy Program into balance without injuring the cattlemen. However, my contracts with the Department of Agriculture aren't too reassuring.

This bill contains a provision to make Federal agencies better neighbors by making more efficient control of grasshopper infestations on public land possible.

The sugar and wool programs are extended in about their present forms. As these programs are designed to operate with minimal Government expense, I'm pleased to support them.

I'm in general agreement with the pork and beef promotion provisions. I applaud our livestock producers for taking the initiative in trying to increase their markets.

I believe the clear title provisions represent a reasonable compromise. I'm not as pleased with the cargo preference resolution but recognize it as a difficult issue.

Mr. President, I'm not going to try to discuss all the details of the bill. Overall, I feel it merits support and urge that it be enacted. Our farmers deserve to know the rules of the game.

Mr. President, this is a subject that is near and dear to my heart, farm programs and farming, in general. Coming from an agricultural State and having a farming background myself, I really wish to say that I think that the leadership of the Agriculture Committee and Senator DOLE, the majority leader, all deserve a strong pat on the back and commendation from not only the people who come from farm States but from the taxpayers of this country.

It appears to me that the farm bill is changing the course and the direction of our current farm policy. Under our current farm policy our farmers are growing grain to sell to the Government and then the Government is paying to store it, and we are losing the markets to Argentina, Brazil, Australia, Canada, and Western Europe. So, the farmers in those countries have been cheering for our farm programs while our farmers are facing financial disruptions, bankruptcies, and other problems.

I really think that all of my colleagues, if they have not had the opportunity to carefully peruse through what the conferees came back with, should peruse it, and I wish to give my support for this bill.

I only say, in summary, I do not like Government programs, but I would say that you have three choices. The first choice is vote for this bill, this conference report, which is a step in the right direction for farm policy. As slow as it may be, it at least starts on the course of getting us back into international competition. The other alternative would be to extend the current Farm Program for another year, and that is an unmitigated disaster. We know that. So we do not need to do that.

The last course would be to go back to the 1949 Farm Act, which would be an even worse disaster with 90 percent of parity locked into the law and very rigid acreage controls. It would be very unflexible, unworkable and most costly to the taxpayers of the country.

So I think the wisest course of action to take here today is to pass this conference report and encourage the President to go ahead and sign the farm bill.

I might just say that there is one part of the farm bill that I have a great deal of reservation and concern about. Actually, there are many parts of the farm bill that one might have concerns and reservations about. Specifically, I am concerned about the American cattlemen. The cowboys are one group of farmers who do not come into Washington and have their hand in the Federal trough. Yet, in order to solve the dairy problem, and it is a problem, I am first to admit that, there has been a very negative impact on the price of beef in this country and I regret that a great deal.

I do not have a solution. I know the conferees worked very hard to come up with this whole-herd buyout proposal. As a matter of fact, the dairy people in my State favored this. So it is a mixed bag. But as far as the cowboys, the cattle producers, we prop up the grain prices, and they have to pay higher grain prices. We have whole-herd buyouts and then those dairy cows go to the slaughterhouse and depress the price.

I do not know the answer, but I do have a great deal of concern for the American cattlemen and I think they deserve our heartiest congratulations. I guess one thing we could all do is encourage everyone to go buy some beefsteak, that might help them as much as anything. We could also drink a couple extra glasses of milk and do our part to help get rid of the dairy surplus.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. SYMMS. I am happy to yield.

Mr. MELCHER. Mr. President, I say to my friend from Idaho I have shared the same concern about the whole-herd buyout plan that is in the farm bill. It was in the House-passed bill, and the conferees have accepted it where the Secretary of Agriculture is authorized to buy an entire dairy herd, to take it out of production. The dairy cattle would either be sold abroad or would be slaughtered.

My concern is like that of my friend from Idaho, that that added slaughter of dairy cows would further depress the cow market for the beef industry.

Nevertheless, as it was finally accepted, the conferees agreed to buy up to 200 million pounds of red meat per year and at least 100 million pounds of that red meat that is purchased by the Government will have to be for export.

So to that extent the conference did address the concerns that the Senator from Idaho and I share.

Mr. SYMMS. I thank the distinguished Senator for that observation. I think that is a point that needs to be made and widely acknowledged, that 100 million pounds of this will be exported and 100 million pounds will go in the school lunch programs and other programs. Is that correct?

Mr. MELCHER. That is right.

I must point out it is 200 million pounds per year for 2 years, and those 2 years will actually be only about 18 to 20 months duration, so it will be during 2 years.

But the point about red meat should not go ignored. It is not just beef; it could be pork also.

The Senator is correct. Of those 200 million pounds, 100 million pounds would be for the domestic nutrition programs such as school lunch, and 100 million pounds will have to be exported.

Mr. SYMMS. I thank the Senator very much.

I say to the Senator and all Senators who were on the conference that I just want to say again, as one Member of the Senate, I appreciate the job the conferees did. I had the privilege of being on the House Agriculture Committee for 8 years in the other body, and I was watching very carefully what they were doing here to keep tract of it.

I think that our Senate conferees on both sides of the aisle did an excellent job of trying to put the best foot forward for a sound farm policy for the future.

As I say, the Senator mentioned about the dairy-herd buyout, the dairy producers are going to pay for this cost. It is not going to be an additional cost to the taxpayer, as I understand the program. So at least it is a self-support program that addresses another problem that we all have, and that is a surplus of dairy products being produced in the country.

So, by and large, I just think Senator HELMS and Senator ZORINSKY and their conferees deserve a pat on the back, and I wish them a Merry Christmas in the process.

Mr. STAFFORD. Mr. President, this conference report on the farm bill contains language purporting to enact the policy voted by both this body and the House regarding the deductibility of the shelter costs covered by low income home energy assistance payments. During consideration of both the Reconciliation Act and the farm bill, the Senate adopted, by 60 and 63 votes, my amendment striking committee language which would have had the effect of counting LIHEAP benefits as income when food stamp benefits, and in some cases, eligibility are determined.

As a result, the policy enunciated in the 1980, 1981, and 1984 LIHEAP acts, which all prohibited counting energy assistance as income for any purpose was clearly reaffirmed; the original committee provisions might have negated the decision of the U.S. Eighth Circuit Court in this matter, but as a result of the amendment, no action has been taken with respect to that decision and, in essence, current law remains unchanged. Similar language was adopted by the House.

While the conference report appears in many respects to implement our intent, I have a continuing concern as to whether the complex formulations adopted with respect to multiple standards for utility allowance and with respect to out of pocket costs adequately and clearly protect the recipient of food stamps and energy assistance as Congress intends. The requirement of having out of pocket costs to qualify for a standard allowance seems inconsistent with the other provisions of the act and is certainly inconsistent with the votes on the floor of the Senate. Further, the flexibility allowed the States with respect to interpretation of the standard allowance provisions may be so broad as to permit discrimination against LIHEAP recipients which is contrary to the intent of Congress.

On a positive note, the conference committee chose to remain silent on the deductibility of costs paid by the Energy Assistance Program and thus left stand the recent court decisions on this issue.

When the reauthorization for the LIHEAP block grant is considered by the Labor and Human Resources Committee next year, I will examine this matter as part of the committee's legislative review of the program to make sure that both acts consistently ensure that energy assistance is disregarded as income.

Mr. BENTSEN. Mr. President, I support the farm bill now before the Senate, not because it is going to solve our farm problems, but because it is the best that we can do within the limits that have been imposed on us. All in all, it is a major step forward in our agricultural policy. It provides a number of important new tools, such as marketing loans, that will allow us to move aggressively back into agricultural export markets.

I appreciate the work and the cooperation of the members and staff of the Senate Agriculture Committee in addressing many of my concerns on this bill. The chairman of the committee, Senator HELMS, and the ranking member, Senator ZORINSKY, and their staffs were most helpful and considerate, as were the other members of the committee.

I especially appreciate the work of the distinguished Senator from Mississippi [Mr. COCHRAN]. I was pleased to collaberate with him on a number of amendments to this bill, and he has done outstanding work for the farmers of Mississippi and of the Nation.

It is finally time to pass the 1985 farm bill. We must have a farm bill now. Wheat farmers throughout Texas and in many other States have had to plant without a Farm Program. They do not know how much to plant, They had to guess. Cotton farmers in south Texas have had to put down herbicides already. That action locks them in on their planting decisions. They will start planting milo in late January or early February. They will start planting cotton about mid-February. Wheat farmers can graze out their excess acres, and this bill will allow them to do that as well as providing diversion payments for wheat farmers who have already planted. Those are provisions I have strongly supported. But cotton and milo farmers cannot graze out their excess. They must plant exactly what they want to harvest.

I have talked to Secretary of Agriculture Block. He has given me his personal assurances that the 1986 farm programs will be announced immediately after this bill is enacted into law. I appreciate those assurances, and many farmers are depending on those assurances. I have done everything I could to see that all farmers get a Farm Program as soon as possible, and that the Secretary of Agriculture would have the authority necessary to announce those programs before Congress recesses for Christmas. That has now been done.

In addition, provisions have been made in the bill to see that this year's problems never need arise again. These provisions are made through the inclusion of language from one of my Senate floor amendments. My advance announcement amendment gives the Secretary of Agriculture the authority, whenever a farm program is not announced by the deadline set by law, to allow farmers hurt by that delay to choose between last year's program and this year's program for that commodity. That authority extends for 1 year more than the farm bill commodity titles, so that it will provide protection during the next farm bill.

The Secretary can offer affected farmers the choice of last year's acreage bases and acreage reductions, wheat grazing authority, and other program details necessary to make planting decisions. Or he can offer them the full program, including price supports. This should never be necessary during the farm bill, because program announcement deadlines are set by law. If it is used then, the announcement of bases and acreage reductions may well be sufficient under some circumstances, such as when the price supports are already set by law.

This section will become extremely important, however, in a farm bill year, in a year in which the Secretary does not have the authority to announce the new program. I feel, and it is also so stated in the statement of managers, that this section is especially intended for the next farm bill year. In that year the Secretary of Agriculture should provide the full program option to farmers. Without having price support levels, farmers cannot get financing for their crops.

This section has been made discretionary, rather than mandatory, by the conferees. But that should not, in my estimation, reduce its effectiveness. Any reasonable Secretary of Agriculture would not deny farmers the information they need to make planting decision in a timely fashion. The end result will be that 1990 will be the first farm bill in memory in which wheat farmers will have a farm program before they plant. It will be the first time that early-planting Southern States cannot be held hostage because of their unique need for early passage of a farm bill. We will all be on equal footing.

A number of other amendments in which I was actively involved are also included in this bill. With the assistance and cooperation of the members of the Senate Agriculture Committee and their staffs, a number of those changes which I had thought were needed have been incorporated into the bill now before us. I would like to mention just a few of those changes.

This bill will get the 1986 farm program announced. It will prevent this

year's problems with announcement dates from happening again.

It freezes yields for 5 years, but the freeze calculation is done using program yields instead of actual yields. This prevented cuts of up to 43 percent in deficiency payments to many Texas farmers, particularly West Texas cotton producers.

It includes the clear title legislation which I cosponsored with the distinguished Senator from Mississippi [Mr. COCHRAN]. It will implement in early 1985 a marketing loan program for rice to in order to re-activate what is now a dead market. It will extend the peanut and wool programs without crippling changes.

It will continue the Secretary's authority to provide disaster payment protection to farmers. It will require, for the first time, prevented-planting disaster payments if Federal Crop Insurance coverage is not available. It will retain the current ceilings on Farmers Home Administration loans, rather than lowering them sharply.

The cottonseed industry is protected against prices shocks rippling in from soybeans this year, first because of my amendment which the Senate adopted and second because the conferees deleted those changes in the soybean program.

The bill will break the current logjam over cargo preference and allow USDA export credit programs to work effectively once again. It will help Texas dairy farmers both through a long-overdue adjustment in the price differentials and through a whole-herd buyout provision. It will provide for a more effective agricultural export policy by getting the Special Trade Representative, our top trade official, involved directly in recommending actions to counter agriculture trade problems.

There are many other provisions in this bill in which I had an active interest on behalf of Texas farmers, but I will not take the time of the Senate on them. Others have already spoken more extensively than I. I would simply say that the tools are now there to do the job. The challenge now is to use them well.

We have given good tools to the administration. To get good results, especially in agricultural exports, they will have to be used well. As the ranking member of the International Trade Subcommittee I have been actively involved in trade issues, including agricultural trade. In that capacity and in my capacity as the senior Senator from Texas, one of our largest agricultural States, I will be working hard on this. I intend to help in every way possible to see that the trade tools in this bill, and the other trade tools available to the administration, are used wisely and well and as often as needed.

Their track record so far is very poor, but there have been a few steps forward recently. If our farmers are to get the help they need, those hesitant steps will have to turn into a dead run very soon.

Mr. President, I urge passage of this bill so that we can get on with the critical job of reviving our agricultural economy.

Mr. DECONCINI. Mr. President I rise in opposition to the conference report on farm credit which passed the Senate last night. I opposed the bill when it was first considered in the Senate and I have seen nothing in the conference report to change my views on this legislation. First, let me state that I have always opposed bailouts. I opposed the bailout of New York City, the bailout of Chrysler and the bailout of Continental Illinois. However, if I had believed that this farm credit bill would have really helped farmers in America I might have broken my strong record and supported it. But this bill is not a bailout of farmers—it is a bailout of investors.

Since this session began, we have spent many days—and many nights—debating the fate of America's farmers. There has been much gnashing of teeth and pulling of hair in the Senate on how best to help the family farmer. But if this farm credit bill is any indication of our true concern for the farmers, I don't believe we are at all, because this bill is a farm credit system investor bailout. These investors, be they big city banks or foreign corporations or whomever, went into this with their eyes wide open. It is an accepted economic principle that with higher yield come higher risks. Farm credit system bonds are no exception to this principle. I have no sympathy for investors who take lousy investment advice and make lousy business decisions—that is part of our free enterprise system, the right to make a mistake. Do not be misled into thinking that any of these investors were in this to help out the poor farmer, because they weren't. They took a risk and perhaps now they will have taken a bad risk. But bailing out the investors is not going to help the farmers.

I am convinced that if we really want to we could formulate farm credit legislation which will help assuage the problems facing many farmers. The credit crunch is real, but that is not at question here. The question is how do we help the farmers. This bill is not the answer.

Mr. NICKLES. Mr. President. It is no news to anyone that American agriculture is at a crossroads in history. The path on which it is struggling today is, I fear, headed down a dead end road. The farm bill Congress is approving today will not change the course of this path.

There is great misery out on the farm. During the past few years, I have talked with thousands of farmers and ranchers across Oklahoma and the mood is depressed. For most family farmers, life in rural America has become bleak.

Farmers are up against the wall because of sustained low commodity prices, falling land values, and high interest rates. Recent farm programs have failed to provide adequate income protection despite record amounts of money poured into these programs. They have also failed to hold down production and, in fact, have had many built-in incentives to produce beyond our ability to consume and export.

The 1985 farm bill will do very little to change these problems.

Yes, there are a few positive aspects of this bill. It does contain my proposal to allow farmers to maximize program benefits on half of their production acreage. Under this program, farmers would be able to receive a fair price on at least part of their acreage, and would be able to diversify without risking reductions in their acreage base.

However, this farm bill, overall, falls far short of what is really needed on the farm. It shows too little understanding of what our farmers and ranchers need.

It has been predicted that if conditions in the agriculture sector don't improve over what they have been for the last 3 years, a quarter of the Nation's producers could be forced out of business. The family farm is at the very heart of our Nation's economy and we can't afford for it to fail.

Facing the possibility of foreclosure is a frightening prospect for anyone in business, but consider the added plight of the farmer. The farm is more than his business, it is his life. And the worst part of this is that the financial crisis many farmers are facing is not a result of mistakes or poor business decisions on their part. Rather, a large part of the blame rests on the Federal Government.

The Government has allowed interest rates and inflation to go sky high; imposed embargos on Soviet grain purchases; and ignored the ever-growing deficit. And farmers are paying the price.

What does the Federal Government owe the farmers? At the very least, it owes them compassion, understanding, and willingness to offer some consistent guidelines before planting season to help farmers make decisions. The Federal Government has been interfering with the farmer's business for about 50 years now and, quite frankly, has not done a very good job.

It has always been my contention that the best assistance farmers can get will be the reduction of the Federal deficit. This would assure lower interest rates, and reduce the value of the dollar to help selling to foreign markets. Additionally, we need to be

more aggressive with out trade policy, and do all that we can to be more competitive in the world market. The 1985 farm bill does little of this. In fact, it doesn't adequately maintain farm income through these very worst of times.

Thirty years ago farmers received $1.99 for a bushel of wheat. Ten years ago the same bushel would bring $3.40. Today, Oklahoma farmers find the downward market offering a dismal $2.85 per bushel. A single bushel of wheat produces seventy-three #1 pound loaves of bread, and yet a farmer's share of a dollar loaf of bread is less than 4 cents. This farm bill doesn't change that either.

I'm not saying that this on any farm bill can cure all the ills facing our farmers; it cannot. But the least it could do is fully recognize the deep and serious problems on the farm by maintaining and not decreasing farm income. Under this bill, cargo preference subsidies, which cost farmers and taxpayers, increase 50 percent, food stamp costs increase millions of dollars, but farmers are faced with target price reductions of 10 percent over the life of the bill.

The social fabric of rural America is tearing under the strain caused by farm failures, bank closings and the migration of rural families to urban areas. This farm bill doesn't mend that fabric. For these reasons, I will vote against the 1985 farm bill.

FARM BILL STILL TOO COSTLY TOO INEFFECTIVE TO SUPPORT

Mr. PELL. Mr. President, we have labored for many days and have made many improvements in the farm bill but, even after a round of last-minute budget cuts in conference, it remains too expensive and too ineffective for me to support.

This measure, according to the Department of Agriculture, would cost about $52 billion for farm support programs during the first 3 years of this 5-year bill. That is far too much to repeat the mistakes of the past.

During Senate consideration of the farm bill, I opposed efforts to boost Federal payments to corporate agricultural interests. At the same time, I supported efforts to reduce the bloated subsidies that push our farm economy even more off-balance by encouraging our farmers to over-produce.

It is becoming increasingly apparent that our agricultural policy is bankrupt, like many of the farmers who trusted the easy credit made available by the Federal Government and over extended their operations.

We need to aid the farmers and, as some observers have said, we need to set an income floor to assure that farmers are not wiped out by the vagaries of weather and market conditions beyond their control.

I understand and support the need to establish an income floor, but we are not doing that in this bill. We are targeting most of our aid to the wealthiest farmers who need it least and we are encouraging farmers to produce for Government warehouses and not consumers.

The conference report, moreover, does away with some of the progress we made in reducing subsidies, such as those for peanuts and sugar. It also does away with the Senate elimination of the lavish Honey Program. Neither consumers nor taxpayers benefits from these changes.

Clearly we must act to protect the farm economy. This farm bill, however, only repeats the mistakes of the past by continuing enormous farm subsidies that reward the wealthy, at great cost to the taxpayers and consumers, and do little for those who need help the most.

I have worked for measures that would have reduced some of the enormous subsidies and eliminated some of the needless Federal largesse in the farm bill. We did not make enough changes, unfortunately, to cut this expensive bill down to size or to make it an effective vehicle to aid the Nation's farmers.

For that reason, after considerable reflection, I decided I could not support final passage of the farm bill in its current form.

Mr. THURMOND. Mr. President, I rise in support of the conference report on the 1985 farm bill. This comprehensive legislation represents a concerted effort by all individuals involved to improve the marketability of American farm products abroad. The Congress has labored many months to reduce the cost of farm programs to the Federal Government without jeopardizing the economic stability of our farmers.

This bill contains a conservation title that will improve our efforts to preserve our land for future generations. The strong export title, combined with lower loan rates on several commodities, will encourage foreign nations to purchase American goods and stimulate our depressed agricultural economy. Furthermore, the bill provides a mechanism for the Secretary of Agriculture to make additional reductions in price supports in response to competitive changes in the world market.

The dairy provision will allow some farmers to get out of production without suffering a terrible economic loss, thereby reducing our overproduction of dairy products. Although I am disappointed by the assessment leveled on dairy farmers, I am encouraged by the provision to terminate this "milk tax" on October 1, 1987.

The 1985 farm bill is a very large step in the right direction for American agriculture. I urge my colleagues to vote for adoption of this conference report.

Mr. KASTEN. Mr. President, I rise in opposition to H.R. 2100, the 1985 farm bill.

I oppose this legislation with a great deal of reluctance, because I know how much our farmers need a farm bill, and how important it is for them to have some indication about what Government policy toward agriculture is going to be.

But while no piece of legislation this large and complicated can possibly please everyone, this farm bill contains more than its share of flawed and misguided provisions which we will regret having passed.

Mr. President, I was especially disappointed to see the conference committee adopt the very worst feature of the dairy title approved by the House, the legislated increases in class I differentials in most of the Nation's marketing order regions.

Class I differentials, when added to the M-W price for manufacturing-grade milk, determine the guaranteed minimum price for milk sold for fluid use. By arbitrarily raising them in Southern and Southeastern marketing orders, the conference report will stimulate greater milk production in those orders at a time when we are trying to reduce a massive dairy surplus. The increased prices for milk will also depress consumption at a time when we need to encourage it.

Moreover, the higher guaranteed minimum prices for Southern dairy farmers will increase the incentive for those farmers to remain in the industry and refuse to participate in the whole-herd buyout program. This will place an unfair burden for reducing milk production on the traditional heart of the dairy industry, Wisconsin and the upper Midwest. Ironically, it will be the most efficient, lowest cost of production dairying region that will lose the most dairy production under this program.

Of course, things may not work out this way. What may happen is that increased class I prices will deter participation in the whole-herd buyout program in the Southeast, and that producers in the upper Midwest will decide that they have no alternatives to dairying even with the buyout payments. In many parts of Wisconsin, there are no alternatives in agriculture to dairying. So under this scenario, the buyout program will simply not work at all.

Another flaw with this conference report is its partial reliance on support price cuts to bring supply and demand in balance. I believe it is fundamentally unfair to freeze wheat and feed grains for 2 years, and sugar prices indefinitely, while starting to chip away at the dairy support price after only 1 year.

Mr. President, there is a farm income crisis in Wisconsin. I cannot

ignore it, and this Senate should not ignore it either. Wisconsin dairy farmers have already endured three price-support cuts in the last 2 years. The additional price-support cuts required in the conference report will not significantly reduce the surplus—the only thing they will accomplish is to send a few more Wisconsin dairy farmers over the edge.

The objectionable provisions of this bill are not limited to the dairy title. Because of the sugar title of this farm bill, sugar users in Wisconsin will have to pay higher sugar prices, without guaranteeing that sugar producers in the rest of the country will be any better off.

Because of the cargo preference section of this bill, the Great Lakes ports of Milwaukee, Green Bay, and Superior will have to fight just to stay open. By raising the cargo preference requirement on Public Law 480 shipments to 75 percent, the farm bill slashes the amount of cargo that can go out through the lakes. Since there is little U.S.-flag service through the lakes, Wisconsin ports will now have to bid for one-fourth, rather than one-half, of Public Law 480 cargos.

With the Port of Milwaukee dependent on Public Law 480 shipments for over 90 percent of its business, this change in legislation is unacceptable. it is ironic, at a time when farmers are being called on to sacrifice, that the maritime industry on coasts other than the Great Lakes are being given an effective increase in Government subsidies—and one that will be exempt from cuts under Gramm-Rudman.

In sum, Mr. President, Congress has not done a good job in this year's farm bill. It does not do enough for farmers, and it will all have to be redone well before the 1989 expiration date. For that reason, I oppose passage of this bill.

Mrs. HAWKINS. Mr. President, I rise today to support this conference report on the 1985 farm bill. Today marks the beginning of what I hope will be a new era in Federal agricultural policy. This legislation provides, for the first time, a market-oriented approach to supporting American farmers, expanded programs to promote the exports of U.S. commodities, a tough new conservation program intended to protect erodible lands and wetlands, an extension of the Federal Food Stamp Program, and provisions for dealing with the credit problems of many of America's farmers.

It is an understatement to say this is comprehensive legislation. The 1985 farm bill is a massive article intended to promote an abundant supply of food and fiber to U.S. citizens and many of the other people of the world. This bill is also intended to help protect, and eventually improve, the income of many of our hard-pressed farmers. This is, without doubt, an expensive proposition. Estimates of the cost of this legislation range upward of $55 billion over the first 3 years of the bill's life. This bill maintains many of the wrong-headed concepts of past Federal farm policy. Artificial price subsidies are maintained at relatively high levels. The dairy program is designed to pay farmers to go out of business. But on the whole this legislation corrects many more of the bad policies of the 1981 farm bill than it retains.

Commodity loan rates have been tied to moving market averages and the bill includes the use of marketing loans in an attempt to improve American farmers' competitive position in the world market. These are costly provisions. But they are necessary provisions if American farmers are to compete with the subsidized farm exports of many of our trading partners. Most importantly, as policy tools, they demonstrate our Nation's commitment to the fundamental concepts of the free and competitive marketplace. Further, they send a strong message abroad that the United States will not abandon agriculture.

In fact, agriculture is and will continue to be the foundation on which our Nation's wealth and prosperity is based. Our Nation was born as an agrarian society. Agriculture is still vital to our life and livelihood. Today, agricultural exports are vital to the U.S. balance of trade. Without agriculture, our negative trade balance would immeasurably worsen. Agriculture provides approximately one-fifth of U.S. gross national product. This farm bill underlines our commitment to American agriculture.

Mr. President, several weeks ago I voted against the Senate-passed version of the farm bill. I felt at that time that we had created an expensive monster that held out little hope for our Nation's farmers. I hoped the conference committee would improve the bill. I am convinced this is the best that can realistically be achieved. Today I plan to vote for the 1985 farm bill because of the policy changes that it includes. Taken together, flexible loan rates, marketing loan provisions, reductions in the target prices after 1987, tough new conservation provisions to eventually prohibit farmers who place erodible lands and wetlands into cultivation from participating in Federal farm programs, the adoption of a long-term dairy policy that reduces prices to reduce production, and the provision of credit assistance to hard-pressed farm borrowers, make this farm bill a supportable measure. I want to remind Senators that this 1985 farm bill is only one-half of the package we are offering to American farmers.

Yesterday, the Senate passed a tough self-help program for the Farm Credit System. That legislation provides an emergency backup line of credit from the Federal Treasury to assist the borrowers of the Federal Farm Credit System. As chairman of the Subcommittee on Agricultural Credit and Rural Electrification I cosponsored that legislation for a number of reasons.

First, among those was my desire to see affordable interest rates for American farmers. Equally important, is my desire to see the Farm Credit Administration replaced with a new strong "arms length" regulator, improve the operating procedures and reporting practices of Farm Credit System institutions, and provide for adequate examination of Farm Credit System institutions. I would add for the record, as an original cosponsor of S. 1884 and author of an amendment to the House passed text, a statement on the intent of this legislation. This legislation is intended to provide the Farm Credit Administration with the necessary authority to regulate the Farm Credit System Capital Corporation's power to require contributions of capital to the Corporation. This legislation is intended to provide a mechanism for drawing on the existing surplus of the Farm Credit System to address the financial problems of Farm Credit System institutions. Further, the legislation is intended to provide the Farm Credit Administration with the regulatory authority to insure that the surplus is drawn upon to the maximum extent practicable before Federal funds are made available to the Capital Corporation. Specifically, the Senate amendments offered to the House-passed text section 4.28G(a)(15)(B) (i)(II) and (ii)(I) were intended to insure that the Farm Credit Administration will have adequate regulatory authority in this regard. The Farm Credit legislation, S. 1884, as passed by both the House and Senate goes a long way toward meeting the goals I believe the Congress sought to achieve. Without that legislation I believe the New York markets would have abandoned the Farm Credit System with disastrous consequences for American farmers. Because Congress has taken action to address the problems of the Farm Credit System and if we enact this farm bill, I believe we hold out considerable hope for the farmers of this Nation.

To close, Mr. President, I would simply say that the 1985 farm bill marks an end and a beginning. It is the end of long hours of effort by the chairman of the Senate Agriculture Committee and the ranking member of our committee, the Senator from Nebraska, and the majority leader, and many other memers of the committee and the Senate. We would not be here today, however, without the yoeman efforts of the staff of the Senate Agriculture Committee under the direction of George Dunlop. I

thank the Senators for their leadership and the staff for their assistance in crafting this farm bill. I urge my colleagues to support this measure.

Mr. DODD. Mr. President, after careful consideration I have decided to vote against the farm bill once again, although I realize that we have a much improved product in front of us. Obviously, with a bill of this length and enormous complexity no one can possibly like or dislike every provisions. There are several parts of this bill that I can fully support. In my State of Connecticut the dairy provisions are important for many of my constituents. I am satisfied with the dairy part of the bill. It lowers price supports, in itself not a joyous piece of news for dairy farmers, but it does so in a gradual, balanced way by tying price supports to the level of production. This is a sensible solution. The dairy farmers of my State do not seek handouts from a dairy price system but reasonable security and predictability.

The bill, however, is still over budget to a degree that I find unacceptable. At this time when we force every recipient of our Federal expenditures to take painful reductions we cannot create such exceptions to the general rule. Exceptions lead to clamor for other exceptions and we continue to add to the deficit instead of reducing it. It is no secret that among the prime victims of the deficit are the small farmers who are devastated by high interest rates resulting from the deficit. This bill does not do much for the small farmer anyway, its major beneficiaries are the large agribusiness type of operations.

For these reasons, Mr. President, I cannot support this bill even in this improved form.

Mr. GLENN. Mr. President, before the present version of the 1985 farm bill emerged from the conference committee, I was deeply troubled with the course of U.S. agricultural policy. The Senate-passed farm bill did little to boost farm income and thereby relieve the financial distress in agricultural communities. Paradoxically, by continuing costly and inefficient programs, the bill did little to reduce the Federal deficit.

The Senate bill did, nonetheless, contain provisions which I wholeheartedly endorsed, including strong conservation and export enhancement programs. I reluctantly voted for this bill, not only because it contained those programs, but also because a vote for final passage was also a vote to consider the crucial issue of Farm Credit System assistance, and because a farm bill was better than permanent legislation or, worse yet, no legislation at all.

Many of my concerns have been allayed by the conference committee's farm bill. The present version of the farm bill retains many of the programs I have already mentioned I support—conservation and export enhancement programs. Of particular pride to me, it also includes a healthy commitment to new-uses research. Finding new uses for agricultural products will help correct the imbalance between supply and demand for farm products. I, along with my colleague, Senator LUGAR proposed and won inclusion of a new program for nonfood use agricultural research in this country. I will have other proposals along a similar line early in 1986.

More importantly, perhaps, the conference committee legislation is a step in the direction of a more sensible agricultural policy. For example, although I have been a strong supporter of a 4-year freeze in target prices I can accept a 2-year freeze. This means that the incomes of farmers will be stable for at least the next 2 years. The level will be gradually phased down, allowing farmers to comfortably adjust to the agricultural economy.

Mr. President, my vote in favor of the conference committees' farm bill remains, nonetheless, a reluctant one. We have yet to deal resolutely with the crisis in the agricultural community. Small farmers continue to veer toward bankruptcy, suppliers are still shutting their doors, and rural communities in the Midwest are still experiencing an economic depression.

I believe that we need to return prosperity to America's family farmers. I have called for a new partnership between the Federal Government and farmers to ensure that this goal is met. The 1985 farm bill takes some first steps in this direction.

Mr. LEVIN. Mr. President, I intend to vote for the conference report on the farm bill because I am convinced that given the budget constraints, it is the best we can do.

Although I had hoped we could devise innovative approaches to our farm programs, I am also aware that drastic changes may not be appropriate because of the delicate state of the farm economy.

I am heartened that the administration's wishes to cut farmer income and let the alleged free market dictate commodity prices which are already depressed, did not prevail. Although a 2-year freeze in commodity prices is, by no means, relief for our farmers, we have at least not pulled the rug out from under the farmers as some had wished.

This farm bill contains an important provision for the dairy farmers in my State. The fact of the matter remains that we have to reduce the amount of milk-producing cows in this Nation and this provision should be a significant step toward reducing milk production.

I also support keeping the loan rate for sugar at its current level for 5 years which is important to Michigan's sugar beet farmers.

Finally, we have taken strong steps to discourage farming fragile land by establishing the conservation reserve and denying Federal payments to those who plow up erodible land without an approved conservation plan.

It would be easy to point out the many negative aspects of the farm bill and simply vote against it. But I am convinced that an overriding concern in Michigan is that we get a reasonable farm bill. Our farmers need the stability of a 5-year program and they expect us to act now. If I thought delay on the farm bill would result in a significantly better farm bill, I would vote against it. However, I do not believe that is the case and therefore, I will vote for the bill.

Mr. CHAFEE. Mr. President, I must oppose the conference agreement on H.R. 2100, the farm bill. I do so with some regret, for this bill contains several provisions that I would like to see enacted into law—particularly those pertaining to agricultural conservation and the Food Stamp Program.

There is no question that we need a farm bill. Not just any farm bill, however, but one that is fair to taxpayers, consumers, and farmers alike. Many say this is the best that can be achieved. Do we have to go with something so far short of excellence. I don't think so.

I don't believe anyone would dispute that this bill is a woeful failure as far as taxpayers are concerned. In budgetary terms, it misses its target by a long shot. The commodity portion alone is more than $13 billion over the generous limits this Congress set just 4 months ago in the budget resolution.

Now let us consider consumers. Under this bill consumers will continue to pay inflated prices for milk, sugar, peanut butter, and honey. This hits poor families—who spend two and a half times as much of their income on food as do average families—especially hard. It is, in effect, a tax more regressive than any that Congress would ever write.

This is entirely inconsistent with the portion of the bill that increases authorized funding levels for the Food Stamp Program. Once again, we find ourselves in the position of giving with one hand and taking away with the other.

Some of these deficiencies might be pardoned if there was any likelihood that this bill would actually alleviate the stress in the farm sector. Unfortunately that is not the case here: This bill would do little to break the downward spiral of the farm economy. While it does move toward a more market-oriented policy, that transition will be very slow. And it largely fails to address the problem of poorly targeted direct subsidies, thus assuring that the

largest benefits will continue to go to the largest producers.

One portion of the bill, however, that does represent a radical departure from the past is the conservation title. I strongly support these historic provisions. Under this title, highly erodible land would be permanently retired into a 40-million acre conservation reserve. Also, those who farm such land would—for the first time—be ineligible for Federal farm benefits. Thus, it would ensure that our most fragile lands will finally be taken out of production.

At the same time, it would ensure that our best farmland stays in production and protected from development. A provision which I authored, for example, allows FmHA to sell the development rights to farmland, thus ensuring that the land will not be developed. The bill also provides that FmHA will make every effort to keep prime farmland in the hands of family farmers, rather than simply selling it off to the highest bidder.

Despite these excellent provisions, I believe that the bill as a whole falls far short of what these times demand. Rather than confronting tough choices, it simply spends more on the counterproductive policies of the past.

This is fair to neither taxpayers or consumers—nor, ultimately, to farmers themselves. I must, therefore, respectfully oppose the conference report.

ANIMAL WELFARE LEGISLATION

Mr. DOLE. Mr. President, the farm bill contains legislation dealing with the humane treatment of animals. The main thrust of the bill is to minimize pain and distress suffered by animals used for experiments and tests.

In so doing, biomedical research will gain in accuracy and humanity. We owe much to laboratory animals and that debt can best be repaid by good treatment and keeping painful experiments to a minimum.

INFORMATION SERVICE

The bill establishes an information service at the National Agricultural Library to work in cooperation with the National Library of Medicine and it is intended that all investigators be provided ready access to methods of research and testing involving fewer or no animals or reduced pain or distress. Institutions would have access to instructional materials for use in personnel training and it is intended that a data base be maintained to avoid unintended duplication in testing and experimentation. It is hoped that substantial savings in Government expenditures can be made in this way.

TRAINING

Mr. President, the bill calls for training of scientists, technicians, and animal care personnel by research facilities. It is intended that instruction cover the basic needs of each species in the institution and practical ways of fulfilling these needs, handling appropriate to the species, nursing care following operations, or other traumatic interventions and feeding appropriate to the condition of the animal.

Training for scientists should include instruction on anesthesia, analgesia, and tranquilizing drugs appropriate to each species used in experiments that could cause pain, and instruction in the least distressing methods of restraint for each species and in other methods of minimizing pain or distress. It is intended that details be provided on the availability of information from the National Agricultural Library in cooperation with the National Library of Medicine to prevent unintended duplication of experiments and tests and encourage use of state-of-the-art means of reducing pain, and avoiding unnecessary use of animals.

EMPLOYEE EDUCATION

It is intended that all personnel be acquainted with the provisions of this act and instructed to report deficiencies promptly to ensure that the institution is in compliance at all times. No one should be discriminated against for reporting violations of the act. Veterinary inspectors from the U.S. Department of Agriculture cannot be present on a daily basis. However, their enforcement capability can and should be enhanced by the Institutional Animal Committee and personnel in laboratories must be protected against any reprisal for reporting mistreatment of animals.

PERFORMANCE

With regard to experimental procedures, it is intended that the Secretary promulgate standards relating to the performance of experiments and tests only with respect to the act's provisions as specified for the purpose of minimizing pain and distress, including anesthesia, analgesia, tranquilizing drugs, restraint and handling methods, nursing care, and euthanasia.

EXERCISE

The new provision calling for exercise of dogs is intended to prevent permanent caging without daily release from a cage. It is intended to include a variety of practical means to allow dogs movement. This could include housing in pens or kennel-runways or, where dogs are housed in cages, removal from the cage during cleaning. The attending veterinarian should work within the basic standards set by the Secretary providing special attention to the needs of individual dogs.

CONCLUSION

Mr. President, it is my desire that these points reflected in the legislative history of this bill will clarify the intent of some of the bill's provisions. Finally, I would note that this bill is the result of efforts made by members of both the research and animal welfare communities and reflects a balanced approach to this important issue.

Mr. LAUTENBERG. Mr. President, I have some very strong objections to the conference report on the farm bill.

One of the principal reasons I will vote against this conference report is that it exceeds the budget resolution and will result in all other Federal programs paying for that excess. I have spoken to that point separately.

I also oppose this bill because it fails to make essential reforms in the sugar, peanut, and dairy programs important to consumers, and to food processing manufacturers and workers trying to compete in an increasingly competitive world economy with their hands tied behind their backs.

This conference report permits the current sugar price support level to continue unchanged instead of gradually reducing the support price, the approach I supported during Senate consideration of the farm bill.

Under the current sugar program, raw sugar sells for about 21 cents per pound in the United States, although it costs only 4 to 5 cents in the world market. It is kept at this artificially high price through an 18-cents loan rate, the price the Government will pay for sugar as a buyer of last resort, and through quotas on how much sugar can enter the United States. The difference between what American consumers pay for sugar and sugar-containing products and what these items cost on the open market is estimated to add about $3 billion a year to the bill Americans pay for sweeteners. The artificially high price of sugar also hurts those involved in the processing of products containing sugar by impairing their ability to compete with foreign businesses who can buy cheaper sugar. Chocolate, candy, cookie, and ice-cream manufacturers all suffer a competitive disadvantage from the sugar program.

This conference report perpetuates a bad program by failing to make even modest reforms in the sugar program. And by adding a "no net cost" provision to the law, it makes a bad program worse. "No net cost" means that the Government must assure that the price of sugar is high enough that it is more profitable for sugar farmers to sell their sugar on the market rather than selling it to the Government for the support price. To do this, the Government must decrease the amount of sugar entering the country under quota, lessening the sugar supply and raising the price of domestic sugar.

The conference report also fails to make reforms in the peanuts program. The price of peanuts is supported by limiting those who can produce peanuts for domestic consumption, and supporting those peanuts at a price four times that of world prices. Lower-priced peanuts are kept out of the U.S.

market through import quotas. Although anyone can produce peanuts for the overseas market, those peanuts are supported at a much lower price. Because domestic peanut production is artificially limited, and low-priced peanuts are kept out of the United States, consumers pay about 13 percent more per jar for peanut butter. And it also costs candy, cookie, and bakery businesses more to buy peanuts for their products.

Not only does the conference report fail to make significant reforms in this program, it actually provides that the support price for domestic peanuts could be increased in 1986 by an amount equal to any increase in the cost of production. The conference report permits further increases in the support levels for 1987 and for the life of the bill up to 6 percent annually to reflect increases in the cost of production.

Finally, this conference report takes a step toward reform of our dairy support program, but takes that step 1 year too late. Our Government supports the price of milk by agreeing to buy all farmers' surplus milk in the form of butter, dry milk, and cheese at an agreed price, and by dictating the price at which most fluid milk must be sold. By keeping the price of milk high, and by guaranteeing dairy farmers a Government market for their milk, this program has encouraged excess production. The result is large surpluses of dairy products sitting in Government warehouses, and a projected Government price tag to $2 billion in 1985. The only way to decrease production is by lowering the price support—which the bill does in 1987, not this year, which would be the better choice by far. The conference report also pays dairy farmers who agree to slaughter their herds instead of using them to produce milk. But the money for these payments would be raised by imposing a milk tax or roughly 3 cents a gallon on each and every milk producer in the country in 1986. While we must reduce the milk supply, I do not believe that taxing each dairy producer in the country is the way to do it.

For all these reasons, Mr. President, I cannot support this bill. While it takes some steps to reform our farm policy, it simply does not go far enough and it would impose penalties on our consumers, workers, and domestic food processors.

OPPOSITION TO THE FARM BILL

Mr. HART. Mr. President, it was with some reluctance that I voted for the farm bill when it passed the Senate a few weeks ago. It will be with some reluctance today that I will vote against the conference report on this legislation.

When the Senate began consideration of legislation to write a new 4-year program for rural America, I established a set of principles against which I would judge the bill. It was my belief that we must do no less than maintain farm income at current levels, even though that income is deeply depressed; even though many farmers are being forced from their land.

It was my belief that the commodity supports should be targeted or tiered, so that small- and medium-sized operations would enjoy the lion's share of the benefits provided by the programs.

Since the farm credit situation is inextricably linked to the status of farm families, I wanted a farm credit bill which provided direct assistance to farmers—to keep them on the land. The best backup for our farm banks is a farmer on his land paying his mortgage.

I voted to send the bill to conference because I hoped there was some prospect of achieving those objectives. The Senate bill did not apply targeting across the board to all commodity programs—as I believe they should—but it did apply targeting to the wheat program. And that's a good start. Farm income, due to the efforts of Senators HARKIN, MELCHER, and EXON, was helped in the Senate bill when they pressed for and won a real, 2-year freeze approach. Rather than prolonging the process further, I voted in favor of the Senate bill to see what the conference might accomplish.

Now that the conference report has come back to the Senate, much has changed, but not for the better. Targeting is gone; there is no 2-year freeze to protect farm income, even minimally, and no diversion payments are required after 1986 for those who agree to cut back production. The Congress has since voted for farm credit legislation which will not materially contribute to the elimination of farm debt, or the solvency of farmers and small businesses.

If that were not enough, the Congress has passed, and the President has signed, the Gramm-Rudman bill. As sure as the Sun rises in the East, this farm bill will be cut back radically, when the computerized spending reductions mandated by Gramm-Rudman are issued by the President. This will make a bad situation all the worse.

Rather than allow effective supply management programs, rather than effectively negotiate fair market shares for U.S farm goods in international trade forums, the Senate is voting to abandon family farmers. We are not talking about a few farm families. We are talking about cutting thousands of farmers adrift in a flood of excess commodities, buffeted by the winds of a hostile farm policy.

We should, instead, be swimming in new waters.

This bill will become law. It does offer something to some farmers in distress in Colorado and in other sugar producing regions of the country. For that, I am grateful. The majority leader joined me in offering legislation dealing with the problem of lost CCC payments. Payments lost to honest farmers when processors entered bankruptcy before payments had been conveyed. The conference approved this provision and I offer my thanks.

It has become axiomatic that voting here inevitably involves making tough choices. There have been times I have voted for legislation which should have been better, but there weren't adequate alternatives.

In this instance, and in good conscience, I cannot sentence the families and small businesses affected by this bill to 5 years of existence under its provisions. The farm legislation is not an answer to their problems but a repudiation of their concerns. I intend to vote against it.

Mr. BURDICK. Mr. President, I supported the farm bill that was passed by both the House and the Senate, because it was the best we could do under the threat of the Presidential veto. However, I have serious reservations that it will not be enough to provide for our farmers not only over the life of the bill, but even in 1986.

There is no question that this bill is better than what the Senate originally passed. The system of target prices and deficiency payments is the most important facet of the farm bill that serves to bolster our farmers' incomes. Because this bill contains essentially a 3-year freeze, it is better than the 2-year freeze passed by the Senate. However, it is not nearly as helpful as the 4-year freeze which was adopted by the Senate Agriculture Committee.

This administration, Mr. President, has little compassion for the family farmer. We witnessed this lack of compassion on both the farm bill and the farm credit bill. Neither piece of legislation is enough for our farmers, who are the most deserving of anyone in our society of Federal assistance.

Let me tell you this, Mr. President. Without our farmers, this country would not run. We would not need the massive defense budget because we would have little to protect. I want this administration to know that just because we have passed a farm bill and a farm credit bill, this is not the end of it. We need to do more and we must do more. Those of us who care about farmers and farming will be back next year to push for what is right and just for our farmers.

Mr. HELMS. Mr. President, I ask for the yeas and nays on the conference report.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. I yield to my friend from Oregon.

Mr. PACKWOOD. Mr. President, on the reconciliation conference, I want to say that Medicaid is finished, trade is finished, Social Security Trust Fund, pension, the pension benefit guarantee board, finished, extension of aid to widows, CHAMPUS finished, and so forth. The only issue holding us up is revenues. The Senate made an offer to the House yesterday afternoon about 2 or 3 o'clock in the afternoon. Since that time we have had no response from the House. The chairman of the House conferees refuses to meet. So we have had neither a counteroffer nor a meeting. At the moment, I am stuck because there is no place else to go. The two issues holding us up are Superfund and Medicare coverage for State and local employees. When we get a counteroffer, we may make progress. We have none at the moment.

Mr. DOLE. Mr. President, I take this time because earlier the distinguished Senator from North Dakota——

Mr. STENNIS. May we have order, Mr. President?

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOLE. Mr. President, earlier the distinguished Senator from North Dakota, Senator ANDREWS, and I hoped to have an exchange on another matter, wheat deficiency payments. I did not want to keep the floor at that time because other Members had not had the opportunity to speak. I now yield for a question.

Mr. ANDREWS. Mr. President, I appreciate the majority leader yielding. I was interested in listening to the comments of the Senator from New Jersey followed by the comments of the Senator from Iowa. The Senator from New Jersey said the spending is too high and, therefore, we ought to oppose this farm bill because it is taking too much from the budget.

The Senator from Iowa said that the spending is too low and, therefore, we ought to oppose this farm bill.

But, Mr. President, when we continue talking about this, the problem that we have in the farm sector is that we are operating under a program right now that pays deficiency payments to the wheat producers. As we speak, the wheat producers in my State, the majority leader's State, and other States are not getting those deficiency payments. Those checks are being held up in the local ASC office, checks that are desperately needed by those farm families, checks that amount to in excess of $3 billion, held up because we cannot get a continuing resolution through.

Mr. President, I would like to ask my colleague, the majority leader of the Senate, what his observations are on how fast the Department of Agriculture will be able to disburse these checks if and when we can resolve this continuing resolution.

Mr. DOLE. Well, first, as the Senator pointed out, the USDA ASC offices are withholding sending out deficiency payments on the 1985 wheat crop because they are nearing the end of their CCC spending authority and are continuing to make commodity loans and payrolls. They had $4 billion, as the Senator knows, in the continuing resolution for additional CCC spending authority.

Had the House passed the continuing resolution a couple of nights ago we probably would have been out of here by now, plus the farmers in my State and the Senator's State and other States, in the Dakotas and other States, would have been getting their deficiency payments on time. I regret that the continuing resolution did not pass the House the other evening. I regret that some Members of Congress from farm States voted against the continuing resolution.

Mr. ANDREWS. That is precisely the problem.

Mr. President, let me point out to the majority leader that I have never yet voted for a farm bill that was good enough, in my estimation. Yet I have voted for every farm bill that has come along because it represents the very best product that we could put together.

This, again, Mr. President, is the best product that we could put together. Our farm families need not just these checks for deficiency payments for this past crop year, but they need to be able, as they go into their banker, their local PCA or Farmers Home office, right after the first of the year, to sit down with that lender and know what is happening in those outyears.

Under this bill, they have a freeze on target prices for 2 years, a 2-percent cut the next year, a 3-percent cut in the next. That gives a fairly level playing field and to the best of my knowledge in talking with the conferees and in talking with my colleagues it is the best we could get through.

I applaud the individuals who worked so long and hard. They did a good job. I only wish we could have done better. The satisfaction I have is that they share my feelings that we always could have done better. But this is what we have now and that is why we have to support it now, because those farm families cannot wait around to find out what is going to happen any more than they can wait around many more weeks for their deficiency payments.

Mr. HARKIN. Will my colleague yield?

Mr. ANDREWS. First, let me say that my friend from Iowa has a special program for agriculture that would result in less spending. I should not have referred to him in the way that he wanted to spend more. Other colleagues on his side of the aisle say we are spending too much. Other colleagues have said we are not spending enough. But the Senator from Iowa has a very unique program that cuts back much more acreage and, therefore, runs the price up on less production. It would have less budget impact.

Yes, I yield.

Mr. HARKIN. I did want to point out that at no point in my remarks did I indicate that we were not spending enough. I think we are chasing bad money after good.

Mr. ANDREWS. But my colleague will agree that the time has come to act. We cannot continue to postpone for those farm families which are suffering.

Mr. DOLE. Mr. President, I would ask unanimous consent that we might include in the RECORD at this point the recorded vote by Members in the House who voted against the continuing resolution.

Mr. ANDREWS. Maybe some of their wheat farmers will be glad to send them a special Christmas card saying, "Thanks for holding up my payment for another 2 weeks."

There being no objection, the vote was ordered to be printed in the RECORD, as follows:

The vote was taken by electronic device, and there were—yeas 170, nays 239, not voting 25, as follows:

[Roll No. 461]

YEAS—170

Ackerman, Akaka, Alexander, Anderson, Andrews, Annunzio, Atkins, AuCoin, Badham, Barnes, Bateman, Beilenson, Bennett, Berman, Bevill, Biaggi, Boehlert.

Boggs, Boland, Bonior (MI), Bonker, Borski, Bosco, Boucher, Brown (CA), Burton (CA), Burton (IN), Bustamante, Byron, Carney, Carr, Chandler, Chappell, Cheney.

Stokes, Studds, Stump, Sweeney, Swift, Swindall, Synar, Tallon, Tauke, Tauzin, Taylor, Thomas (CA), Torres, Towns, Traficant, Traxler.

Vento, Visclosky, Volkmer, Vucanovich, Walgren, Walker, Weber, Wheat, Whittaker, Williams, Wirth, Wise, Wortley, Yatron, Zschau.

NOT VOTING—25

Addabbo, Aspin, Brooks, Crockett, Davis, Dymally, Fuqua, Garcia, Gray (IL), Hefner, Hillis, Kindness.

Lent, Lott, Markey, McKinney, Moakley, Nelson, Price, Rangel, Roth, Valentine, Vander Jagt, Weaver, Young (MO).

The Clerk announced the following pairs:

On this vote:

Mr. Nelson of Florida, for, with Mr. Crockett against.

Messrs. WEBER, DORNAN of California, STOKES, GLICKMAN, ERDREICH, SCHAEFER, ZSCHAU, BEDELL, VOLKMER and CAMPBELL changed their votes from "yea" to "nay."

Messrs. MORRISON of Washington, CHANDLER, BURTON of Indiana, and STANGELAND changed their votes from "nay" to "yea."

So the conference report was rejected.

Mr. DOLE. Mr. President, I would like to renew my request that the Senator from Arkansas be permitted to speak for 10 minutes—there may be others who request time—and that we may have a vote on passage on the conference report at 6:30 p.m.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object. Does the Senator from Iowa wish to speak further? I had understood that he did.

Mr. President, I have no objection.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. GORTON. Mr. President, at long last the time has come for the Senate to take its final look at the 1985 farm bill. The bill that comes to the Senate out of the conference committee is an improvement on the two bills that went in to the conference. That in itself is an accomplishment that should not be ignored and I applaud the efforts of the conferees on both sides of the aisle and from both Houses of Congress for their diligent work on this bill.

For all the improvements that have been made in the bill, I do not think there is a Member in this body who does not disagree with some of its provisions. I am one of that number. I would have done many things differently. However, the opportunity for changing the legislation, at least for this session of Congress, is past. Now is the time to decide if we will pass a 5-year farm bill that will begin to help correct some of the failed policies of the past or if we will fail to do so. I believe that we should pass this farm bill and I urge my colleagues to join me in this effort.

For the farmers in Washington State, the wheat and dairy programs are of particular importance. A number of improvements have been made in both programs—some of which are revolutionary. The loan rates for wheat will start at $3 per bushel for 1986. However, from 1987 on, loans for wheat will be set to the marketplace rather than to a governmentally determined rate. In the second through fifth years of the bill the loan rates for wheat will be set between 75 and 85 percent of the average price received by producers during the immediate preceding 5 marketing years, excluding the high and low years. The Secretary will also have the authority to further lower the loan rate if the market price continues to fall. Ultimately this will lead to decisions on the farm to plant for the market rather than for the program.

The target prices under the Wheat Program will be frozen at current levels through 1987. Beginning in 1988, the Secretary will have the authority to set the target price at slightly lower levels. This provision is also a movement in the correct direction.

The Dairy Program has also been improved in this bill. The 1 year freeze in support prices followed by two reductions in the next year will begin the process of reducing the tremendous surplus that the Federal Government piles up every year. I am also pleased that the whole herd buy-out plan—truly a revolutionary idea—was included in the conference report. Although this provision was never debated on the floor of the Senate, it has often been the center of informal discussion among Senators. It is an untested program, but I am convinced it is a necessary one. The whole herd buy-out program will get thousands of dairy cows out of production and keep them out. With protections in place for our cattlemen and beef producers, this idea needs to be tried and I am pleased that it is part the bill.

The commodity provisions of the bill are complimented by a strengthened export title and a very good conservation program. The export provisions of the bill are imaginative and innovative in many respects. These provisions require the Secretary of Agriculture to offer federally owned surplus commodities to exporters, processors, or foreign buyers to encourage the development and expansion of overseas markets for U.S. commodities. This will help the administration in its efforts to combat unfair foreign trade practices. In addition, the Cargo Preference Program has been revised to free the Blended Credit Program which has been suspended for more than 9 months. The conference report offers a workable compromise on this program—the Food for Peace Program will be subject to cargo preference percentages of 60 percent in 1986, rising to 75 percent in 1988 and thereafter.

Moreover, the Food for Peace Program, America's great charitable food donation program, will be accomplished by the establishment of a companion Food and Progress Program. The new program will promote free enterprise policy and development through the donation of surplus Federal commodities.

The conservation section offers a necessarily tough sodbuster provision which will ensure that highly erodible land will not be put into production. the penalties that producers will suffer for violating this provision are stiff. The conservation title is also noteworthy for the inclusion of a long-term conservation reserve which will return crop land to less productive uses. This will take 40 million acres of land that is now producing surplus commodities out of production. with-

out causing undue suffering for the farmer who owns the land.

There are a number of other provisions in the conference report which are noteworthy. Some are important steps toward returning agriculture to a freer market, others are downright onerous. Most importantly, however, this bill is a beginning. A beginning toward a market oriented farm policy and a beginning toward the day when the American farmer will again be able to produce for the world.

Finally, we should make no mistake in assuming that the ills of American agriculture will be solved by this bill or any other Federal agricultural policy. The big problems facing agriculture are interest rates, the strong dollar and a shrinking world market. The solutions to these larger problems lie beyond the farm bill. I urge my colleagues to consider this as well as we move toward the final vote on this bill.

Mr. President, no consideration of the farm bill is complete without an accounting of the food assistance titles. I would like to take a moment to comment on the Food Stamp Program and other programs that have emerged from the conference committee.

Feeding the hungry is one of the hallmarks of a civilized society. It is through programs such as the Food Stamp Program that we are able to provide assistance to those who are hungry.

Before the bill went to conference, the House and the Senate versions were significantly different in their treatment of food stamps. The House version provided for $1.4 billion in excess of current service levels, while the Senate bill was $600 million under current service levels. The result of the conference is a bill providing for $305 million over current services. This is certainly a fair compromise.

I would like to touch on several of the major reforms made in the Food Stamp Program by the conference committee. First, several benefit areas impacting the working poor were increased. Among the changes are: increasing the shelter deduction to $147; making the dependent care deduction a separate deduction, with a limit of $160 per month; and increasing the earned income deduction to 20 percent. In addition, the asset limit was increased from $1,500 to $2,000. Undoubtedly, these reforms will provide additional benefits to those who are among the working poor.

A second provision that the conference committee dealt with was the Employment and Training Program. Under the conference report, States will not be provided with a miniblock grant, enabling them to establish their own employment and training program.

Third, the conference committee revised the Job Training Partnership Act income provision to count earnings in the equation for determining food stamp benefit levels. They did, however, exclude stipends, training costs, uniforms, and other nonearnings moneys from the equation. This change is worthy of support—income should be counted in the equation; however, there is significant debate as to whether items such as training costs and uniform costs should be included.

Mr. President, I believe the reforms I have mentioned, in addition to enhanced computerization and provisions to eliminate fraud, represent a fair compromise, while ensuring that those who are most in need will have their benefits protected.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, I have not had an opportunity to go through all of this bill, and I do not believe that there is a single Senator here who has. I have asked my staff to give me a detailed summary of the bill, and they have done so.

I find the bill marginal, but I intend to vote for it because it is marginally better than no bill. This is what we must do: If we do not vote for it, we have no agriculture bill and we leave desperate farmers in limbo about their future. My guess is that farmers would rather take a little less than they would like to have, than to have the kind of chaos and confusion that would result from not passing this bill.

Compared to the bill that the President submitted to this body, it is one of the finest bills ever presented here. That bill had disaster written all over it. To suggest that the farmers were prepared to go to a free market and compete in the world against countries who subsidize their farmers and their commodities on a much higher percentage basis than we do would have been unthinkable.

Agriculture in this country, in my opinion, has the potential for being the catalyst that could take this country's economy down in the next 24 months. A lot of people have talked about the fact that agribusinesses are affected and that banks are affected. You can bet your bottom dollar that, when the farmers of this country owe $212 to $220 billion and that a big part of it is delinquent and more of it about to become delinquent, there is a significant possibility that it could be the very catalyst that triggers the closing of hundreds of banks, which would have the undesired ripple effect of closing more and more nonagricultural banks.

The farmers have to pay a price in this bill to keep the support and target prices at the level we want, and one of the prices they have to pay is the possibility of the Secretary setting aside huge percentages of their base. In the case of rice—and we in Arkansas grow about 35 to 40 percent of all the rice in this country—rice farmers could be required to set aside as much as 35 percent of their land—a very unhappy thought. We used to require set-asides in this country, Mr. President, in an effort to raise prices, and we have found in the last few years that the more we set aside, the more Argentina, Brazil, Canada, and Australia grow. And it has virtually no effect on raising prices, particularly of our exported commodities.

What set-asides do and what they are designed to do in this bill is to limit the cost of this bill to the Federal Government.

There is one other thing about rice in this bill. There is a marketing loan provision which we hope will help us wipe out our big surpluses of rice over the next 2 years. It has that very salutary effect. Certainly, the rice provision of this bill will be hailed by all the farmers in this country. However, I have serious reservations about its soybean provisions.

I said earlier, and I repeat, this bill is marginal. I promise you that somewhere between 10 and 20 percent of all the farmers in this country who are now farming will not be farming in 2 years because they cannot finance the staggering debt they are under.

Much has been said here about Gramm-Rudman, and much should be said about Gramm-Rudman. Nobody has raised a point of order on this bill, which, in my opinion, would be technically well taken under the Gramm-Rudman amendment. I am pleased that no point of order has been made, but it points up the trauma that this body and the House both are going to be faced with in 1986 and as early as February 1986.

I voted for Gramm-Rudman in the hope that this body would do its duty and that we would not abdicate our responsibilities to a computer printout. If we cannot in this body decide, for example, where we are going to cut and how much, and whether or not we need a tax increase—if we cannot decide, for example, that school lunches are more important to our vision of the future, our commitment to excellence, our national character—if we cannot conclude in this body that school lunches are more important than Amtrak, we ought to fold it up and go home.

If we in the U.S. Congress cannot decide, for example, that childhood immunizations and WIC and maternity and child health care are more important than Urban Development Action Grants, we ought to fold up our tents and silently steal away.

So, Mr. President, I voted for Gramm-Rudman on the assumption that the Congress, and especially the U.S. Senate, could make those distinctions and that there was still enough

sensitivity is this body to understand what is really important and what is political.

If we come up on the deadline and say we just cannot work it out, fire up the computer and bring us the printout, Gramm-Rudman will be the most dismal disaster that ever passed this body.

Finally, Mr. President, I know that there are people in this body, in the House, and all across the country who are really tired of hearing some of us talking about the plight of the farmer. I get tired of talking about it. But I can tell you there are people in this country who do not get tired of hearing about it. They are the people who are losing their farms and their homes and who have lost everything they fought and scratched for all their lives.

I do not care whether you are an urban Senator or a farm State Senator or somewhere in between. We do not have the discretion or the right to turn our back on any segment of our economy, no matter how large or small. This bill is much better than nothing and I urge my colleagues to support it. It is not a panacea, but it is certainly better than nothing.

Mr. President, I yield the floor.

Mr. HELMS. Mr. President, we have unanimous consent to vote at 6:30; is that correct?

The PRESIDING OFFICER (Mr. CHAFEE). The Senator is correct.

Mr. HELMS. It is not no later than 6:30; it is at 6:30?

The PRESIDING OFFICER. The Senator is correct.

Mr. HELMS. I thank the Chair.

Mr. President, I had better defend my baby a little bit from the criticism it has received. It is true enough that it would have been necessary to waive section 311(a) of the Budget Act in order for this farm bill to qualify for further consideration by the Senate, but let me make the point it is because we are the last car in the train. We are the caboose. If this farm bill, this very farm bill conference report had appeared in July or September, or even October, there would be no question about it.

Now, let me say for the RECORD, Mr. President, that I happen to be the only chairman of the Agriculture Committee in the history of the Senate to vote against reporting a farm bill and to vote against the farm bill itself on the floor, and I did so because in my judgment it was too expensive. In conference we reduced the Senate bill's cost by about $5 billion, and that put it in the ballpark.

Furthermore, this farm bill saves $11 billion over current law, so if we continued current law as many Senators were urging us to do early this year, it would cost $11 billion more than this conference bill. So as I said at the outset this afternoon when the conference report was made the pending business, it is not perfect. It is not what I would have written if I were a dictator and I could have sat down and prescribed and proscribed as I pleased. But it is a pretty good farm bill considering the situation that exists out there across America, and I hope Senators will support it.

Furthermore, this bill comes very close to the $50 billion mark set by the President himself. So I reiterate a point of order under the Budget Act can be raised only because of the quirk that this farm bill is the caboose of the train in the legislative process. I reiterate that I spent 40 hours by actual count waiting for a quorum to appear during the markup of this bill. I sat there often by myself, frequently with the distinguished Senator from Iowa. I pay him the compliment of saying that he was there. Senator ZORINSKY was also there, but we have difficulty, as the Senator from Iowa himself pointed out, getting a quorum day after day. In addition, often we were not allowed to meet in the afternoons or beyond 2 hours after the Senate had convened in the morning. But that is history. We have that behind us, and we have worked together in a remarkable fashion to produce a farm bill that I believe is worthy of the Senate's approval and I hope it will be overwhelmingly approved.

Mr. President, while I have the floor I want to thank so many people who have contributed to the production of this bill. I have said over and over again what a joy it is to work with the distinguished Senator from Nebraska [Mr. ZORINSKY] and the majority and minority leaders. All members of the committee have cooperated constantly, but most particularly the young, dedicated staff of the Senate Agriculture Committee, both minority staff members, and majority staff members. We worked together as a team. Some day I hope to just lay out for the record the sacrifices of their time that were made throughout this year, on occasion after occasion. Since Saturday night, they went round the clock, day after day, to produce that 13-pound document that is now pending before the Senate.

So, with that, Mr. President, I yield the floor.

I would say to Senators, if I may regain the floor, we cannot vote until 6:30 because of the unanimous-consent agreement. So I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WILSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WILSON. Mr. President, I rise to express serious reservations about the 1985 farm bill and to convey my heartfelt concerns about the future, competitive vitality of the American farmer.

I do not mean to suggest that the conference report before us is devoid of positive developments in agricultural policy. Indeed, the distinguished conference chairman, Senator HELMS, and his fellow conferees should be commended for far more than their tireless efforts and remarkable endurance. Yet, for many of the provisions, which I would characterize as pluses, there are unfortunately offsetting minuses of significant dimensions and serious consequences.

For example, the bill makes a major—and a positive—structural change in Federal policy by allowing commodity loan levels to reflect marketplace prices, instead of codified estimates. This means that our grain and cotton loan rates will come down over the length of the bill; but only gradually—not more than 5 percent in most years. Another favorable provision is the use of a "marketing loan" which will allow growers to redeem their crops from the Commodity Credit Corporation at world price levels, instead of higher CCC loan levels; thereby enabling American farm products to be sold to foreign buyers; not forfeited to the Federal Government.

Unfortunately, the downward trend of loan levels, which may be the single-most important change in the bill, is offset by freezing target prices at their presently high levels. Technically, this is a 2-year freeze, but a token 2-percent reduction in 1988 and a 3-percent reduction in 1989 do little to thaw the freeze.

While I understand the rationale behind the target price freeze and sympathize with the desire of my colleagues to maintain farm income—especially during these difficult economic times—the combination of high target prices and lower loan rates will translate into larger Federal deficiency payments to farmers. Moreover, I strongly suspect that the attractive combination of higher direct payments and marketing loan flexibility will prompt more farmers to participate in these programs.

Consequently, we are about to adopt a farm bill which will not only increase the size of each individual deficiency payment, but will also increase the number of farmers to whom these Government payments will be made. For example, in recent years, only about 20 percent of eligible farmers participated in these Federal support programs; however, as Government subsidy levels increased and commodity prices fell, program participation has skyrocketed. This trend will surely

continue under the 1985 farm bill, prompting speculation that next year as many as 90 percent of eligible wheat growers and feed grains farmers will seek shelter in USDA's programs.

Long-term changes in the dairy program represent steps in the right direction; however, dairymen will crawl through an 18-month Federal tax on their production before they will reach a support program responsive to the realities of supply and demand. Despite the fact that USDA will purchase more than 16 billion pounds of surplus dairy products in 1985, the bill retains throughout all of the next year the existing support level of $11.60 per hundredweight.

During that period of time—and until October of 1987—the Secretary of Agriculture will administer a "whole herd buy-out" program pursuant to which dairymen who wish to remain in business will be assessed a tax on every 100 pounds of their production, in order for the Government to "buy-out" any one of their competitors interested in leaving the dairy business.

I do not doubt that this is a well-intentioned attempt to "fine tune" a farm program whose primary problem is unrealistically high support levels. Unfortunately, by addressing fundamental problems with slick-packaged gimmicks instead of straight-forward changes, we in Congress are indirectly penalizing segments of American agriculture—specifically, producers of cattle and growers of fruits, nuts, and vegetables—who do not receive Government subsidies and have not requested them.

For example, proponents of the dairy provisions accurately recognized that returns to cattlemen, who do not receive farm subsidies, will be adversely affected by the increased amount of red meat which will come on the market in the wake of a whole-herd buy out. Unfortunately, their solution—to require the Secretary of Agriculture to buy 400 million dollar's worth of red meat—does not recognize that this money depletes a discretionary fund which the Secretary has historically used to purchase surplus fruit, nut and vegetable crops—none of which receive Federal subsidies—for distribution in Federal food programs.

On other matters, this final farm bill version properly eliminates the short-lived and ill-advised subsidy payments for soybeans and sunflowers, which had been added on the floor of the Senate. Unfortunately, the conference revived the honey program, which the Senate had voted overwhelmingly to phase out, and restored unlimited "incentive" payments—worth hundreds of thousands of dollars annually—to a select number of wool and mohair producers.

It is proper that the bill does contain a strong, commendable conservation title which will return nearly 45 million acres of highly erodible land to less-intensive uses and will discourage farmers from converting fragile soil or wetlands into planted acreage; however, in addition to a conservation reserve, the bill's commodity titles will still continue to require farmers to idle significant amounts of fertile, potentially productive lands through acreage reduction programs. Compliance with these so-called ARP's, which will range from a low of 20 percent of our Nation's corn acreage to a high of 35 percent of rice acres, are a regrettable outgrowth of the high costs of the type of support programs which this legislation reauthorizes.

Unfortunately, not only do these ARP's increase the per unit cost of American farm products and reduce our economies of scale, but they serve as an incentive for farmers abroad to increase their own plantings and provide additional competition for U.S. agricultural exports. The displacement effect of this approach is evidenced by the plight of our farm exports under policies in the last 4 year farm bill. These exports have plummetted from a high of $44 billion in 1981 to barely $30 billion in the current year.

Fortunately, the 1985 farm bill will provide a variety of tools to enable the Secretary of Agriculture to reverse this downward export trend and to respond to a variety of unfair trade practices. Yet, I am concerned that the benefits of a strong trade title will be, at least, partially diluted, if not fully negated, by some of the other provisions, which I have already discussed.

I recite this list of the pluses and minuses contained in the 1985 farm bill in order to demonstrate the inconsistent policies and incongruous provisions which we are about to enact—or should I say reenact—into law. These same inexplicable contradictions are contained in current farm policies, which have so miserably and tragically failed the American farmer.

And the failure of our Federal farm policies is not limited to those growers who participate in these support programs, many of whom are confronting severe financial problems—despite $50,000 a year deficiency payments. These Federal farm subsidies take a toll on agricultural operations, which for a variety of reasons, such as their size, diversity, or free-market ideology, do not qualify for participation in USDA's commodity programs.

An agricultural constituent of mine provides a timely and troubling example. The J.G. Boswell Co., one of the world's largest cotton-growing concerns, announced last month that it needs to reduce its work force by 600 employees, from a work force of 1,300 to 700. In a letter from the chairman of this family-run operation to his employees announcing these severe cutbacks, Mr. J.G. Boswell cited the inability of this Congress to reduce farm subsidies as major factor behind the need to restructure his operation.

Mr. President, this year the American taxpayer will have distributed approximately $20 billion to farmers who produce basic commodities and are eligible for program participation. Their dire economic plight convincingly demonstrates to me that this year's Federal largess was inadequate to restore prosperity to the farm belt. At the same time that these agricultural subsidies have failed to revitalize farmers who participate in the program, they have, also, penalized those agricultural enterprises beyond the scope of Federal assistance.

In my mind, this is a lose-lose scenario—harming the most efficient of American agriculture while failing to revive the financially troubled growers—which will be played-out for 5 more years under the policies contained in the 1985 farm bill. For this reason, Mr. President, I am regrettably compelled to vote against the conference report.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the vote on this measure has been set for 6:30 p.m.

The question is on agreeing to the conference report. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON, I announce that the Senator from New Mexico, [Mr. DOMENICI], Senator from Alaska [Mr. MURKOWSKI], the Senator from Virginia [Mr. TRIBLE], the Senator from Connecticut [Mr. WEICKER], are necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS], is absent on official business.

Mr. CRANSTON. I announce that the Senator from Massachusetts [Mr. KENNEDY], is necessarily absent.

I also announce that the Senator from Florida [Mr. CHILES], is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 55, nays 38, as follows:

[Rollcall Vote No. 378 Leg.]

YEAS—55

NOT VOTING—7

Chiles	Mathias	Weicker
Domenici	Murkowski	
Kennedy	Trible	

So the conference report was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

(Earlier the following occurred:)

Mr. PRYOR. Mr. President, in order that our colleagues who were not on the Agriculture Committee may have the benefit of an excellent summary that was issued by the committee on the conference agreement on the new farm bill as proposed, I ask at this time unanimous consent that it be printed in the RECORD immediately following the disposition of the conference report, providing that it passes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Major provisions of the bill include:

WHEAT AND FEED GRAINS

Basic initial loan rates for grains would start at $3.00 a bushel for 1986 wheat and $2.40 for 1986 corn. From 1987 on, loans for grains would be set each year at between 75 and 85 percent of the average price received by producers during the immediate preceding 5 marketing years, excluding the high and low years, with annual reductions limited to 5 percent.

After calculating the basic initial rates, the Secretary could then further reduce the rate for any year by up to 20 percent if (1) market prices in the previous season failed to top 110 percent of the previous year's basic loan rate, or (2) he determines that a further cut is needed to compete on world markets.

For the 1986 crop only, the Secretary would be required to use this authority to drop the loan at least 10 percent.

The Secretary would have discretionary authority to allow repayment of price support loans at levels which could be set as low as 70 percent of the original loan rate. The Secretary would have additional discretionary authority to give producers one of two alternate types of marketing certificates to help promote exports.

Target price income protection would operate alongside whichever loan system was used, and any reduction below the basic initial loan rates would be offset by increased target price deficiency payments which would not be subject to payment limits.

Target prices, which provide direct payments to farmers when market prices are below the target rate, would be frozen at current levels ($4.38 a bushel for wheat and $3.03 a bushel for corn) through 1987. For the 1988 crop, the Secretary would have authority to set the target price level at not less than 98 percent of the 1986 level ($4.38 and $3.03); at not less than 95 percent for the 1989 crop; and at not less than 90 percent for the 1990 crop, but not to lower than $4 for wheat and $2.75 for corn.

To qualify for benefits in any years in which carryover wheat stocks exceed 1 billion bushels, wheat producers would be required to reduce acreage as follows: in 1986, a maximum diversion of 25 percent, (including a mandatory minimum reduction of 15 percent, a mandatory in-kind paid diversion of 2.5 percent, and further discretion for reductions of 7.5 percent); in 1987, a maximum reduction of 27.5 percent (including a mandatory minimum reduction of 20 percent and a further 7.5 percent at the Secretary's discretion); and in 1988-90, a maximum of 30 percent (including a mandatory minimum of 20 percent and a further 10 percent at the Secretary's discretion). For the 1986 crop only, the Secretary would be required to offer growers who planted before announcement of the program a chance to idle 10 percent of their base in return for payments.)

For feed grains, if stocks exceed 2 billion bushels of corn, the 1986 reduction would be a maximum of 20 percent (including a mandatory minimum of 12.5 percent, a mandatory in-kind paid diversion of 2.5 percent, and further discretion for reductions of 5 percent. For 1987-90, the maximum would be 20 percent (including a mandatory minimum of 12.5 percent plus up to 7.5 percent at the Secretary's discretion).

For all grains, the Secretary would have the authority to offer producers a further, voluntary, paid diversion beyond the basic minimums in the bill.

The Secretary is required to allow haying and grazing on diverted acres in 1986, permit grazing in 1987-90 if state Agricultural Stabilization Committees request it. Current law gives the Secretary discretionary authority to permit haying in 1987-90.

The Secretary would have discretionary authority to offer producers a "Target Option Program" under which the individual grower's wheat target price would rise if he elected higher levels of acreage reduction or decline at lower acreage-cut levels. Also optional for the Secretary would be a plan varying target price levels for farms of different sizes an effort to concentrate benefits on medium-sized farms. For the 1986 crop, the Secretary would be required to pay part of the expected target price deficiency payments on an advance basis and to make part of the payment "in-kind."

Under the bill, the Secretary would have the discretionary authority to proclaim marketing quotas for wheat, and establish a mandatory acreage control program for wheat, subject to the approval of producers in a referendum.

The bill requires the Office of Technology Assessment to study federal grain export quality standards. It also provides that 6 months after the study, the Agriculture Department would have to revise its export grading rules, in line with the study findings, to protect grain quality.

COTTON

The basic support loan rate is set at 55 cents per pound for 1986. In 1987 and thereafter for the life of the bill, the loan rates would be based on 85 percent of the world market price, with reductions limited to 5 percent annually, with a floor of 50 cents.

If the basic rate is not competitive on world markets, the Secretary would choose one of two alternate "market enhancement" plans for repayment of loans. Under one plan, he could lower the repayment rate by up to 20 percent, thus allowing farmers to redeem their crops and sell them at a competitive price. Under the second plan, repayment would be at rates varied periodically through the year to keep pace with world markets. In instances where world market levels fall below the new loan repayment levels, the Secretary would issue "in-kind" certificates to domestic and foreign buyers to bridge the gap between the effective support and the market.

Target prices would be frozen for the 1986 crop at the 1985 level of 81 cents per pound. For the 1987 crop, the Secretary would have the authority to set the target price at not less than 98 percent of the 1986 level (81 cents); at not less than 95 percent for the 1988 crop; at not less than 92 percent for the 1989 crop; and at not less than 90 percent for the 1990 crop.

To qualify for program benefits, producers would be required to divert up to 25 percent and the Secretary could offer a voluntary payment in kind supplemental diversion plan, including payments in kind, if greater acreage cuts were needed.

The base loan rate would be set at $7.20 per hundredweight for 1986 and then based on 85 percent of the average market price in the past 5 years, excluding the high and low years, with annual reductions limited to 5 percent and a floor of $6.50.

The Secretary is required to permit repayment of the price support loan at the world market price, but for 1986 and 1987 not below 50 percent of the original loan rate, for 1988 not below 60 percent of the original loan, and for 1989 and thereafter not below 70 percent of the original loan. Up to one-half of the difference between the original level and repayment level may be paid in negotiable in-kind certificates.

If the market price falls below the repayment level, the Secretary must issue in-kind marketing certificates to exporters bridging the gap between domestic and world prices. (The "marketing loan" plan under which growers can repay support loans at a reduced rate would be applied in the case of rice to the 1985 crop as well as the 1986-90 crops.)

Target prices would be frozen at $11.90 per hundredweight for the 1986 crop and then scaled down using the same formula as for cotton. (Percentages of 98, 95, 92, and 90 of the original level for the years 1987-90.)

Producers who want to enter the program would be subject to acreage reductions of up to 35 percent. The Secretary could also offer a voluntary paid diversion program and make in-kind payments.

DAIRY

The bill retains the current $11.60 support price for 1986.

The Secretary is required to implement a whole herd buyout program for 18 months, under which producers—on a bid basis—may take their entire herds out of production. The program will be funded by a producer assessment of 40 cents per hundredweight.

The Secretary is required to purchase 400 million pounds of red meat for export and domestic feeding programs during the 18-month program.

The Secretary is required to implement orderly marketing provisions during the whole herd program.

On January 1, 1987, the Secretary is required to reduce the price support level by 25 cents per hundredweight, and is required to reduce the assessment to 25 cents per hundredweight.

The Secretary is required to reduce the price support level by 25 cents per hundredweight on October 1, 1987, at which time the assessment is terminated.

For the rest of the life of the bill—1988-1990—the Secretary is required to reduce the support price level by 50 cents per hundredweight if CCC purchases are projected to exceed 5 billion pounds. If CCC purchases are projected to be less than 2.5 billion pounds, the Secretary must raise the price support 50 cents per hundredweight.

Differentials used in setting minimum fluid milk prices in some marketing orders would be increased.

SOYBEANS

The bill continues the basic price support loan rate through 1986 and 1987 at the current minimum rate of $5.02 a bushel. For the next three years, rates would be based on an average market price formula with reductions limited to no more than 5 percent a year and with a floor of $4.50 per bushel. In all of the 5 years, the Secretary would have authority to reduce loan levels by an additional 5 percent if necessary to keep the crop competitive in world markets. The Secretary would also have discretionary power to allow repayment of loans under a "marketing loan" system.

SUGAR AND WOOL

The bill also generally extends current programs. The wool price support formula would be frozen for the life of the bill.

The sugar price support is maintained for the life of the bill at 18 cents per pound.

1986 import quotas, scheduled to expire September 30, would be extended for at least 3 months.

Beginning with the next quota year, the Secretary would be directed to operate the sugar program with quota levels which avoid any cost to the government. Also, beginning in the 1987 quota year, no import quotas can be given to a country that is a net importer of sugar unless the country can verify that it does not import any sugar produced in Cuba.

PEANUTS

The peanut program would be continued without major changes. Supports for peanuts grown within a domestic (food and seed) quota in 1986 would be set at the 1985 level plus any increase in the cost of production; for 1987 and thereafter for the life of the bill, such support levels would be adjusted to reflect increases in the cost of production, but not by more than 6 percent annually, and access to quota sales at the domestic support level would be broadened by sharing any growth in the quota between old and new growers. The bill sets a floor of 1.1 million tons (the statutory 1985 level) under the annual domestic peanut quota for the next 5 years, but provides the quota can increase if actual domestic needs grow.

HONEY

The price support would be reduced from the present level of 65 cents a pound to 64 cents for 1986 and 63 cents for 1987. In the following 3 years the Secretary would be authorized to provide reductions of up to 5 percent annually and to implement a marketing loan.

PAYMENT LIMITATIONS AND GENERAL COMMODITY PROVISIONS

The bill continues the present $50,000 annual per producer ceiling for program payments. Exempt from the ceiling would be: (1) target price payments required to offset support loan cuts below basic loan levels, (2) payments made under several program cost-reduction items which the bill provides for discretionary use by the Secretary, and (3) any gains farmers realize when paying off support loans at less than the initial loan level.

A $100,000 ceiling would be placed on disaster payments to producers of grains, cotton, and rice and similar disaster payments are authorized for the 1985-90 crops of soybeans, sugar beets, sugarcane and peanuts.

Advance deficiency payments would be required for the 1986 crops of wheat, feed grains, cotton, and rice, and would be discretionary in future years for the life of the bill. The Secretary also would be given authority to make up to 5 percent of the total deficiency payment with surplus commodities.

New provisions for determining crop and total farm acreage bases are included, along with revisions in the farmer-owned grain reserve program, putting new limits on the program.

Also for the program using target price, the Secretary would have the discretion to make payments to producers who are eligible for loan and target price payments but agree to forgo those benefits.

A beef promotion board is established to administer a beef promotion program. The program will be funded by a $1 per head checkoff at the point of sale, including imported beef. A credit of up to 50 cents per head is provided for assessments paid to State beef councils. Provision is also made for refunds to producers and importers. The program will begin as soon as practicable, and a referendum of beef producers must be held within 22 months of the beginning of the program.

A similar pork promotion board is established to operate a pork promotion program, funded by a ¼ of 1 percent checkoff of the sales price of swine and imported pork products. The checkoff is refundable at the request of the producer until a referendum is approved by pork producers. A referendum must be held within 24 to 30 months of date of enactment of the bill.

EXPORT TITLE

Requires the Secretary to offer surplus commodities owned by the Agriculture Department to exporters, processors or foreign buyers to encourage the development and expansion of overseas markets for American crops including processed farm products. The Secretary would be directed to use $2 billion worth of commodities for the program over the next 3 years to counter unfair foreign trade practices and generally to make American products more competitive, and at least 15 percent of the program could to be devoted to exports of poultry, meat and meat products. To the extent practical, the Secretary must use the commodities in equal amounts in each of the 3 years.

Requires the Secretary of Agriculture to make available not less than $5 billion annually in short-term export credit guarantees for the life of the bill where such guarantees would improve the competitive position of American exports.

The Secretary is required to make not less than $325 million available annually in FY 86-88 in cash or in surplus commodities for direct export credits to counter the subsidies, import quotas or unfair trade practices of foreign countries. (The direct credits, whether in cash or in kind, could be used in so-called "blended credit" export programs.)

Broadens the purposes for which an existing intermediate (3-to-10-year) export credit program can be used and directs the Secretary to make available intermediate loan guarantees of at least $500 million a year through 1988, with a ceiling in fiscal 1989 of $1 billion. A previously-authorized export credit revolving fund is reauthorized under the bill. Also, the Agriculture Department would be directed to operate a pilot test of barter programs with at least 2 countries to acquire strategic or other materials for which there are unmet national stockpile goals.

Requires the President to designate a Special Assistant for Agriculture Trade and Aid to improve coordination of federal agency programs in overseas food assistance.

Extends the Food for Peace program and provides that at least 75 percent of the foods shipped under the donation phase of the program must be in the form of processed, fortifies or bagged products. For fiscal 1986, shipments under the donation phase would be maintained at the 1985 level of 1.8 million tons. The bill also authorizes expanded operations under a related program which provides surplus commodities for needy people abroad and it provides that not less than one-tenth of 1 percent of Food for Peace (P.L. 480) funds for fiscal 1986 and 1987 must be used for a farmer-to-farmer technical assistance program.

Authorizes the President to donate up to at least 75,000 and up to 500,000 metric tons of eligible section 416 of P.L. 480 commodities, or any combination thereof, in each of the fiscal years 1989-90 under a new Food for Progress program to promote private free enterprise policy and development. At least 75,000 tons of such commodities must be from section 416. In return for the commodities, the recipient country must promote economic freedom in the production of food for domestic consumption and must be able to use the donated commodities without disrupting its own agricultural markets.

A section on cargo preference regulations states that commodities exported under Public Law 480 (Food for Peace) and two other donation programs will be subject to a cargo preference floor starting at 60 percent in calendar 1986 and rising to 75 percent in 1988 and thereafter (in place of the current 50 percent). The bill provides that additional funds needed for these increases would come from the Department of Transportation and it exempts from cargo preference a number of commercial-style export and export credit programs operated by the Agriculture Department including blended credit programs. If the Transportation Department is not able to provide the needed funds, the new provisions would be shelved and existing law would come back into effect.

The bill requires the Secretary of Agriculture and the U.S. Trade Representatives to pursue agricultural trade consultations with major producing countries. Trade-related studies required by the bill include one to determine the impact on U.S. agriculture of Brazilian ethanol and another on specific unfair trade practices by foreign countries which affect American exports.

CONSERVATION

For highly erodible land which has not been cultivated since 1980, the bill provides a "sodbuster" program to discourage plowing up fragile soils. If a farmer planted a crop on fragile land in violation of the terms of the bill, he would lose price supports and other farm benefits for all of his crops in the year of the violation. Highly erodible land which was used for crops (or idled under a government acreage control program) between 1981 and 1985 would initially be exempt from the sodbuster penalties, but this "grandfather clause" exemption would disappear for any affected producer who fails to begin applying a conservation plan by 1990 or 2 years after completion of a soil survey of his land, whichever is later. Producers would have until 1995 to complete application of the conservation plan. A companion "swampbuster" provision would deny farm benefits to producers who convert wetlands to crop use in the future except in cases where the impact of the action is found to be minimal.

For highly erodible soils which are already in crop use, the bill provides a long-term Conservation Reserve program under which farmers would contract for periods of 10 to 15 years to return 40 to 45 million of such acres to less-intensive uses such as grass or trees, which in some cases may be used to establish shelterbelts. In return for compliance with the contracts, growers would get cash or "in kind" land rental payments (established on a bid basis) plus payments covering a part of the cost of needed land treatment measures. No more than 25 percent of the land in any county could be enrolled in the Reserve except in counties where the Secretary of Agriculture decides that higher levels would not hurt the county economy. There would be a $50,000 limit on annual payments to farmers under Reserve contracts.

The bill extends the Resources Conservation Act, requiring the Agriculture Department to produce assessments of soil and water resources in 1995 and again in 2005. A further section permits governors of states which have state laws to protect farmland from urban development to file suits in cases where the federal government has not followed procedures of a federal farmland protection law. (The federal law requires, among other points, that government agencies must consider alternatives before taking actions which result in shifting farmland to nonfarm use.)

The bill requires the Secretary of Agriculture to formulate plans and give technical assistance to property owners, state and local agencies, and interstate river basin commissions to protect the quality and quantity of subsurface water, reduce flooding hazards, and control salinity. The Secretary must report to Congress on this matter by February 15, 1987.

CREDIT AND RURAL DEVELOPMENT

The bill reauthorizes and in some cases revises federal farm credit and rural development programs. It requires the Secretary, through September of 1988, to operate a $490 million program under which the Agriculture Department and private lenders would share equally in the cost of reduction in interest rates for hard-pressed farmers who hold loans guaranteed by the Farmers Home Administration. The government could pay for 2 percent of the "buy-down," or one-half of the total, whichever was less.

The bill includes discretionary authority for a program of planting-season advance commodity loans to farmers beginning in 1986.

Authorization ceiling include annual caps for the 1986 through 1988 fiscal years of $3.48 billion for Farmers Home Administration farm operating loans with a phased shift from an equal division between direct and guaranteed loans to a third-year division of $870 million for direct and $2.610 billion for guaranteed loans.

For farm ownership loans, the bill authorizes $520 annually, beginning with an equal diversion between direct and guaranteed loans and ending with a third-year diversion of $130 million direct and $390 million in guarantees. (The Secretary is authorized to transfer up to 25 percent of each year's guarantee allocation into direct loans.)

For emergency disaster loans there would be ceilings of $1.3 billion in fiscal year 1986, $700 million in 1987 and $600 million in 1988. Under new changes contained in the bill, such disaster loans would no longer be available to those who can get credit elsewhere or beginning in 1987, to those who chose not to purchase crop insurance if it were available. In addition, FmHA disaster loans would now be restricted to not larger than family size farm operators.

For rural development programs, the bill authorizes $340 million annually for 3 years in direct water and waste disposal loans and $250 million annually in guaranteed industrial development loans plus $115 million in direct community facility loans. The bill also provides a new method of determining eligibility for water and sewer loans and grants based on community income and health and sanitary conditions.

A "clear title" provision in the bill is designed to protect buyers of farm products from challenges to the title to their purchases while still allowing lenders to protect their liens on farm products. States would be given 12 months to set up central registry systems for recording farm product liens, if they wish to do so.

Also, the Agriculture Department would be ordered to observe a number of new restrictions on the way it handles farmland acquired by the government in future foreclosures of FmHA loans. Among other provisions, USDA would be forbidden to sell such land if the sales would depress local farmland values, and first priority in any sales or leases would have to be given to operators of farms which are not larger than family size. In leases, the bill calls for giving priority to former owners of the land and sales prices must reflect the probable income the land can produce. Where FmHA-owned land is administered under management contracts, contracts must be let under competitive bids with preference to local small businessmen, and the use of conservation practices may be required on land which has been classed as highly erodible as a condition of sale or lease.

The bill allows the Secretary to acquire from FmHA borrowers who cannot repay their loans on conservation, recreational or wildlife easements on land which has been in crops but is classed as wetland, upland, or highly erodible. In return, the Secretary could cancel part of the borrower's debt.

The Secretary would be given discretion to make loans to distressed FmHA borrowers who plant timber crops on marginal farmland which is security for their existing loans. The new credit, which would reamortize the old loans and would be limited to an overall total of 50,000 acres, would be repayable when the timber produces revenue or within 45 years.

The category of those eligible to borrow from cooperative banks of the Farm Credit System is expanded to include all rural utilities eligible to borrow from the Rural Electrification Administration.

The bill requires a study of procedures used by FmHA for farmer appeals when loan applications are rejected, and a further provision creates a new, speedier appeals system using informal meetings. Other amendments require FmHA to process loan applications within 60 days, to provide funds on approved loans within 15 days, and to continue the agency's small farmer training and technical assistance program.

RESEARCH

The bill authorizes a 3-year program of special grants for educational and counseling programs to develop income alternatives for producers who have been forced out of farming by economic stress. It also directs the Secretary of Agriculture to develop "appropriate controls" on the development and use of biotechology in agriculture.

The bill also includes a provision urging USDA to emphasize, in its research and teaching programs, new technology suitable for small- and moderate-sized farms. The Secretary of Agriculture would be directed to report on the feasibility of more complete studies of the relationship between diet and blood cholesterol in humans, and dietary calcium and its importance in human health and nutrition. The bill allows the Secretary to make cooperative, cost-sharing agreements with private agencies, organizations or individuals to develop new agricultural technology, authorizes research on new uses for farm and forest products, and directs the Secretary to conduct demonstration projects on the development or commercialization of crops that would supply strategic industrial products.

Federal agricultural research funding authorizations would be extended through 1990 with fiscal 1986 ceilings including $600 million for federal activities, $270 million for contributions to cooperative research in state experiment stations and $370 million for contributions to cooperative extension programs in states (with $10-$20 million annual increases in following years for the three programs), and $7.5 million annually for aquaculture research.

The bill authorizes competitive research grants at a level of $70 million for the period covered by the bill and for grants and fellowships for food and agricultural sciences education at an annual level of $50 million. It authorizes the Research Facilities Act for the period covered by the bill at a level of $20 million with a federal-state matching provision for facilities at state cooperative institutions. It reauthorizes the animal health and disease research advisory board and an authorization level of $25 million. It also authorizes permanent extension funding for the 1890 institutions and $10 million annually for 5 years for extension facilities. The bill establishes a new program of agricultural productivity research with demonstration projects to be conducted for a term of at least 5 years and to the extent practicable 12 to 15 years.

FOOD ASSISTANCE

The food program section of the bill extends the Food Stamp program for 5 years, improves some program benefits, and requires all states to set up special employment and training programs to help move jobless stamp recipients onto payrolls. The bill also extends for 2 years, through fiscal 1987, the Temporary Emergency Food Assistance Program authorizing distribution of government surplus foods to the needy.

Among the food stamp changes adopted were an increase in work incentives by revising the "earned income" deduction used in calculating stamp benefits; changes in assets limitations to make the program more accessible to working poor households; an increase in the excess shelter cost deduction to the Food Stamp Program operations; and action to strengthen program accountability and management.

Other food assistance provisions in the bill would extend the Commodity Supplemental Food Program for women and young children for 5 years and broaden the program to serve elderly persons in cases where this would not deny benefits to women and children. The bill also would authorize increased nutrition education for low-income people and strengthen current efforts to monitor nutrition of low-income people.

OTHER PROVISIONS

The bill provides that in order to prevent damage to older gasoline engines used on many farms, the Environmental Protection Agency must not reduce the lead limit in gasoline to below 0.1 gram per gallon until Jan. 1, 1988. In the interim, the Agriculture Department and EPA would make a study of the need for lead in engines, completing the study by Jan. 1, 1987 and reporting within 6 months on whether it would be appropriate to modify the general lead-limit rules in the case of gasoline used for farming purposes.

Another provision bans imports of Fluecured or Burley tobacco which does not pass U.S. pesticide residue tests applying to American-grown tobacco. Also, the bill directs the Agriculture Department to continue a program of random checks to determine if imported Canadian potatoes meet U.S. standards.

A ban for a total for 5 years is placed on price supports and certain other farm benefits for persons convicted of growing or storing "controlled substance" drugs; requires tobacco importers, in addition to reporting the country of origin of the project, to also identify the intended U.S. purchaser; authorizes watermelon producers to adopt a checkoff program to finance research and promotion; and directs the Secretary to conduct a pilot project under which wheat, cotton, feed grain and soybean growers in at least 40 counties would test a program of using futures or options markets to protect their incomes (with participating producers assured by the USDA that their returns could not fall below support loan levels).

An animal welfare title revises standards for the humane handling of animals by research facilities, dealers and exhibitors. It directs the Secretary to develop standards with minimum requirements in areas including housing, feeding, shelter, veterinary care and experimental procedures that minimize pain and distress.

Changes would be made in the federal Virus-Serum-Toxin Act, a law which regulates veterinary biologics, to give the Agriculture Department control over intrastate as well as interstate sales, but would allow states which have effective regulatory systems to retain them. Intrastate producers would be given up to 4 years to comply with Federal regulations.

Other provisions in the bill: require the Secretary to give 60 days notice to the Senate and House agriculture committees before he acts to terminate marketing orders for non-price supported crops; require the Secretary to designate 3 administrative areas for the selection of community Agricultural Stabilization Committees in all counties with some exceptions such as in counties with less than 150 farmers, in which case only a single area is required; and require the Secretary to control grasshoppers and Mormon crickets on federal rangeland.

ORDER OF PROCEDURE

Mr. BYRD. Mr. President, I would like to ask the majority leader about the program for the rest of the evening, whether there will be rollcall votes, how late we may be in this evening, and what is the prospect for sine die tomorrow?

Mr. DOLE. Mr. President, I thank the distinguished minority leader.

I am advised that the House will not take up the continuing resolution until 11 a.m. on tomorrow, which means that we cannot adjourn sine die tonight. I am also advised that at this very moment the House is sending to us an extension on 13 expiring items that must be acted on tonight: Extension of R&D targeted jobs credit as in the tax reform bill, moratorium on IRS and R&D regs as in the tax reform bill, educational assistance, prepaid legal, architectural barriers, net operating loss moratorium attorney fees, energy credits to the extended tax reform, factory housing, sugar and excise tax, taxi cab fuel extension, spouses of Vietnam MIA's.

These are on the Ways and Means extender bill through March 15 of next year.

I do not see the distinguished chairman of the Finance Committee.

Mr. METZENBAUM. Mr. President, will the distinguished majority leader yield for a question?

Mr. DOLE. I yield.

Mr. METZENBAUM. What is the moratorium that the majority leader is talking about? Is it on some regulations of IRS? I understood this was a tax extender bill. But I did not know we were putting in a moratorium on the IRS.

Mr. DOLE. No. I qualified that. That was a moratorium on IRS and R&D regs as in the tax reform bill passed by the House last evening.

I do not know if anyone here wants a rollcall on this package. If we can have the assurance there will be no rollcall, but we have to pass it by midnight. Some of these provisions expire.

I would not want to indicate there would be no more rollcall votes, and someone jump up and either demand a rollcall or offer some amendment which we had to dispose of.

There are a number of Members on the floor. If no one seeks a rollcall, I think we can assure Members we might not do that.

Mr. BYRD. Mr. President, has the distinguished majority leader completed the list of extension?

Mr. DOLE. Yes. There are 13 of them.

Mr. BYRD. What date or dates would they be?

Mr. DOLE. Through March 15, 1986.

Mr. BYRD. Is this the only possibility or likelihood of a rollcall vote tonight, may I ask?

Mr. DOLE. That is correct.

Mr. BYRD. If no one indicates a desire to have a rollcall vote on the extensions, then I would take it that, if the majority leader agrees, there will be no more rollcall votes tonight.

Mr. DOLE. Mr. President, I am prepared to announce that there will be no other matters that require a rollcall vote.

The distinguished minority leader has the floor. I wonder if he might yield to the distinguished chairman of the Appropriations Committee to get some indication of what will happen in the timeframe on the Senate side on CR.

Mr. BYRD. I am happy to yield.

Mr. HATFIELD. Mr. President, the reconstituted conference committee has completed all of the items on our agenda with the exception of the Defense Subcommittee. That is pretty well narrowed down to the question of chemical weapons.

I would anticipate that we will complete work, and I have been in touch with the administration. Under a certain set of guidelines they will sign off on this CR, and will support it in both the House and the Senate.

We have not yet met those guidelines. We are in the process, and I anticipate that we will meet them before we complete our work, probably within about 1 hour.

Mr. BYRD. I thank the distinguished chairman of the Appropriations Committee, and the CR conference on this.

Mr. President, I have one more question of the majority leader.

Beyond the CR conference report, does the distinguished majority leader anticipate that the Senate will be in session beyond that, or do we expect to complete the conference on the reconciliation bill?

Mr. DOLE. The reconciliation bill is still hopefully a live possibility. They are down to two subconferences: one on Banking, and one involving Finance and the Ways and Means Committee. There is some hope that the Banking matter can be resolved. We hope it can be resolved.

Then as I understand, according to the chairman of the Finance Committee, there is just one outstanding issue

involving Ways and Means and Finance. That is Superfund, and how it should be paid for—whether it should be a new tax. I do not know what it is called. But it is a value-added tax. We hope that is a possibility tomorrow.

Mr. BENTSEN. Mr. President, will the majority leader yield?

Mr. BYRD. Mr. President, I yield the floor.

I thank the majority leader.

Mr. BENTSEN. Mr. President, I think we have two issues still outstanding. I believe we have two issues left between Ways and Means and Finance. One of them is the Superfund and the other is the extension regarding Social Security.

Mr. DOLE. Mr. President, the chairman of the Finance Committee earlier indicated that there had been a reluctance on the part of the House conferees to meet. So it is fairly difficult to work out any agreement that they can meet. I will announce there will be no more votes this evening.

Mr. DANFORTH. Mr. President, before the leader does that, I wonder if I can ask a question. I am sorry. I was in the cloakroom when the majority leader discussed the program for the rest of the evening.

But as I understand it, one of the suggestions was to take up a bill which I think has been passed by the House extending certain provisions of the Internal Revenue Code which would otherwise expire.

My understanding is that the House bill extends 13 provisions of the Internal Revenue Code. But what the House does in some of those programs is amend the underlying program. Therefore, what they are asking us to do is not only extend the programs as is but to change the programs really on faith without any input at all from the Senate.

Some of us have been considering—and, in fact, Senator BENTSEN and I and others with 68 cosponsors have introduced a bill which is a straight extension of these provisions without any action to modify them in the last day or so of the Congress.

It is my hope that the Senate can agree to take up the House bill, and to amend it to provide for a straight extension. If we can do that, that may or may not require a rollcall depending on the sense of the Senate. But I would like to at least hold open the possibility for that kind of amendment on the floor tonight, if that is one of the bills that will be brought up.

Mr. BENTSEN. Mr. President, if I may strongly urge that we follow the suggestion of Senator DANFORTH in that regard because we do not know how this will modify particular underlying legislation, nor what the extension will affect. We would be continuing the status quo under the bill that we talked about with the cosponsors. We would leave it to the appropriate committee over here to study the underlying legislation to make the proper decision.

Mr. DOLE. Mr. President, I think it is fair to say that we better be prepared to hang around here for a while. What they have done on the House side is to send us extensions. In four cases, it is a change in current law because they have extended as they have it in the tax reform bill passed last night by the House, on R&D credits, targeted jobs credits, the moratorium and energy credits. That could lead to a nice debate on those items and maybe some more that we have not thought of.

I suggest the absence of a quorum.

Mr. CRANSTON. Will the Senator withhold for one question on another topic? I know the Senator cannot predict the schedule with accuracy, but what is the earliest time we might get to the continuing resolution tomorrow?

I just asked another question on the schedule. What is the earliest time we might get to the continuing resolution tomorrow.

Mr. HATFIELD. Mr. President, assuming the fact that we expect to complete the continuing resolution tonight, there will be about a 3-hour requirement to put the paperwork together, which would indicate then that, according to my information, the House will come in at 10 and go to the Rules Committee to seek a rule. Normally, they try to put a time limit on that consideration of a resolution of about an hour. They did it the last time. That would mean, then, that the House conceivably could finish up with the continuing resolution by, say, 1 o'clock and send it over here. We could conceivably have it ready for consideration on the floor between 2 and 3 o'clock. I would say that is a fairly liberal exercise of the time scenario. They could conceivably get it over here by 1 o'clock.

Mr. CRANSTON. The House automatically takes it up first?

Mr. HATFIELD. The House will take it up first.

Mr. CRANSTON. I thank the Senator.

Mr. BUMPERS. Will the majority leader yield?

Mr. DOLE. Yes.

Mr. BUMPERS. As I understand, we are taking up the House bill on these extensions. I would like to ask the manager of the bill, if he is around, under current law——

Mr. DOLE. The manager of the bill is not here.

Mr. BUMPERS. Maybe the staff would know the answer to the question. Under current law, judges who are on senior status are not required to pay Social Security, the reason being that they take senior status and they take retirement and then if they carry a caseload, they are required to pay Social Security. So it is to their advantage not to carry a caseload if they have to pay Social Security. So we have exempted them. That is one of the items that is coming to an end. That exemption is in the Senate bill but I wonder if it is in the House bill. If it is not, I might want to offer an amendment on that.

Mr. DOLE. I do not see it listed. That is not one of them. I would hope if there are going to be amendments, that we do not wait until 2 a.m. to draft amendments on this bill.

Mr. EXON. Will the majority leader yield for a question?

Mr. DOLE. I yield.

Mr. EXON. I would like to ask the majority leader so we might plan ahead, is there any possibility that we could get agreement that we would be out of here by 6 o'clock on Christmas Eve and not meet until 2 p.m. on Christmas day, if that becomes necessary?

Mr. DOLE. I hoped we might be out this evening. Obviously, that is not going to happen. Again, I could see us here even through Friday but I cannot think of anything that would keep us here longer.

Mr. EXON. Actually, on planning ahead, is there a possibility that we might possibly conclude our activities by tomorrow night sometime or is that not a safe assumption?

Mr. DOLE. I have just been advised by Senator STEVENS, who is a member on Defense, that they have not reached agreement yet on Defense, though I assume they will stay in conference tonight until there is either agreement or total disagreement. If there is disagreement we will get an extension with some CR, I guess, up through next January. I guess the big question that I cannot answer is what happens to reconciliation. If we do not do the CR until 3 o'clock, and I do not know when we will do reconciliation, we may have a very late night tomorrow night and hopefully that might end it.

Mr. EXON. As I understand it right now, there is still a possibility of rollcall votes tonight.

Mr. DOLE. A possibility of rollcall votes tonight, I am sorry to say, yes.

Mr. EXON. I thank the majority leader.

The PRESIDING OFFICER (Mr. COCHRAN). Does any Senator seek recognition?

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, we have some business to perform. I have conferred with the Democratic leader and I now present various matters to the Chamber.

FEDERAL DEBT COLLECTION

Mr. SIMPSON. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 1890.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendments of the Senate numbered 1, 2, 4, 5, 6, 8, 9, and 11 to the bill (H.R. 1890) entitled "An Act to provide for an equitable waiver in the compromise and collection of Federal claims.".

Resolved, That the House agree to the amendment of the Senate numbered 3 to the aforesaid bill, with the following amendment:

In lieu of the matter stricken and inserted by said amendment, strike out [made on or after January 1, 1985].

Resolved, That the House agree to the amendment of the Senate numbered 7 to the aforesaid bill, with the following amendment:

In lieu of the matter stricken and inserted by said amendment, strike out [made on or after January 1, 1985].

Resolved, That the House agree to the amendment of the Senate numbered 10 to the aforesaid bill, with the following amendment:

In lieu of the matter stricken and inserted by said amendment, strike out [made on or after January 1, 1985], and on page 4, after line 17 of the House engrossed bill, insert:

SEC. 4. EFFECTIVE DATE.

The amendments made by section 1 of this Act shall apply to any claim arising out of an erroneous payment of travel, transportation, or relocation expenses and allowances made on or after the date of the enactment of this Act. The amendments made by section 2 and 3 of this Act shall apply to any claim arising out of an erroneous payment of travel and transportation allowances made on or after the date of the enactment of this Act.

Mr. SIMPSON. Mr. President, I move that the Senate concur in the House amendments to Senate amendments numbered 3, 7, and 10.

The motion was agreed to.

Mr. SIMPSON. Mr. President, I move to reconsider the vote.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ENROLLMENT CORRECTION

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now turn to consideration of House Concurrent Resolution 262, to correct the enrollment of the Compact of Free Association.

The PRESIDING OFFICER. Is there objection? Without objection, the clerk will state the resolution by title.

The legislative clerk read as follows:

A house concurrent resolution (H. Con. Res. 262) correcting the enrollment H.J. Res. 187.

The resolution (H. Con. Res. 262) was considered and agreed to.

Mr. SIMPSON. I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DESIGNATION OF THE PERIOD COMMENCING JANUARY 1, 1986, AND ENDING DECEMBER 31, 1986, AS THE "CENTENNIAL YEAR OF THE GASOLINE POWERED AUTOMOBILE"

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of Senate Joint Resolution 231, designating the period commencing January 1, 1986, and ending December 31, 1986, as the "Centennial Year of the Gasoline Powered Automobile," and I ask for its immediate consideration.

I ask for its immediate consideration.

Mr. PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the joint resolution by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 231) to designate the period commencing January 1, 1986, and ending December 31, 1986, as the "Centennial Year of the Gasoline Powered Automobile".

Mr. PRESIDING OFFICER. Without objection, the joint resolution will be considered as having been read the second time at length, and the Senate will proceed to its consideration.

The resolution (S.J. Res. 231) was considered, ordered to a third reading, read the third time, and passed, as follows:

The preamble was agreed to.

The joint resolution with its preamble is as follows:

S.J. RES. 231

Whereas the first motor vehicle powered by an internal combustion engine was invented in 1886;

Whereas such vehicle was the forerunner of the present automobile and there are more than one hundred twenty-four million automobiles registered in the United States;

Whereas one in five jobs in the Nation are dependent directly or indirectly on the automobile industry;

Whereas the automobile has been associated with tremendous changes in society in the one hundred years since its invention; and

Whereas the automobile has enhanced communication, travel and has brought mobility to all people in the Nation; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the period commencing January 1, 1986, and ending December 31, 1986, is designated as the "Centennial Year of the Gasoline Powered Automobile" and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such year with appropriate ceremonies and activities.

Mr. SIMPSON. I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

● Mr. RIEGLE. Mr. President, I am pleased that the Senate has been able to approve Senate Joint Resolution 231 prior to adjournment. This resolution will designate 1986 as the centennial year of the gasoline powered automobile. The automobile has had a great impact on our world, and it is fitting that we recognize the role that it has played during the past 100 years.

By taking this action today, and obtaining speedy House action, many organizations ranging from the UAW to automobile dealers and manufacturers will be organizing events and raising public awareness of the automobile. I thank Senator THURMOND for his assistance in allowing me to bring this resolution before the Senate today, and also for cosponsoring this bill along with 37 other Senators.●

AMENDMENT OF TITLE 10, U.S. CODE

Mr. SIMPSON. I ask unanimous consent that the Senate turn to consideration of H.R. 3974, the House companion to S. 1956.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will state the bill.

The legislative clerk read as follows:

A bill (H.R. 3974) to amend title 10, United States Code, to include in the death gratuity payable to survivors of a member of the Armed Forces who dies on active duty an amount equivalent to two months housing allowance.

AMENDMENT NO. 1428

Mr. SIMPSON. Mr. President, I send an amendment in the nature of a substitute to the desk on behalf of Senator THURMOND.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. THURMOND, proposes an amendment numbered 1428.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That section 403 of title 37, United States Code, is amended by adding at the end thereof the following new subsection:

"(l)(1) The Secretary of Defense, or the Secretary of Transportation in the case of the Coast Guard when not operating as a service in the Navy, may allow the dependents of a member of the armed forces who dies in line of duty and whose dependents are occupying family housing provided by the Department of Defense, or by the Department of Transportation in the case of the Coast Guard, other than on a rental basis on the date of the member's death to continue to occupy such housing without charge for a period of 90 days.".

"(2) The Secretary concerned may pay an allowance for quarters to the dependents of a member of the uniformed services who dies in line of duty and whose dependents are not occupying a housing facility under the jurisdiction of a uniformed service on the date of the member's death or are occupying such housing on a rental basis on such date, or whose dependents violate such housing sooner than 90 days after the date of the members death. The amount of the allowance for quarters shall be the same amount that would be payable to the deceased member under sections 403, 403a, and 405 of this title if the member had not died. The payment of an allowance for quarters under this subsection shall terminate 90 days after the date of the member's death.".

SEC. 2. The amendments made by section 1 of this Act shall take effect December 12, 1985, and shall apply only with respect to housing for and payment of an allowance for quarters to dependents of members of the uniformed services who died on or after that date.

SEC. 3. SERVICEMEN'S GROUP LIFE INSURANCE PROGRAM.—Section 401(c) of Public Law 99-166 is amended to read as follows:

"(c) EFFECTIVE DATE.—(1) Except as provided in paragraph (2), the amendments made by subsections (a) and (b) shall take effect on January 1, 1986.

"(2) The amendment made by subsection (a)(1)(A) shall be deemed to have taken effect on December 12, 1985, with respect to members who—

"(A) died after December 11, 1985, and before January 1, 1986; and

"(B) were, on the date of death, insured in the amount of $35,000 under subchapter III of chapter 19 of title 38, United States Code.".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1428) was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 3974), as amended, was passed.

The title was amended so as to read:

"To provide for temporary family housing or temporary housing allowances for dependents of members of the Armed Forces who die on or after December 12, 1985, and for other purposes.".

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay the motion to reconsider on the table.

The motion to lay on the table was agreed to.

ASSISTANCE FOR THE REPUBLIC OF LIBERIA

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate turn to calendar item No. 476 (S. Res. 271), dealing with Liberia.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 271) expressing the sense of the Senate regarding the furnishing of assistance for the Republic of Liberia, and for other purposes.

The Senate proceeded to consider the resolution.

U.S. POLICY TOWARD LIBERIA

Mr. DODD. Mr. President, I rise in strong support of the resolution regarding U.S. policy toward the Republic of Liberia.

On December 10, the Foreign Relations Committee Subcommittee on African Affairs, chaired by my distinguished colleague from Kansas, Senator KASSEBAUM, held a hearing on U.S. policy toward Liberia. Hope is disintegrating for a return to civilian rule by free elections in Liberia, and much of that hearing focused on the U.S. Aid Program to Liberia, in light of events.

Since 1981, the United States has provided Liberia with $375 million in economic and military aid, based on the Government of Liberia's commitment to free and fair elections. Let me just read to my colleagues section 807 of the International Security and Development Cooperation Act of 1985:

In recognition of the special relationship that the United States has with Liberia and of the wide variety of interests that the United States has in Liberia, security assistance for fiscal years 1986 and 1987 is based on the expectation of a successful completion of free and fair elections, on a multiparty basis, in October 1985 as proposed by the Government of Liberia and on a return to full civilian, constitutional rule as a consequence of those elections.

In case there may be any lingering doubts among my colleagues that the government of Samuel K. Doe has failed to meet those requirements, the basic facts about the tragedy that is now occurring in Liberia will dispel them.

When the Doe regime seized power in 1980, there seemed some grounds to hope that power would be shared more equitably in Liberia, that the native African majority might gain a fair share in the Government with the descendants of freed American slaves. Then sergeant, now Major General Doe, the leader of the coup, promised a return to civilian rule. The Doe regime promised free and fair elections. Those promises have been broken and those hopes have been dashed. Look at what has happened.

On September 13, 1985, for example, Ellen-Johnson Sirleaf, one of the Doe regime's prinicipal opponents, was convicted of sedition. Mrs. Johnson-Sirleaf's crime was to give a speech in the United States opposing the economic policies of the Doe regime, as an economist, the Nairobi representative of Citibank, Mrs. Johnson-Sirleaf's opinions on the economic mismanagement of her native land are worth hearing. But the Liberian people did not have the chance. Her Liberal Action Party, and the primary opposition group, the United People's Party, were barred from the elections.

On October 15, the already tained elections were held. And on October 29, the predictable results were announced—a victory, albeit a narrow one, for Samuel K. Doe. Topping the long list of election irreguarities witnessed by opposition figures and Western reporters was a large pile of ballots that were burned outside of the Liberian capital.

In light of Liberia's economic woes, compounded by these political troubles, it is not surprising that a coup was attempted on November 12. It failed, but let no one suspect that failure augers well for Liberia's future.

In response to the coup, Liberian soldiers went on what can only be described as a rampage. There were summary executions, a diplomatic crisis with neighboring Sierra Leone, and arrests of leading opposition figures on trumped-up charges of participating in the coup. According to one observer on the scene, the Government did not have its soldiers under control after the coup attempt. As reported in the Washington Post, this businessman said: "The soliders are just arresting anyone who they think might be a threat."

So at the risk of appearing balanced and consistent—something maybe we ought to try more often around here—it seems to me that the Government of Liberia deserves no better treatment from the United States than does the Government of South Africa.

We know what the Government of Pretoria is, and what it has done to its people. It is a totalitarian regime and it is brutal. Regrettably, the Government in Monrovia also shows signs of totalitarianism. And it also brutalizes its people.

So the credibility of our policy requires that we apply the same rules

and the same standards to both situations. We can be no more concerned about the political prisoners, the political killings and political injustice in South Africa than we are about the political prisoners, the political killings and the political injustice in Liberia.

Liberia is the highest per capita recipient of U.S. foreign aid in Africa. U.S. aid to Liberia has increased sixfold since the Doe regime took power. I think the record shows that to be a very poor investment, indeed.

This Congress has conditioned further U.S. aid on free and fair elections, and on a return to civilian government. The evidence shows that warning has been disregarded. That disregard must now have its consequences.

We should not turn our backs on the people of Liberia, with whom the United States has had a long and unique relationship, but we should have as little as possible to do with the Doe regime.

This resolution asserts that the October elections do not meet the requirements this Congress set for U.S. aid to Liberia. It calls on the President to channel future economic aid to Liberia through nongovernmental channels. And it calls on the President to suspend all military aid to Liberia until the Doe regime's political prisoners are released, and real steps are taken toward free and fair elections and a return to civilian rule. I think that is the only prudent course for U.S. policy toward Liberia at this time, and I urge my colleagues to pass this resolution unanimously.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 271) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 271

Whereas the Republic of Liberia and the United States are bound by ties of mutual respect and friendship;

Whereas the Government of Liberia has undertaken since 1981 to restore civilian rule and establish a genuinely democratic government which will provide all citizens with an equal voice in the goverance of their country;

Whereas the Goverment of Liberia made a public commitment to hold a free and fair election in 1985 and to install a civilian government based on the results of that election by 1986;

Whereas the United States has provided the Republic of Liberia with $375,000,000 in economic and military assistance since 1981 on the basis of the Government of Liberia's commitment to hold free and fair elections;

Whereas the election that took place in the Republic of Liberia on October 15, 1985, has been characterized by improprieties, including the denial of the right to participate by significant opposition parties and candidates and restrictions on the freedom to campaign;

Whereas the results of the election, as announced on October 29, 1985, giving 50.9 percent of the vote to General Doe, were tallied in secret by an ad hoc committee appointed by the military government after an earlier tabulation in the presence of opposition party representatives gave the election to another candidate;

Whereas several political leaders have been arrested and held in detention without charge, allegedly on the grounds that they participated in the attempted coup d'etat of November 14, 1985;

Whereas the Congress, in the International Security and Development Cooperation Act of 1985, expressed the need for free elections in the Republic of Liberia; and

Whereas it is the desire of the Congress that the people of Liberia enjoy the full fruits of democracy as well as the respect of the international community: *Now, therefore, be it resolved,* That (e) it is the sense of the Senate that—

(1) the October 15, 1985, election and vote tally in the Republic of Liberia do not meet the requirements of section 807 of the International Security and Development Cooperation Act of 1985;

(2) the President should channel, to the maximum extent possible, future economic assistance to the Republic of Liberia through nongovernmental organizations; and

(3) the President should suspend military assistance to the Republic of Liberia until the Government of Liberia has released all political prisoners, provided for free and fair elections, and established a civilian government chosen through such election.

(b) The Senate hereby expresses to the people of Liberia the friendship of the people of the United States and the earnest desire of the people of the United States for the establishment of a genuine democracy in Liberia.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay the motion to reconsider on the table.

The motion to lay on the table was agreed to.

EXTENSION FOR SUBMISSION OF U.S. SENTENCING COMMISSION GUIDELINES

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate turn to H.R. 3837 dealing with the United States Sentencing Commission.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 3837) to extend the deadline for submission of the initial set of sentencing guidelines by the United States Sentencing Commission, and for other purposes.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 3837) was ordered to a third reading, was read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay the motion to reconsider on the table.

The motion to lay on he table was agreed to.

JAMES A. WALSH UNITED STATES COURTHOUSE

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate turn to calendar item No. 489, H.R. 2698, the James A. Walsh U.S. Courthouse.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 2698) to designate the United States courthouse in Tuscon, Arizona as the James A. Walsh United States Courthouse.

the Senate proceeded to consider the bill.

Mr. DECONCINI. Mr. President, the bill presently before the Senate, H.R. 2698, honors an individual who has served nearly 50 years as a distinguished member of the legal profession in Arizona, Judge James A. Walsh. H.R. 2698, sponsored by my friend and distinguished colleague in the House, MORRIS K. UDALL, would designate the U.S. Courthouse located at 55 East Broadway in Tucson, AZ, the James A. Walsh United States Courthouse. I can think of no more fitting tribute to a man who has given so much to the Federal judiciary than to, at the very least, name a courthouse in his honor.

Throughout his 50 years of service Judge Walsh has proven himself a master in judicial ingenuity. Judge Walsh was admitted to the Arizona State Bar in 1928. Since that time he continued to serve in various public positions including city attorney of Mesa, administrative assistant to U.S. Senator Ernest McFarland, assistant U.S. attorney, Maricopa County attorney and judge of the superior court in Phoenix. In 1947 Judge Walsh left the bench to join one of Arizona's leading law firms, now known as Snell & Wilmer. In 1951-52, he was chief counsel to the Arizona Code Commision which completely revised the statutory law of Arizona. In 1952 President Harry S. Truman appointed Judge Walsh to the U.S. district court. He served as chief judge from 1961 until 1973. On July 9, 1976 he took senior judge status.

I have known Judge Walsh and his family for many years, and have had the privilege of practicing law before

him. His earnestness and objectivity in performing the duties of his office have gained him the respect of all who have appeared in his court. Many lawyers througout the West have learned from him the high values to be placed on hard work and the respect to be given to the civility with which the work of lawyers and judges should be conducted.

Judge Walsh is recognized as one of the finest judges ever to serve in the Western States. A building named in his honor is a fitting tribute to his lifetime of achievements, both as a public servant and an understanding individual.

Mr. President, I want to take this opportunity to personally express my thanks and appreciation to Mr. STAFFORD, chairman of the Environment and Public Works Committee, and his staff Steve Swain, for their outstanding efforts in moving this bill expeditiously through the committee. Through their assistance, we now have a bill that can be sent to the President before the Congress adjourns. I also want to thank the distinguished ranking minority of the committee, Mr. BENTSEN and his staff for their help.

I urge my colleagues in the Senate to unanimously give their approval to this legislation.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 2698) was ordered to a third reading, was read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay the motion to reconsider on the table.

The motion to lay on the table was agreed to.

EXECUTIVE CALENDAR

Mr. SIMPSON. Mr. President, I inquire of the minority leader if he is in a position to confirm any or all of the following Executive Calendar nominations.

Mr. BYRD. Mr. President, if the distinguished assistant Republican leader will proceed with the items, I believe I will be able to agree with going forward on them.

Mr. SIMPSON. Mr. President, I thank the Senator from West Virginia, the Democratic leader. The items are:

Calendar No. 626, J. H. Tyler McConnell; Calendar No. 627, Robert Setrakian; Calendar No. 628, Gerald Ralph Riso; Calendar No. 629, C. Dale Duvall; Calendar No. 630, Sidney Lovett; Calendar No. 631, John Norton Moore; Calendar No. 632, Richard John Neuhaus; Calendar No. 633, W. Bruce Weinrod; Calendar No. 634, Dennis L. Bark; Calendar No. 635, Evron M. Kirkpatrick; Calendar No. 636, W. Scott Thompson; Calendar No. 637, Allen Weinstein; and Calendar No. 638, William R. Kintner.

Also, all military nominations reported out of the Armed Services Committee today, which include 54 Air Force brigadier generals, 1 Navy vice admiral.

If the Democratic leader has reviewed those items and is in a position to agree, I ask unanimous consent that, as in executive session, the nominations just identified be considered en bloc and confirmed en bloc.

Mr. BYRD. Mr. President, there is no objection on this side to proceeding with the nominations, and there is no objection to considering the aforementioned nominations en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

UNITED STATES POSTAL SERVICE

J. H. Tyler McConnell, of Delaware, to be a member of the Board of Governors of the United States Postal Service for the remainder of the term expiring December 8, 1988.

Robert Setrakian, of California, to be a Member of the Board of Governors of the United States Postal Service for the remainder of the term expiring December 8, 1993.

NEW REPORTS

DEPARTMENT OF THE INTERIOR

Gerald Ralph Riso, of New York, to be an Assistant Secretary of the Interior.

C. Dale Duvall, of Washington, to be Commissioner of Reclamation.

UNITED STATES INSTITUTE OF PEACE

Sidney Lovett, of Connecticut, to be a Member of the Board of Directors of the United States Institute of Peace for a term of 2 years expiring January 19, 1987. (New Position)

John Norton Moore, of Virginia, to be a Member of the Board of Directors of the United States Institute of Peace for a term of 4 years expiring January 19, 1989. (New Position)

Richard John Neuhaus, of New York, to be a Member of the Board of Directors of the United States Institute of Peace for a term of 2 years expiring January 19, 1987. (New Position)

W. Bruce Weinrod, of the District of Columbia, to be a Member of the Board of Directors of the United States Institute of Peace for a term of 2 years expiring January 19, 1987. (New Position)

Dennis L. Bark, of California, to be a Member of the Board of Directors of the United States Institute of Peace for a term of 4 years expiring January 19, 1989. (New Position)

Evron M. Kirkpatrick, of Maryland, to be a Member of the Board of Directors of the United States Institute of Peace for a term of 4 years expiring January 19, 1989. (New Position)

W. Scott Thompson, of New Hampshire, to be a Member of the Board of Directors of the United States Institute of Peace for a term of 4 years expiring January 19, 1989. (New Position)

Allen Weinstein, of the District of Columbia, to be a Member of the Board of Directors of the United States Institute of Peace for a term of 4 years expiring January 19, 1989. (New Position)

William R. Kintner, of Pennsylvania, to be a Member of the Board of Directors of the United States Institute of Peace for a term of 2 years expiring January 19, 1987. (New Position)

AIR FORCE AND NAVY

In the Air Force 54 brigadier generals and 1 Navy vice admiral, reported out of the Armed Services Committee today.

GERALD RALPH RISO

Mr. McCLURE. Mr. President, I support the nomination of Gerald Ralph Riso to be Assistant Secretary of the Interior for Policy, Budget, and Administration. Mr. Riso has complied with all requirements of the Senate and the Committee on Energy and Natural Resources. Mr. Riso appeared before the committee on December 12, 1985, and has fully responded to all questions asked of him by the committee. On Tuesday, December 17, 1985, the committee met in open business session and ordered Mr. Riso's nomination favorably reported to the Senate by a unanimous vote.

The position of Assistant Secretary for PBA is a difficult one, but one for which Mr. Riso is exceptionally well qualified. The Assistant Secretary will be the point man for the Department in the development of the annual budget. He will have responsibility for the coordination of the various missions of the Department within the overall policy guidelines of the Secretary and the parameters set by law. He will be responsible for ensuring that the various agencies have adequate resources to fulfill their mandates and protect and conserve the lands and resources of this Nation. His position is one of support for the other Assistant Secretaries to enable them to achieve their objectives.

Mr. Riso has previously held several senior management positions within the Federal Government. He was Deputy Assistant Secretary for Health and Scientific Affairs at the then Department of Health, Education, and Welfare from 1970 to 1972. He also served as Deputy Commissioner of the Immigration and Naturalization Service within the Department of Justice from 1982 to 1984. He comes to this position well qualified, and I urge my colleagues to support his nomination.

U.S. INSTITUTE OF PEACE

Mr. HATFIELD. Mr. President, the confirmation of the nine nominees for the Board of Directors of the U.S. Institute of Peace represents a landmark. The U.S. Institute of Peace is a dream I've shared with many people for a long time—indeed, a dream as old as our Nation. With the Board in place, this independent and nonprofit

educational Institute can begin to study ways to feed America's hunger for peace.

Many times I have stood before this body to encourage you, my colleagues, to support the Institute of Peace. Today I stand before you to say thank you. The years of hard work by the 45,000 members of the National Peace Academy Campaign, my distinguished colleagues and former colleagues Matthew Neely, Jennings Randolph, Vance Hartke, SPARK MATSUNAGA, ROBERT STAFFORD, and many others have paid off. This payoff will, I am certain, reach every citizen in this country who cares to learn how to wage peace.

The U.S. Institute is a dream which became a reality through necessity. Technological wizardry and international tensions complicate our daily lives. Just as we need to actively provide for our defense, we need to know how to protect peace and how to promote it in other countries. The Institute is designed to provide insight into the techniques required to obtain and maintain peace, and these newly confirmed Board members will have the enviable task of crafting and shaping the project. To them I say congratulations and good luck, and to everyone involved in the U.S. Institute of Peace, I say thanks.

C. DALE DUVALL

Mr. McCLURE. Mr. President, I am pleased to bring before the Senate the nomination of C. Dale Duvall to be the Commissioner of the Bureau of Reclamation. Mr. Duvall has complied with all requirements of the Senate and of the Committee on Energy and Natural Resources. Mr. Duvall appeared before the committee on December 12, 1985, and has fully responded to all questions posed to him by the committee. On December 17, 1985, the committee met in open business session to consider his nomination and unanimously voted to report the nomination to the Senate favorably.

Mr. Duvall is the first Commissioner of the Bureau of Reclamation to require confirmation. He comes from the West and is familiar with the important, and essential, contributions which the Bureau has made to the development of this country. He has an appreciation of the future of the Bureau and the many problems which the Bureau faces. Mr. Duvall has been candid and I look forward to working with him in the future. He does not have an enviable task given the seeming myopia of the Office of Management and Budget. While there will be some shift in emphasis for the Bureau in the future, the entire economy of the West will continue to depend on how well the Bureau continues to function.

Mr. Duvall brings to the job important qualifications. He has been treasurer and vice president of the Overseas Private Investment Corp. and previously was managing partner of a multioffice regional CPA firm based in Spokane, WA. I support his nomination and urge my colleagues to do so also.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the vote by which the nominations were considered and confirmed en bloc be reconsidered.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS APPOINTMENTS

Mr. BYRD. Mr. President, will the distinguished assistant Republican leader yield so that I may read a letter into the RECORD?

Mr. SIMPSON. I yield.

Mr. BYRD. I thank the distinguished Senator.

Mr. President, the White House, under date of today, has written the following letter to me with respect to recess appointments:

This is in response to your letter of December 16 to the President, concerning recess appointments during the upcoming adjournment of the Senate.

At this time, the President has no plans to make any recess appointments during the adjournment, assuming that there are votes before adjournment on those nominations currently pending before the Senate. There can be no doubt, however, that the adjournment will be of sufficient duration to permit recess appointments to be made, as envisioned by the Constitution. If for any reason we should decide it is necessary to make recess appointments during the upcoming adjournment, we will, pursuant to previous discussions you have had with Administration officials on this issue, advise you of those appointments before they are made.

With best wishes for a joyous holiday season,

Sincerely,

M.B. OGLESBY, JR.
Assistant to the President.

NOMINATION OF JAMES RICHARDS

Mr. SIMPSON. Mr. President, as in executive session, I ask unanimous consent that the Government Affairs Committee be discharged from further consideration of the nomination of James Richards, and I ask that it be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

APPOINTMENTS TO NATIONAL GROUND WATER COMMISSION

Mr. SIMPSON. Mr. President, pursuant to Public Law 98-616, I appoint to be members of the National Ground Water Commission, the following Senators:

Senator DAVID DURENBERGER of Minnesota, Vice Chairman.

Senator DON NICKLES of Oklahoma.

SENATE SCHEDULE

Mr. SIMPSON. Mr. President, just a quick review of things, while the Democratic leader is present.

I believe the majority leader has indicated that there is a possibility of other items yet to come before us this evening.

As the majority leader has discussed, we will remain in session for a time this evening. Regrettably, there is still a possibility of rollcall votes. I wish I could indicate differently, but that is not possible.

We have a bill coming from the House extending various revenue provisions until March 15, 1986, which must be passed by midnight tonight. I know that is repetitive, since the leader mentioned that. Since that time, however, I believe there has been an agreement reached with regard to the low-level radioactive waste transitional legislation. That has been a difficult negotiation. Senator EVANS of the Energy Committee, Senator JOHNSTON, Senator MCCLURE, and Senator THURMOND have been instrumental in resolving that. I think it has been resolved. I do not know if a rollcall vote will be required on it, or perhaps there will be an amendment. I am not certain of that, but I share with my colleagues the fact that that measure may be before us later this evening.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I now understand that the House of Representatives will send us a simple 1-day extension of four provisions which would otherwise expire at midnight tonight, and these four provisions have been acted on before. They are: trade adjustment assistance, cigarette excise tax, railroad retirement, and black lung and Medicare.

We have extended those before. This will be a 1-day extension until tomorrow night at midnight.

I am going to assume that we can pass a 1-day extension on those four

items without a rollcall vote. So there will be no more rollcall votes tonight.

EXTENSION OF CERTAIN TOBACCO EXCISE TAXES AND OTHER EXTENSIONS.

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 3981.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 3981), to extend until December 19, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain medicare reimbursement provisions, and borrowing authority under the railroad unemployment insurance program.

There being no objection, the Senate proceeded to the immediate consideration of the bill.

Mr. DOLE. Mr. President, let me indicate that this is a 1-day extension of four items that we have extended before.

The other nine that we mentioned previously will be taken up by the House Rules Committee tomorrow. They will come over sometime tomorrow.

I have suggested that in order to expedite the process tomorrow, maybe the staff on all sides can get together and try to work out what might be acceptable so that we do not have a big debate on the floor.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 3981) was ordered to a third reading, was read the third time, and passed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LEADERSHIP FOR THE FUTURE: THE GIFTED IN A CHANGING SOCIETY

Mr. McCLURE. Mr. President, we are indebted to our colleague, the Senator from Indiana, Mr. QUAYLE, for his leadership role in a recent national seminar, "Leadership for the Future: The Gifted in a Changing Society." The seminar was sponsored by the National Business Consortium for the Gifted and Talented and boasted a distinguished seminar host committee: Secretary and Mrs. William E. Brock, Lilia Clemente, Arthur E. Dewey, the Honorable Alexander M. Haig, Jr., Senator and Mrs. Ernest F. Hollings, the Honorable Frank Ikard, Gen. David C. Jones, Congressman and Mrs. James R. Jones, Congressman and Mrs. Jack F. Kemp, James S. Kemper, Jr., The Honorable Drew L. Lewis, Jr., the Honorable John A. Love, Robert A. Maheu, Attorney General and Mrs. Edwin Meese, Senator and Mrs. Dan Quayle, Congressman and Mrs. Richard T. Schulze, Donald V. Seibert, Dr. Dorothy Sisk, James A. Skidmore, Jr., Congressman and Mrs. Guy Vander Jagt, James R. Whelan, my wife, Louise, and me.

The conference was presided over by Mr. Robert A. Maheu, chairman of the National Business Consortium for the Gifted and Talented.

Senator QUAYLE led off the conference with a strong presentation on the need for the Nation to address the subject of America's leadership for the future and the mobilization of business on behalf of our Nation's greatest asset—our most able young people.

Senator QUAYLE said:

I do believe and I think that your National Consortium points out a lack of appreciation and perhaps a lack of attention that we have in fact given to the gifted and talented. as we look into this new era that we are beginning to enter into with high technology—the growth industries, turning into the 21st century—there is no doubt about it that we are going to face competition like we have never faced before, not just domestically but internationally and as competition rises, as the requirement for getting along and understanding this new technology, obviously we have got to have as much creativity as we possibly can and we have got to have an education base and when you have a statistic that only 13 percent of our school districts have a gifted and talented program, I think that shows a real need for some attention and for some help. It ought to be 100 percent of the school districts, not just 13 percent. I think that the Federal government's role in this area—I might point out as we go down this road—will be one to facilitate, to encourage. There are some availabilities of programs, but I think that the primary emphasis if we are really going to be successful is how we can develop a partnership at the local and state levels with our public and private institutions that deal with education and our private sector. Now, the Federal government has in the past been involved in gifted and talented education that first started in the late 1960's with the National Defense Education Act; the funding there was $2 million but in those days $2 million was real money—today it doesn't go too far. In 1978 where there was probably more attention than there is right now, the Congress passed a Gifted and Talented Children's Act. It was a separate categorical grant. In 1981, with the new Federalism and block grants, the Gifted and Talented Children's Act was forwarded into Chapter 2 of the money that is now on a block grant basis—back to the states and the local communities—they do have the option right now to use the Chapter 2 monies for the gifted and talented but as I stated, you have only 13 percent of the school districts that are utilizing the Chapter 2 funds for gifted and talented and that is a very low statistic.

Keynoting the seminar was the well-known trend analyst, Marvin Cetron, author of a half dozen titles on trends and developments in education, jobs, business, and the future. Mr. Cetron's best-known work is probably "An Encounter with the Future," which he co-authored with Washington Post writer, Thomas O'Toole.

Cetron set the scene:

REMARKS OF MARVIN CETRON, PRESIDENT, FORECASTING INTERNATIONAL

The truth is that our scarcest resource is neither energy or water, it's our kids. And the scarest resource of the scarce resources happens to be the bright ones. We're ignoring them, saying they're bright, they'll take care of themselves, don't worry, they'll get a job or a career, and that's probably true. But they won't get what they could be capable of producing and what they could put out, and that's what we need. If we're going to compete worldwide, we've got to use our brightest and our sharpest, and eight out of 10 of our people go into entrepreneurial jobs. Those are the ones that make jobs for others, and if we don't get these kids the education and capability they require so that they can use their skills—we're not talking about the highest and brightest I.Q., that's not the answer. Anything over 135 (I.Q. points) is great, they can do it on their own. What they need is the stimulating environment that Senator Quayle mentioned earlier. The business of having a summer camp—that's great. The idea of having these kids work for corporations in the summer and helping out is tremendous. Having corporations making available their people to work with them so that they can increase productivity themselves, so they understand things like Junior Achievement—how the capitalistic system works by increasing productivity—and we need the bright ones for this.

We are a country that wastes, and you can see what we can do with conservation of energy alone. We've got to realize that we've got to utilize our equipment better, more efficiently, and think brighter. And to think brighter, you need brighter kids.

A panel of top business executives followed Mr. Cetron's dynamic multi-screen audiovisual presentation and his most provocative remarks.

Mr. James S. Kemper, chairman of the Kemper Group of insurance and financial service companies, led the industry response.

REMARKS OF JAMES S. KEMPER, CHAIRMAN, KEMPER GROUP

I think you could say very properly that what we are involved with here is a movement, a movement on behalf of the gifted and talented, and you need an active and interested constituency to create something called a movement.

It is relatively easy to develop a constituency supporting better education for underprivileged kids—inner-city kids. The villain here is ignorance, and everybody wants to find ways to help these kids to help themselves get out of the underclass and become productive, useful citizens. And the constituency here is also easy because it's politically expedient to devote large sums of money at the federal and state level to get those kids out of the underclass. But when it comes to working with gifted and talented students we're dealing with a tough one here—a relatively small percentage of young people who are exceptionally gifted. There are no villians, and as the public sees it,

there is no urgent necessity to give people who are already gifted beyond the capacities of most of us the opportunity to utilize their talents. It's a tough job (to build a constituency for the gifted and talented), and so far, at least as I have observed, the principle active constituency in support of doing something for the gifted and talented are some government agencies—Labor and Defense are two that come to mind immediately—and the fact that we're here today indicates that the Commerce Department is interested, and the educational establishment, which is a constituency, but not even all of it is what I would call an active constituency in support of the gifted and talented.

Mr. Bruce Smart, Under Secretary of Commerce for International Trade, spoke from his former corporate experience as chairman of the Continental Group.

REMARKS OF THE HONORABLE BRUCE SMART, UNDER SECRETARY OF COMMERCE FOR INTERNATIONAL TRADE

It has become increasingly clear that in a country that no longer has the advantages of wide oceans to protect its markets, or technology that cannot flow outside its boundaries, or the best interest structure, or the best education system in the world, we are pretty hopeful if we think that with 5 percent of the world's population and the world's lowest industrialized saving rate that we can somehow remain preeminent in all factors of industry—so that I think that the success of the United States economically, and the economic success of course undergirds military strength—will depend entirely on our ability to develop the gifted people for positions of professional responsibility and/or leadership over the next decade.

Obviously the gifted person coming into adulthood and moving out into the working world is principally a product of two environments; one environment is the family and the home community and the other environment is the educational system; and for those of us who are recruiting these people into work environments that do not relate to where they once were and certainly the large corporation is such an environment. These are environments that are radically different from what these young people have experienced.

So the more gifted people tend to come to us individually very successful academically but they also come with an elitist bent and occasionally with an arrogance about their skills but it is unwarranted when it is measured against the broader spectrum of talent and human competence. They also come it seems to me lacking in experiencing or skills in team play and in leadership because so much of what they have done has been judged on individual effort and they often come, because of elitism and arrogance, lacking in an appreciation of the contribution that can be made to society by people less gifted than they are, who bring a certain determination and perseverence and on whom they must depend if they are to project their ideas over a broad enough group of people to have the ideas have any particular force in the society.

What is the private sector doing about the gifted and talented? What can it do that it's not already doing?

Mr. Theodore C. Rogers, chairman of NL Industries, Inc., responded from the corporate perspective to the challenge of gifted and talented development.

REMARKS OF THEODORE ROGERS, CHAIRMAN AND CEO, NL INDUSTRIES, INC.

I worry and concern myself with the fact that we may be much more capable of adopting technology and discarding technology than we are in incorporating that technology in a change and movement of the fundamental folkways and mores of our society. Therefore it seems to me we produce the edges of severe conflict and strain. How to deal, and how to cope with those strains and conflicts, it seems to me, will become an increasingly large problem for us and the world.

We need the talent and the skills and the creativity to cope with these changes and to carry out and mold an efficient and peaceful world society.

To state the obvious—it's been stated over and over again—we miss about half of the gifted students, and those that we do identify don't really have the resources made available to them to enrich them and challenge them and to motivate them in school. Hence, we have quite a few dropouts who are in fact gifted children. The world needs, and government and business must assist in the development of programs for identification and enrichment of the gifted. We need personal involvement, this isn't something you throw money at. It's something that you have to become personally involved with.

Mr. William Poduska is one of the founders of Prime Computer Co. He then founded Apollo Computer Co. Today he is heavily involved in the startup of his third computer firm. Bill Poduska's remarks were particularly thought-provoking. I quote from them at some length:

REMARKS OF WILLIAM PODUSKA, FORMER CHAIRMAN OF APOLLO COMPUTER, INC.

I'm trying to gather a bunch of people to start a new enterprise, and I can tell you what I look for in the people and the culture of this organization that we're building. I identify six nouns, three of which were stolen from Bob Townsend, my favorite author in the management business. Six nouns that identify the characteristics that I'm looking for in the people that I want to be with me to build this next major enterprise in the computer business.

First of all, I'm looking for excellence. I want people to do things well today. I want people of action. Today's the time to do it, not tomorrow. I don't see why anything can't be done today. I'm looking for people of ego, people who believe in themselves. Not the blustering kind of ego that's born mostly of insecurity, but that thing that's born of inner confidence that says I know what I'm doing and I'm going to do it. Muhammed Ali said one time that it ain't bragging if it's true. The converse is probably true also, that it is bragging if it isn't true.

I want people of ethics. I want people who will not knowingly do any dishonorable thing, not with customers, not with vendors, not with investors, not with employees, not with anybody. Don't con anybody, least of all your family. I'm looking for justice within the organization. I want to fairly award people who put out. I'm going to try to make 50 millionaires out of this new company, but more than the money, they'e going to look in the mirror in the morning and say "that person there did it." Of course, the opposite side of that is true, too. If the enterprise doesn't make it, the reason it didn't make it is staring you right in the face.

Finally, I'm looking for people who want to have some fun. Joy of today—have a laugh in the afternoon or hop into a tavern, or whatever, but also that long-term joy that says "we've done something good, we've really done something good."

If you want to talk about leadership and talent, those are ones I'm looking for. And you notice what I didn't say? I didn't say IQ. Sure, I want bright people, but what is more frequently told than the story of the unfulfilled promise of the genius? I didn't say I'm looking for accomplishment. I'm willing to take raw material. I'd rather have a few of them to look at some books on the subject of management. I would direct your attention to Bob Townsend's book "Up The Organization" and the sequel, "Further Up the Organization," the man has a sense of humor. He seems to be an iconoclast who puts these things into perspective.

Now, with regard to leadership—that's what this seminar is about (the) leadership of the future, the gifted in a changing society. Let me tell you what I think about leadership. I'm an M.I.T.-type jerk—I like the Sloan school of M.I.T., at least some of the things they do. They have a little saying—they talk about the Business Trinity, the issue of what command is about. They say command falls into three broad categories: administration, executive skills, and leadership. It's easy enough to define what administrative skills are. It may not be so easy to acquire them, but I think it's relatively easy to define them. But leadership—ah, that's a different sort of thing, isn't it?

What is it to lead? It must mean something that is not obvious, otherwise all would do it. It must have something to do with courage and determination. It must have something to do with those short human words that have these large meanings like "love," "faith," "hope." Well, I tell you, I heard a Persian proverb—I refuse to call it Iranian, it's always Persian—a Persian proverb that talks about leadership and talks about it in terms of those who know, have knowledge, and those who know that they have knowledge, and it goes some thing like this: "Those who know not, and know that they know not, are students—teach them. Those who know and know not that they know are followers—lead them. Those who know not, and know not that they know not, are fools—avoid them. But those who know and know that they know are leaders—follow them.

So my friends in the audience, and especially the youngsters who are here, I say to you: know, and know that you know. Take ownership of problems, make commitments to solving these problems. But in all of your doing, live also. Enjoy the life that we have. I can find no better words to describe that than the words written in a poem turned into song by James Taylor called "Secret Of Life." It starts out with the line: "The Secret of life is enjoying the passage of time. Any fool can do it. There's nothing to it. As anyone knows, love is the only road. Love yourselves and the work that you do, and we'll all live a little better."

Mr. William McGowan, chairman of the board and president of MCI, the pioneering telecommunications company, contributed to the response from the point of view of his experience in

high tech and entrepreneurial enteprises.

REMARKS OF MR. WILLIAM MC GOWAN, CHAIRMAN OF THE BOARD AND PRESIDENT OF MCI

The American business community, which must go through a major change in the way it operates, the way it structures its organization, the way it makes decisions, has an excellent chance of doing so if it takes advantage of the people who are capable of coping with such a dramatic change, and they are typically the (gifted and talented) youngsters who are the subject of your concern.

We were in a position where one of our major motivations, one of our major tasks in life was surviving. It was in that period that I discovered, simply because I had no choice, that many of the attributes that have developed over the course of years in a substantial number of corporations—certainly not all by a long-shot, but a substantial number of them—were developed, probably all with good intentions, but also with the result that they were typically rather unattractive places for a certain group of people. The group of people that it was unattractive to turned out to be the group of people I decided to try to seek out. When the period was over, through dint of some decisions, there was in front of MCI a great opportunity.

And so therefore we decided that since we were looking for individualistic type people, people who wanted to be individuals, who did not want the typical corporation, I had the advantage of not needing to add the accoutrements of larger corporations that typically you might find.

We encourage that by giving past credit for seniority and for all of the things that they do. We also said that we cannot afford to be a home for you, but we explain to them very carefully there is no home here. If you can't figure out the rest of your life and the rest of your social life and the rest of your community life, then you're in the wrong organization. We don't have credit unions, we don't have teams, we don't have Christmas parties, we expect the individual to function for himself and not rely upon the company.

In being in that position, I think we did collect a group of people who were interested in a challenge, who did not wish to spend the time learning how to adapt to somebody else's way of working, who wanted the opportunity to grow as fast as they could go. We have in the company still a policy that says there will never exist a seniority list, because I don't wish someone who comes in today to think that therefore, they are less than someone who was here 10 years ago.

Mr. Donald Seibert, retired Chairman of J.C. Penney Co., and former president of the national United Way, stepped to the microphone next to lead a panel discussing the programs and project of the National Business Consortium to tackle the basic problems faced by gifted and talented youth as they move into the work force.

REMARKS OF DONALD V. SEIBERT, RETIRED CHAIRMAN OF J.C. PENNEY CO.

I believe significant percentages of school dropouts and juvenile offenders are actually gifted young people, which is a tragedy. Many of these people have not been identified and have not been cultivated and worked with and, in effect, are dropping out of society, let alone missing the opportunity that they have to contribute. For our country to remain competitive, to achieve dominance in the years ahead, we obviously must use our best resources. They are clearly our people. We must have bright minds to tackle tough problems. Dominance in the future will not come from simply being producers but in being creators, and we must establish environments of creativity in which great minds can flourish.

For a powerful conclusion to the half-day seminar, Dr. Larry Eastland returned to the podium to spell out the challenge.

REMARKS OF DR. LARRY EASTLAND, PRESIDENT OF EASTLAND & ASSOCIATES

What we have in the Consortium is more than just concern, because concern must be translated into action. There must be specific, measurable kinds of programs. There must be outcomes to these programs that one can look at and show that indeed, to business people at least, of which I am one, and volunteers, of which I am one; we've got to be able to see in all of this that somewhere on the bottom line that something is succeeding, because it's been said before that of the programs that we see now that train leadership, separate from the educational system, many of them do not apply to the kinds of things that we're concerned about. Unfortunately, there are very few programs that are specifically aimed at developing the knowledge, skills, and abilities of young people. What we have to become is the invisible. We have to, as business people, involve ourselves in providing the kind of invisible curriculum for the young people of this nation. We should not view dollars and resources that we put into the gifted and talented as being competitive with dollars that we put into programs for the general populations in the schools or dollars that we're putting in to help the disadvantaged, that one taking away from one is one that we then give to another. We should look rather at the bottom line dollars that we give, and time and talent that we give to the gifted and talented as being our hedge in a world of competition. We are competing with the gifted and talented of Japan and China and Korea and Singapore and Mexico and Hong Kong and Brazil and Argentina. That's what our dollars are going into.

What we need to teach our gifted and talented are very basic kinds of things, and in order to do this, the national board and the Consortium have been created. The national office serves as a catalyst, as a clearinghouse for ideas and information. There is no national clearinghouse today on gifted and talented on what is going on across the country, the differences in programs, what kinds of knowledge and skills being taught, and what's being received.

The second task of the National Consortium is to identify the corporations and institutions at the local level that are willing to make a commitment, willing to make the commitment of their time and their talents. What we do is to identify those companies that have the vision that it takes to recognize that they must begin to contribute, and that that contribution will come back not just to their corporation, but to other companies in America.

The third goal that we have, and one that we're going to start on very shortly here, is to do a national needs assessment of the gifted and talented students so that we can specifically target the resources that are brought to bear by the consortium itself to the specific needs. If, in the gifted and talented programs in the country, 70 percent are working on computer programs, then there's no reason for us to do that. But if there is an area where we are deficient, those are the areas that we need to target our resources, and we need to be able to feed back into the businesses where that is.

The third is to develop pilot programs, specific pilot programs that will work. We are developing a pilot program right now which we hope to be able to start this coming summer. It will be a national business camp in which we can, on a regional basis, target gifted and talented programs for basic economic competition and leadership education. The point is that we have very little hands-on experience with young people who have the talent and creativity but have yet to have that organized to understand how to take an idea and get it on paper and financially plan it and know the relationship of the economic structure to the creativity structure. Our national business camp will be able to measure numbers of students, numbers of skills that we can produce through our techniques, and particularly, with the help of the corporations' research and development offices, so that the skills that we're producing for tomorrow are the skills that are needed tomorrow.

Dr. Dorothy Sisk, professor of special education at the University of South Florida, spoke for the Nation's teachers of the gifted and talented.

REMARKS OF DR. DOROTHY SISK, PROFESSOR AT THE UNIVERSITY OF SOUTH FLORIDA

As I listened to all of you talk, I couldn't help but think about how many young people that we have who are unmotivated, who are not identified in even the few gifted programs that we have, because the regular program doesn't challenge them. I oftentimes find, too, that as I look at the gifted programs that it's really a little bit more of the same. In fact, I chuckled ruefully this morning when the young man said, "Well, in our program we just do harder work or more work." I think that's part of what the Business Consortium can begin to model for the nation, and that is that we need a different kind of program. We need the types of programs where youngsters can focus in on thinking. I certainly concur with all of the emphasis on becoming computer literate. I also concur with something that maybe we didn't even mention or mean to mention, and that's the fact that we need more people who are mentors who can model the kind of risk-taking, the kind of step forward, and get things done that we saw this morning with the individuals.

TRADE TALKS: AMERICA BETTER LISTEN

Mr. BRADLEY. Mr. President, 2 weeks ago while we were on Thanksgiving recess, the 90 member countries of the General Agreement on Tariffs and Trade [GATT] agreed to establish a preparatory committee to plan the eighth major round of multilateral trade negotiations since World War II. This is a major step forward and those talks could begin next fall.

The trading system is in disarray. international cooperation is at its lowest point since World War II. With

discipline lacking, a full scale trade war is a distinct possibility. Pressures for trade restrictions abound because of current unemployment problems. And those pressures will increase because of the labor adjustment problems inherent in heightened international competition and in the transition from old to new technologies. Overvaluation of the dollar also increases the pressure for protection in this country.

Yet, even as the trading system faces great dangers, opportunities are evident as well. The developing countries, the fastest growing markets for industrial country exports, still have vast pools of unemployed or underutilized resources. Integrating the LDC's more fully into the trading system will be the greatest challenge of the coming decade. If this were to be accomplished, the world economy would get a sorely needed stimulus to growth comparable to the one the world enjoyed after World War II when the United States used its dominant economic power to promote trade liberalization in a series of trade negotiating rounds. For over a generation from 1950 to 1973, the world economy experienced unprecedented growth averaging 3.3 percent per annum. Trade liberalization was a major factor creating that growth and helped spread it around the world.

But those real income gains gave way to stagnation and unemployment in the mid-1970's. Now the trading system, from which all countries have benefited, is under severe pressure. Countries are pursuing more nationalistic trade policies and some are on the verge of adopting the beggar-thy-neighbor policies which characterized the Depression of the 1930's. I participated in a small group of world economic leaders appointed by Mr. Director-General of GATT to study the trading system. We concluded that "today the world market is not opening up; it is being choked by a growing accumulation of restrictive measures. Demands for protection are heard in every country, and from one industry after another." If present trends continue, the trading system could collapse. The new negotiators could reverse that trend. We in Congress have a special responsibility to oversee these negotiations. The Constitution gives to Congress the authority to regulate foreign commerce and to lay and collect duties. The President's authority on trade derives from a congressional delegation of authority. Next year we will debate how and in what form that negotiating authority should be given. The outcome of that debate will determine how ambitious these new negotiations will be.

In the meantime, I urge the Members of Congress to become familiar with the issues, problems and prospects for these negotiations. According to a timely new book by C. Michael Aho and Jonathan David Aronson, Trade Talks: America Better Listen! published by the Council on Foreign Relations in New York, these new negotiations will be more difficult, more complicated and will last longer than any in the past. They could last a decade.

We and the administration have a great deal of work to do in establishing priorities, in developing strategies for maximizing U.S. leverage and in ameliorating the domestic consequences any liberalization we pledge in return for greater market access overseas. We also have to decide how to structure the negotiations in order to hold them together and make progress over the course of a decade. Surely without high-level political attention and active private sector support these negotiations will not succeed. Their book has useful suggestions in this regard.

I highly recommend this new book as an excellent overview of the players, prospects and problems of the new trade talks. The authors have drawn a blueprint for the changes that are needed in the trading system if it is going to survive. I ask that the concluding chapter of the book which details their recommendations, be printed in the RECORD.

TRADE TALKS: AMERICA BETTER LISTEN!

COUNCIL ON FOREIGN RELATIONS

CONCLUSION: OUTLOOK

Trade talks can succeed. If countries cooperate, higher growth and greater discipline are possible. These two goals go hand-in-hand. Neither is possible without the other. No country will sacrifice its own growth prospects for the insubstantial benefits of stronger trade rules. Yet national and international growth prospects will suffer unless the trading rules are overhauled and made relevant to today's fast-changing world economy. To get ready for the 1990s, trade talks will have to address and make progress on both fronts at once.

The ten policy challenges described in chapter 2 will make new negotiations different and more difficult than those in the past. Growing interdependence, the decline in the ability and will of the United States to dictate terms, the proliferation of industrial policies and the emergence of excess capacity in many sectors at a time when world economic growth is slowing puts profound pressure on negotiators. In addition, negotiations will be different because traditional sectoral distinctions are breaking down, global corporate competition is changing, new types of trade barriers have replaced tariffs as the focus of attention, services need to be addressed, and product-life cycles are shortening as the pace of change accelerates. These challenges make it more difficult to build domestic coalitions favoring trade liberalization, particularly because employment and adjustment problems are critical everywhere and are related to broad domestic reforms which ultimately will determine whether trade can be liberalized.

As new trade talks begin, opportunities and pitfalls abound. We expect progress because the alternative is deterioration of the trading system and with it the world economic system. How long the system will hold together without reform is impossible to predict, but few careful analysts believe that the trading system can survive indefinitely without a major overhaul. However, no country, including the United States, is willing to accept the brunt of the costs of renovation. Each would like a free (or at least a subsidized) ride. That's impossible. Therefore political leaders around the world will have to summon up courage and persuade their countries that they must contribute something if everyone is to benefit.

The most critical moves must come from, and the most ominous signs are coming from, the United States. Over 300 protectionist bills have been introduced into Congress in 1985. Members of Congress are currently unprotected from constituent requests for special treatment. They are only hearing one side of the story. The overvaluation of the dollar has eroded the domestic consensus in favor of trade liberalization as exporters facing unprecedented competitive problems are not lobbying for open trade. GATT is not now effective as a means to deflect special interest requests. The feeling is widespread on Capitol Hill that the United States is not vigorously enforcing its existing trade laws. Congress wonders who is in charge of trade policy. Sentiment is brewing to pass some legislation restricting imports and/or rewrite U.S. trade laws expanding the definition of unfair trade practices and to make retaliation mandatory when unfair trade practices are found.

In the face of the possibility that Congress will pass some form of restrictionist legislation, President Reagan has reassessed his trade policy and overall international macroeconomic policy. He instructed the Secretary of Treasury to work together with the other major countries to bring the dollar down. This represents a change in the Administration's position. He has also instructed his USTR, Clayton Yeutter, to work with Congress to put together a trade bill with revisions in U.S. trade laws acceptable to the Administration and with a request for negotiating authority for a new round of trade talks. Whether a trade bill will pass in a form acceptable to the President is uncertain. Much bargaining needs to be done. But at least the process is beginning in earnest. Whatever else emerges from the President's new trade strategy, new trade talks will be a central element. And even if Congress should pass a restrictionist bill, the President has said he will veto it and the veto can be sustained with only 34 votes in the Senate. Passage of a restrictionist bill with a Presidential veto might not be all bad. Indeed, a veto with the threat of an override might be just the leverage the Administration needs to get recalcitrant countries to move forward in negotiations.

The President's strategy, even if arrived at late in the game, is a sound one. A new round of trade talks will both begin to address the manifold problems of the trading system and provide protection for legislators confronted with special interest requests. To take unilateral actions would jeopardize the multilateral talks. But the Congressional pressures are not going to go away, and the Administration is going to have to re-establish its credibility on trade issues by vigorously pressing other countries. If the priorities for action are selected carefully, that could also have the salutary effect of mobilizing domestic interests behind the Administration's strategy. But only in a multilateral context can such

strategies be effectively employed. Then once in the round, the Administration will have to begin to address the labor adjustment problems inherent in granting more market access to import competition. Although the President is not out of the woods yet, he is moving down the right path. What remains to be seen is whether he has the commitment and resolve to see it through.

To revitalize the trading system, rhetoric will have to give way to pragmatism. Ultimately, a package that is perceived as fair to all major interests needs to be developed. That is still years away. For now, countries must get things started one step at a time. We believe that the chances of increasing growth and strengthening trade disciplines will improve if political leaders and their negotiators keep in mind these eight observations.

First, promote growth and discipline; worry less about free trade and protectionism. Progress is more likely if the focus is on positive goals instead of sterile debates. Trade liberalization enhances economic growth. Greater discipline can reduce uncertainty and lead to an expansion of trade, investment and growth. By contrast, free trade, like absolute zero in physics, cannot be attained. Freer trade is all that can be achieved. In an interdependent world where sectoral boundaries blur and national industrial policies conflict, free trade is only useful as an ideal to help in making comparisons. Protectionism is also relative. Legitimate social, cultural and security concerns will always persuade governments to protect key sectors to varying degrees. Countries will continue to promote their own development even if this means protecting their firms against foreign imports and subsidizing their firms' exports. In order to protect against widespread abuse of these practices, negotiators need to develop trade practices and procedures that are responsive and respected so that trade issues are resolved with a minimum of friction. Otherwise the system's credibility will continue to suffer.

Second, learn to live with complexity; stop trying to revolt against interdependence. The world is changing. A return to a simple, isolated existence is impossible even if it were desirable. The world in which the GATT was created is gone forever. As interdependence increases, domestic economic policies cannot clash successfully with world economic trends. Nations can no longer follow independent trade, monetary, and investment policies. Shifting corporate structures and the emerging world information economy provide great opportunities for growth and job creation but are making regulation much more difficult to fine tune domestically or internationally. The line between goods and services is getting harder to distinguish. Similarly, tariffs have declined in importance as obstacles to trade and have been replaced by various sorts of nontariff barriers. Too often government officials and negotiators are trying to solve yesterday's problems. Such myopia creates as many problems as it solves. Therefore, negotiators need to learn to deal with the world as it is and as it is becoming and not base their actions and positions on a view of the world that is no longer relevant.

Third, make sure the underlying principles are right; stop being overly rigid and legalistic. The increased complexity of the world economy and of world competition makes it necessary to focus more on general principles and less on details. Unless the trading system is moving in the right direction, nothing much will help. Because the rate of economic change is accelerating, detailed rules are likely to become outdated and inappropriate more rapidly than in the past. Overriding principles (e.g., nondiscrimination, transparency and reciprocity) with mechanisms for updating rules are necessary to keep the trading system vital and relevant.

Some computer programs now rewrite themselves. They learn from experience and adapt to improve their performance. For example, chess-playing computer programs now defeat all but the best players in the world. The same concept needs to be introduced to trade rules. Trade rules cannot be written in stone. They must be allowed to adapt and change as the world economy and the world trading system change. Following the letter of the law is not helpful when the world for which the law was designed is gone. The United States remains the foremost advocate of a legalistic approach to trade rules. This approach needs to be tempered. The application of rules should depend more on the circumstances of the problem. Nevertheless, ways need to be found to prevent cheating. In the future, prudent application of safeguards and escape clauses may have to replace strict application of rules. However, in emphasizing adaptability, care must be taken not to sacrifice predictability. That is why it is not contradictory to strengthen mediation and conciliation procedures and mechanisms for seeking redress and for enforcing norms.

Fourth, start the process of reform now; don't wait for the crisis. In the past, major reforms were only possible in the face of crisis or collapse. Interdependence makes risking collapse before instituting reforms particularly dangerous. Today, all countries would suffer in a collapse. If depression strikes the United States and the major industrial countries or if the major LDCs are unable to service their debts, all countries will suffer the consequences. Work needs to begin to extend and adapt the trading system to cover the areas that are not now covered within the GATT. It is equally important to pull some of the sectors that have escaped from GATT discipline back into the system and to strengthen GATT discipline. Each country can contribute something now to preserving and promoting the general good, or they may have to pay much more later to restore a broken system.

Fifth, U.S. leadership is critical. Some one must take the lead—only the United States can do this and it must be done at the highest levels. Ronald Reagan needs to be personally involved. As former U.S. Trade Representative Robert Strauss has put it, the President's popularity is not to be saved; it should be spent in order to achieve breakthroughs on trade. In addition, the President must make clear that he has confidence in and will actively support his trade negotiator. Moreover, since the United States will have a new President before negotiations are far under way, the next President and perhaps the one after that will need to make trade a continuing priority. This is needed domestically, otherwise Congress might seize the initative and try to set trade policy. For if U.S. leadership wavers or falters, other countries will pick up the cue and efforts to move forward will be undermined.

Sixth, the United States cannot lead alone. Even as the United States must redouble its efforts to lead, others need to increase their contributions as well. As power diplomacy has faded, the need for cooperation, coalitions and bargaining increases. Unless in today's highly pluralistic world the other pillars of the system, the European Community and Japan, accept their responsibilities, no progress is possible. They must take a less parochial attitude and increasingly assume the burdens and responsibilities commensurate with their size and stake in international trade. This means that the EC should stop holding efforts at trade liberalization and strengthening discipline hostage to the resolution of existing internal and external disputes. For Japan, this means taking further unilateral steps to open its markets and, more fundamentally, to change the social and political attitudes that have made its market so impervious to outside penetration and to dispel the widespread perception that it uses unfair practices to gain competitive advantages. The NICs must also accept that they have responsibilities for maintaining the system and cannot expect to get the benefits of access to industrial-country markets without doing their share to open their markets and support trade rules. Since fundamental social policies and objectives are involved in all the major countries, other heads of state must become active participants. A far-reaching global bargain can only be struck at the higher levels.

Seventh, reforms must be phased in slowly; domestic political constraints are growing, not decreasing. Even as we write of progress, it is clear that reform can only be implemented in an ordered, step-by-step manner, countries will accept more competition and discipline, but only a little bit at a time. Domestic accommodations are needed and domestic adjustment needs time to work. However, limits and schedules have to be developed for adjustment so that uncompetitive sectors are not protected indefinitely to the detriment of their own consumers and the rest of the world. Long phase-in periods are another reason to begin the process now and not delay. Both the long phase-ins and the long duration of the negotiations will also require flexible, continuing processes in GATT to monitor developments and to deal with potential problems before they become full-blown.

Eighth, mobilize the stakeholders in an open trading system. The fate of the trading system depends upon domestic political decisions. Unless the key stakeholders are mobilized to encourage more liberal trade at home and abroad, long-term trade prospects will dim. Multilateral negotiations can help to mobilize the stakeholders in all countries, but internal reforms are needed as well. Trade negotiations are held among the nations of the world, but fundamentally they involve internal disputes with distributional consequences. To maximize the chances of progress, the round should be structured to highlight those domestic conflicts of interest. Internal reforms which increase domestic awareness about the positive as well as the negative consequences of trade liberalization would help the negotiations to move forward.

Countries should adopt open procedures and require cost/benefit analyses of changes in trade policy similar to the environmental-impact statement now required in some countries. Where there are negative consequences for workers, firms, and communities, governments have a responsibility to ameliorate the adjustment burden for those who suffer the consequences of trade liberalization. But that amelioration should be done in such a way that the govern-

ments' responsiblity to the other stakeholders in trade liberalization is also met. Internal and international reforms would be mutually reinforcing. Stronger international discipline would reduce the resort to unilateral action. Internal decisions resulting in fewer unilateral actions would enhance the credibility of the international discipline. Both would work hand-in-hand to restore confidence in the efficiency and the efficacy of the trading system.

Needless to say, a great deal needs to done to reform the international trading system. It will not be easy and it will not happen overnight, but the stakes are too high not to try.

Institutions, like human beings, seldom mark time. The GATT will observe its fortieth birthday in 1987. Much has changed since its inception. But now, as then, the world is sorely in need of more international cooperation on trade matters. In the absence of efforts to make progress on the important international trade issues, the system will regress further. If nations of the world do not begin to focus on these pressing trade problems, the world faces the possibility of a repeat of the 1930s, when the collapse of the trading system contributed to the length and severity of the depression.

Although the problems confronting the trading system are grave, failure to deal with them is a prescription for disaster. If all countries would put aside their longstanding differences and be bold and forthcoming, all countries will gain and a better future is possible. Let us begin that long arduous process.

ARIZONA VOLUNTEERS WHO ASSISTED EARTHQUAKE VICTIMS IN MEXICO CITY

Mr. DECONCINI. Mr. President, at 7:19 a.m. Thursday, September 19, "El Terremoto"—the earthquake—unleashed its fury on the largest metropolitan area in the world, Mexico City. This calamity befell our good neighbor to the South with such devastation and personal tragedy that many in our country suffered as well. The cultural roots between Mexico and the United States made this natural disaster much more personal than most others. The outpouring of support from this country, particularly my home State, reflects our sense of compassion for our friend to the South. With the dust having settled, it is now appropriate that we recognize several displays of enormous humanitarian effort.

Amid the confusion, the dust and the isolation, the world response to our friend in need was virtually universal. In the forefront of these efforts was the individual Arizonan. The spontaneous reaction that resulted from the devastation is indicative of the deep-seeded emotional ties between the two countries. My office became the focal point of some of the relief efforts. It is to these efforts and volunteers that recognition is most deserved.

With the international and domestic telephone communication system severely disrupted, my State offices were flooded with calls from distraught constituents with relatives and friends in the vicinity of Mexico City. From the need for information arose volunteer staffed crisis information centers coordinated through my State offices. After these crisis information centers were established, several Arizona ham radio operators began relaying information from their counterparts in the quake area. During the second day of operation, Phil Richardson, a Tucson area ham operator, proposed utilizing his local club to establish a link with Mexican ham operators so that Mexico City telephone numbers could be contacted and the information relayed back to desperate Arizonans. The coordinated efforts of these individuals, in combination with the local media, provided the conduit for information that helped alleviate the concerns of hundreds of distraught relatives.

These efforts were further enhanced when the domestic phone system became operable 6 days after the initial quake. Several residents of Nogales, AZ, and Nogales, Sonora, sprung into action with their own impromptu communications system. Coordinated by my good friend Irma Maytorena, they relayed messages between relatives and friends in the United States and Mexico City.

Several U.S. companies that had facilities in Nogales, as well as Canacintra, the Industrial Chamber of Commerce of Mexico, displayed overwhelming compassion by not only donating office space and phone lines, but also assuming the significant expense for the hundreds of long distance calls. The actual phone connections to Mexico City were successful in large part due to the persistent efforts of the phone operators. The Mexican National Phone Co. put these operators at the disposal of our volunteers for 14 hours a day.

These are just a few examples of the total effort that was undertaken on behalf of our stricken neighbor. I was proud to be a part of it. Mr. President, I ask unanimous consent to have printed in the RECORD the names of those individuals who assisted me in my limited endeavors to offer assistance. These individuals unselfishly gave of their time and resources to help. This body's recognition of the individuals listed below is a fitting reward for a job well done.

There being no objection, the names were ordered to be printed in the RECORD, as follows:

ASSISTING VOLUNTEERS

Irma Maytorena.
Jannette Marie Raptis.
Maria Sophia Orduno Valle.
Delia Saspe de Ruiz.
Maria Antonieta Alvarez Gaxiola.
Yolanda Varona.
Rosa Maria Haas.
Martha Castro.
Lester H. Van Dyke.
William Wallace.
Roberto E. Hernandez
Luis A.G. Larios
Mike Rico.
Ann Bressi.
Roberto Borboa.
Rhonda Nichols.
Rene' Leglue.
Lupe Klein.
Patrick Wilch.
Betty Medina.
Mollie Smith-Eno.
Wendy Hakes.
Marta Ann Alcumbrac.
Wendy Gerlach.
Darren Clinton Graybill.
Deborah Lynn Teeler.
Brian Laird.
Jim Posner.
Ken McCollester.
Wes Soderquist.
Brad Rich.
Jeff Barker.
Yolanda Arenas.
Jackie Andrew.
Wendy Hannah.
Blanche Carter.
Willa Rackley.
Asociacion De Maquiladoras De Sonora.
Canacintra.
Murt-KB7NE.
Stan-K7KNP.
Doug-WA7IGV.
A.J.-KB7KZ.
Gerard-K7SPH.

Telephono de Mexico.
All Operator's for Telephono de Mexico.
George Kalil.
John Anaya.
Judy Anaya.
Central Bag and Supply Company.
Kalil Bottling Company.

TAX REFORM

Mr. KASTEN. Mr. President, after the dramatic vote in the House Monday, the focus in the tax reform debate shifts to the Senate.

It is up to us to draft a final package that is truly profamily, projobs and progrowth; that remains revenue neutral; and that can gain enough votes to pass.

I believe we will prove ourselves equal to that challenge.

We will rise to the challenge because we are beginning to realize how crucially important tax reform is to the future of this nation.

True tax reform could restore equity and simplicity to our Tax Code and fuel a growing economy well into the 1990's.

Under our current Tax Code, low-income families face steep tax barriers preventing them from climbing the ladder of success. Small businessmen and women are hit by tax rates up to 50 percent, while large corporations play the Tax Code game and pay no taxes at all.

Loopholes in the Tax Code totalled $36 billion 10 years ago. Today, they are at $360 billion. That mean as equal incomes don't pay equal taxes. And that drags our economy down.

It is time for a fundamental restructuring of our Nation's Tax Code.

The package passed by the House provides us a vehicle with which to work. But many changes must be made. I am particularly concerned that the following principles be included:

First. The top tax rate for individuals should be no higher than 35 percent President Reagan has affirmed his support for this goal.

Second. The personal exemption should be raised to $2,000 for all taxpayers, whether they itemize or not. There is no basis for discriminating against a family simply because it decides to itemize its expenses rather than take the standard deduction.

Third. Deductions should not be repealed until tax rates are lowered. Under the House bill, many taxpayers would see their taxes increase in 1986 because deductions are eliminated on January 1 and rates are not lowered until July. This is unfair; it could slow economic growth; and it is hardly the objective of true tax reform.

Fourth. The business tax changes should not bias the Tax Code against capital-intensive industries. The House package would hit especially hard at the kind of capital-intensive industries that predominate in the Midwest. I believe the business section of the Tax Code should not be biased for or against any specific industry. Our goal must be to provide a level playing field for all.

Fifth. Tax reform must be revenue neutral. It should not become the vehicle for an election-year tax increase.

Each of these principles is crucial to a balanced tax reform package.

Mr. President, next year we will have a chance to do something dramatic here in the Senate. We will have the opportunity to fundamentally restructure our Nation's Tax Code to restore fairness and simplicity and equity, and to extend our current economic recovery to the turn of the century.

A chance like this comes to us very rarely. Let us use it wisely. The American people deserve nothing less.

ERISA AMENDMENTS—H.R. 3500

Mr. DECONCINI. Mr. President, I have been particularly interested in following the ERISA amendments of this bill and how they impact on the rights of troubled companies, and entities in bankruptcy. Initially, I must admit I was greatly troubled by some of the provisions that were in the Senate version of the budget reconciliation bill, S. 1730, but I was even more concerned about some of the more far flung amendments contained in various House proposals. My concern, in part, was prompted by not knowing exactly what the various bills were trying to do and because the Judiciary Committees of Congress, which traditionally handle bankruptcy related matters, had not been involved in any degree in the development of this most important legislation that has a dramatic impact on bankruptcy.

I have been encouraged and applaud the process that has taken place since early November, when the Judiciary Committee became aware of the provisions in the bill dealing with bankruptcy, whereby members of the Judiciary Committee staff and other interested parties in the bankruptcy field have met with the Labor Committee staff and staff of the Pension Benefit Guarantee Corporation to discuss the various viewpoints on this legislation. I believe this process has resulted in a final product which is considerably better and more equitable for all who will come into contact with it.

I remain concerned about the impact of certain provisions of the bill on employer companies with sizable unfunded pension liabilities. I do not believe Congress has adequately focused on whether or not the increase in liabilities to the PBGC will make it more difficult for these companies to obtain credit or to raise cash by selling divisions, assets or subsidiaries for badly needed money to pay creditors. I am fearful that credit for troubled companies will be even more difficult to come by when the lender must take into consideration the augmented unfunded pension liabilities of a potential borrower. I can only hope that we are not passing legislation that will have the impact of forcing more and more companies into chapter 11 reorganization proceedings rather than be able to successfully workout their financial problems outside of bankruptcy. On the same theme, only experience will tell us if we have placed such an enormous burden on debtors with unfunded pension liabilities that we negate any hope they have of a successful reorganization and effectively have denied any possibility of meaningful payouts to unsecured creditors in cases involving unfunded pension liabilities.

I have reviewed the provisions of the bill as they impact on companies in chapter 11 of the Bankruptcy Code and I am satisfied that the bill does not intend to couple any new liens or priorities with the increase in liability to the PBGC from 30 percent of net worth to 75 percent of unfunded pension liability. I am also assured that the bankruptcy court will retain exclusive jurisdiction over plan terminations for companies in chapter 11 and that the termination during the pendency of a bankruptcy proceeding does not create any administrative expense priority. Finally, I am satisfied that new section 4069 on evasion of liability, is intended to be narrowly construed and applied only to fraudulent transactions, such as those where inadequate consideration is paid to a distressed company for the sale of valuable assets.

MICHAEL STERN

Mr. CRANSTON. Mr. President, I want to take this opportunity to pay special tribute to a member of the Senate staff who is leaving after over 17 years of service in this body. Michael Stern has worked for the Senate since 1968. He has served as a longtime assistant to Senator LONG; in that capacity he has served as the staff director of the Senate Finance Committee from 1973 through 1980, and since 1981 as its minority staff director.

Michael has been an invaluable resource to members on both sides of the aisle on the Finance Committee and in the Senate at large. His breadth of knowledge, his wise counsel, and his patience in helping carry out the will the Senate are well-known to many, if not all, Senators.

Michael has on many, many occasions assisted me and my staff in working out complicated problems within the jurisdiction of the Finance Committee. He has always been a true professional in every sense of the word, always willing to help in an objective and thorough way and lend his considerable expertise to the tasks that needs to be performed.

Michael has left his mark upon countless measures acted on by this body, but I recall perhaps most vividly his dedication and commitment to helping gain passage of the 1980 Adoption Assistance and Child Welfare Act—legislation designed to improve the lot of America's forgotten foster children. This legislation was of special interest to me and I recall that—in sharp contrast to the interest displayed as to many other issues before the Finance Committee—there were only a handful of outside groups lobbying for its passage. Nevertheless, Michael put in countless hours and boundless energy helping make sure that this landmark legislation became law.

Michael Stern has served the Senate and the Nation extraordinarily well. My staff and I will miss him deeply. I know that his exceptional legislative and analytical skills, his vast experience and knowledge in the extremely

diverse subjects under the Finance Committee's jurisdiction, his keen and insightful mind, and his deep sense of public commitment and public trust will be missed by all who have worked with him.

We wish him all possible success in his new endeavors and have no doubt he will achieve the same success in the private sector that he has achieved in his long career in public service.

CENTRAL AMERICA COUNTER-TERRORISM LEGISLATION

Mr. CRANSTON. Mr. President, during the next session of Congress, the Senate is expected to consider S. 1915, legislation which would provide $22 million in "counterterrorism assistance" to four Central American countries.

This measure represents a compromise reached through protracted bargaining among members of the Foreign Relations Committee. The compromise has been difficult because the legislation deals with one of the very elements in the region that has repeatedly been guilty of abuses of human rights in the past, the national police forces. In 1974, Congress terminated a similar "public safety" program begun in the late 1950's because of evidence of abuses by some of the police officials trained under the U.S. program.

Originally, the Reagan administration made an urgent request for $54 million in counterterrorism assistance. That proposal would have set up an open-ended program which had few restrictions on the expenditure of funds. Because of the history of the public safety program, and because human rights abuses—from the left as well as the right—continue in Central America, I had serious reservations about supporting this legislation.

The compromise establishes a 1-year program providing $22 million in counterterrorism assistance to El Salvador, Costa Rica, Honduras, and Guatemala. Of that total, $1 million will go to a witness protection fund to aid those providing information or other assistance against terrorist activity. In an effort to avoid a repetition of past abuses, the legislation includes numerous restrictions. Before any funds can be given to a country, the President is required to report to Congress twice over the next 12 months and demonstrate that substantial improvements have taken place in that country's human rights situation and in its efforts to set up police and judicial institutions independent of the military. A separate certification is required for Guatemala to demonstrate that an elected civilian government is in power and has made substantial progress in this area after assuming power.

In addition, the General Accounting Office [GAO], an investigatory arm of the Congress, is required to report three times to Congress over the next year on the progress made by each country receiving this U.S. assistance in eliminating human rights violations; in creating law enforcement and judicial systems which promote and encourage the prosecution of criminal acts; and in professionalizing its independent law enforcement agencies. Intelligence agency participation is barred, except for U.S.-based training, and there is a 10-percent cap on lethal weapons expenditures.

While I believe we are taking a risk in authorizing this program, I believe the risk will be worthwhile if the program results in a significant contribution to the professionalization of the police and security forces and the elimination of human rights abuses in the countries receiving assistance. The police and security forces are institutions which must change so that more positive developments in the direction of true democracy can continue to take place in these countries.

The careful restrictions Congress has placed on the program will give us a chance to measure its success. Since Congress must renew the proposal in 1 year if it is to continue, we will be able to determine whether the assistance has helped to bring about the type of change anticipated. If the counterterrorism aid fails to accomplish the goals we have set for it, then we in Congress will have an opportunity to take the appropriate steps to put an end to it.

THE FEDERAL DEFICIT

Mr. LEAHY. Mr. President, like the ancients, last week Congress walked into the proverbial Valley of Decision, when we passed the Gramm-Rudman-Hollings deficit reduction plan.

Our decision to go forward with this historic plan to reduce Federal deficits, like the decision to enter the legendary valley, was only a beginning. Many decisions—the important decisions—lie ahead. And there must be no avoiding them.

We have resolved to set annual limits on the Federal deficit and to retire it by 1991. We have forced ourselves and the President to make the tough choices to meet the goals we set out in law.

Mr. President, now it is our responsibility—our duty—to fashion the actual program under which we will reduce the Federal deficit by $36 billion annually. Members of the Senate, on both sides of the aisle, must work together in a spirit of cooperation to live up to the objectives of Gramm-Rudman-Hollings.

Some favor reducing the deficit by eliminating one-third of the shortfall through cuts in domestic and social programs, one-third through cuts in defense spending and one-third through Federal income tax increases.

The plan I have supported for 3 years, the Hollings-Leahy freeze, would reduce the deficit by freezing all Federal spending at 1984 levels for domestic, social, and defense programs. In addition, wealthy individuals and large, profitable corporations that have paid no taxes would be forced to pay their fair share.

Mr. President, I believe our plan is the most responsible and equitable way of reducing the deficit. Every program is frozen. No one program is favored. No one group is disadvantaged. And every American would benefit from reducing the deficit. In fact, our plan, were it enacted when first proposed in 1983, would have retired the Federal deficit this year.

Some suggest that we must reduce the deficit to stimulate investment and economic growth.

That is only half the story, Mr. President. Reducing the deficit is vital to health of our economy, but it is just as vital to the well-being of our society.

Our children and their children deserve the opportunity we have had to choose a direction for Government and society—to determine their own priorities for the Nation. The ever-growing portion of our annual budget that is wasted on interest payments on the Federal debt jeopardizes the ability of the next generation to choose their own direction. There simply won't be the money for investment in new research that cures disease or famine, or education that enlightens and makes us strong, or any other worthy endeavor which future Americans may wish to explore.

We owe it to ourselves, and especially to future Americans to take seriously the commitment we have made to reduce the deficit. We have entered the valley, now we must begin to find a way out. We need a plan that is fair, responsible and future-minded.

MARTIN LUTHER KING, JR. NATIONAL HOLIDAY

Mr. DURENBERGER. Mr. President, national holidays are important occasions for Americans to break their routines and celebrate our Nation's accomplishments. National holidays are also a time to reflect upon and reinforce the ideas and principles upon which our country was founded, and the men and women who have inspired and represented those ideals.

The inspiration provided by Dr. Martin Luther King, Jr. is fully deserving of that kind of national recognition and reflection. It is truly significant that on January 20, 1986, Americans will celebrate the first annual observance of Dr. King's birthday as a national holiday.

Dr. Martin Luther King, Jr.'s crusade, for which he gave his life, was the fight against the equivocation of the constitutional guarantees of freedom, justice and equality, not only for blacks, but for all minorities, women, the disabled, the elderly, and other groups who have historically not been offered the full measure of American opportunity.

Martin Luther King was born on January 15, 1929, in Atlanta, GA. He attended the first public high school for blacks in Atlanta, Booker T. Washington High School. Completing high school in 2 years by skipping the 9th and 12th grades, he was admitted to Morehouse College at age 15.

Dr. King was ordained into the ministry in the National Baptist Church in 1947, and received a B.A. degree in sociology from Morehouse College in 1948. Following graduation from Morehouse, Dr. King earned Crozer Theological Seminary. Following his seminary training, Dr. King earned a doctorate in theology from Boston University.

In 1964, Dr. King made history by becoming the youngest person ever to receive the Nobel Peace Prize for his adherence to the principles of nonviolence and for the example he set for others working toward peaceful social change. His vision of a better America is an inspiration to us all. In the words of Martin Luther King, Jr.:

Human progress is neither automatic nor inevitable. Even a superficial look at history reveals that no social advance rolls in on the wheels of inevitability. Every step toward the goal of justice requires sacrifice, suffering, and struggle; the tireless exertions and passionate concern of dedicated individuals without persistent effort, time itself becomes an ally of the insurgent and primitive forces of irrational emotionalism and social destruction. This is no time for apathy or complacency. This is a time for vigorous and positive action.

Mr. President, these lessons of vigor, diligence, honesty and indeed, hope, in the struggle for the rights of all Americans are the legacy Dr. King left to the modern civil rights movement. Dr. King's spirit lives on in our efforts to extend the provisions of the Voting Rights Act, to preserve the U.S. Commission on Civil Rights, to extend greater economic opportunities to women under the Economic Equity Act, to reinforce Federal support for affirmative action through Executive Order 11246, and to preserve our cornerstone civil rights statutes through the Civil Rights Restoration Act.

Mr. President, I am honored and grateful for the opportunity to follow in the path of this great man. His vision and principles have inspired a generation of citizens and their representatives to "vigorous and positive action." The result is a shared, and healthy impatience with an imperfect world, and the energy to continue to work to change it.

Our need to maintain the courage and conviction for equality and justice is as strong today as it was during Martin Luther King's time with us. Celebrating his contribution to America on January 20 is a fitting opportunity to recommit ourselves to the fundamental principles of freedom, justice, and equality which were at the heart of his life and his legacy to us all.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on Armed Services.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL APPROVALS

A message from the President of the United States announced that he had approved and signed the following enrolled bill and joint resolution:

On December 16, 1985:

S.J. Res. 238. Joint resolution relating to the approval and implementation of the proposed agreement for nuclear cooperation between the United States and the People's Republic of China.

On December 17, 1985:

S. 1639. An act to authorize the minting of gold bullion coins.

MESSAGES FROM THE HOUSE RECEIVED DURING PROCESS

ENROLLED JOINT RESOLUTION SIGNED

Under the authority of the order of the Senate of January 3, 1985, the Secretary of the Senate, on December 17, 1985, during the recess of the Senate, received a message from the House of Representatives announcing that the Speaker had signed the following enrolled joint resolution:

H.J. Res. 491. Joint resolution making further continuing appropriations for fiscal year 1986.

Under the authority of the order of the Senate of January 3, 1985, the enrolled joint resolution was signed on December 17, 1985, during the recess of the Senate by the President pro tempore (Mr. THURMOND).

MESSAGES FROM THE HOUSE

At 10:13 a.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the amendments of the Senate to the bill (H.R. 1784) to authorize appropriations for fiscal year 1986 for the operation and maintenance of the Panama Canal, and for other purposes.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 3132. An act to amend chapter 44, of title 18, United States Code, to regulate the manufacture, importation, and sale of armor piercing ammunition, and for other purposes; and

H.R. 3838. An act to reform the internal revenue of the United States.

At 2:12 pm., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2100) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to continue food assistance to low-income persons, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes.

ENROLLED BILL AND JOINT RESOLUTIONS SIGNED

At 2:48 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bill and joint resolutions:

S. 1728. An act to authorize the Cherokee Nation of Oklahoma to lease certain lands held in trust for up to ninety-nine years;

H.J. Res. 436. Joint resolution to designate 1986 as "Save for the U.S.A. Year", and for other purposes; and

H.J. Res. 485. Joint resolution waiving the printing on parchment of enrolled bills and joint resolutions during the remainder of the first session of the Ninety-ninth Congress.

The enrolled bill and joint resolutions were subsequently signed by the President pro tempore (Mr. THURMOND).

At 3:12 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 1918. An act to change the date for transmittal of a report.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 3931. An act to designate the General Services Administration building known as the "United States Appraiser's Stores Building" in Boston, Massachusetts, as the "Captain John Foster Williams Coast Guard Building"; and

H.R. 3974. An act to amend title 10, United States Code, to include in the death gratuity payable to survivors of a member of the Armed Forces who dies on active duty an amount equivalent to two months housing allowance.

At 4:10 p.m., a message from the House of Represenatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the amendments of the Senate to the amendment of the House to the bill (S. 1884) to amend the Farm Credit Act of 1971, to restructure and reform the Farm Credit System, and for other purposes.

The message also announced that the House has passed the following joint resolution, with an amendment, in which it requests the concurrence of the Senate:

S.J. Res. 240. Joint resolution opposing the Soviet Union's invasion and six-year occupation of Afghanistan against the national will of the Afgan people.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 262. Concurrent resolution correcting the enrollment of House Joint Resolution 187.

ENROLLED BILL SIGNED

At 7:50 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

H.R. 3914. An act to preserve the authority of the Supreme Court Police to provide protective services for Justices and Court personnel.

The enrolled bill was subsequently signed by the President pro tempore [Mr. THURMOND].

At 8:01 p.m., a message from the House of Representatives, delivered by Ms. Goetz, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 3981. An act to extend until December 19, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain medicare reimbursement provisions, and borrowing authority under the railroad unemployment insurance program.

MEASURES REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 3838. An act to reform the internal revenue laws of the United States; to the Committee on Finance.

MEASURES PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 3132. An act to amend chapter 44, of title 18, United States Code, to regulate the manufacture, importation, and sale of armor piercing ammunition, and for other purposes.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, December 18, 1985, she, had presented to the President of the United States the following enrolled bills:

S. 1621. An act to amend title 25, United States Code, relating to Indian education programs, and for other purposes.

S. 1728. An act to authorize the Cherokee Nation of Oklahoma to lease certain lands held in trust for up to ninety-nine years.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-2133. A communication from the Secretary of Transportation, transmitting, pursuant to law, a report on a violation of law involving the overobligation of an approved apportionment of appropriations; to the Committee on Appropriations.

EC-2134. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the status of certain budget authority proposed for rescission for which the Congress has failed to pass a rescission bill before the 45-day withholding period; pursuant to the order of January 30, 1975, referred jointly to the Committee on the Budget, the Committee on Appropriations, and the Committee on the Judiciary.

EC-2135. A communication from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to amend title 10, United States Code, to revise and standardize the provisions of law relating to appointment, promotion, and separation of commissioned officers of the reserve components of the armed forces, and for other purposes; to the Committee on Armed Services.

EC-2136. A communication from the Acting Secretary of the Army, transmitting, pursuant to law, a report on the breach of the unit cost threshold of the SINCGARS program by more than 25 percent; to the Committee on Armed Services.

EC-2137. A communication from the Chairman of the Nuclear Regulatory Commission, transmitting, pursuant to law, a report on progress in the preparation of the study of quality and quality assurance guidelines in the design and construction of nuclear powerplants; to the Committee on Environment and Public Works.

EC-2138. A communication from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to provide for voluntary private alternative coverage for Medicare beneficiaries, and for other purposes; to the Committee on Finance.

EC-2139. A communication from the Secretary to the Commission on Fine Arts, transmitting, pursuant to law, a report on the system of internal accounting and administrative controls in effect during fiscal year 1985; to the Committee on Governmental Affairs.

EC-2140. A communication from the Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the 60-day period to December 13, 1985; to the Committee on Foreign Relations.

EC-2141. A communication from the Secretary of Labor, transmitting, pursuant to law, the semiannual report of the Office of Inspector General, Department of Labor, for the period April 1 through September 30, 1985; to the Committee on Governmental Affairs.

EC-2142. A communication from the Assistant Secretary of State (Legislative and Intergovernmental Affairs), transmitting, pursuant to law, the annual report on the Foreign Service Retirement and Disability System for fiscal year 1984; to the Committee on Governmental Affairs.

EC-2143. A communication from the Acting Staff Director of the Commission on Civil Rights, transmitting, pursuant to law, a report on the system of internal accounting and administrative control in effect for the Commission during fiscal year 1985; to the Committee on Governmental Affairs.

EC-2144. A communication from the Assistant Vice President (Employee Benefits) of the Ninth Farm Credit District of Wichita, transmitting, pursuant to law, the annual report on their pension plan for the plan years ending February 28, 1985, and February 29, 1984; to the Committee on Governmental Affairs.

EC-2145. A communication from the Secretary of Defense, transmitting, pursuant to law, a report on legislation to reinstate the death penalty for persons convicted of espionage in civilian courts; to the Committee on the Judiciary.

EC-2146. A communication from the Comptroller of the American Council of Learned Societies, transmitting, pursuant to law, the audited financial statement of the Council for fiscal year 1985; to the Committee on the Judiciary.

EC-2147. A communication from the Secretary of the Interior, transmitting, pursuant to law, notice of a leasing system for the North Aleutian Basin, Sale 92, scheduled to be held in January 1986; to the Committee on Energy and Natural Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted.

By Mr. HATCH, from the Committee on Labor and Human Resources, with amendments:

S. 1855: A bill to revise the provisions of the Public Health Service Act relating to health planning (Rept. No. 99-224).

By Mr. HATCH, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute:

S. 1848: A bill to amend the Federal Food, Drug, and Cosmetic Act to establish conditions for the export of drugs (Rept. No. 99-225).

By Mr. HATCH, from the Committee on Labor and Human Resources, without amendment:

S. 1968: An original bill to amend the Railroad Unemployment Insurance Act to assure sufficient resources to pay benefits, to increase the maximum daily benefit, and for other purposes.

Mr. President, today on behalf of the Committee on Labor and Human Resources, I am reporting an original bill, S. 1968, to amend the Railroad Unemployment Insurance Act. The bill complements provisions adopted by the Committee on Finance and included in its portion of S. 1730, the Consolidated Omnibus Budget Reconciliation Act of 1985.

In general, the bill is a package of amendments designed to restore solvency to the railroad unemployment system and to address several concerns raised by rail labor and rail carriers. I recognize that some of the provisions contained in the bill are probably within the jurisdiction of the Senate Finance Committee, and I look forward to that committee's review and consideration.

In 1983, when Congress passed the Railroad Retirement Solvency Act, it established the Railroad Unemployment Compensation Committee to prepare a report on the problems beseting the railroad unemployment insurance system. The bill I am reporting today embodies most of the recommendations made by the committee, recommendations which the Compensation Committee believes are necessary to insure an efficient and equitable benefit system.

Briefly, let me explain the various amendments contained in this bill. First, the bill would increase from $25 to $27 the maximum daily benefits payable to eligible workers for employment and sickness benefits. This would bring the benefits more into line with those available to workers covered by other unemployment systems. Along with this increase, the bill would index the daily benefit rate to insure that the benefit level would grow at a rate comparable to employee compensation rates and overcome the effects of inflation.

At the same time, more stringent requirements for eligbility would be established to guarantee that persons seeking benefits are regular railroad employees. Prior to registering for benefits, employees must have worked at least 6 months and earned a certain level of compensation. A 3 day waiting period would be established for the first registration period of each year.

In order to insure that there are sufficient revenues with which to pay benefits and to insure that those revenues increase with raises in the daily benefit rates, employer contributions would be indexed to the monthly compensation base. The current maximum contribution rate of 8 percent would be increased to 12 percent and any contribution required beyond the 12 percent maximum would be assessed proportionately to other employers.

The contribution of each employer would be based on an experience rating for individual employers, rather than the current system-wide base. This amendment would encourage employers to maintain a high employment level and would produce an employer desire to monitor benefit claims. Employers would be authorized to participate in the investigation, processing, and appeal of employee claims in order to establish which claims are not justified and to make certain that employer contributions are not unduly increased.

In order to guarantee that future claims do not financially overburden the system, there would be a 1.5-percent or 2.5-percent surcharge levied against all employers for any year in which the fund reserve for benefits drops below certain levels.

Finally, in order to improve the efficiency of investigation and processing of benefit claims, the amount of administrative funds assessed to each employer would be increased.

The bill being reported today will help to establish the solvency of the Railroad Unemployment Insurance System and strike a legitimate balance between the interests of the rail carriers and the rail unions. When coupled with the amendments to the system that the Senate Finance Committee has included in its portion of S. 1730, the bill will provide Congress with a solution to the problems besetting the system and I urge my colleagues to support the legislation.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. GOLDWATER, from the Committee on Armed Services:

The following-named officer, under the provisions of title 10, United States Code, section 5141, to be Chief of Naval Personnel and to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Rear Adm. Dudley L. Carlson, xxx-xx-x... xxx-.../1110, U.S. Navy.

The following officers for appointment in the U.S. Air Force to the grade of brigadier general under the provisions of section 624, title 10 of the United States Code:

To be brigadier general

Col. Robert M. Alexander, xxx-xx-xxxx FR, Regular Air Force.

Col. James S. Allen, xxx-xx-xxxx FR, Regular Air Force.

Col. John R. Allen, Jr., xxx-xx-xxxx FR, Regular Air Force.

Col. Edgar R. Anderson, Jr., xxx-xx-... xxx-... FR, Regular Air Force.

Col. James G. Andrus, xxx-xx-xxxx FR, Regular Air Force.

Col. Malcolm B. Armstrong, xxx-xx-... xxx-... FR, Regular Air Force.

Col. Lester P. Brown, Jr., xxx-xx-... FR, Regular Air Force.

Col. Robert A. Buethe, Jr., xxx-x... FR, Regular Air Force.

Col. Gerald A. Daniel, xxx-xx-xxxx FR, Regular Air Force.

Col. Thomas E. Eggers, xxx-xx-xxxx FR, Regular Air Force.

Col. James W. Evatt, xxx-xx-xxxx FR, Regular Air Force.

Col. Frederick A. Fiedler, xxx-xx-xxxx FR, Regular Air Force.

Col. Paul D. Gleason, xxx-xx-xxxx FR, Regular Air Force.

Col. Joel T. Hall, xxx-xx-xxxx FR, Regular Air Force.

Col. William P. Hallin, xxx-xx-xxxx FR, Regular Air Force.

Col. Floyd E. Hargrove, xxx-xx-xxxx FR, Regular Air Force.

Col. George B. Harrison, xxx-xx-xxxx FR, Regular Air Force.

Col. John R. Harty, xxx-xx-xxxx FR, Regular Air Force.

Col. Richard E. Hawley, xxx-xx-xxxx FR, Regular Air Force.

Col. Harald G. Hermes, xxx-xx-xxxx FR, Regular Air Force.

Col. Thomas W. Honeywill, xxx-xx-... xxx-... FR, Regular Air Force.

Col. John R. Hullender, xxx-xx-xxxx FR, Regular Air Force.

Col. Grover E. Jackson, xxx-xx-xxxx FR, Regular Air Force.

Col. John E. Jackson, Jr., xxx-xx-xxxx FR, Regular Air Force.

Col. Arlen D. Jameson, xxx-xx-xxxx FR, Regular Air Force.

Col. Jeffery D. Kahla, xxx-xx-xxxx FR, Regular Air Force.

Col. Donald L. Kaufman, xxx-xx-xxxx FR, Regular Air Force.

Col. Vernon J. Kondra, xxx-xx-xxxx FR, Regular Air Force.

Col. Paul E. Landers, Jr., xxx-xx-xxxx FR, Regular Air Force.

Col. James J. LeCleir, xxx-xx-xxxx FR, Regular Air Force.

Col. Orthus K. Lewis, Jr., xxx-xx-xxxx FR, Regular Air Force.

Col. Nathan J. Lindsay, xxx-xx-xxxx FR, Regular Air Force.

Col. John D. Logeman, Jr., xxx-xx... FR, Regular Air Force.

Col. Charles F. Luigs, xxx-xx-xxxx FR, Regular Air Force.

Col. Billy G. McCoy, xxx-xx-xxxx FR, Regular Air Force.

Col. Michael P. McRaney, xxx-xx-xxxx FR, Regular Air Force.

Col. Philip L. Metzler, Jr., xxx-xx-xxxx FR, Regular Air Force.

Col. Kenneth V. Meyer, xxx-xx-xxxx FR, Regular Air Force.

Col. John M. Nowak, xxx-xx-xxxx FR, Regular Air Force.

Col. Carl G. O'Berry, xxx-xx-xxxx FR, Regular Air Force.

Col. Richard J. O'Lear, xxx-xx-xxxx FR, Regular Air Force.

Col. David C. Reed, xxx-xx-xxxx FR, Regular Air Force.

Col. Jon A. Reynolds, xxx-xx-xxxx FR, Regular Air Force.

Col. Paul L. Roberson, xxx-xx-xxxx FR, Regular Air Force.

Col. Alan V. Rogers, xxx-xx-xxxx FR, Regular Air Force.

Col. Richard M. Scofield, xxx-xx-xxxx FR, Regular Air Force.

Col. John F. Sievertson, xxx-xx-xxxx FR, Regular Air Force.

Col. Victor S. Stachelczyk, xxx-xx-xxxx FR, Regular Air Force.

Col. Kenneth E. Staten, xxx-xx-xxxx FR, Regular Air Force.

Col. Robert F. Swarts, xxx-xx-xxxx FR, Regular Air Force.

Col. Dale W. Thompson, Jr., xxx-xx... FR, Regular Air Force.

Col. Denis L. Walsh, [redacted] FR, Regular Air Force.

Col. Sam W. Westbrook III, [redacted] FR, Regular Air Force.

Col. Robert V. Woods, [redacted] FR, Regular Air Force.

By Mr. LUGAR, from the Committee on Foreign Relations:

Thomas A. Bolan, of New York, to be a Member of the Board of Directors of the Overseas Private Investment Corporation for a term expiring December 17, 1988.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HATCH, from the Committee on Labor and Human Resources:

S. 1968. An original bill to amend the Railroad Unemployment Insurance Act to assure sufficient resources to pay benefits, to increase the maximum daily benefit, and for other purposes; placed on the calendar.

By Mr. SPECTER:

S. 1969. A bill to create a National Center for the Prosecution of Child Abuse under the Office of Justice Programs in the Department of Justice; to the Committee on the Judiciary.

S. 1970. A bill to authorize loan guarantees and interest subsidies for severely depressed cities; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. LAXALT:

S. 1971. A bill to transfer certain lands under the jurisdiction of the Secretary of the Interior to the city of Mesquite, Nevada; to the Committee on Energy and Natural Resources.

By Mr. HELMS (for Mr. EAST (for himself, Mr. THURMOND, Mr. QUAYLE, Mr. SYMMS and Mr. HELMS)) (by request):

S. 1972. A bill to authorize the furnishing of military assistance to the National Union for the Total Independence of Angola (UNITA); to the Committee on Foreign Relations.

By Mr. BINGAMAN (for himself, Mr. HATFIELD, Mr. HART and Mr. PRYOR):

S. 1973. A bill to provide for multilateral limitations on arms sales, and for other purposes; to the Committee on Foreign Relations.

By Mr. WILSON (for himself, Mr. MATHIAS, and Mrs. HAWKINS):

S. 1974. A bill to prohibit the imposition by the states of the worldwide unitary method of taxation; to the Committee on Finance.

By Mr. GOLDWATER:

S. 1975. A bill to provide that the laws restricting trade between two points in the United States to vessels of the United States shall not apply to inflatable passenger boats or rafts before November 1, 1993; to the Committee on Commerce, Science, and Transportation.

By Mr. SPECTER:

S. 1976. A bill to provide for a study relating to the development of high speed rail systems within the United States; to the Committee on Commerce, Science, and Transportation.

By Mr. SYMMS:

S. 1977. A bill to temporarily increase the duty on Canadian softwood lumber and wood shingles and shakes; to the Committee on Finance.

By Mr. CRANSTON (for himself, Mr. D'AMATO, Mr. DIXON, Mr. DODD, and Mr. MATTINGLY):

S. 1978. A bill to clarify the taxation of certain asset-backed securities in multiple class arrangements; to the Committee on Finance.

By Mrs. KASSEBAUM:

S. 1979. A bill to fulfill the purposes of the Airport and Airway Improvement Act of 1982, promote air passenger safety, and provide equity to airway users; to the Committee on the Budget and the Committee on Governmental Affairs, jointly, pursuant to the order of August 4, 1977.

By Mr. THURMOND (for himself, Mr. ZORINSKY, Mr. EAST, Mr. SIMPSON and Mr. KERRY):

S. 1980. A bill to amend title 17, United States Code, regarding the conveyance of audiovisual work, and for other purposes; to the Committee on the Judiciary.

By Mr. MURKOWSKI (for himself, Mr. STEVENS, Mr. HEINZ, Mr. GRASSLEY and Mr. MCCLURE):

S. 1981. A bill to provide a duty on surimi; to the Committee on Finance.

By Mr. DECONCINI:

S. 1982. A bill to provide financial assistance to States to enable them to establish or expand teacher education programs, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. KERRY:

S. 1983. A bill to amend the Clean Air Act to control certain sources of sulfur dioxide and oxides of nitrogen to reduce acid deposition, and for other purposes; to the Committee on Environment and Public Works.

By Mr. NICKLES:

S. 1984. A bill to amend the Employee Retirement Income Security Act of 1974 to improve the financial solvency of multiemployer pension plans, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. DURENBERGER:

S. 1985. A bill entitled the "Medicare Voucher Act of 1986"; to the Committee on Finance.

By Mr. PELL (for himself and Mr. DANFORTH):

S.J. Res. 252. A joint resolution requesting the President of the United States to negotiate controls upon and the early prohibition of nuclear explosions; to the Committee on Foreign Relations.

By Mr. HATCH:

S.J. Res. 253. A joint resolution to designate the week of March 2, 1986, through March 8, 1986, as "Women's History Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. SPECTER (for himself, Mr. DENTON, Mr. LAUTENBERG, Mr. CRANSTON, Mr. SIMON, and Mr. MCCONNELL):

S. Res. 278. A resolution to disapprove the freeze on funds for the Office of Juvenile Justice and Delinquency Prevention; to the Committee on the Judiciary.

By Mr. HELMS (for himself, Mr. HECHT, Mr. EAST, and Mr. DENTON):

S. Res. 279. A resolution expressing the sense of the Senate with respect to any transfer of U.S. territory, including certain islands in the Arctic Ocean; to the Committee on Foreign Relations.

By Mr. GARN (for Mr. SIMPSON (for himself and Mr. CRANSTON)):

S. Con. Res. 98. A concurrent resolution to recognize the historical significance of the former presidential yacht Sequoia, and express support for her donation to the United States Navy by the Presidential Yacht Trust; considered and agreed to.

By Mr. DODD (for himself and Mr. STEVENS):

S. Con. Res. 99. A concurrent resolution supporting expanded cultural exchange between the United States and the Soviet Union; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. SPECTER:

S. 1969. A bill to create a National Center for the Prosecution of Child Abuse under the Office of Justice Programs in the Department of Justice; to the Committee on the Judiciary.

CHILD ABUSE PROSECUTION ACT

Mr. SPECTER. Mr. President, today I introduce the Child Abuse Prosecution Act of 1985. This legislation will establish the National Center for the Prosecution of Child Abuse.

The incidence of child abuse in the United States is staggering. The present precedures for the prosecution of child offenders, however, are inadequate to counter this growing nationwide problem. The National Center established by this legislation will provide district attorneys and local prosecutors with the essential support they desperately need to address this tragedy.

In 1983, 1.7 million cases of child abuse were reported—an alarming increase of 800 percent since 1976. As a former district attorney of Philadelphia, I am acutely aware of the problems associated with prosecuting child abuse cases. More recently, as chairman of the Senate Subcommittee on Juvenile Justice and cochairman of the Senate children's caucus, I have heard extensive testimony on the increasing problem of child abuse. I believe we must implement innovative new methods to address this problem. Local prosecutors are primarily responsible for the prosecution of child abuse cases; a nationwide network will provide invaluable support services for their efforts in these difficult cases.

A National Center for the Prosecution of Child Abuse has the support of Attorney General Edwin Meese and his pledge of cooperation by the Department of Justice in implementing this program. On May 12, 1985, the criminal justice section of the American Bar Association endorsed establishment of the National Center under

the auspices of the American Prosecutors Research Institute.

A survey recently conducted for the U.S. Department of Health and Human Services showed an alarming increase in 1984 of documented reports of abused and neglected children. According to the HHS survey, the total number of such reported cases was 1,712,641—a 16-percent increase over 1983 figures. The largest increase is in sexual abuse reporting—from 71,691 reports in 1983 to an estimated 110,878 reports in 1984—an increase of 54 percent.

The increasing reports of child abuse require us to do more to protect our children nationwide. I believe that establishment of a National Center for the Prosecution of Child Abuse is an important step toward achieving this important goal.

This legislation addresses the need to improve procedures for prosecution of child abuse cases and to protect the child victim. The National Center for the Prosecution of Child Abuse would provide the following services:

Training programs for professionals involved in child abuse cases, to improve sensitivity toward the victims;

Dissemination of information about model prosecution programs to prosecutors throughout the United States;

Development of techniques to provide better interviewing of the victim-witness, to avoid further traumatization of the child;

Monitoring of changes in case and statutory law in every jurisdiction and prompt provision of this information directly to prosecutors;

Recommendations of charging and sentencing practices which consider the unique factors involved in child abuse cases; and

Coordination of local and regional interdisciplinary teams to assist local prosecutors in the investigation and preparation of child abuse cases.

Creation of the National Center for the Prosecution of Child Abuse would not be a long-term financial burden for the Federal Government; the National Center would be operated by uniquely qualified criminal justice organizations, such as the American Prosecutors Research Institute and the National District Attorneys Association. It is expected that the local and regional interdisciplinary teams would become financially self-sufficient after a few years, as a result of local private support; the National Center also is expected to become financially self-sufficient after a period of 5 years.

The vital services provided by the National Center currently are not available to most prosecutors. We must act now to provide prosecutors with the information and technical assistance they desperately need in the prosecution of child abuse cases. The National Center for the Prosecution of Child Abuse established by this legislation will coordinate and support the important efforts by prosecutors throughout the United States to combat the growing national problem of child abuse.

Mr. President, I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1969

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Child Abuse Prosecution Act of 1985".

FINDINGS AND PURPOSE

SEC. 2. (a) Congress finds that:

(1) Approximately 1.7 million cases of child abuse were reported in this country in 1983, an 800 percent increase since 1976. The more serious of these incidents of physical child abuse and all incidents of child sexual abuse are regarded as crimes and fall within the purview of local prosecutors.

(2) This escalation in reported cases of child abuse has created dramatic case load increases for prosecutors responsible for seeking appropriate redress.

(3) The unique nature of the relationships of offenders to their victims in intrafamilial cases and the fact that, in all abuse cases, the main witnesses are children, requires the exercise of extreme sensitivity on the part of prosecutors responsible for interviewing these young witnesses and preparing cases for trial.

(4) The traditional criminal justice system has not been responsive to the verbal and developmental limitations of children and must be reformed in order to ensure that, while defendants are afforded the full panoply of rights granted them under the constitution or statutes, children are shielded from further vitimization by the system designed to protect them.

(5) Prosecutors do not have the resources necessary to acquire the requisite skills in handling these sensitive cases, the capability to track changes in case and statutory law, or to obtain information on model or innovative programs.

(6) While prosecutors have a wealth of actual case experience, they do not have the resources to monitor, evaluate and recommend changes in State and Federal legislation designed to accommodate the needs of the child witness and thereby eliminate barriers to successful prosecution.

(7) Many prosecutors do not have the benefit of authorities in the fields of pediatric medicine or mental health on which to rely for export testimony and are at a distinct disadvantage when seeking a conviction.

(b) It is therefore the declared policy of the Congress to provide the necessary resources to develop a national prosecutorial capacity to undertake legal research, identify and disseminate model prosecutorial child abuse programs, and provide technical assistance and litigation support to local prosecutors across the country.

ESTABLISHMENT OF CENTER

SEC. 3. (a) part A of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S. 3711-3712) is amended—

(1) in section 102—

(A) in clause (5) by striking out "and" after the semicolon;

(b) by redesignating clause (6) as clause (7); and

(C) by inserting after clause (5) the following:

"(6) provide for the operation of the National Center for the Prosecution of Child Abuse as provided in Section 103; and"; and

(2) by adding at the end thereof the following:

"NATIONAL CENTER FOR THE PROSECUTION OF CHILD ABUSE

"SEC. 103. (a) The Assistant Attorney General shall provide for the operation of a clearinghouse, to be known as the 'National Center for the Prosecution of Child Abuse', the functions of which shall include but not be limited to the following:

"(1) disseminating nationally information on innovative and model prosecution programs;

"(2) monitoring and evaluating changes in State and Federal legislation based upon the actual case experience of prosecutors, for the purpose of developing model legislation;

"(3) reporting and tracking changes in case and statutory law in every jurisdiction and disseminating this information to prosecutors;

"(4) providing technical assistance and litigation support to prosecutors in child abuse cases;

"(5) coordinating local and regional interdisciplinary teams to assist local prosecutors in the investigation and preparation of child abuse cases; and

"(6) assisting local prosecutors in the design and implementation of efforts for private funding to support the establishment and maintenance of such interdisciplinary teams.

"(b) The Assistant Attorney General is authorized to make grants to or enter into cooperative agreements or contracts with public agencies or private nonprofit organizations to operate the National Center for the Prosecution of Child Abuse as provided in this section.".

AUTHORIZATION AND CONFORMING AMENDMENT

SEC. 4. (a) Subsection (a) of section 1001 of title I of the Omnibus Crime Control and Safe Streets Act (42 U.S.C. 3793(a)) is amended by adding at the end thereof the following:

"(7) There is authorized to be appropriated $1,300,000 for each fiscal years 1987 and 1988 to operate the National Center for the Prosecution of Child Abuse as provided in section 103.".

(b) The table of contents of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended by adding at the end of the item relating to Part A the following:

"Sec. 103. National Center for the Prosecution of Child Abuse.".

By Mr. SPECTER:

S. 1970. A bill to authorize loan guarantees and interest subsidies for severely depressed cities; to the Committee on Banking, Housing, and Urban Affairs.

SUDDEN AND SEVERELY ECONOMICALLY DEPRESSED CITIES LOAN GUARANTEE AND LOAN INTEREST SUBSIDY ACT

Mr. SPECTER. Mr. President, today I am introducing legislation designed to call the Government's attention to the severe economic distress that many municipalities suffer as a result

of their loss of industry and, thus, their tax bases.

On November 1, 1985, the distinguished acting chairman of the Commerce, State, Justice Appropriations Subcommittee, Mr. RUDMAN, and I called this body's attention to the problems of cities like those in Pennsylvania which have experienced a loss of steel companies and related industries. I noted then that "along with the decline of the industry have come lowered county assessments on homes and businesses, reduced employment, and an aging population."

The city of Clairton, PA, was given as an example of the problems faced by municipalities with declining industries. I stated in the colloquy that, as I pointed out, in 1960, Clairton's population was 18,389. By 1980, the population had declined to 12,188, for a loss of 33.7 percent. A further 6-percent loss is projected by the year 2000. And in 1980, 17.2 percent of the population was over 65 years old. The decline in the city's ratables has produced a fiscal crisis of the first order, to the extent that health and safety are now endangered. The city of Clairton is projecting a deficit of $600,000 by year end, or nearly one-third of the city's $3.2 million budget. As of September 10, 1985, there was only $3,000 remaining in the city's bank account, which was not enough to pay its 13 police officers and 10 firefighters. State police and volunteer firefighters now constitute the city's sole safety forces.

Clairton by no means stands alone. There are many other "steel" towns in a similar situation throughout my State and the country. Other examples in Pennsylvania include, but are not limited to, Aliquippa, Homestead, West Homestead, Duquesne, and Dravosburg.

But the problem is not limited to towns with a declining steel industry. Towns whose economies are based on farming, lumber, textiles, mining, and other industries that are experiencing difficulties are also facing severe economic problems like those being experienced by Clairton. This is truly a national problem in scope.

My bill would authorize long-term loan guarantees and interest subsidies for severely economically depressed cities that are deemed eligible for assistance under criteria to be established by the Secretary of the Treasury. The loan guarantee part of the legislation is modeled on the rescue plan that Congress adjusted for the city of New York a few years ago.

This legislation also contains a provision that would allow severely economically depressed communities to divert portions of their community development block grants to pay for vital municipal services such as police and firefighters where they would not otherwise be able to pay for these services. The Secretary of Housing and Urban Development would give permission to divert funds based on criteria development by the Secretary.

This bill need not impose major new costs on the Federal Treasury. Past loan guarantee programs, such as those for New York City and Chrysler, have demonstrated that guarantees do not cost the Government 1 cent if careful criteria are established for working loans available. The low interest loans need not be a prohibitive expense to the Government if awarded only where needed. My bill explicitly authorizes the Secretary of the Treasury to take such considerations into account in setting eligibility criteria.

I should also add that there will be high costs to doing nothing in terms of the additional benefits that a devastated citizenry will become entitled to if basic municipal services cannot be maintained to protect health and safety.

I urge my colleagues to give this bill their most serious consideration, and I ask unanimous consent that the bill be printed in the Record.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1970

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, This Act may be cited as the "Sudden and Severe Economically Depressed Cities Loan Guarantee and Loan Interest Subsidy Act".

TITLE I—LOAN GUARANTEES AUTHORITY

SEC. 101. (a) Upon the written request of a unit of general local government and the Governor of the State where that unit of general local government is located, the Secretary of the Treasury may guarantee the timely payment, in whole or in part, of interest or principal, or both, of indebtedness of that unit of general local government in accordance with this title.

(b) Any guarantee under this title shall cease to be effective not later than fifteen years after the date of the issuance of the indebtedness involved.

(c) The Secretary of the Treasury shall prescribe terms and conditions for the making of guarantees under this title.

(d) The Secretary of the Treasury shall also provide interest subsidies where needed to enable cities which meet the requirements established by the Secretary to obtain loans at below market interest rates.

CONDITIONS OF ELIGIBILITY

SEC. 102. (a) A guarantee may be made under this title only if the Secretary of the Treasury finds—

(1) that the unit of general local government is severely economically depressed;

(2) that it has lost such a significant amount of industry, employed population, and, therefore, its tax base; and

(3) that it is in a financial crisis and is unable to meet its financial obligations or to maintain vital municipal services.

The Secretary of the Treasury shall determine the criteria for eligibility.

(b) The Secretary shall include in the criteria prescribed under this title assessments of the viability of the unit of general local government and of the exposure of the United States Treasury.

AUTHORIZATION FOR LOAN GUARANTEES AND SUBSIDY AMOUNTS

SEC. 103. There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this title.

TITLE II—EMERGENCY USE OF COMMUNITY DEVELOPMENT BLOCK GRANTS FOR CITY SERVICES IN SEVERELY ECONOMICALLY DEPRESSED CITIES AUTHORIZATION

SEC. 201. (a) Upon the written request of a unit of general local government and the Governor of the State where that unit of general local government is located, the Secretary of Housing and Urban Development may permit the unit of general local government to divert portions of its community development block grant to pay for vital municipal services, where the Secretary finds that the unit of general local government has lost such a significant amount of industry and taxpaying population that its tax base can no longer support vital municipal services.

(b) As used in this section—

(1) the term "Secretary" means the Secretary of Housing and Urban Development; and

(2) the term "vital municipal services" includes the services of police and firefighters and ambulance and medical services.

By Mr. HELMS for Mr. EAST (for himself, Mr. THURMOND, Mr. QUAYLE, Mr. SYMMS, and Mr. HELMS) (by request):

S. 1972. A bill to authorize the furnishing of military assistance to the National Union for the Total Independence of Angola [UNITA]; to the Committee on Foreign Relations.

MILITARY AID TO ANGOLA

Mr. HELMS. Mr. President, as our colleagues are aware, the distinguished junior Senator from North Carolina. Mr. EAST, has been necessarily absent from this Chamber for much of this year.

Nevertheless, JOHN is looking forward to his return. Among other issues, he is deeply concerned by the relative lack of interest which our Government has taken in providing assistance to the freedom fighters opposing the Communist government of Angola. My able colleague believes that it is our responsibility to assist all those trying to throw off Communist tyranny, and I agree with him wholeheartedly.

Accordingly, Mr. President, Senator EAST has asked me to introduce on his behalf a bill to provide military aid to the Angolan freedom fighters, along with the statement he had prepared for the legislation.

Mr. President, I ask unanimous consent to submit, at the request of Mr. EAST, the aforementioned bill, and also on behalf of myself and the other cosponsors, Mr. QUAYLE, Mr. THURMOND, and Mr. SYMMS.

● Mr. EAST. Mr. President, I am introducing today S. 1972, a bill to provide $27 million in military aid to

UNITA forces, under the leadership of Dr. Jonas Savimbi, currently fighting the Marxist regime of Angola.

I believe military aid to these anti-Communist and pro-Western forces is necessary for three reasons, Mr. President. First, military assistance will provide necessary supplies and weaponry to UNITA at a time when the Soviet Union appears to be increasing its own massive aid to the MPLA regime and to be preparing for a final onslaught on the freedom fighters. Second, the repeal of the Clark amendment earlier this year, which prohibited any American aid to any group in Angola, permits the United States to play a more active role in southern Africa in behalf of the cause of freedom in that region. American assistance to UNITA, which has long proved itself one of the most effective and reliable pro-Western forces in southern Africa, may well provide the margin of victory in Angola for the supporters of freedom there. The victory of UNITA and the removal of the Marxist regime in Angola would eliminate a source of instability in the region. The 35,000 Cuban troops who prop up the MPLA in power would be sent home, and the assistance that Angola now provides to SWAPO and other terrorist groups in Africa would be ended.

Third, Mr. President, American aid to UNITA would encourage similar anti-Communist forces throughout the world. Afghan, Nicaraguan, Cambodian, and Vietnamese resistance fighters against the Marxist regimes in their own countries would see the United States as a champion of their cause and a source of effective, material aid. The false doctrine that the victory of communism is inevitable would be exposed as the lie that it is, and the claim that the United States has withdrawn from the struggle for freedom and its responsibilities in the world would be refuted.

Mr. President, the regime of the Marxist MPLA seized power in Angola in 1975 after independence from Portugal was gained and in violation of the Alvor agreement, which provided for free elections in Angola. These elections were never held, and the MPLA, with the aid of 13,000 Cuban troops, came to power. There was no pretence that the new regime rested on consent, and since that time popular resistance to the MPLA has grown steadily and dramatically. Since 1983, when UNITA forces won a major victory in central Angola, the regime has been on the defensive and has been forced to rely even more on Soviet and Cuban aid.

In the past 2 years, Soviet military aid to the MPLA has amounted to $1 to $2 billion. Cuban troops in Angola now number some 35,000. Soviet military materiel recently deployed in Angola consists of T-62 heavy tanks, Mig-23 jet fighters, SU-22 fighter bombers, and about 25 MI-24 helicopter gunships. The Soviets have established an air defense line in southern Angola, and Soviet and Cuban pilots have flown Angolan Air Force planes, which in fact are Soviet planes. In July of this year the Soviets undertook and offensive against UNITA forces in eastern Angola. Soviet commanders directed four Government brigades in the offensive, and Soviet military officers directed the MPLA forces down to the battalion level. The Soviets also undertook an offensive against the heartland of UNITA support in Jamba in southeastern Angola. UNITA forces resisted these offensives valiantly and succeeded in blunting the massive, Soviet-coordinated attack.

There are indications, however, that the Soviets are preparing to mount a new offensive in the very near future, and the hard truth is that unless the United States provides military aid to UNITA to counter Soviet and Cuban weaponry and troops, the struggle for freedom in Angola could suffer a serious reverse and perhaps defeat.

Dr. Savimbi has stated many times that he does not seek simply a military victory and the installation of his own forces in power. What he seeks is the withdrawal of all foreign forces from Angola, a free election as promised in the Alvor Agreement of 1975 in which the Angolan people may choose their own government, and the establishment of permanent democratic institutions. UNITA has been forced to wage war against the Marxist regime because that regime has violated its agreement to hold elections, has relied on foreign troops, has waged war against its own people, and has refused to negotiate with UNITA. Nor has the regime shown any disposition to move forward in negotiations over the presence of Cuban troops, the removal of which is a prerequisite in the settlement of the Namibian issue. Indeed, there are more Cuban (and Soviet) military personnel in Angola today than ever before, and they show no sign of leaving.

Mr. President, it is rare that we have an opportunity to help movements like UNITA, which for over a decade has proved its commitment to freedom and its endurance and effectiveness against overwhelming Communist strength. We cannot allow such a movement to be crushed by the tyranny it is resisting, and I urge my colleagues to join with me in providing UNITA the military aid it needs and deserves.●

By Mr. BINGAMAN (for himself, Mr. HATFIELD, Mr. HART, and Mr. PRYOR):

S. 1973. A bill to provide for multilateral limitations on arms sales, and for other purposes; to the Committee on Foreign Relations.

LIMITATION OF CONVENTIONAL ARMS SALE TO THIRD WORLD

Mr. BINGAMAN. Mr. President, today along with Senators HATFIELD, HART, and PRYOR, I am offering legislation intended to limit the sale of sophisticated conventional arms to the Third World. This bill calls on the President to begin discussions with the major arms-supplying countries and encourages formation of a permanent Consultative Commission for Multilateral Arms Transfer Restraint, modeled on the successful Nuclear Suppliers Group which negotiated multilateral restraints on the export of sensitive nuclear technologies in the Ford and Carter administrations. An almost identical bill is being introduced in the House today by Congressman LEVINE.

The reasons for controlling, and hopefully reducing, the sale of advanced conventional weapons to the Third World are very clear. As we gather in this Chamber today, conflicts in Afghanistan, the Persian Gulf, Southeast Asia, Africa, and Central America relentlessly take their toll of human life and threaten the stability of entire regions. These local conflicts, inflamed by the continuing supply of newer and more sophisticated arms, threaten to engulf other states and to provoke wider wars that might involve the United States and the Soviet Union. Most students of international politics believe that a United States-Soviet confrontation, if one were to occur, is most likely to grow out of a regional war in which both superpowers have major interests and considerable prestige at stake. Apart from that menace, arms suppliers also face the possibility that the sophisticated weapons they provide to the rest of the world could be used against them or their allies. This is a lesson the British learned in a very costly fashion during the Falklands war.

The magnitude of advanced arms sales to the developing world is staggering. Based on data supplied by the Arms Control and Disarmament Agency, worldwide arms sales increased tenfold from the early 1960's to the early 1980's. Exports to the Third World accounted for about 80 percent of this increase. Congressional Research Service figures show that from 1977 to 1984, Third World countries doubled their purchases of arms. Foreign sales to the Third World now amounts to over $30 billion a year.

Many countries produce and sell sophisticated weapons. The Soviet Union's record of exporting arms to the Third World—in support of wars of national liberation and in search of hard currency—is abundantly clear. Many Western nations, including our closest NATO allies, also participate in arms trade, as do the Soviet Union's East European allies. In addition, an

increasing number of newly industrializing countries are selling weapons to Third World countries. Brazil, Israel, India, North and South Korea, Taiwan, and China have all developed indigenous arms industries to enhance self-sufficiency, promote economic development, and gain technological expertise. Brazil, for example, has recently had an annual arms sales of $2 billion. And Egypt, India, and Israel all exceed $1 billion in annual arms sales.

Mr. President, the desire to limit arms sales to the Third World is of concern to all Americans. As many in this Chamber will recall, during the Carter administration in 1977, the United States and the Soviet Union initiated discussions on what were then called the Conventional Arms Transfer Talks. A year later, in response to Soviet adventurism in Africa, the United States ended the talks.

In his United Nations speech earlier this fall, President Reagan called on the Soviets to channel competition with the United States along peaceful lines and to enter into negotiations to bring peace to regional hotspots around the world. Multilateral controls on the export of conventional arms would be a major step in this direction.

Former President Nixon also recognized the danger of conventional arms transfers in the fall 1985 issue of the Foreign Affairs Journal. Noting that arms competition in the Third World must be brought under control, Mr. Nixon said:

> U.S. and Soviet arms sales to Third World countries run to billions of dollars. Most of these countries are desperately poor, and they need economic assistance far more than they need additional arms. For the Soviet Union to arm India, while the United States arms Pakistan, can only end in tragedy for the people of both countries. Even though these are only non-nuclear arms, they are instruments of war, and small wars always have the potential of escalating into nuclear wars. There is no prospect for reducing arms sales soon, if at all, but both the United States and the U.S.S.R. have an interest in controlling them and not letting them drag us into conflict.

I share Mr. Nixon's view, and his realistic assessment of the prospects for success, with one qualification: that such discussions should include all major arms suppliers just as the Nuclear Suppliers Group included all major suppliers of nuclear technology. Mindful of the realities of the 1980's, particularly of the emergence of additional actors on the international stage, I believe that progress toward peaceful competition among states inevitably requires a multinational commitment.

In the spring of this year, my distinguished colleague from Oregon, Senator HATFIELD, recognized the need for additional participation in this dialog. Senator HATFIELD's amendment to the foreign aid authorization bill called for conventional arms discussions among the United States, the Soviet Union, and France. That amendment later became public law together with a requirement for an extensive report on this whole area. I am proposing that we further broaden the participation in the negotiations, in the interest of attempting to avoid the circumvention of an agreement.

Mr. President, the legislation that I present for the Senate's consideration is not intended to produce a cessation of arms transfers. Clearly this would be impossible. Moreover, it would also be undesirable. Arms exports can serve U.S. interests to the extent that they strengthen the defensive capabilities of friendly states against aggression by hostile neighbors. What the proposed legislation does is to recommend that this administration establish an international forum modeled after the Coordinating Committee for Multilateral Security Export Controls and the Nuclear Suppliers Group. This new Commission would be comprised of the United States, the Soviet Union, the United Kingdom, France, Italy, and the Federal Republic of Germany. Membership could be expanded later to include other supplier nations.

In the words of this legislation, the purpose of the new Commission would be to "establish guidelines, to regulate the effect of multilateral limitations on arms sales and on the national economies of its member countries; and address other areas pertinent to limiting the sale or transfer of arms." The legislation would also amend the Arms Export Control Act to recognize the threat which the sales of sophisticated arms to the Third World pose to regional and world peace.

Mr. President, I am convinced that there is no greater real threat to world peace then the proliferation of massive quantities of highly sophisticated conventional weapons in regions of great instability. In an immediate sense, conventional arms sales may pose a greater danger than the more dramatic threat of nuclear proliferation.

Mr. President, I also want to take this opportunity to thank Mr. Hugh De Santis, who recently left my staff for a position with the Carnegie Endowment for International Peace, for educating me regarding the threat of international arms sales and for his hard work in preparing the proposed legislation.

Mr. President I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1973

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds that—

(1) arms sales worldwide have increased from $3-4 billion per year to $30-35 billion per year over the past two decades;

(2) $25-30 billion of this annual amount represents arms transfer agreements with countries of the Third World;

(3) the accelerating pace of arms transfers to developing countries absorbs resources which could be more productively utilized to foster economic growth;

(4) the proliferation of arms in the developing world tends to undermine geopolitical regional balances;

(5) the deterioration of regional balances has direct implications for North-South relations and East-West relations;

(6) experts agree that any military confrontation between the United States and the Union of Soviet Socialist Republics, and thus another global war, is most likely to stem from a regional conflict in the Third World; and

(7) Third World countries contracted to buy arms from the United States, the Union of Soviet Socialist Republics, and the major West European suppliers between 1980-1984 totaling $40,249,000, $40,201,000, and $33,328,000, respectively.

SEC. 2. (a) It is the sense of the Congress that the President should undertake negotiations with governments of the key arms suppliers in order to establish a consultative commission, modeled after the Coordinating Committee for Multilateral Security Export Controls and the nuclear suppliers group, which should be called the Consultative Commission for Multilateral Arms Restraint (hereafter in this Act referred to as the "Consultative Commission").

(b)(1) The Consultative Commission should be comprised of the United States and the Union of Soviet Socialist Republics, historically the largest arms suppliers, as well as France, the United Kingdom, Italy, and the Federal Republic of Germany.

(2) The Consultative Commission should meet in Geneva, Switzerland, at intervals to be determined by its members in order to negotiate restrictions on sophisticated combat weaponry and the technology of conventional arms production.

(3) The Consultative Commission should—

(A) establish guidelines to regulate the effect of multilateral limitations on arms sales on the national economics of its member countries; and

(B) address other areas pertinent to limiting the sale or transfer of arms, including—

(i) the adoption of mechanisms to safeguard against the circumvention of the arms restraint regime by its member countries; and

(ii) the establishment of a procedural timetable for the purpose of creating an additional forum to facilitate deliberations between member countries of the Consultative Commission and other developed as well as newly industrialized countries on the limitation of arms transfers.

SEC. 3. Paragraph (5) of section 25(a) of the Arms Export Control Act (22 U.S.C. 2765(a)(5)) is amended by adding at the end thereof the following new subparagraphs:

"(C) the aggregate dollar value and quantity of defense articles, defense services, and design and construction services furnished by the United States to each foreign country and international organization, by category, for the preceding fiscal year, specifying whether such articles and services were furnished—

"(i) by sale under chapter 2 of this Act,

"(ii) by sale under chapter 2A of this Act,

"(iii) by commercial sale licensed for permanent export under section 38 of this Act (including separate listings for the value and quantity of the defense articles and defense services which were licensed for permanent export during that fiscal year and for the value and quantity of the defense articles and defense services which were actually exported on a permanent basis during that fiscal year), or

"(iv) by other authority;

"(D) the aggregate dollar value of all commercial manufacturing license agreements approved under section 38 of this Act during the preceding fiscal year, listed by foreign country and international organization;

"(E) the aggregate dollar value of all commercial technical assistance agreements approved under section 38 of this Act during the preceding fiscal year, listed by foreign country and international organization; and

"(F) the aggregate dollar amount of all offset agreements (as defined for purposes of section 309 of the Defense Production Act of 1950 (50 U.S.C. app. 2099)) associated with commercial licensed sales or government-to-government sales under this Act, which were entered into during the preceding calendar year by the United States suppliers of the defense articles, defense services, or design and construction services sold, listed by foreign country and international organization;".

By Mr. WILSON (for himself, Mr. MATHIAS, and Mrs. HAWKINS):

S. 1974. A bill to prohibit the imposition by the States of the worldwide unitary method of taxation; to the Committee on Finance.

UNITARY TAX REPEALER ACT

Mr. WILSON. Mr. President, I rise today to offer a bill that, unfortunately, must be offered in order that the United States avoid starting an international conflict over the taxation of multinationals.

The legislation that I am introducing, the Unitary Tax Repealer Act, would, first, prohibit States from imposing corporate income taxes on a worldwide unitary basis; second, limit State taxation of dividends received by U.S. companies from foreign corporations; and third, provide States with Federal assistance in gathering information necessary to administer their tax laws relating to multinational businesses. The legislation was prepared by the Treasury Department at the express direction of the President. I am introducing the bill today, as is Representative DUNCAN in the other body, so that the Congress can begin its consideration of the legislation in a timely manner.

Mr. President, the practice of a small but important minority of the States, including my State of California, that assesses corporate income taxes on a worldwide unitary basis has caused serious difficulties with the conduct by the Federal Government of our foreign economic policy. The worldwide unitary method departs from the separate accounting principles of international taxation generally followed by the Federal Government and within the international community. That method imposes severe recordkeeping and administrative burdens on multinational businesses and, because of its departure from internationally accepted taxing principles, often results in double taxation.

These adverse consequences of State worldwide unitary taxation have led to serious formal diplomatic complaints from virtually all of our closest trading partners including Canada, the United Kingdom, Germany, Belgium, the Netherlands, Italy, Switzerland, and Japan. These objections have resulted in the adoption of enabling legislation by the United Kingdom permitting serious retaliatory measures to be taken against United States companies that operate in worldwide unitary States and that have subsidiaries in the United Kingdom. It has become clear that the ability of the Federal Government to speak with one voice in the conduct of its foreign economic affairs is significantly weakened because of these State tax practices.

Over the past 2 years the administration has worked closely with States and affected businesses in an attempt to arrive at a voluntary resolution of the worldwide unitary tax problem. The Treasury Department chaired a Worldwide Unitary Taxation Working Group which in 1984 arrived at principles for the voluntary resolution of the unitary issue at the State level. A number of States responded to this initiative by ceasing the use of the unitary method on a worldwide basis. Other States have not yet acted, however. The failure to date to achieve voluntary compliance by all States with the principles adopted by the working groups, and the increasing international difficulties caused by continued adherence by a few States to the worldwide unitary method, now require that restrictive Federal legislation be adopted.

While the principal foreign commerce issues raised by State worldwide unitary taxation would be resolved if States were to agree that they would not impose worldwide unitary tax on foreign controlled entities, such as limited resolution would cause other serious problems. If a "foreign only" solution were adopted, domestically controlled businesses would thereby be disadvantaged. This would occur because the foreign income of the States, whereas the foreign income of domestically controlled multinationals would continue to be subject to tax at the State level, either on a worldwide unitary combination basis or when repatriated in the form of dividends. The working group recognized expressly the need for competitive balance for domestic multinations, foreign multinational and purely domestic businesses in any resolution of the unitary issue. That principle requires that legislation restricting State worldwide unitary taxation also address the question of equitable State taxation of foreign source dividends.

The legislation I am introducing does not mandate that any specific method of dividend taxation be imposed by the States. Rather, it provides in broad terms for equitable taxation of dividends and suggests certain guidelines that States can follow to avoid the systematic overtaxation and double taxation of U.S. taxpayers—in contravention of a strong Federal policy. Many States, including a number of former worldwide unitary tax States, already compete with these guidelines. Parenthetically, I might also note that even the Ways and Means Committee version of the tax bill recognizes the evil of double taxation by continuing the deductibility of State and local taxes for Federal tax purposes.

States have legitimately contended in the working group and elsewhere that they lack the resources and ability to monitor adequately transactions between members of a water's edge unitary group and related foreign companies outside that group. The Treasury Department agreed with the recommendations of the working group to provide appropriate assistance to the States in order to assure proper operation of the separate accounting method. The working group suggested that an annual information return be filed with the Internal Revenue Service by multinational companies. This return would in turn be shared with the States and with multistate audit agencies and would provide States with some assurance that corporations had allocated and apportioned the appropriate share of the corporation's income to each State. The report would also identify those related companies with which serious income shifting would be most likely to arise. In the summer of 1985, the Treasury Department published for comment a draft of legislation implementing this reporting system. Section 3 of the bill is based upon that draft after taking into account the many comments received from affected businesses and the various States. The information reporting system provided for in the bill is an integral part of the solution to the worldwide unitary problem.

Arguments of federalism and State fiscal sovereignty are not easily overcome. Due concern for rights of the States dictate that they be granted great leeway to tailor their own systems of taxation. However, in this instance the lack of a solution will certainly yield serious international ramifications, including foreign sovereign retaliation against innocent bystanders. Therefore, the Congress must insert itself into the process in order

to avoid a serious disruption of international commerce and so that a solution can be forged.

It is my sincere hope that California and the other six remaining unitary tax States will take remedial action without Federal mandate. However, they are now on notice that the unitary tax repealer has left the station, and, one way or another, the problem will be solved by the end of 1986.

I ask unanimous consent that the text of the Unitary Tax Repealer Act be printed in the RECORD along with a copy of the President's statement of November 8, 1985, addressing the unitary tax issue.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1974

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this bill may be cited as the "Unitary Tax Repealer Act".

SEC. 2. Chapter 77 of the Internal Revenue Code of 1954 (relating to miscellaneous provisions) is amended by adding at the end thereof the following new section:

"SECTION 7518. STATE TAXATION OF FOREIGN INCOME.

"(a) STATE USE OF WORLDWIDE UNITARY METHOD PROHIBITED.—No State shall impose income tax on any taxpayer on a worldwide unitary basis, unless:

"(1) the taxpayer materially fails to comply with the requirements of section 6039A or with the legal or procedural requirements of the income tax laws of such State; or

"(2) neither the taxpayer nor the government of the relevant foreign country provides to such State, within a reasonable period after proper request, material information relating to the determination of the income of the taxpayer on transactions between the taxpayer (or any related corporation described in section (c)(2)) and any corporation not described in section (c)(2) which is a member of the same controlled group of corporations as the taxpayers.

"Notwithstanding the foregoing, this subsection shall not preclude any State from permitting a taxpayer to be taxed on a worldwide unitary basis pursuant to an unconditional election by such taxpayer.

"(b) STATE TAXATION OF FOREIGN-SOURCE DIVIDENDS.—No State shall require the inclusion in the income base upon which State income tax of a corporation is calculated of more than an equitable portion of any dividend received from another corporation, other than a corporation described in section (c)(2)(A) through (E). For purposes of this subsection (b), a State shall not be considered to include in the income base more than an equitable portion of dividends described in the preceding sentence if it—

"(1) excludes from the income base at least eighty-five percent of such dividends;

"(2) excludes from the income base the portion of the dividend that effectively bears no Federal income tax after application of the foreign tax credit; or

"(3) adopts a method of taxation that, considering all the facts and circumstances, results in an equitable apportionment of the dividend to the State substantially similar to (1) or (2), pursuant to regulations to be promulgated by the Secretary.

"This subsection shall not apply to any tax imposed on a dividend by the State of commercial or legal domicile of the recipient. This subsection shall not be construed to permit State taxation of any dividend not subject to State taxation prior to enactment of this section.

"(c) DEFINITIONS.—

"(1) INCOME TAX.—For purposes of this section, the term 'income tax' shall include any State franchise or other tax which is imposed upon or measured by the income of the taxpayer.

"(2) WORLDWIDE UNITARY BASIS.—For purposes of this section, the term 'worldwide unitary basis' means that in computing its State income tax liability a corporation includes in the income base on which the tax is calculated any share of the income of any corporation other than a corporation that is a member of the same controlled group of corporations and is:

"(A) a domestic corporation (including a corporation that has made an effective election under section 936);

"(B) a corporation described in section 922;

"(C) a corporation organized in the Commonwealth of Puerto Rico, Guam, American Samoa or the United States Virgin Islands;

"(D) any foreign corporation if—

"(i) such corporation is subject to State income tax in at least one State by virtue of its business activities in that State; and

(ii) (a) such corporation has, assignable to one or more locations in the United States, at least $10,000,000 in compensation payments made by it for services rendered during its most recent Federal taxable year, sales or purchases of at least $10,000,000 to or from unrelated parties during its most recent Federal taxable year, or property (other than stock or securities of a corporation) with an aggregate original cost of at least $10,000,000, or (b) the average of the percentages of such corporation's property (based on its aggregate original cost), compensation payments made for personal services (determined for its most recent Federal taxable year), and sales (determined for its most recent Federal taxable year) that are assignable to one or more locations in the United States is at least 20 percent; or

"(E) any foreign corporation described in subsection (c)(3).

"(3) CERTAIN FOREIGN CORPORATIONS.—A foreign corporation is described in this subparagraph if such corporation—

"(A) is a member of a controlled group of corporations that includes at least one reporting corporation (within the meaning of section 6039A but determined without reference to this paragraph);

"(B) either carries on no substantial economic activity or makes at least

"(i) 50 percent of its sales,

"(ii) 50 percent of its payments for expenses other than payments for intangible property, or

"(iii) 80 percent of all of its payments for expenses,

"to one or more corporations that are described in subparagraph (A) through (D) of paragraph (2) and that are within the controlled group of corporations referred to in subparagraph (A) of this paragraph; and

"(C) under standards established in regulations to be prescribed by the Secretary, is not subject to substantial foreign tax on its net income.

"(4) CERTAIN DOMESTIC CORPORATIONS TREATED AS FOREIGN CORPORATIONS.—For purposes of paragraphs (2) and (3), a domestic corporation shall be treated as a foreign corporation if (i) such corporation has, assignable to one or more locations in the United States, less than $10,000,000 in compensation payments made by it for services rendered during its most recent Federal taxable year, sales or purchases of less than $10,000,000 to or from unrelated parties during its most recent Federal taxable year, and property (other than stock or securities of a corporation) with an aggregate original cost of less than $10,000,000, and (ii) the average of the percentages of such corporation's property (based on its aggregate original cost), compensation payments for personal services (determined for its most recent Federal taxable year), and sales (determined for its most recent Federal taxable year) that are assignable to one or more locations in the United States in less than 20 percent.

"(5) CONTROLLED GROUP.—For purposes of this section, the term 'controlled group' has the same meaning as in section 6039(c)(4).

"(6) CERTAIN BANK BRANCHES.—For purposes of this section, a domestic branch of a foreign corporation shall be treated as a separate corporation that is incorporated in the United States if such branch is engaged in the commercial banking business. For purposes of the preceding sentence, a branch is engaged in the commercial banking business if—

"(i) the predominant—part of its business consists of receiving deposits or making loans and discounts, and

"(ii) it is subject to supervision and examination by State or Federal authorities having supervision over banking institutions. The Secretary may issue regulations providing that for purposes of this section domestic branches of foreign corporations in other specified industries shall be treated as separate corporations incorporated in the United States."

SEC. 3. Subpart A of part III of subchapter A of Chapter 61 of the Internal Revenue Code of 1954 (relating to information returns) is amended by adding immediately after section 6039 the following section:

"SECTION 6039 A. INFORMATION WITH RESPECT TO CERTAIN MULTISTATE AND MULTINATIONAL CORPORATIONS.

"(a) GENERAL RULE.—A reporting corporation shall file, within 180 days of the due date (including extensions thereof) of its Federal income tax return for the taxable year, a return disclosing information relating to its State income tax returns for state taxable years ending with or within the taxable year of such corporation for Federal income tax purposes. Such return shall include the reporting corporation's income tax liability to each State in which it is liable to pay income tax, its income subject to tax in each State, the method of calculation by which the reporting corporation computed and allocated its income subject to tax by each State, each corporation in which the reporting corporation, or any corporation owning 50 percent or more of the outstanding voting stock of the reporting corporation, owns, directly or indirectly, at any time during the reporting corporation's taxable year, more than 20 percent of the combined voting power of all classes of stock entitled to vote and which, during the reporting corporation's taxable year, has engaged in transactions with the reporting corporation and its includible corporations aggregating $1,000,000 or more, and such other related information as the Secretary may by regulation prescribe.

"(b) REPORTING BY RELATED CORPORATIONS.—

"(1) REPORTING BY COMMON PARENT OF AFFILIATED GROUP.—If a reporting corporation is a common parent of an affiliated group of corporations, in filing the return required by subsection (a) it shall include the information described in subsection (a) with respect to each includible corporation in such affiliated group. Such information shall be filed for the state taxable year of each includible corporation ending with or within the common parent corporation's taxable year for Federal income tax purpose.

"(2) REPORTING ON BEHALF OF OTHER RELATED CORPORATIONS.—If a reporting corporation is a member of a controlled group of corporations that includes a foreign corporation that is described in section 7518(c)(3) but is not required to file a Federal income tax return, then such foreign corporation shall, for purposes of paragraph (1), be considered to be a member of an affiliated group, of which such reporting corporation is the common parent. The preceding sentence shall not apply if the foreign corporation and such reporting corporation are included in a return filed on behalf of an affiliated group pursuant to paragraph (1).

"(c) DEFINITIONS.—

"(1) REPORTING CORPORATION.—

"(A) IN GENERAL.—For purposes of this section, the term 'reporting corporation' means a corporation that is required to file a Federal income tax return for the taxable year, and that

"(i) makes aggregate payments of at least $10,000,000 as compensation for services rendered outside the United States during the taxable year;

"(ii) owns assets situated outside the United States with an aggregate original cost of least $10,000,000;

"(iii) has gross sales occurring outside the United States of at least $10,000,000 during the taxable year; or

"(iv) is subject to tax in at least two States, and owns total assets with an aggregate original cost of at least $250,000,000, at least $10,000,000 of which are located in the United States.

The Secretary shall have authority at any time to increase any dollar threshold set forth in this paragraph. The allocation of compensation payments, property, or sales to or among foreign countries shall be determined under regulations prescribed by the Secretary.

"(B) APPLICATION OF DEFINITION TO RELATED CORPORATIONS.—For purposes of applying subparagraph (A) to related corporations—

"(i) compensation paid by, property owned by, or sales made by members of an affiliated group of corporations shall be treated as if paid, owned, or made directly by the common parent corporation; and

"(ii) compensation paid by, property owned by, or sales made by members of a controlled group of corporations that are not members of the same affiliated group of corporations shall be consolidated and attributed to each member of such controlled group that is required to file a Federal income tax return.

"(2) AFFILIATED GROUP.—For purposes of this section, the term 'affiliated group' means one or more chains of includible corporations connected through stock ownership with a common parent corporation which is required to file a Federal income tax return for the taxable year if—

"(A) stock possessing more than 50 percent of the combined voting power of all classes of stock entitled to vote of each of the includible corporations (except the common parent corporation) is owned directly or indirectly by one or more of the other includible corporations within the affiliated group; and

"(B) the common parent corporation own directly stock possessing more than 50 percent of the voting power of all classes of stock entitled to vote of at least one of the other includible corporations.

"(3) INCLUDIBLE CORPORATION.—For purposes of this section, with respect to any taxable year, the term "includible corporation" means—

"(A) any domestic corporation, other than a corporation exempt from tax under section 501,

"(B) any corporation incorporated in the Commonwealth of Puerto Rico, Guam, American Samoa or the United States Virgin Islands,

"(C) any corporation defined in section 922,

"(D) any foreign corporation that is required to file a Federal income tax return with respect to such taxable year, or

"(E) any other foreign corporation that is described in section 7518(c)(3).

"(4) CONTROLLED GROUP.—For purposes of this section, the term 'controlled group' has the meaning given to such term by section 267(f)(1), except that the determination shall be made without regard to section 1563(b)(2)(C).

"(5) CERTAIN BRANCHES TREATED AS SEPARATE CORPORATIONS.—For purposes of this section, a branch described in section 7518(c)(6) shall be treated as a separate corporation that is incorporated in the United States.

"(d) STATUS OF RETURN.—If the information return filed pursuant to subsection (a), or any information reflected on such return, is disclosed or made available to a State tax agency (as defined in section 6103(d)(4)(C)), or to any common agency (as defined in section 6103(d)(4)(A)) in which a State participates, the return may thereupon be treated, if and to the extent provided by the laws of such State, as if originally filed with such State for purposes of the imposition of civil or criminal penalties under the laws of such State for negligence, fraud, or a material understatement of income or of tax liability. Except as provided by the laws of the applicable State, treatment of the information return as a State return shall not extend or otherwise affect any State statute of limitations.

"(e) DOLLAR PENALTY FOR FAILURE TO COMPLY.—

"(1) IN GENERAL—If with respect to any taxable year a reporting corporation fails to comply substantially with the requirement of subsection (a) on or before the due date specified in subsection (a), such corporation shall pay a penalty of $1,000.

"(2) INCREASE IN PENALTY WHERE FAILURE CONTINUES AFTER NOTIFICATION.—If any failure described in paragraph (1) continues for more than 90 days after the date on which the Secretary mails notice of such failure to the reporting corporation, such corporation shall pay a penalty (in addition to the penalty imposed by paragraph (1) or by any applicable State law) of $1,000 for each 30-day period (or fraction thereof) during which such failure continues after the expiration of such 90-day period. The increase in penalty under this paragraph shall not exceed $24,000.

"(3) IMPOSITION OF PENALTIES UNDER STATE LAW.—Nothing in this subsection shall preclude any State from imposing any fines or penalties for negligence, fraud, or understatement of income or of tax liability in accordance with the laws of that State."

SEC. 4. Section 6103 of the Internal Revenue Code of 1954 (relating to confidentiality and disclosure of returns and return information) is amended by—

(a) revising subsection (d) to read as follows:

"(d) Disclosure to State Officials, Etc.

"(1) IN GENERAL.—Upon compliance with the procedures and requirements of paragraph 2, returns and return information with respect to taxes imposed by chapters 1, 2, 6, 11, 12, 21, 23, 24, 31, 32, 44, 45, 51, and 52 and subchapter D of chapter 36, returns described in section 6039A, and return information obtained by the Internal Revenue Service from any foreign government, or agency or department thereof, under the exchange of information provisions of any income tax treaty, estate and gift tax treaty or agreement described in section 274(h)(6)(C), to which the United States is a party, shall be open to inspection by, or disclosure to, any State tax agency for the purposes of, and only to the extent necessary in, the administration of the tax laws of a State, including any procedures with respect to locating any person who may be entitled to a refund. Notwithstanding the preceding sentence, return information obtained under treaties or section 274(h)(6)(C) agreements shall be open to examination or disclosure only to the extent such examination or disclosure is permitted by, and shall be subject to any limitation imposed by, the relevant treaty or agreement. Returns and return information described in this paragraph (1) relating to any taxpayer that is a reporting corporation (within the meaning of section 6039A(c)(1)) or that is a member of an affiliated group (within the meaning of section 6039A(c)(2)) that also includes such a reporting corporation shall also be open to inspection by or disclosure to any common agency.

"(2) PROCEDURES AND RESTRICTIONS.—

"(A) PERSONS TO WHOM INFORMATION MAY BE DISCLOSED.—Except as the Secretary shall prescribe by regulation, inspection shall be permitted, or disclosure made, under paragraph (1) only upon written request by the head of the State tax agency or common agency, and only to the representatives of such agency designated in such written request as the individuals who are to inspect or to receive the returns or return information on behalf of such agency. Such representatives shall not include any individual who is the chief executive officer of a State or who is neither an employee or legal representative of such agency nor a person described in subsection (n). Returns and return information shall not be disclosed under paragraph (1) to the extent that the Secretary determines that such disclosure would identify a confidential informant or seriously impair any civil or criminal tax investigation.

"(B) DISCLOSURE OF RETURNS AND RETURN INFORMATION RELATING TO SECTION 6039A REPORTING CORPORATIONS BY STATE TAX AGENCIES, AND COMMON AGENCIES.—A State tax agency or common agency obtaining returns or return information that are described in paragraph (1) and that relate to any taxpayer that is a reporting corporation (within the meaning of section 6039A(c)(1)) or that is a member of an affiliated group (within the meaning of section 6039A(c)(2)) that also includes such a reporting corporation, may disclose such returns and return information to a State tax agency of any other State, provided the State tax agency of such other State has entered into an applicable nondisclosure agreement with the Secretary

that satisfies the requirement of paragraph (2)(C).

"(C) NONDISCLOSURE AGREEMENT.—A State tax agency or common agency obtaining returns or return information that are described in paragraph (i) and that relate to any taxpayer that is a reporting corporation (within the meaning of section 6039A(c)(1)) or that is a member of an affilated group (within the meaning of section 6038A(c)(2)) that also includes such a reporting corporation shall be required to execute a non-disclosure agreement with the Secretary prohibiting the disclosure of such returns or return information or of any data, information or conclusion extracted or of any data, information or conclusion extracted from or based upon such returns or return information except for the purposes of and under the conditions provided in this section. The required nondisclosure agreement shall contain such terms and conditions as the Secretary shall prescribe.

"(3) DISCLOSURE TO STATE AUDIT AGENCIES.—Returns or return information described in paragraph (1) obtained by any State tax agency may be open to inspection by, or disclosure to, officers and employees of a State audit agency for the purpose of, and only to the extent necessary in, making an audit of the State tax agency. Notwithstanding the preceding sentence, return information obtained under a treaty or section 274(h)(6)(C) agreement shall not be open to inspection by or disclosure to any State audit agency.

"(4) DEFINITION.—

"(A) COMMON AGENCY.—For purposes of this section, the term 'common agency' means a joint or common agency, body, or commission which has been designated under the laws of four or more States to represent such States collectively in the administration of the corporate income tax laws of those States and which has executed a nondisclosure agreement of the type described in paragraph (d)(2)(C).

"(B) STATE TAX AGENCY.—For purposes of this section, the term 'State tax agency' means any agency, body, commission or other body charged under the laws of a State with responsibility for the administration of State tax laws.

((C) STATE AUDIT AGENCY.—For purposes of this section, the term 'State audit agency' means any State agency, body, commission, or entity which is charged under the laws of the State with the responsibility of auditing State revenues and programs."

(b) Striking "subsection (e)(1)(D)(iii)" in subsection (a)(3) and inserting in lieu thereof "paragraph (1) of subsection (d), subsection (e)(1)(D)(iii)".

(c) Striking "subsections (c)" in the second sentence of subsection (p)(3)(A) and inserting in lieu thereof "subsections (c), (d)(2)(A)".

SEC. 5. The second sentence of section 274(h)(6)(C)(i) of the Internal Revenue Code of 1954 (relating to exchange of information agreements) is amended to provide as follows:

"Except as provided in clause (ii), an exchange of information agreement shall provide for the exchange of such information (not limited to information concerning nationals or residents of the United States or the beneficiary country) as may be necessary and appropriate to carry out and enforce the tax laws of the United States (whether criminal or civil proceedings), the tax laws of the beneficiary country and if the parties to the agreement agree, the tax laws of the several States of the United States, including information which may otherwise be subject to nondisclosure provisions of the local law of the beneficiary country (such as provisions respecting bank secrecy and bearer shares.)"

SEC. 6. EFFECTIVE DATE.—The amendments made by this Act shall be effective for taxable years beginning after December 31, 1986.

STATEMENT BY THE PRESIDENT

Since early in this Administration, we have been working with the states, the business community, and foreign governments in an effort to resolve issues related to state use of the worldwide unitary method of taxation. At this time I believe it appropriate for the Federal Government to state its support for the concept of legislation that would:

1. Effect a requirement that multinationals be taxed by states only on income derived from the territory of the United States ("the water's edge requirement"); and

2. Address the question of equitable taxation of foreign source dividends.

We hoped that by this time these principles would have been enacted by the various states that have unitary taxation. Since states have not universally accepted these principles, I am instructing the Secretary of the Treasury to initiate the process of crafting Federal legislation to incorporate these principles into law and to work with the Congress for passage, and also, where appropriate, to enter into negotiations to amend double taxation agreements. I am also instructing the Secretary of the Treasury to pursue enactment of the domestic "spreadsheet" legislation, which has been previously proposed, and which is designed to assist nonunitary states with tax enforcement respecting multinational corporations in order to promote full taxpayer disclosure and accountability.

Further, I am instructing the Attorney General to ensure that the United States' interests are represented in appropriate controversies and cases consistent with this approach.

Mr. MATHIAS. I am very pleased to cosponsor this bill, drafted by the administration and introduced at its request by Senator WILSON. It marks a great stride toward the worldwide unitary tax reform I have been pressing for two decades.

The bill has two major components. First, it restricts the States from applying a unitary tax to corporate income generated beyond U.S. territory and requires the States to follow the principles of the Federal Tax Code in taxing intercorporate dividends from foreign corporate branches. Second, it requires multinational corporations to make fuller financial disclosures to the State taxing authorities on a new domestic disclosure spreadsheet.

Abandoning the worldwide unitary tax will have little direct effect on the revenues coming to the States from corporate taxes. It will, however, give a powerful boost to the economic vitality of the few States that have clung to this method of taxation. The change should enhance the investment climate in these States. In addition, the full disclosure spreadsheet will reassure the States that all the corporations' worldwide operations are being taxed properly in the jurisdictions in which they are generating income.

The worldwide unitary tax has been a source of distress among our foreign trading partners. By introducing a bill this year and vigorously pursuing its enactment next year, we hope to avert retaliatory measures from other countries, such as the pending British action to restrict the advance corporate tax rebate that United States corporations now enjoy in that country.

As one who has worked on this issue for more than 20 years, I am gratified to see the support this proposal has drawn in its present form, from the President and the Senator from California, among many others. The Secretary of the Treasury, James Baker, and his predecessor, White House Chief of Staff Donald Regan, both deserve special mention for their sustained involvement and leadership in maintaining progress on this issue over the past few years. I look forward to working further with all these gentlemen, and with the rest of my colleagues, in advancing the bill through the legislative process next year.

By Mr. GOLDWATER:

S. 1975. A bill to provide that the laws restricting trade between two points in the United States to vessels of the United States shall not apply to inflatable passenger boats or rafts before November 1, 1993; to the Committee on Commerce, Science, and Transportation.

WHITEWATER RAFTING TRADE EXEMPTIONS

● Mr. GOLDWATER. Mr. President, I am today introducing legislation to provide the whitewater rafting industry with a temporary exemption from the Jones Act.

Owners of these river touring companies have been advised by the U.S. Customs Service that the operation of foreign-built inflatable rafts on navigable rivers of the United States is illegal under provisions of the Jones Act. This affects well over 90 percent of the rafts currently owned by professional river outfitters. Because of domestic supply problems, outfitters cannot replace worn rafts for the 1986 river season, let alone replace their entire fleet with U.S.-built rafts. A period of relief and transition is very much justified. The 8-year exemption to the Jones Act provided by my bill is sufficient to determine whether domestic raft manufacturers can begin to service this market.

There are many among my colleagues who are cautious about any proposals to amend the Jones Act. I want to reassure these colleagues that over a period of several months the whitewater industry has worked close-

ly with maritime labor, domestic inflatable raft manufacturers, and other parties to reach accommodation of the interests of these groups. That process is ongoing, and it is not the intent of the river outfitters to strike at the fiber of the Jones Act.

I hope that my colleagues can also appreciate the urgency of this situation and act quickly to resolve the question. The problem has confronted the industry for some time now with the verbal assurances of its Government that no enforcement procedures would occur. However, enforcement has now occurred. Hundreds of river outfitters and their thousands of employees are left without recourse in their business plans for the upcoming 1986 river season.

It has been determined that no administrative or legal remedy is available to river outfitters. What happens next to this segment of recreation is solely in the hands of this Congress. We need to move quickly on any unresolved factfinding, because the stability of this industry depends upon a congressional decision within the next few months.

I thank my colleagues for the time many have already devoted to this problem and for the attention it receives in the future.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1975

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 27 of the Merchant Marine Act, 1920 (46 U.S.C. 883), is amended by inserting after the period at the end thereof the following: "Before November 1, 1993, nothing in this section, or in any other provision of law restricting trade between points in the United States to vessels of the United States, shall apply to inflatable passenger boats or rafts not exceeding two and one half tons."●

By Mr. SPECTER:

S. 1976. A bill to provide for a study relating to the development of high speed rail systems within the United States; to the Committee on Commerce, Science, and Transportation.

HIGH SPEED RAIL SYSTEMS

Mr. SPECTER. Mr. President, I am introducing legislation directing the Federal Railway Administration and the National Railroad Passenger Corporation (Amtrak) to conduct a joint study for the purpose of determining the most effective means by which the Federal Government can encourage the development of high speed rail systems within the United States. In conducting such a study, the Federal Railway Administration and the National Railroad Passenger Corporation are directed to consider, among others, such means as tax benefits for private investors; Federal assistance in obtaining necessary rights-of-way; matching Federal grants for developing new technology that could be applied nationally; and the establishment of a pilot program. The recommendations will be reported to Congress within 6 months of enactment.

Last year, April 11, 1984, Congress enacted legislation which I cosponsored granting its consent to an interstate compact among the States of Illinois, Indiana, Michigan, Ohio, and Pennsylvania for the preparation of a feasibility study for the development of a system of high-speed intercity rail passenger service. The bill I am introducing today directs that the Federal study be conducted in consultation with this congressionally recognized compact.

The involvement of Amtrak in this venture is also essential; it has the experience as the national passenger railway and owns much of the track and rights-of-way necessary for development of high-speed rail service. On July 31, 1985, I wrote Mr. W. Graham Claytor, Jr., president of Amtrak, and urged him to study the feasibility of initiating high-speed rail service between Philadelphia and Pittsburgh. I ask unanimous consent that my letter and Mr. Claytor's response be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, July 31, 1985.

Mr. W. GRAHAM CLAYTOR, Jr.,
President, Amtrak, North Capitol Street, NW., Washington, DC.

DEAR MR. CLAYTOR: I am intrigued by the reports in the recently issued preliminary study of the Pennsylvania High Speed Intercity Rail Passenger Commission that rail service between Philadelphia and Pittsburgh may be accomplished in less than three hours, at speeds of 160 miles per hour or faster. According to the study, such high speed rail systems are currently in use in France, Great Britain and Japan.

Such a system would give Pennsylvania a quality and frequency of service unknown in America, but widely available to those countries presently utilizing safe rapid rail transit between major cities. It also would help meet a growing demand for intercity transportation which some studies have indicated will double by the year 2000.

I strongly urge you to support the development of such rail service, if indeed it is practical for the areas in which it is envisioned.

Thank you for your prompt attention to this important aspect of transportation improvement.

Sincerely,

ARLEN SPECTER.

SEPTEMBER 5, 1985.

Hon. ARLEN SPECTER,
U.S. Senate, Washington, DC.

DEAR SENATOR SPECTER: I am responding to your July 31 letter concerning reports you have received from the Pennsylvania High Speed Intercity Rail Passenger Commission regarding the feasibility of establishing a 160-mile-per-hour rail service between Philadelphia and Pittsburgh.

While I have not yet seen the reports you mention, I am familiar with the efforts of various groups to establish high-speed rail service in this country, and I can offer some general observations. As you point out, the Japaneses bullet trains and France's Tres Grande Vitesse (TGV) are perhaps the two better known high-speed services in operation today. In the United States, Amtrak currently operates service in the Northeast at 120 miles per hour, the fastest rail passenger service in the country, and we hope to achieve slightly greater speeds as further refinements in our operations permit.

Amtrak has taken the position that it will support the effort of private and public sector initiatives to develop high-speed rail service, but for budgetary reasons we cannot participate financially in the institution of such service. Amtrak did, however, enter into a licensing agreement with the former American High Speed Rail Corporations (AHSRC) for development of high-speed rail passenger service in the Los Angeles-San Diego corridor. Our interest in AHSRC was predicated on the belief that the introduction of high-speed passenger trains to the United States on a commercial basis holds the promise of financial benefits to Amtrak and that prospects are favorable that Amtrak can enter into profitable commercial relationships with the direct providers of high-speed passenger service whereby we could possibly provide reservations, operating and maintenance services, all on a profitable basis. Unfortunatley, AHSRC was not able to secure the private sector financing to institute service, but this does not necessarily work against other entities' efforts to establish service. In fact, the Florida High-Speed Rail Commission was recently formed to consider the feasibility of high-speed rail service in that state, and technical information prepared by the Japanese National Railways was made available to the Commission through AHSRC. Clearly, the development of high speed service should result in greater public awareness of rail service as a viable transportation alternative, and we look forward to the day that the United States will have world class high-speed service.

I appreciate your interest in high-speed rail and hope that you will let me know if you have any further questions about Amtrak's role in its development in the United States.

Sincerely

W. GRAHAM CLAYTOR, Jr.,
President.

Mr. SPECTER. Mr. President, high-speed rail service is the wave of the future, and it is unconscionable that this Nation, once a leader in new technology, should lag so far behind other developed nations such as France, Germany, Great Britain, Canada, and Japan. We cannot settle for a society that fails to develop the infrastructure needed to maximize our potential.

Just as the railroads once paved the way for the development of our Nation, high-speed rail can pave the way for revitalization of our cities by stimulating tourism, increasing employment opportunities, and encouraging business development in now near-deserted urban train stations and in

outlaying cities served by these rails. The greatly reduced travel times—the current 7-hour trip between Philadelphia and Pittsburgh, for example, could be cut to just over 2 hours—and the greater choice in arrival and departure times, will attract vastly more riders with a corresponding savings in oil and gas use and reduction in highway and airport congestion.

We must begin now to develop the transportation infrastructure we will need by the turn of the century. Several years ago, the Congress set up the National Transportation Study Commission to study America's future transportation needs. The Commission's final report predicted that, by the year 2000, this country will need almost double its present ability to transport passengers by common carriers. If we are to meet these travel needs, development of high-speed rail systems should be a high priority.

The Federal study took special note of the absence of an efficient travel mode for short-distance intercity markets—a niche high-speed rail might fill:

Present inter-city service offers limited speed and cost options. In short-range markets, there are no substantial high-speed options—air being relatively slow due to excessive access time, and the auto and bus being fixed at a maximum upper speed limit of 55 miles per hour. This market is often indicated as having potential for high-speed rail service; however, substantial capital investment is required. Where auto, bus and air speeds are often impaired by road and airway congestion, rail services may gain market share when rail speeds and service levels begin to compare favorably with the other modes.

A high-speed rail network will not only provide the transportation system necessary for future growth, but it will also deliver benefits related to its planning and construction. In my own State of Pennsylvania, a study prepared for the Pennsylvania High Speed Intercity Rail Passenger Commission found that new jobs directly created can boost the State's employment growth rate by as much as 68 percent during the construction period—estimated at 8 years—and by up to 35 percent when service begins. A high-speed rail system between Philadelphia and Pittsburgh could provide as many as 24,000 construction jobs and 12,500 permanent positions. Similar economic benefits would be found in the construction of high-speed rail in other States.

It is equally important to note that this economic activity and business activity would be shared by a wide range of industries, sparking an employment upturn in many of the same industries that built the interstate highways, such as construction companies clearing the rights-of-way, and those providing the steel necessary to construct bridges and the other necessities in laying the roadbed. Heavy industry currently building conventional railroad equipment would have a new market, while construction would also involve the advanced technology required for communications, operations, ticketing, and other aspects of a high-speed rail system.

In the cities of participating States, high-speed rail would be expected to provide a new dimension to the revitalization of urban areas which have fallen into neglect as rail service declined. The high-speed rail facilities will stimulate business, construction, employment, and tax revenues.

The five Northeast-Midwest States in the congressionally authorized high-speed rail compact, Pennsylvania, Illinois, Indiana, Michigan, and Ohio, comprise the industrial heartland of America. Today this heartland and its industry has been weakened by recession and new competition and is seeking new businesses and new opportunities. A modern, efficient rail passenger system would attract business and lay a strong foundation for industrial revitalization.

The promise of these economic benefits has stimulated State and local interest in the development of high speed rail service, but the States cannot meet this national need for an improved transportation infrastructure on their own. Timely development of high-speed rail requires Federal assistance. Notwithstanding severe budget constraints, we cannot afford not to make this capital investment in our future, which will yield extreme benefits for the entire country.

As Pennsylvania State Representative Richard Geist, chairman of the PA High-Speed Rail Commission and vice chairman of the national High Speed Rail Association, recently told a group in Washington, DC:

We can either confidently help shape the future, or we can slide further behind other developed nations with our passenger rail technology. The choice is ours.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1976

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Federal Railway Administration and the National Railroad Passenger Corporation shall conduct a joint study for the purpose of determining the most effective means by which the Federal Government can encourage the development of high speed rail systems within the United States. In conducting such study, the Federal Railway Administration and the National Railroad Passenger Corporation shall consider, among others, such means as tax benefits for private investors; Federal assistance in obtaining necessary rights-of-way; matching Federal grants for developing new technology that could be applied nationally; and the establishment of pilot programs.

(b) In carrying out such study, the Federal Railway Administration and the National Railroad Passenger Corporation shall consult with members of the Interstate High Speed Intercity Rail Passenger Network Compact.

(c) On or before the expiration of the 180-day period following the date of the enactment of this Act, the Federal Railway Administration and the National Railroad Passenger Corporation shall report, jointly, to the Congress the results of such study, together with their recommendations.

SEC. 2. There is authorized to be appropriated such sum as may be necessary to carry out the provisions of this Act.

By Mr. SYMMS (for himself and Mr. MCCLURE):

S. 1977. A bill to temporarily increase the duty on Canadian softwood lumber and wood shingles and shakes; to the Committee on Finance.

AMERICAN SOFTWOOD LUMBER STABILIZATION ACT

Mr. SYMMS. Mr. President, yesterday I talked to Mr. Douglas Westenhaver, president of DAW Inc., a lumber manufacturing firm. He is a competent and respected manager. His firm manages 14 lumber mills in Idaho, Montana, Oregon, and Washington.

I contacted him when I heard that two of his Idaho plants, the W-I and DAW mills in the Coeur d'Alene area, are the latest victims of subsidized Canadian lumber imports. The DAW plant is shut down and the W-I plant is facing an environmental deadline on December 21. Because of the economic impact of Canadian lumber on American markets, management cannot justify spending the money to cure the environmental problem.

Consequently, another 235 workers will probably be laid off at these two mills by Christmas. About 160 loggers supplying the W-I plant are idled and more will be out of work if the DAW plant cannot start up again soon.

"This is just the first two mills," according to Westenhaver. "Others will be going down, at least one more (not in Idaho) before Christmas." Doug puts the blame squarely on the Canadians. "Thats what's killing all our dimension mills" he says. In his view, and that of other lumbermen, the Canadians are able to take American markets simply because they are subsidized. "I've been in their plants and I'm not a bit concerned about competing with them. If we could get free timber for 6 months like they do we'd close the borders ourselves. Its not just the mills that are hurting, the quality of life of the workers sure goes way down when they lose their jobs."

Mr. President, I share Doug's view, and those of other Idaho lumbermen. We are being taken for a royal ride. The Canadians love to talk. They are anxious to meet with us often and dis-

cuss trade issues. While we talk, they are taking our markets and putting our people out of work. As Doug says, "It's a shame to be broke and have the people who broke us laughing at us."

The Westenhaver operations are not unique. Riley Creek Lumber, Scott Paper, Champion International, and Potlatch, among others, have experienced downtime or closures related at least partially to import-impacted markets. I am tired of this and our people are tired of it. No one can argue that we are not hurting badly. In 1979, Idaho's timber industry employed 19,400 people; right now we probably have less than 15,000 jobs.

The situation is the same, or maybe worse, nationally. In 1984, the timber industry operated at 80 percent of capacity, had pretax losses of over $300 million, and took over $600 million in writeoffs. More than 30,000 jobs have been lost, 22,000 of them directly attributed to Canadian competition.

We occasionally hear statements that Canadian imports are not really the problem. Mr. President, the Canadian share of the American market has grown from 18.7 percent in 1975 to 30.9 percent in 1984. Between 1979 and 1984, our plant utilization dropped from essentially 100 percent to about 80 percent. If anyone thinks that is a coincidence, the Canadians would really like to talk to you.

Several factors contribute to the Canadian success. A recent ITC study indicates that the Canadian Government sells standing timber—stumpage—at a fraction of the price American producers must pay for standing timber. Canadian sources indicate that Canadian firms are not required to pay the costs of reforesting the cutover land. Most Canadian timber is sold on a negotiated basis, from government entities. In the United States about two-thirds of the timber is harvested from private land with the stumpage price being required to cover all management land reforestation costs. Public timber is usually purchased on a competitive bid basis, guaranteeing fair market price. In addition, environmental constraints on timber harvesting appear to be much more stringent in the United States, thus dramatically increasing costs. All of these factors, and others, have placed American products at a disadvantage.

Mr. President, we have very recently seen a change in tactics by our neighbors to the north. The Canadian Cousul-General from Seattle has been stumping Idaho, claiming that imposition of a tariff would cost us long-term jobs with only four States gaining employment. He cites a study done by an American think tank. His message is, at the least, misleading. First of all, the study in question covers a broad range of natural resources. We are talking only about Canadian timber. More importantly, according to the Congressional Budget Office, the study is based on a faulty premise.

Mr. President, I am certain that in making the Canadians play by the same rules we are using, it will help our ailing timber industry. For this reason, I am introducing a bill to impose a 3-year tariff on imports of Canadian softwood lumber, shakes, and shingles. The tariff is set at 30 percent for 1986, 25 percent for 1987, and 20 percent for 1988. It would end at the end of the third year or earlier if the import level decreases to historic levels—15 percent.

I have been hesitant to introduce this legislation because other measures are already under consideration to restore equity to our lumber trade. I and a number of my colleagues have been involved with this matter for some time now. Last spring, Congress passed a "Symms" resolution calling on our Government to take action on the imported lumber issue. Currently, the Senate has before it a quota bill and a natural resources subsidy bill designed to give us a level playing field for our lumber industry.

I am pleased to be a cosponsor of both bills. The former bill was introduced by my senior colleague, Senator McCLURE. The natural resource subsidy bill was designed to give us a level playing field and was introduced by the Senator from Montana [Mr. BAUCUS].

The quota bill would limit the amount of lumber from other countries that we would accept and the subsidy bill would allow countervailing duties to be imposed in the amount of the subsidy. Either of these bills would be very beneficial. The tariff bill I am introducing is designed to partially offset the subsidies the Canadians enjoy. These subsidies are the edge in exchange rates and the pennies on the dollar rates they pay for stumpage. In other words, the 30-percent tariff would equalize the 30-percent difference between the Canadian dollar and the United States dollar.

Mr. President, I and many of my colleagues have met on numerous occasions with top Canadian officials and key administration figures to emphasize the importance of this matter to resource producing States.

I would still much prefer to avoid legislation. However, our industry can not wait any longer. By introducing this tariff bill, we are providing the Congress and the administration with a full range of options to deal with Canadian lumber.

Mr. President, I send the bill to the desk, so that any colleagues who wish to cosponsor it may do so, for the remainder of the day.

In summary, Mr. President, there will be no action on the part of the Canadians without some action on the part of Congress to demonstrate to them that we mean business. I hope that some of my colleagues will join in this effort.

I have met with Dr. Clayton Yeider on this matter on numerous occasions. I know that he is willing to negotiate with the Canadians, to settle the issue with some sort of administrative solution to the problem. We would welcome that. But, in my view, that will not happen until Congress takes some action.

By Mr. CRANSTON (for himself, Mr. D'AMATO, Mr. DIXON, and Mr. DODD):

S. 1978. A bill to clarify the taxation of certain asset-backed securities in multiple class arrangements; to the Committee on Finance.

RECOVERY ACT FOR MORTGAGES AND OTHER ASSET-BACKED SECURITIES

Mr. CRANSTON. Mr. President, today I am introducing a bill to eliminate impediments to the growth of the mortgage-backed securities market and to permit the development of the new asset-backed securities market. This legislation would amend the Internal Revenue Code to permit the issuance of multiple class passthrough securities backed by pools of mortgages or other assets under the grantor trust rules of the Internal Revenue Code. Other assets include consumer loans, commercial real estate mortgages, and commercial leases.

The secondary mortgage market provides billions of dollars in credit each year to finance home ownership by enabling originators of home mortgages such as thrift institutions and mortgage bankers to resell mortgage loans to investors in the form of mortgage-backed securities. Recently, the first such securities backed by automobile receivables and consumer loans have come to market. An efficient secondary market lowers the cost of funds for that particular market, making it possible for originators: To make mortgage funds available to homebuyers at lower interest rates, to make car loans available at lower cost and, make other types of consumer loans available at lower cost. Under this proposal originators of all types of loans or assets will be able to sell loans or assets in a more efficient manner to other investors for cash and use the new funds to continue the lending process.

There is approximately $300 billion of outstanding mortgage securities in the secondary market. Purchasers of mortgage backed securities include banks, thrift institutions, pensions and other retirement funds, insurance companies and other institutional as well as individual investors. The first issuance of securities backed by pools of mortgages ever accomplished was done under title 8 of the Housing Act of 1968 by the Federal National Mort-

gage Association [FNMA]. One of my constituents from California, Ray Lapin, the First President of FNMA while it was still a part of the U.S. Department of Housing and Development, devised the concept of putting the full faith and credit of the U.S. Government behind securities backed by pools of FHA-VA mortgages. The success of those securities led to the development of the secondary market as we know it today. Mr. Lapin can truly be said to be the "father" of the secondary mortgage market.

Since that time, the secondary mortgage market has developed a variety of mortgage-backed securities that have been attractive to investors in terms of safety, yield, and investment performance. However, because residential mortgages are subject to prepayment at uncertain intervals, the traditional mortgage security lacks call protection—assurance that the investment will have a definite maturity. The lack of call protection—from a cash payment occurring before the stated maturity to the investor—causes investors to demand a higher yield on moneys invested in these securities. This higher cost of funds is passed on to homebuyers and other participants in the market.

Many investors have differing timing needs in structuring their investments. If one pool of mortgages could be structured to pay off on several maturity dates, that is—2 years, 5 years, 10 years et cetera—investors could select the maturity date most compatible with their investment needs. This concept is called the multiple class mortgage-backed passthrough. This multiple class feature would add more predictability to this instrument thereby reducing the demand for higher yields on these securities.

Presently the tax laws, most of which were enacted prior to the development of mortgage-backed securities, have made it difficult to structure securities that provide call protection, as well as securities that rearrange the cash flows from mortgages to create different maturity classes.

The fixed investment trust vehicle, traditionally used to market pools of mortgages in securitized form without tax liability at the pool level, has been interpreted to restrict the flexibility necessary to provide call protection even to a limited extent and the ability to structure different classes of investors with different maturities as defined by proposed treasury section 301. 7701-4(c) published in the Federal Register on May 2, 1984. In early 1984, Sears Mortgage Securities Corp. along with Dean Witter pioneered the development of a multiple class, mortgage-backed passthrough security. The security was set up under the grantor trust rules with multiple classes of ownership and consistent with private letter rulings from the Internal Revenue Service. Two months later the IRS promulgated draft regulations that espoused the view that multiple class shares in collateral pools violate the passive requirement of the grantor trust form. However, the initial Sears/Dean Witter issue was grandfathered. A public hearing was held by the IRS on the proposed regulation on July 31, 1984. At that hearing, numerous witnesses, including the public securities Association, the Mortgage Bankers Association of America, the National Association of Home Builders, Sears' Mortgage Securities Corp., Dean-Witter Reynolds Inc., Norwest Mortgage Co., the Lomas & Nettleton Co., the First Boston Corp., Solomon Bros., and the gentleman from Texas, Congressman STEVE BARTLETT, all testified in opposition to the regulation. The witnesses described the negative effect of the regulation on the mortgage-backed securities market, and why the use of multiple class fixed investment trusts should be differentiated from Treasury concerns regarding other tax deferral investment proposals.

The Bankers Association of America testified:

We cannot overemphasize the importance of multiclass mortgage passthrough instruments to all parties involved.

We find no legal or tax rationale for the consequences of these regulations that would treat certain multiclass mortgage passthrough arrangements as a 'corporation' instead of a trust for tax purposes.

The Public Securities Association stated:

From a public policy perspective, the use of multiple class passthrough custodial arrangements are desirable because investments in traditional 30-year mortgage passthrough securities are somewhat limited, and this new structure, by providing various maturities, will attract many new institutional investors to participate in the mortgage-backed securities market.

We can conceive of no reason why it is sound tax policy, or sound public policy, to pursue adoption of the proposed amendments without a specific exception permitting multiple class mortgage passthrough arrangements to be classified as fixed investment trusts, and not associations taxable as corporations.

The National Association of Home Builders stated:

The recent development of multiple maturity mortgage investments has been extremely beneficial for the housing industry and American homebuyers.

Mortgage-backed securities, the principal tool for raising mortgage money in the capital markets, have had higher yields than other similar investments because of the unpredictable prepayment of the underlying mortgages which makes management of mortgage pass-through portfolios more difficult than for other similar investments. The development of multiple class mortgage investments has substantially reduced the investment risk problems associated with direct investment in mortgage-backed securities. These multiple class investments, by virtue of more predictable maturities, typically have had significantly lower yield requirements than other mortgage-backed securities.

Dean Witter Reynolds, Inc./Sears Mortgage Securities Corp. stated:

. . . offering 'fast-pay-slow-pay' interests in mortgage pools is desirable, because the different interests have different investment characteristics and appeal to different classes of investors.

We think it is wrong as a matter of legal analysis and tax policy not to exclude multiple class mortgage-pass-through arrangements from the amendments proposed . . .

I would like to insert in the RECORD at this time more recent letters supporting the multiclass mortgage-backed passthrough.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

MORTGAGE BANKERS
ASSOCIATION OF AMERICA,
Washington, DC, July 31, 1985.

Hon. ALAN CRANSTON,
U.S. Senate,
Washington, DC

DEAR SENATOR: As you know, the Mortgage Association of America has been most interested over the past several years in the development of a multiple class mortgage-backed pass-through security that would not be subjected to the restrictions embodied in the grantor trust tax treatment under the Internal Revenue Code. We view this mechanism as an excellent opportunity for the attraction of needed additional investment capital for one of our country's most important goals—creation and maintenance of an adequate national stock of housing.

We are most pleased that you are in the process of crafting legislation, the "Mortgage-Backed Securities Legislative and Regulatory Improvements Act of 1985," that would authorize the creation of such a security. We would be happy to work with you and your staff in exploring the effect your proposal would have on the market and in offering any possible technical drafting assistance. And, of course, at such time as Congressional hearings might be scheduled on the subject, we would very much appreciate the opportunity to appear and testify in support of the concept.

We understand that group of investment banking firms has designed a similar proposal and have also indicated to them our interest and support in this matter.

Our goal, of course, is the development of the most effective instrument that could be put in place as quickly as possible. We would hope that all interests involved in this effort could agree on a mutually satisfactory course of action.

Sincerely,

_____.

NATIONAL COUNCIL OF
SAVINGS INSTITUTIONS,
October 7, 1985.

Hon. ALAN CRANSTON,
Senate Hart Office Building,
Washington, DC.

DEAR SENATOR CRANSTON: On behalf of the National Council of Savings Institutions, I would like to offer some observations on draft legislation prepared by your staff entitled the "Recovery Act for Mortgage-Backed Obligations" (RAMBO).

This legislation recognizes that tremendous change has happened in the mortgage

markets in the past five years. The liquidity of mortgages has increased substantially, and the volume of trading in mortgages and mortgage-related investment vehicles has also grown.

Not only has the use and volume of mortgage-backed securities grown over the past decade, the creativity applied by the market to these instruments has mushroomed. Savings institutions now use mortgage-backed securities in their asset management. As the need to put old loans in portfolio to use, savings institutions are issuing collateralized mortgage obligations, mortgage-backed bonds, and preferred stock. In the majority of these transactions, mortgage-backed securities, not the mortgages themselves, are used as the collateral.

However, the ability to best utilize mortgage-backed securities, both from the investor and issuer point of view is hampered by tax law. The passive management requirements imposed by the grantor trust provision of the tax code have limited mortgage-backed securities. Your legislation addresses this fundamental weakness in the current structure for mortgage-backed securities.

At the present time, we would like to reserve our technical comments on your legislation. However we would like to express support for your efforts and urge that you introduce legislation in this important area.

Kind Regards,

JOHN H. ROUSSELOT

AMERICAN BANKERS ASSOCIATION, MORTGAGE BANKERS ASSOCIATION OF AMERICA, NATIONAL ASSOCIATION OF HOME BUILDERS, NATIONAL ASSOCIATION OF REALTORS, NATIONAL COUNCIL OF SAVINGS INSTITUTIONS,

October 17, 1985.

Hon. BOB PACKWOOD,
Chairman, Committee on Finance,
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: It is our understanding that legislation is currently being drafted that would amend the tax laws to permit the issuance of multiple-class securities backed by a single pool of mortgages.

The undersigned organizations strongly support proposals that would remove tax liability at the pool level for multiple-class mortgage pass-through securities set up under specified guidelines. With these tax law amendments, multiple-class pass-through securities could be issued that would resemble collateralized mortgage obligations (CMOs) and offer investors a choice of maturities. This would lessen the unpredictability of prepayments and permit issuers to sell mortgage assets at higher prices than can be commanded by using secondary market instruments currently available to them. Thus, issuers could have the benefits of CMOs as well as sale-of-assets treatment for accounting purposes. In turn, homebuyers would realize a benefit in terms of lower interest rates that would result from more favorable secondary market pricing. Indications are that any revenue loss to the Treasury would be negligible.

We, therefore, respectfully urge Congress to hold hearings on this matter and to pass legislation that would authorize these types of multiple-class mortgage securities. Such legislation would expand the universe of investors willing to purchase mortgage products because such securities could be fashioned to accommodate differing investment needs. Pricing benefits would accrue to homebuyers in the form of lower interest rates, and there would be no significant loss to the Treasury.

Sincerely,

JAMES C. CAIRNS,
President,
American Bankers Association.
RONALD F. POE,
President,
Mortgage Bankers Association of America.
JOHN J. KOELEMIJ,
President,
National Association of Home Builders.
DAVID D. ROBERTS,
President,
National Association of Realtors.
KENNETH F.X. ALBERS,
Chairman of the Board,
National Council of Savings Institutions.

Mr. CRANSTON. Mr. President, Treasury officials could promulgate final regulations by the end of January 1986 on these issues, however, from my conversations with them, they have indicated that they will not substantially amend the regulations with respect to mortgage-backed securities trusts to allow the use of multiple class passthrough securities. They have given indications that they would like some guidance from the Congress on this matter. I believe this legislation would provide such guidance.

My bill simply overrides the proposed draft regulations prohibiting multiclass passthrough securities under the grantor trust rules. This proposal provides that multiclass passthrough securities that do not have active management features are considered with the grantor trust rule.

My legislation makes clear that all classes of passthrough securities representing an interest in the same pool of assets must be issued simultaneously, and the interests represented thereby may not be changed after issuance. This does not, however, prevent the passing through of any adjustments inherent in the assets themselves, such as an adjustable interest rate or a prepayment of principal. Furthermore, the pool of assets must be fixed prior to the date of the first payment to security holders, except for a 2-year period in which substitution of substantially similar assets is allowed in connection with a breach of a representation or warranty made by the transfer of the assets to the trust. I believe that these restrictions provide protection against any tax deferral securities being issued under this provision and that the IRS has sufficient regulatory authority to handle such matters.

The bill contemplates that passthrough securities may be issued in one or more classes. A class is defined to include one or more classes. A class is defined to include one or more passthrough securities, each of which represents a pro rata right to specified cash payments and other rights provided for in the identified assets. For example, a class may represent an undivided interest in all of the assets of the trust; an undivided interest that differs from another class of undivided interests in that its right to payments on the assets is senior to or subordinate to such other class in the event of a delinquency or default on an underlying asset; or a sequential—"fast pay" or "slow pay"—interest which receives payments of principal—or similar amounts—on the assets prior to or later than another such interest, together with amounts designated as interest.

The assets which may be owned through a grantor trust are as proposed in the bill described as "financial instruments." These are defined to include: First, any evidence of indebtedness, such as residential or commercial mortgage, automobile loan, commercial bank loan, credit card receivable, or trade receivable; second, any lease receivable; third, any proceeds of a financial instrument, temporary investments of such proceeds and any income thereon, and any property acquired pursuant to foreclosure—or similar realization on a security interest—with respect to any financial instrument; and fourth, any other passthrough security. Proceeds of a financial instrument include any payment thereon or any payment in lieu thereof, such as advances, guaranty payments, insurance proceeds, or foreclosure proceeds. The bill would be effective with respect to passthrough securities issued after April 27, 1984, the effective date of proposed Treasury regulation section 301.7701-4.

The multiclass format has historically been used predominantly for mortgages. However, the securitization of nonmortgage assets, a relatively recent development, was not consciously excluded from early efforts to facilitate the securitization of mortgages. It simply was not in existence.

It would be incongruent to divide the capital markets by permitting one form of assets, mortgages, to be securitized versus other types of assets. Although homeownership is an important goal for many Americans, food, clothing, home furnishing, automobiles, and other consumer items are generally viewed as equally essential necessities. I believe that there is merit to including consumer loans, commercial mortgages, leases and other assets because this could have a substantially beneficial impact on consumers, business, and financial institutions. This is an area that deserves greater attention by the Congress and the Treasury.

For instance, finance companies, thrifts, and commercial banks that are holders of consumer loans will have a format to sell those loans and remove some of the risk inherent in consumer lending, such as student and education loans. Creating a more efficient capital market is one way to lower interest rates on credit card loans in response

to continued consumer complaints that credit card interest rates are too high. Second, the securitization of commercial leases will be beneficial to computer companies as a means to raising capital for expansion by securitization of their equipment leases. Commercial banks for example, should benefit by being able to securitize and sell commercial loans and commercial real estate loans to investors more economically. This should add liquidity and new sources of fee income for these institutions. Mortgage bankers who are unable to withstand increased debt burdens on their balance sheets should benefit greatly from obtaining sale-of-asset treatment for securitization of commercial and residential mortgages. Thrifts, which in recent years have been the hardest hit by the high cost of financing their assets, should benefit greatly as well by having a new asset-liability management tool. This legislation will also provide them new sources of fee income and it will mitigate against loan losses on commercial and consumer loans as they diversify into these new lending areas. Domestic automobile companies have found in recent years that less costly financing alternatives offered by their finance company subsidiaries have been largely responsible for increased purchases of automobiles and have helped revitalize the automobile industry. The inclusion of automobile receivables as qualifying assets will help them substantially. It is also my belief that asset-based passthrough financings will be of substantial benefit to many other companies that are highly leveraged and/or cannot support additional debt burdens on their balance sheets. Indeed, several prominent financial commentators have argued that excessive debt burdens are endangering American corporations. This security can be used to provide asset liability management and improve the ratio of equity to debits of many corporations. Additionally, those Government sponsored agencies that sell mortgages such as Ginnie Mae, Fannie Mae, and Freddie Mac, will certainly benefit from the multiclass mortgage backed passthrough structure as it will lower their cost of funds.

Not to allow the use of a multiclass grantor trust for nonmortgage loans or assets will deprive consumers of the benefits of a more efficient security while creating yet another level of complexity by requiring regulators and investors to treat otherwise very similar assets differently. To not clarify the application of the Internal Revenue Code to the fullest extent possible is counterproductive to the overall tax simplification efforts presently being undertaken by the Congress and administration. While it is clear that the Treasury could proceed with authorizing a multiclass mortgage-backed passthrough, this is too important an area with broad public policy implications to be left solely to the Treasury.

This area has been in limbo since the proposed Treasury regulations were issued in early 1984. These regulations have never been made final. It is recognized that any change in the way business is done could have tax implications. However, because the Treasury has not spoken on these matters, the market has created other instruments such as the collateralized mortgage obligations to carry out this activity. This particular mechanism is an inefficient one and therefore a more costly one. If there are tax problems created by these instruments, it is time that Treasury stepped forward to propose a solution so that business in this important area of the capital markets can go on in an orderly manner.

The secondary market is now a large market with broad-based participation. Private entities such as General Motors Acceptance Corp., the General Electric Credit Corp., Ford Motor Credit Corp., and Chrysler Financial Corp., are now all active participants in the secondary market. The growth of this market is being restrained by anachronistic tax laws and in some cases the application of laws that have no relevance to market activity. Now is the time for the Congress to begin the process of providing a unified framework for the future development and growth of the mortgage and asset-backed securities market to the benefit of consumers, underwriters, and issuers, both private and public. I would urge the chairman of the Senate Finance Committee to schedule hearings on this matter as soon as possible early next year. Mr. President, I ask unanimous consent to include in the RECORD the text of the bill and a technical explanation of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1978

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the Recovery Act for Mortgage and Other Asset-Backed Securities.

SEC. 2. MULTI-CLASS PASS-THROUGH SECURITIES.

Subpart E of Part 1 of Subchapter J of Chapter 1 of Subtitle A of the Internal Revenue Code of 1954 (relating to the treatment of grantor trusts) is amended by adding at the end thereof the following new section.

"SEC. 680. PASS-THROUGH SECURITIES.

"(a) GENERAL RULE.—Holders of pass-through securities that represent interests in cash payments and other contractual rights provided for in identified financial instruments shall be treated for all purposes of this subtitle as the owners of beneficial interests in such payments and contractual rights, and the arrangement pursuant to which such financial instruments are held and such pass-through securities are issued shall be treated as a grantor, trust subject to the provisions of this subpart, provided that—

"(1) the interests in the financial instruments represented by the pass-through securities are established prior to the intitial issuance of the pass-through securities and, pursuant to the terms of the pass-through securities, such interests may not be changed; and

"(2) the financial instruments in which the holders of pass-through securities own interests are identified prior to the first payment made to holders and are not changed thereafter, except that substantially similar financial instruments may be substituted for identified financial instruments within 2 years of such first payment date in connection with a breach of a representation or warrenty made by the seller of all or a portion of the identified financial instruments.

"(b) CLASSES OF INTEREST.—One or more classes of interests in identified financial instruments represented by pass-through securities may be established with respect to the same identified financial instruments, and the arrangement pursuant to which such financial instruments are held and such pass-through securities are issued shall be treated as the same grantor trust.

"(c) BENEFICIAL OWNERSHIP OF FINANCIAL INSTRUMENTS.—Pass-through securities shall represent the ownership of beneficial interests in the underlying identified financial instruments to the extent of the holder's adjusted basis in such pass-through securities allocable thereto for all purposes of this subtitle, including section 593(d), section 851(b)(4), section 856(c)(5), and section 7701(a)(19)(C).

"(d) DEFINITIONS.—For purposes of this section—

"(1) PASS-THROUGH SECURITY.—The term "pass-through security" means—

"(A) an instrument that evidences the holder's contractual right to receive cash payments on identified financial instruments, the holder's rights in any security for such payments, and the holder's rights in other contractual rights contained in or incident to the identified financial instruments, where the issuance of pass-through securities representing interests in such financial instruments is treated as a sale under section 1001 of all or a portion of such financial instruments, and

"(B) the retained beneficial interest of the seller of a portion of such financial instruments.

"(2) CLASS.—The term "class" means a pro rata right to specified cash payments and other contractual rights provided for in identified financial instruments represented by one or more pass-through securities, which pro rata right differs from the right represented by one or more other pass-through securities, if any, established with respect to the same identified financial instruments.

"(3) FINANCIAL INSTRUMENT.—The term financial instrument means—

"(A) any bond, debenture, note, certificate, account receivable, or other evidence of indebtedness, or a participation interest therein;

"(B) any lease receivable;

"(C) any proceeds of a financial instrument temporary investments of such proceeds and any income thereon, and any property acquired due to a default on any fi-

nancial instrument and any income thereon; and

"(D) any pass-through security representing direct or indirect interests in financial instruments described in subparagraph (A), (B), or (C)."

SEC. 3. EFFECTIVE DATE.

The amendments made by section 2 shall apply to pass-through securities issued after April 27, 1984.

TECHNICAL EXPLANATION OF THE BILL

The proposal provides that arrangements for the issuance of "pass-through securities" in one or more "classes" would be taxed as grantor trusts and not as corporations. As in the case of present mortgage pass-through securities, the holder of the security would be treated as the owner of his share of the assets represented by the security. The holder would be taxed on his proportionate share of the payments on the assets to the extent such payments represented either an undivided interest in the income on such assets or income reportable under the stripped bond rules of section 1286 or similar rules.

The proposal limits the proposed tax treatment to passive arrangements that do not carry on a business activity. Accordingly, all classes of pass-through securities representing interests in the same pool of assets must be issued simultaneously, and the interests represented thereby may not be changed after issuance, pursuant to the terms of the security. This does not, however, prevent the pass-through of any adjustments inherent in the assets themselves, such as an adjustable interest rate or a prepayment of principal. Furthermore, the pool of assets must be fixed prior to the date of the first payment to security holders, except for a two-year period in which substitution of substantially similar assets is allowed in connection with a breach of a representation or warranty made by the transferor of the assets to the trust.

As defined in the proposal, pass-through securities represent interests in assets that are treated as having been sold either in whole or in part by the transferor of the assets. Partial sales include transfers in which the transferor retains either an undivided interest in the assets or an interest consisting of one or more stripped coupons or stripped bonds within the meaning of section 1286 of the Code (or similar interests in the case of assets other than debt obligations). The beneficial interest retained by the transferor is also treated as a pass-through security. Essentially, any arrangement other than one treated for federal income tax purposes as an issuance of debt obligations by the transferor is included.

The proposal contemplates that pass-through securities may be issued in one or more classes. A class is defined to include one or more pass-through securities, each of which represents a pro rata right to specified cash payments and other rights provided for in the identified assets, which pro rata right differs from the right represented by one or more other pass-through securities, if any, established with respect to the same identified assets. For example, a class may represent an undivided interest in all of the assets of the trust; an undivided interest that differs from another class of undivided interests in that its right to payments on the assets is senior to or subordinate to such other class in the event of a delinquency or default on an underlying asset; or a sequential ("fast pay" or "slow pay") interest which receives payments of principal (or similar amounts) on the assets prior to or later than another such interest, together with amounts designated as interest.

The assets which may be owned through a grantor trust are described as "financial instruments" in the bill. These are defined to include (i) any evidence of indebtedness, such as a residential or commercial mortgage, automobile loan, commercial bank loan, credit card receivable, or trade receivable, (ii) any lease receivable, (iii) any proceeds of a financial instrument, temporary investments of such proceeds and any income thereon, and any property acquired pursuant to foreclosure (or similar realization on a security interest) with respect to any financial instrument, and (iv) any other pass-though security. Proceeds of a financial instrument include any payment thereon or any payment in lieu thereof, such as advances, guaranty payments, insurance proceeds, or foreclosure proceeds.

The Act would be effective with respect to pass-through securities issued after April 27, 1984, the effective date of Proposed Treasury Regulation §301.7701-4(c).

Mr. D'AMATO. Mr. President, today my colleagues and I are introducing legislation to help foster the growth of the mortgage-backed securities market and the development of a new market in asset-backed securities, including security interests in commercial real estate, equipment leases, credit card receivables, commercial loans, and automobile receivables.

Although I endorse this legislation, I realize that it may not provide a perfect solution. To the extent that the issues regarding phantom profits, original issue discount and revenue neutrality are not adequately addressed by the legislation in its present form, I fully intend that these issues be resolved during consideration of this bill. My qualified endorsement of the bill does not diminish my desire to compel the Treasury Department to clarify existing rules or promulgate new ones regarding the tax treatment of these securities. My colleagues and I have been prompted by Treasury's inaction in this area. This legislation therefore should be a starting point which will hopefully culminate in the passage of legislation or the promulgation of rules that sets forth a rational system of allocating taxes on these securities.

The efforts of our colleague Senator CHAFEE, who has also attempted to address this very complex issue in legislation introduced yesterday, deserve considerable credit. Although that legislation and the bill we introduce today address the taxation of certain securities, they represent slightly different approaches. The most significant distinction between the bills is that Senator CHAFEE's bill applies only to pools backed by mortgage backed securities while the bill that I am cosponsoring would clarify the tax rules as they would apply to many types of asset based securities. Senator CHAFEE's bill may also allow for an election procedure for debt treatment or asset treatment which would affect the taxation of the issuer. The legislation that I am cosponsoring does not change the character of the present multiclass passthrough securities but clarifies the tax treatment of these particular instruments. I am hopeful that we can work with Senator CHAFEE to inspire the Treasury to participate in the process and clarify tax treatment of the securities at issue. These legislative proposals are subject to modification due to the complexity of these issues and I hope that Treasury will finally come forward to address these very important issues.

This legislation would authorize the use of multiple classes of ownership in fixed investment or grantor trusts which are used in issuing passthrough securities. The legislation will harness the innovation of Wall Street to lower the cost of mortgage and consumer credit. These new innovations in the capital markets would provide additonal billions of dollars of credit to these markets and help commerical bankers, thrifts, mortgage bankers, finance companies, computer companies, and others to reduce the cost of financing their assets. This should allow them to reduce interest rates on loans they make to consumers.

Such legislation is a logical next step in the development of the mortgage-backed securities market following on the administration's trusts for investment in mortgages [TIMS] initiative and the recent enactment and signing by the President of the Secondary Mortgage Market Enhancement Act of 1984. This legislation recognizes, however, that other new assets are now a key part of the Nation's capital markets, especially the secondary markets.

The Recovery Act for Mortgage and Other Asset-Backed Securities is a response to the efforts of securities firms that have devised a marketing device that was utilized by them on certain mortgage-backed bonds, called collateralized mortgage obligations. Subsequently these firms attempted to apply this marketing structure to passthrough securities. The Treasury Department, however, on May 2, 1984, proposed restrictive amendments to its regulations on classification of investment arrangements with multiple classes of ownership. This legislation would help the Treasury distinguish the use of multiple class passthrough securities from restrictions proposed by Treasury on other investment arrangements where the Treasury was concerned about tax deferral or tax avoidance use of trusts with multiple classes of ownership.

During hearings held by the Treasury Department's Internal Revenue Service on its proposed regulations in this area, the Mortgage Bankers Association of America, the Public Securities Association, the National Association of Home Builders, and others tes-

tified and supported the concepts we have embodied in this legislation.

This legislation is intended to be revenue neutral and would merely eliminate roadblocks to more efficient capital markets. I believe this legislation will benefit consumers by causing interest rates to decline, assist in the continued recovery of the housing industry, and provide additional liquidity and efficiency in the lending operations of any other lender who securitizes assets. I therefore urge my colleagues to support our efforts to work with the Treasury on an issue of vital importance to investors, lenders, borrowers, and consumers.

I ask that my statement be included in the RECORD as if given.

By Mrs. KASSEBAUM:

S. 1979. A bill to fulfill the purposes of the Airport and Airway Improvement Act of 1982, promote air passenger safety, and provide equity to airway users; pursuant to the order of August 4, 1977, referred jointly to the Committee on the Budget and the Committee on Governmental Affairs.

AIR PASSENGER SAFETY AND EQUITY ACT

● Mrs. KASSEBAUM. Mr. President, I am today introducing legislation I had hoped would not be necessary.

This bill simply treats the airport and airway trust fund in the same manner as Social Security. It states that, notwithstanding any other provisions of law, the receipts and disbursements of the aviation trust fund shall not be included in the totals of the budget of the U.S. Government as submitted by the President or of the congressional budget and shall be exempt from any general budget limitation imposed by statute on expenditures and net lending of the U.S. Government.

My colleagues are well aware of my longstanding belief that all revenue and spending programs of the Federal Government should be counted in the budget process. We are one country, one people, and one government. We should also have one budget which accounts for all receipts and costs of Government programs.

Unfortunately, in my opinion, the Senate has expressed several times this year its support for moving certain items, notably Social Security, "off budget."

While that is now an accomplished fact, I believe we must look ahead to the protection of commitments that we have made. One such commitment is to a safe, efficient, modern system of air transportation. That promise has been made many, many times over the years. Most recently, in 1981, Congress decided it was fitting and proper that those users of the airways should be responsible for maintaining, expanding, and modernizing the system. Users accepted that responsibility based on explicit assurances that revenues generated by their use would be utilized in the airway and airport system.

Mr. President, let us understand clearly this point. The users of aviation fuel, who pay higher Federal taxes, and the users of commercial airlines, who pay a substantial excise tax with each ticket, have relied on a Government promise. That promise was not merely that their taxes would be dedicated to the airport and airway trust fund but that Congress would expend those tax revenues for that dedicated purpose. Only one side of that bargain has been kept.

Since fiscal year 1982, we have never approached the authorization ceilings for aviation trust fund expenditures. Look at the following figures. Through fiscal year 1985, the Airport Improvement Program obligations have been $360 million less than authorizations and the Facilities and Equipment Program $766 million short. During that same period, the surplus in the aviation trust fund has grown to an estimated $3.3 billion.

Earlier this fall, we passed a transportation appropriation bill which widened considerably the gap between trust fund revenues and spending. In a year when concern about aviation safety has never been greater, we initially passed appropriations levels which would have gutted the air traffic control system, gutted the FAA safety inspection system, and seriously hampered our modernization efforts. Sure we may get this money back in the continuing resolution—this time. Next time our choice will be which day of the week will the air traffic control system be shut down.

Literally billions of dollars have been collected solely and exclusively from aviation users. These dollars rest in the trust fund account, their main purpose being to shelter billions of dollars of other spending. As chairman of the Aviation Subcommittee, a member dedicated to aviation safety, and a citizen who flies, I cannot sanction this abuse of trust.

Mr. President, the House Committee on Public Works and Transportation voted to remove the aviation trust fund from the budget. That provision was narrowly defeated on the House floor. I believe the committee's rationale is convincing, and I ask unanimous consent that the section of the committee report supporting that provision be printed in the RECORD.

We sometimes wonder why the American public is cynical. I do not wonder why aviation users are cynical. They agreed to fund a trust, only to find that Congress could change the definition of "trust." Instead of a safer, more efficient, and more modern airways system, their tax dollars have shielded spending on a myriad of programs which could not survive individual scrutiny. This legislation gives us the opportunity to respond to that cynicism in a positive and responsible way. It gives us the opportunity to regain that trust. And it gives us the chance to be honest.

In closing, Mr. President, I remind my colleagues of a phrase we all learned while young, "you get what you pay for." I hope my colleagues will join me by cosponsoring this legislation and restoring the truth of that simple slogan. I ask unanimous consent that the text of this bill be placed in the RECORD following my statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1979

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Air Passenger Safety and Equity Act of 1985."

SECTION 1. Notwithstanding any other provision of law, the receipts and disbursements of the Airport and Airway Trust Fund shall not be included in the totals of the budget of the United States Government as submitted by the President or of the congressional budget and shall be exempt from any general budget limitation imposed by statute on expenditures and net lending (budget outlays) of the United States Government.

[Excerpts from H. Rept. 99-300, accompanying H.R. 3500, the Omnibus Budget Reconciliation Act of 1985]

AIRPORT AND AIRWAY TRUST FUND

The Airport and Airway Trust Fund is fully supported by taxes paid by users of the airport and airway system, including a passenger ticket tax imposed on commercial airlines and a fuel tax imposed on general aviation. These tax revenues are used to support capital development of the airport and airways systems, and as a subsidiary purpose, the operations and maintenance of the air traffic control system.

In 1981, the Trust Fund program was renewed and user taxes were increased. The users supported these increases because they recognized that higher taxes were needed to support a major program of modernizing the air traffic control system and expanding airport capacity so that the system could handle the increased demands which would be placed upon it during the 1980s. Unless these capital improvements were undertaken, airport and airway congestion would increase dramatically and we would soon be faced with the undesirable alternatives of either incurring major delays or imposing restrictions on operations at congested airports, thereby reducing the benefits of competition. The only way to avoid these problems was to modernize and expand the system.

Regrettably, the programs established in 1981 have not been fully funded and the users have been paying considerably more into the Trust Fund than has been going out for capital development. In every year since Fiscal 1982, obligation ceilings have been imposed on the Airport Improvement Program and as a result of these ceilings, obligations under the AIP program through fiscal 1985 have been $360 million less than authorizations. In Fiscal 1986, the obligation ceiling imposed by the House Appropriations Committee will produce an addi-

tional shortfall of $92 million below authorized funding.

In the Facilities and Equipment program for modernization of the air traffic control and navigation systems, there has been an even greater shortfall. Through Fiscal 1985, appropriations for this program were $766 million below the authorized level. The House Appropriations bill for Fiscal 1986 produces an additional $318 million deficiency below the authorization.

These shortfalls are inexcusable when user taxes are producing far more revenues than are needed to support the Airport and Airway Trust Fund programs. As a result of the shortfall, the uncommitted surplus in the Trust Fund has grown from $2.1 billion at the end of Fiscal 1982 to an estimated $3.3 billion at the end of Fiscal 1985. By the end of Fiscal 1986, the uncommitted surplus is estimated to reach $4.6 billion under the appropriations bill passed by the House.

With the Trust Fund included in the general Presidential and Congressional budgets, the increase in the Trust Fund's uncommitted surplus has served to reduce the general budget deficit. In other words, since Fiscal 1982 aviation users have contributed $1.3 billion to reduce the general budget deficit and under the House bill for Fiscal 1986 the aviation users will contribute an additional $1.2 billion to reducing the general budget deficit. This is totally inconsistent with the conceptual basis of user funds. The mistreatment of users in this Aviation Trust Fund threatens our ability to extend the user fund concept to other areas.

The shortfall in spending out of the Trust Fund is largely attributable to the inclusion of the Trust Fund in the Presidential and Congressional budgets. When these programs are included in overall budgets the Administration and the Appropriations Committee tend to lose sight of the fact that the Trust Fund programs themselves produce surpluses rather than deficits, and that the justification for imposing specific taxes on aviation users is that the tax revenues will be spent on the aviation system. In the pressure for reductions of general budget deficits, the temptation to cut Trust Fund programs, while gaining the benefit of their revenues, becomes irresistible. Unless this process is stopped, Congress and the users will be unwilling to have the Trust Fund programs continued and the aviation system will suffer the consequences.

If there is an unfunded aviation authorization, the Secretary of Transportation next determines whether the Trust Fund receipts (taxes and interest) for the two years following the close of the next fiscal year will be greater than the unfunded authorizations. If the unfunded authorizations are greater than the net receipts, the Secretary determines the percentage which the excess is of the authorized amounts. Each authorization (Airport Improvement Program, Facilities and Equipment, etc.) is then reduced by this same percentage.

The reported bill also permits the restoration of any reductions if the Trust Fund deficit is subsequently reduced or eliminated. If the Secretary determines in a subsequent estimate that the excess of unfunded authorizations over net receipts has been reduced, the authorizations are restored. Each authorization is restored by an equal percentage, up to a point where the unfunded authorizations will equal estimated net receipts to the Trust Fund.

In sum, inclusion of the Airport and Airway Trust Funds in the general budget process has prevented the Trust Fund from functioning as intended and has led to the users contributing far more in taxes than has been spent for development of the airport and airway systems. If we are to continue to realize the benefits of the Trust Fund, this situation must be changed. Under the reported bill the Trust Fund will be removed from the budget process, but will be subject to the appropriations process and an anti-deficit provision. With these controls the Trust Fund will not operate at a deficit.●

By Mr. THURMOND (for himself, Mr. ZORINSKY, Mr. EAST, Mr. SIMPSON, and Mr. KERRY):

S. 1980. A bill to amend title 17, United States Code, regarding the conveyance of audiovisual work, and for other purposes; to the Committee on the Judiciary.

USE OF MUSICAL WORKS IN SYNDICATED TELEVISION PROGRAMS

Mr. THURMOND. Mr. President, I am introducing a bill today along with my distinguished colleagues, Senators ZORINSKY, EAST, SIMPSON, and KERRY. I believe this bill is a fair and equitable reform to the process of licensing performance rights in the copyrighted music which accompanies nonnetwork programs broadcast on television. This legislation will remedy a problem of continued concern to hundreds of local television stations throughout the United States.

Congress is specifically entrusted by the Constitution to ensure a balance of rights in copyright law between the creators and users of intellectual property. As Members of Congress, it is our responsibility to enact a copyright law which will protect the public interest and encourage proliferation of the arts. This Congress would be neglecting its duty if we do not ensure that the copyright law provides a balance in music broadcasting by television stations on syndicated programs.

Specifically, Mr. President, this measure would prohibit the conveyance of a copyrighted audio-visual work to nonnetwork television stations without simultaneously conveying the right to perform in synchronization any copyrighted music which accompanies such audio-visual work.

The problem addressed by this bill can be best explained by a brief discussion on how the current system works for licensing performance rights in television music.

Today, when a local television station buys the right to broadcast a syndicated program, all of the performance rights for copyrighted works embodied in that program are included in the purchase price except for one; the right to broadcast music on the soundtrack. The local television station must separately buy permission to broadcast the music even though the music is already embodied on the soundtrack of the syndicated program.

Generally, the effect of this is to require the local station to go to one of two societies, ASCAP or BMI, to buy a blanket license to broadcast the music on the soundtrack. These two societies currently issue over 95 percent of all blanket licenses. I use the term blanket license for a good reason. The local station is required to buy the "blanket" right to use all 3 million of the compositions controlled by ASCAP or all 1 million of the works controlled by BMI, even though the actual soundtrack of the program involved may contain no more than one or two copyrighted songs.

Mr. President, these local television stations have almost no bargaining power as they seek to purchase the right to broadcast the music on a prerecorded soundtrack. They cannot deal with ASCAP and BMI in an arms-length transaction as that term is ordinarily understood in the marketplace. The local broadcasters have no other alternative but to confront these two giants which control over 95 percent of all blanket licenses. The stations have already purchased broadcast rights in a program, but those rights are virtually worthless without the accompanying right to braodcast its music.

One illustration of the current unfair practice is a recent case in Atlanta, GA, with WAGA television station. WAGA negotiated a music package with suppliers, independent of ASCAP and BMI, to broadcast music for its locally produced programming, that is, its local news and public affairs programs. This music package cost WAGA $740 per month and covers programming which accounts for 60 percent of WAGA's nonnetwork revenue. By contrast WAGA has to pay ASCAP $30,000 per month for a blanket license to cover their syndicated programming which generates only 40 percent of the station's nonnetwork revenue. This is a figure ASCAP is now proposing to raise to $52,000 per month. WAGA has no choice but to pay ASCAP this fee because the music is an essential part of every syndicated program.

Mr. President, it is important here to note that the large corporations who make television programs are the primary beneficiaries of this system. Although ASCAP and BMI collect the money from local stations, most of the money goes back to these corporations. This is because most of the music used on television is composed by employees of the studios which make the shows, not by independent composers. The studios get paid twice. They are paid by the television station to broadcast the program and in addition receive payment as members of ASCAP and BMI.

Local television stations are treated differently from movie theaters in this area. The rental fee paid by theaters to the studios who produce the films shown covers all of the rights of the

studio in the movie, including the copyrights to the music. This is the result of a 1948 court decision. This same rule should apply to syndicated programs shown on local television.

Local television stations are willing to negotiate directly with ASCAP and BMI for broadcast rights in music to accompany programs which they produce locally. But with syndicated programs, television stations have no bargaining position to negotiate for the music used by the corporations which produce syndicated films and serials. Their only choice is to take it or leave it.

Under this bill, the syndicators who license programs to TV stations would be required to simultaneously convey the rights to use copyrighted music on the soundtrack of their programs. It is only logical for the local stations to negotiate one price for the entire package. It is virtually worthless for local stations to have broadcast rights for a syndicated program but not for the music which accompanies it. Indeed, who would enjoy watching that great classic, "The Sound of Music", without hearing the very talented Julie Andrews sing the beautiful songs in that movie.

Congress has a responsibility to ensure a balance between the rights of copyright owners and users. This legislation will restore fairness and balance to this area of the copyright system.

Mr. ZORINSKY. Mr. President, I am pleased to cosponsor Senator THURMOND's legislation that will prevent abuse of the monopoly power of copyright owners who control the music in syndicated TV programs. S. 1980 will permit local TV stations to negotiate with these copyright owners "up front" at the same time they clear the rights to broadcast all of the other elements of a syndicated program.

By bringing the licensing of music into the marketplace, windfall profits now paid to music companies will be eliminated, but the quality of TV music will improve. Under S. 1980, the market will determine the price for each composition. Good music will receive more, bad music, less.

Under the present law, when a syndicated TV program is licensed to a local station for broadcast, a payment is negotiated between the syndicator and the station. However, the copyright in the music on the soundtrack—a small but necessary element which must be cleared before the station can actually broadcast the program—is routinely withheld and licensed separately through two monopolistic organizations, ASCAP and BMI. These two organizations control the rights of 95 percent of all of the music in syndicated TV programs. They use their copyright control to demand that stations buy a "blanket license" from them before the programs already purchased from the syndicators actually can be used.

A blanket license includes the copyrights for all the music licensed by the organization, not just the music actually used in a particular show. ASCAP's blanket license includes 3 million songs. BMI's license requires buying the rights to 1 million compositions.

Stations have little leverage with ASCAP and BMI because they must "clear" ASCAP and BMI's copyrights in order to operate. The price ASCAP and BMI charge stations for these blanket licenses bears absolutely no relationship to the amount or quality of music the stations actually use. Instead, stations are charged a percentage of their gross revenue, currently a little less than 2 percent—in effect, a tax or tribute—for permission to operate.

S. 1980 would amend the copyright law. It would eliminate this inefficient system and bring common sense into the licensing of TV music. The bill would apply the simple principle of "you pay for what you get" to music used by local television stations.

I urge my colleagues to support the bill.

Mr. KERRY. Mr. President, I am pleased to cosponsor this important legislation, which amends the 1976 copyright law to prevent the abuse of the monopoly power of copyright owners who control the music on syndicated TV programs.

The current system in effect requires local broadcasters to purchase a "blanket copyright" for the entire library of music owned by the major performing rights societies even if the broadcaster will actually use only a tiny fraction of these works. Not only is this arbitrary system unfair, but it imposes a growing financial burden on broadcasters, thereby limiting the resources which could otherwise be used to hire musical talent from the local community not represented by one of the national societies.

This legislation will not in any way allow local broadcasters to avoid the obligation to compensate performers, composers, or publishers for the use of the music they have created. Rather, it proposes a fairer and more logical method of arriving at a mutually acceptable license fee for such use by replacing the current blanket copyright with a "source licensing" system.

Source licensing of music performance rights is not a new idea. On the contrary, this system has been used for decades with respect to music on soundtracks of films shown in movie theaters. The simple principle of fairness—you pay for what you use—that lead to the adoption of source licensing for movie theaters in the 1940's should be applied to local broadcast of syndicated programs in 1985.

Musicians, performers, and composers as well as broadcasters and television viewers nationwide will benefit by the creation of a more efficient market for the negotiation of music license fees for syndicated TV programs. Creative artists would benefit because a new TV music market for all creators, not just those affiliated with the major societies, would develop. Furthermore, because source licensing would allow bargaining for the right to use identifiable compositions, artists could command a fee that accurately reflects the unique value of their work. TV viewers would benefit because the quality of TV music would improve, and because broadcasters would be able to reinvest into local news, public affairs, and community programming money currently spent on rights to music they don't use.

By Mr. MURKOWSKI (for himself, Mr. STEVENS, Mr. HEINZ, Mr. GRASSLEY, and Mr. MCCLURE).

S. 1981. A bill to provide a duty on surimi; to the Committee on Finance.

DUTY ON SURIMI

● Mr. MURKOWSKI. Mr. President, today I introduce a bill which will establish a new tariff category for surimi, with a 6.5-percent import duty. Surimi is not well known by name and many of my colleagues may be wondering why we need a new tariff category for this product. However, most of us have eaten surimi in one form or another, and its usage in food products is skyrocketing.

"Surimi" is the Japanese word for minced fish. It is made from bottomfish—generally from Alaska pollock—which is put through a process that washes, debones, minces, and presses the fish into a stable, odorless, tasteless intermediate product. This product is then used to manufacture hundreds of different types of finished foods. In Japan, surimi-based products are a major food type. The Japanese eat surimi products in quantities comparable to the American consumption of breakfast cereal. In the United States, surimi-based products are becoming very popular in the form of imitation crab legs, shrimp, scallops, and lobster tails. These products have advanced to the point where most individuals do not recognize that they are eating an imitation unless they are told otherwise.

Mr. President, we must promote fair trade, and that is the reason this legislation calls for a 6.5-percent tariff. Right now, most Japanese surimi is entering duty free, while U.S. producers must pay a 6.5-percent duty if our product is sold in Japan. While the effect of this measure is to raise a tariff of 6.5 percent, the United States should be prepared to remove the proposed tariff when Japan removes its

tariff. The message we must send to Japan is, "You drop your trade barriers, and we will drop ours."

This message needs to be sent because the U.S. surimi market and industry is at a critical stage. If we don't take action now, the Japanese surimi industry is likely to monopolize the U.S. market and cripple our infant industry.

Mr. President, let me give my colleagues some facts that show the dramatic growth of the surimi market in the United States: When the Alaska king crab fishery collapsed several years ago, the Japanese surimi industry spotted a golden opportunity. Japan began producing and exporting imitation crab legs to the United States. In 1981 Japan exported 5 million pounds of crab legs to the United States. By the end of 1985 those exports will have doubled every year to a present level of nearly 100 million pounds and a wholesale value of $200 million.

And that is only part of the picture. Japan not only exports ready-to-eat surimi products to the United States, but has also begun building secondary processing plants in the United States to produce imitation seafood products. In just this year, the number of processing lines in the United States will have grown from 10 to 50. These plants need supplies of raw surimi, and Japanese exports of surimi in 1985 reflect this growing demand. The 6.5 million pounds of raw surimi imported into the United States as of October 1985 represents a 55-percent increase over 1984 total imports. It may sound small compared with the nearly 100 million pounds of finished surimi products that will be imported in 1985, but remember the fivefold increase in secondary processing lines in 1985 and you can get an idea of what the future demand will be. Those 50 processing lines will require nearly 50 million pounds of raw surimi—10 times what was imported this year.

So where, you may ask, is the U.S. surimi producing industry while all this is going on? It is just getting started. The first U.S. plant was located on Kodiak Island in Alaska. It has been operating on an experimental basis for about 1 year, and by the end of this year will have produced about 1 million pounds. Already half a million pounds have been distributed to the research and development departments of U.S. food and ingredient companies. Over 450 organizations in 32 States, involved in everything from cheese to crackers, have shown interest.

This year two seafood companies based in Seattle, WA, announced plans to build surimi plants in Alaska, and on the east coast $1 million has been set aside to study the application of surimi technology to menhaden, an east and gulf coast fishery as large as Alaska's pollock fishery.

Mr. President, as my colleagues can see, the United States has the fish, is developing the technology, and has an exploding domestic market. As our industry grows, it will be looking not only to the U.S. market, but also the Japanese market. Right now Japan gets most of its fish for surimi production from the fishing grounds off Alaska. As the U.S. surimi industry grows, it will displace the Japanese fishing and processing industry. But the Japanese market for surimi will still be there and will become the prime export market for our surimi.

It is for these reasons, Mr. President, that we need this new tariff category. The tariff will put our infant surimi producing industry on an equal footing with the Japanese industry. Matching tariffs is one step in that direction because we will send the message that we want fair and equal trade access. Japan's import quota system is also a barrier to our exports and must be dealt with by the administration under section 301 of the Free Trade Act.

I ask my colleagues to support this legislation as a modest but necessary step to gain access to a key Japanese market for our growing surimi industry.●

By Mr. DECONCINI:

S. 1982. A bill to provide financial assistance to States to enable them to establish or expand master teaching education programs, and for other purposes; to the Committee on Labor and Human Resources.

MASTER TEACHER EDUCATION ASSISTANCE ACT

Mr. DECONCINI. Mr. President, it is with a great sense of responsibility that I introduce legislation which I believe will ultimately improve the quality of education for our Nation. The Master Teacher Education Assistance Act of 1985, if enacted, will provide financial assistance to States to enable them to establish or expand Master Teacher Education Programs resulting in "master teachers" in selected fields of instruction. This is an essential step toward improving and reforming our schools and achieving educational excellence for our children.

The problems with our educational system are complex, and it is difficult to adequately rectify them as a whole. Therefore, I believe a more logical approach would be to systematically address each problem individually. In doing so, we can more realistically achieve our goal of quality education for this country. This legislation which I am introducting was drafted to address one specific goal of our educational reform movement—to improve the quality of instruction within our classrooms.

If enacted, this legislation would provide funds to establish 50 master teacher institutes across the United States. Teachers from both the elementary and secondary school levels would attend these institutes to strengthen their teaching skills and subject knowledge. The high intensity programs developed in the institutes would reach at least 3 percent of their classroom teachers per year. It is anticipated that the graduates of these institutes would return to their school districts equipped and eager to share new skills with their colleagues through formal or informal mentor and peer partnerships.

Mr. President, our United States has moved into a new, postindustrial era of technology and communication. It is imperative that American education meet the challenge of this change. Decidedly, we must acknowledge the fact that this challenge belongs to everyone. It belongs to the taxpayers who provide funds for our educational system; it belongs to the teachers and school administrators who must formulate and translate educational goals into realities; it belongs to parents and students, whose individual lives are directly and profoundly affected by the changes in our educational policy; and perhaps most relevant, it belongs to the Congress, which is responsible for the passage of legislation to appropriate funds to meet the current challenge and make programs such as the Master Teacher Education Assistance Act a reality.

There are a number of reports on the status of education which have recently been issued and among them are several recommendations for change within our current educational system. One of the most notable of these was done by the National Commission on Excellence in Education, a task force organized with the primary purpose of examining the quality of American education. The Commission concluded that "the educational foundations of our society are presently being eroded by a rising tide of mediocrity that threatens our very future as a nation and a people." The Commission points out that quality education for all members of the society is essential for maintaining the country's competitive edge in international economic markets, and for success in the so-called information age.

In focusing on secondary education, the Commission asserts "that the high school curriculum is to diffuse and lacks a central purpose; that high school students are excessively found in general track programs and not academic track programs; that students spend time ineffectively and inefficiently, particularly in comparison with their counterparts in other countries; and that teaching is attacting too few academically able persons and offers a professional life that is, on the whole unacceptable."

Further, the Commission stated that it is the Federal Government's responsibility to take a strong position in meeting the need for educational quality in this country. Every student in America is entitled to look for and find subjects in any of the major disciplines and have a professor or teacher who can impart guidance and instruction in those subjects in preparation of his or her life's endeavor.

Mr. President, I feel we have an obligation to the coming generations to prepare them for the new age. We should do our best to train our teachers and classroom personnel to provide the greatest possible educational system in the world and I believe one means of doing this is to enact the Master Teacher Education Assistance Act of 1985. We cannot afford the risk of not having an educated populace in this time of fierce international competition. Therefore, I urge my colleagues, without hesitation, to join me in the passage of ths legislation as a commitment to progress toward excellence in our public schools. I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1982

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Master Teacher Education Assistance Act of 1985".

STATEMENT OF PURPOSE

SEC. 2. It is the purpose of this Act to provide financial assistance to States for the establishment or expansion, and operation of master teacher education programs in order to improve the quality of instruction by current teachers and by new teachers through intense subject and pedagogic training designed to improve classroom skills.

DEFINITIONS

SEC. 3. As used in this Act—

(1) the term "elementary school" has the same meaning given that term under section 198(a)(7) of the Elementary and Secondary Education Act of 1965;

(2) the term "equipment" has the same meaning given that term by section 198(a)(8) of the Elementary and Secondary Education Act of 1965;

(3) the term "institution of higher education" has the same meaning given that term under section 1201(a) of the Higher Education Act of 1965;

(4) the term "local educational agency" has the same meaning given that term under section 198(a)(10) of the Elementary and Secondary Education Act of 1965;

(5) the term "secondary school" has the same meaning given that term under section 198(a)(7) of the Elementary and Secondary Education Act of 1965;

(6) the term "Secretary" means the Secretary of Education;

(7) the term "State" means each of the several States, the District of Columbia, and the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands; and

(8) the term "State educational agency" has the same meaning given that term under section 198(a)(17) of the Elementary and Secondary Education Act of 1965.

PROGRAM AUTHORIZED

SEC. 4. (a) The Secretary is authorized, in accordance with the provisions of this Act, to make grants to States to pay the Federal share of the costs of establishing and operating master teacher education programs for elementary and secondary school teachers within each State.

(b) There are authorized to be appropriated $50,000,000 for the fiscal year 1986 and for each succeeding fiscal year ending prior to October 1, 1989.

ALLOTMENT TO STATES

SEC. 5. (a)(1) From the sums appropriated to carry out this Act in any fiscal year, the Secretary shall reserve—

(A) not to exceed 1 percent for payments to Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands, and

(B) 0.5 percent for payments for children enrolled in Indian schools, to be allotted in accordance with their respective needs.

(2) From the remainder of the amount appropriated for this Act, the Secretary shall allot to each State—

(A) an amount which bears the same ratio to 50 percent of such remainder as the school-age population of the State bears to the school-age population of all States; plus

(B) an amount which bears the same ratio to 50 percent of such remainder as the number of the children aged 5 through 17 who are counted for the purpose of section 111(c) of the Elementary and Secondary Education Act of 1965 in the State in the fiscal year preceding the fiscal year for which the determination is made bears to the total number of such children in all States.

(b) For the purpose of this subsection—

(1) the term "school-age population" means the population aged 5 through 17; and

(2) the term "States" includes the fifty States, the District of Columbia, and the Commonwealth of Puerto Rico.

USES OF FUNDS

SEC. 6. Grants under this Act may be used for the payment of the Federal share of the cost of the establishment and operation of a master teacher education program for elementary and secondary school teachers within the State which meet the requirements of this Act.

MASTER TEACHER EDUCATION PROGRAM CRITERIA

SEC. 7. No grant may be made under this Act to any State unless—

(1) the master teacher education program will be conducted for a 3-year period and is designed to reach at least 3 percent of the elementary and secondary school classroom teachers within the State;

(2) the master teacher education program will carry out a skill-based curriculum, including—

(A) subject matter instruction in reading and writing skills, computer science, natural science, mathematics, and humanities;

(B) classroom management;

(C) professional growth and development; and

(D) other appropriate areas of instruction which the State deems appropriate; and

(3) the State will furnish each participant who successfully completes the course of instruction in the master teacher program with an appropriate certificate.

STATE APPLICATION

SEC. 8. (a) Each State which desires to receive assistance under this Act shall file an application with the Secretary at such time, in such manner, and containing or accompanied by such information as the Secretary may reasonably require.

(b) Each such application shall—

(1) designate the State educational agency as the State agency responsible for the administration and supervision of the program of assistance under this Act;

(2) describe the establishment or expansion and operation of a master teacher education program for elementary and secondary school teachers within the State which meets the requirements of section 7;

(3) provide assurances that the proposal contained in the application was developed by the State educational agency in collaboration with State and local education officials, State teachers organizations, and the institutions of higher education which have significant responsibilities in teacher training within the State;

(4) provide a description of the procedures under which the local educational agencies within the State will select elementary and secondary school teachers for participation in the master teacher education program;

(5) provide assurances that the percentage of elementary and secondary school teachers from local educational agencies located in rural areas of the State selected for the program will reflect the percentage of elementary and secondary school students from such areas;

(6) describe the length of the enrollment period in the program and the number and location of each project under the master teacher education program to be conducted in the State with assistance under this Act;

(7) describe the manner in which the State educational agency will encourage elementary and secondary school teachers who successfully complete the master teacher education program to participate in a master teacher program or a teacher residency program;

(8) provide assurances that the State—

(A) will use grants under this Act (i) to supplement the level of funds available from non-Federal sources for the purpose of the program for which assistance is sought; and (ii) not to supplant funds from non-Federal sources; and

(B) will not commingle funds made available under this Act with State funds;

(9) provide assurances the State will not expend more than 10 percent of the funds available to it under this Act for administration and oversight of the master teacher education program;

(10) provide assurances that the State educational agency will, at the end of each fiscal year, evaluate the effectiveness of the master teacher education program assisted under this Act;

(11) provide assurances that the State educational agency will pay from non-Federal sources the non-Federal share of the cost to the State of the master teacher education program for which assistance is sought under this Act;

(12) provide that the procedures for the selection of elementary and secondary school teachers by a local educational agency under this Act will not be denied without notice and opportunity for a hearing to the local educational agency before the State educational agency; and

(13) provide such additional assurances as the Secretary deems necessary to assure

compliance with the requirements of this Act.

(c)(1) An application submitted by the State under subsection (a) shall be for a period not to exceed 5 fiscal years and may be amended annually as may be necessary to reflect changes without filing a new application.

(2) The Secretary shall not disapprove an application submitted by the State educational agency without first affording notice and opportunity for a hearing.

(d) The Secretary may approve an application submitted under subsection (a) by a State which has in effect a master teacher education program on the date of enactment of this Act if the master teacher education program substantially meets the requirements of this Act. The Secretary, in carrying out this subsection, may, for fiscal year 1986 and for each of the succeeding fiscal year ending prior to October 1, 1990, waive any particular requirement specified in section 7 or 8 of this Act which the Secretary determines is not essential to carrying out the purposes of this Act and is necessary to carry out this subsection.

PAYMENTS; FEDERAL SHARE

SEC. 9. (a) From the amounts allotted to each State pursuant to section 3, the Secretary shall, in accordance with the provisions of this Act, pay to the State an amount equal to the Federal share of the cost of the program to be assisted under this Act.

(b)(1) The Federal share of each fiscal year shall not exceed 75 percent.

(2) Non-Federal contributions may be in cash in kind, fairly evaluated, including plant, equipment, and services.

By Mr. KERRY:

S. 1983. A bill to amend the Clean Air Act to control certain sources of sulfur dioxide and oxides of nitrogen to reduce acid deposition, and for other purposes; to the Committee on Environment and Public Works.

NATIONAL ACID RAIN CONTROL ACT

● Mr. KERRY. I rise today to offer legislation that addresses a growing problem of national and international significance. Acid rain, a phenomenon resulting from reactions between fossil fuel emissions and atmospheric components, continues to be a major environmental problem threating lakes and streams, forests, human health and manmade structures.

Acid rain damage to aquatic ecosystems, including many freshwater lakes and streams, has been well documented in Europe and eastern North America. The problem, once thought to be an issue only for New England and upper New York State, is quickly revealing itself as one with much broader implications. In addition to the Northeastern States and eastern Canada, recent studies indicate aquatic sensitivity to acidification in the Southeast, areas of the Rocky Mountains, and the Pacific Northwest. The EPA's recently released Eastern Lakes Survey confirms the research of many experts and surprised many by documenting extensive damage thoughout Florida. The National Academy of Sciences projects that, "At current rates of emissions of sulfur and nitrogen oxides, the number of affected lakes can be expected to more than double by 1990, and to include larger and deeper lakes."

Extensive forest damage and growth decline throughout North America and Europe are believed to be the result of acid precipitation. Declines in the United States have been documented in high elevation forests in the Northeast, parts of the Midwest and as far south as North Carolina. It may already be too late to reverse the long-term decline of much of the central European forests from these gaseous pollutants. The emission reductions that countries such as West Germany are undertaking may not save their forests since the pollution effects appear to be cumulative and the recovery time long. Central Europe's experiences should serve as a hard lesson for the United States. In fact, during an acid rain factfinding visit to Europe in January 1984, I visited the Black Forest in Germany and was told by German officials and scientists that much of their damage could be permanent. I believe that we have a responsibility and a vested interest in acting before it is too late for us to undo our past negligence.

The air pollutants associated with acid rain can have direct impact on human health. Evidence indicates that even current levels of sulfur dioxide can produce adverse health effects in some people. Those at greatest risk include people with allergies, children, individuals with bronchitis and more severe respiratory and cardiovascular diseases, the elderly and smokers. It is also suspected that pollutant levels that have been accepted as safe when pollutants are in isolation, may become hazardous when the pollutants are combined—as is the case with acid rain.

Acid deposition at current levels is damaging materials—metal, stone and exterior coatings—as well as many important historic and cultural resources. In addition, acid rain is known to contribute to a deterioration of visibility, particularly in those areas where the pollutants are initially emitted.

Given the magnitude of the effects of acid rain and the growing consensus in the scientific community that it is not confined to a few "dead" lakes in New England, comprehensive, immediate action is indicated. The National Acid Rain Control Act will accomplish the needed emissions reductions while being sensitive to issues of coal miner job displacement, cost responsibilities, equity and other regional concerns. The bill will also allow the flexibility needed to encourage advanced fossil fuel combustion technology.

Let me summarize the major provisions of my bill:

The National Acid Rain Control Act will amend the Clean Air Act to reduce sulfur dioxide (SO_2) emissions by 12 million tons per year and nitrogen oxides (NO_x) emissions by 3 million tons per year by 1995 in the 48 contiguous States and the District of Columbia.

The sulfur dioxide reductions will be achieved in three different ways. First, utilities and industry will, immediately upon enactment, be required to reduce emissions by following a series of mandated steps that include coal washing and the addition of adipic acid before combustion.

Second, each State will have control over allocating the additional reductions based on its share as determined by the EPA Administrator using the best available data. The State plan must call for a phased reduction so that seven-twelfths of the State's share of reductions will be achieved before 1992, and the entire share by 1995. A State may allow a source to substitute emissions of NO_x for SO_2 at a ratio of 2:1. In the event that a State fails to submit a plan, or in the event that the plan is not accepted by the Administrator, major stationary sources will have to comply with an emission limitation equal to 1.2 lbs. of SO_2 per million Btu's of heat input.

Finally, a trust fund will be established by the collection of a fee on the production of electricity generated by fossil fuel combustion. Payments from the fund will be used to help defray capital costs incurred by facilities in meeting their reduction requirements. The subsidy will be paid at a rate of $147 per ton of SO_2 reduced. This amount is designed to reduce electric rate increases payable by utility customers. The fee will be assessed at one of three levels, based upon the 1982 State average SO_2 emissions rate. States with lower rates of emissions will be assessed lower fees. This fee structure is designed to provide equity while recognizing that in order to develop a feasible plan, the costs of emissions reductions must be shared. The trust fund also provides $10 million a year for accelerated research on cleaner burning industrial processes as well as $25 million a year for acid deposition mitigation programs.

Acid rain will not go away by wishing. Congress must act now because, unfortunately, the present administration has abdicated its responsibility to develop a viable solution to this problem. The President asked the National Academy of Sciences, EPA Administrator William Ruckelshaus and Acid Rain Special Envoy Drew Lewis to carry out studies of the problem and report their findings and recommendations. All have concluded that a plan for action must be enacted with haste. So far, the President has declined to heed their common warning but, instead, has decided to hide behind requests for more research. There exists

ample evidence to support our contention that we must act now before it is too late.

Mr. President, I believe that this legislation will provide the tools that will enable us to stop acid rain in a way that will minimize the burden on utilities, other industry and of course, ultimately, our consumers. I am hopeful that in the coming session we will get to work on this profoundly important task.●

By Mr. NICKLES:

S. 1984. A bill to amend the Employee Retirement Income Security Act of 1974 to improve the financial solvency of multiemployer pension plans, and for other purposes; to the Committee on Labor and Human Resources.

MULTIEMPLOYER PENSION PLAN REFORM ACT

● Mr. NICKLES. Mr. President, today I am introducing legislation amending the Multiemployer Pension Plan Amendments Act of 1980.

Under current law, an employer who contractually agrees to contribute to a multiemployer pension plan may be subject to a withdrawal liability for a share of any unfunded vested liability when he ceases to participate in the plan. After 5 years of experience with the Multiemployer Pension Plan Amendments of 1980, which imposes the liabilities, we have found that the liabilities are, too frequently, calculated on an exaggerated artificial basis, thus resulting in an unfair levy on the withdrawing employer.

The problem is that the earnings or interest rate assumptions on which the liabilities are calculated are not in line with actual market conditions or with what the plans are actually earning—or could and should be earning. The calculations should not be based on the so-called plan rate which is permitted under current law.

The use of such rates creates large, unwarranted liabilities that are entirely artificial and have no relation to the actual financial condition and performance of a given plan. But they add substantial risks and costs for employers. The result is that employers are necessarily shying away from the plans. A shrinking base of employer support means a shrinking pool of funds to distribute as benefits in the future.

That clearly is not what was intended. The purpose of the bill I am introducing is to remedy the problem. It will amend the current law to assure the use of more realistic rates in calculating withdrawal liabilities in multiemployer pension plans. The rate required by this legislation is the average yield to maturity on bills, bonds, and notes of the U.S. Government that mature during the period when plan liabilities become due. This is essentially the same treatment current law affords single employer plan sponsors that terminate their plans.

Recent studies show that all but a small fraction of multiemployer pension plans are adequately funded and have no need to assess withdrawal liabilities when realistic rates are used.

The truth is that the need to assess any withdrawal liability is an admission of failure to operate a plan properly. At best, withdrawal liability was conceived as a safety net to be used only when all else had failed. It certainly was not designed to be used routinely as an alternative to proper plan performance. Nor was it designed to encourage reckless behavior such as promises to pay benefits that plan income and earnings cannot support.

A properly run plan keeps benefits in line with plan assets, income and earnings and keeps costs rational and affordable. The considerable majority of multiemployer pension plans already meet that test. My goal is to see to it that all will meet that test.

I am not proposing to remove withdrawal liability as a safety net. But I am proposing to work with employers and employees alike to create a simple and straightforward system that will assure that the safety net will not need to be used. That is my intention in introducing this bill.●

By Mr. DURENBERGER:

S. 1985. A bill entitled the "Medicare Voucher Act of 1986;" to the Committee on Finance.

MEDICARE VOUCHER ACT

● Mr. DURENBERGER. Mr. President, today I rise to introduce the Medicare Voucher Act of 1986. This bill was developed by the Department of Health and Human Services and I introduce it on the behalf of the Department.

The Tax Equity and Fiscal Responsibility Act of 1982 [TEFRA] provides an alternative to traditional Medicare coverage. TEFRA allows Medicare beneficiaries to opt out of traditional Medicare coverage and enroll in a Health Maintenance Organization [HMO] or comparable Competitive Medical Plan [CWP]. For those beneficiaries choosing a health plan, Medicare pays the health plan a premium priced at 95 percent of the average per beneficiary cost for the area in which the health plan enrollee lives.

S. 1985 furthers this concept by broadening the types of health plans that would qualify as alternatives to traditional Medicare coverage. It is an ambitious proposal and will contribute to the process of reform my colleagues in the Congress and I started with TEFRA. I am very supportive of the underlying concept of the bill and look forward to refining the specifics of the proposal as it proceeds through the legislative process in 1986.

Mr. President, the ultimate objective of Medicare reform is to provide Medicare beneficiaries the same choice of health plans they had when they were employed, but with a standard set of hospital, doctor and medical benefits appropriate to elderly and disabled persons.

Medicare will get out of the costly and, to beneficiaries, confusing business of paying doctors and hospitals. Congress was never intended to be an insurance company and we prove it annually. It will be the responsibility of Congress and Medicare to assure access to quality health benefits and competitive, quality health plans.

The experience of the Twin Cities in my homestate of Minnesota has shown that consumer choice of health plans can work for the elderly as well as the non-Medicare population. Experience with the Medicare HMO demonstrations and with the HMO/CMP TEFRA provisions going into effect April 1, 1985 for a fixed prepaid premium has shown that health plans can provide services and benefits to Medicare eligible beneficiaries at least as generous as the traditional Medicare plan. And best of all, major headaches for the elderly covered by Medicare, confusing paperwork and arguments over "reasonable and customary charges," are gone.

The attractiveness of the health plan option is illustrated well by beneficiary enrollment data. Through November 1 of 1985, 1.2 million Medicare beneficiaries, 3.8 percent of the total of eligible beneficiaries, have enrolled in prepaid health plans. There is every sign this number will grow dramatically in 1986 and beyond.

S. 1985, the Department's new proposal, would expand the variety of options available to Medicare beneficiaries. TEFRA limited the range of participating health plans by requiring plans to have physicians on staff or under contract. This requirement basically restricts insurance companies and employer-based plans from participating.

S. 1985 would open the field to health plans providing or paying for medical or hospital services under insurance policies or contracts, and includes plans sponsored by employers or employee organizations, including unions. It calls qualifying health plans, "health benefits organizations" [HBO's].

The most significant feature of this bill is the removal of barriers which now prevent insurers and employer-based plans from participation in Medicare. The TEFRA requirements for participating as a health plan in Medicare would be changed by S. 1985. Plans would qualify only if they could meet a test of actuarial equivalence to Medicare's benefit package and have cost sharing no greater than the average out-of-pocket costs under traditional Medicare. Participating plans would also have to meet a test of financial soundness, provide a mimi-

mum level of hospital care, and exclude providers barred from Medicare.

The bill would make a wider choice of benefit packages available to beneficiaries. Currently, most Medicare beneficiaries purchase "Medigap" coverage to fill-in the coinsurance and deductibles they must pay under the traditional Medicare Program. Too frequently they purchase more coverage than they need. S. 1985 would allow for a combined premium which would offer the beneficiary the advantage of a single insurance policy.

The Voucher Act of 1986 would be of most immediate use for Medicare beneficiaries who have health benefits as part of their retirement benefits. The premium payment would offer advantages to both the retiree and the payer, be it a pension plan or the former employer. The retiree would have the advantage of staying with the health plan he or she had before retirement, eliminating both the need to learn about Medicare's coverage rules and the necessity of first obtaining Medicare's reimbursement and then submitting a supplemental claim. The payer could achieve economies by escaping the rigidity of Medicare's benefit structure by structuring cost sharing to produce better utilization incentives than Medicare, by conducting more effective utilization review, and by making use of preferred provider networks.

S. 1985 would also provide an incentive for more health plans to offer coverage to Medicare beneficiaries and promote more competition in the health care market by removing the restrictiveness of the TEFRA payment for HMO's and CMP's. Current law requires participating health plans to subtract the adjusted community rate [ACR] for the health plan from the average area per capita cost [AAPCC] for all Medicare beneficiaries and commit the difference to lower beneficiary cost sharing, more benefits or simply return it to Medicare. S. 1985, instead, would give plans control over their margin above expenses.

It would even allow plans to make cash rebates to beneficiaries of up to $500 per year. This new flexibility in the treatment of the AAPCC and ACR is important and worthy of attention.

Finally, S. 1985 establishes a single nationwide open enrollment period. This period would work much as open-enrollment for the Federal Employee Health Benefits Program. It would offer plans the opportunity to market their coverage and give beneficiaries the broadest choice and opportunity to compare options.

Since employment originated plans are only available for their own retirees, these plans would be exempted from the open enrollment period. But, the open enrollment still provides a period for comparision shopping, so the annuitant can use it to determine whether his employment-based plan does or does not meet his needs better than alternatives in the marketplace.

As with all Americans, Medicare beneficiaries will do better with choice. Yet, the elderly are often vulnerable to exploitation so great care must be taken in crafting the "rules of the game" for health plan competition under Medicare.

The Medicare Voucher Act of 1986 includes many important concepts which should be discussed and explored by the Congress. It offers beneficiaries more flexibility, promotes health plan participation in Medicare, and provides employers the opportunity to extend coverage to their retirees. It will mitigate the perception among beneficiaries that they have to have all varieties of MediGap coverage, and move the Federal Government to a more appropriate role in the health care marketplace.

Mr. President, I ask unanimous consent that a summary of S. 1985, the text of S. 1985, and the example calculation of actuarial equivalence for the Medicare voucher.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1985

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Medicare Voucher Act of 1986".

PAYMENTS TO HEALTH BENEFITS ORGANIZATIONS

SEC. 2. (a) Section 1876 of the Social Security Act (42 U.S.C. 1395mm) is amended to read as follows:

PAYMENTS TO HEALTH BENEFITS ORGANIZATIONS

"SEC. 1876. (a)(1) The Secretary shall annually determine a per capita rate of payment for each class of individuals who are entitled under this section to benefits from a health benefits organization with which he has entered into a contract under subsection (i). The Secretary shall define appropriate classes of individuals, based on such factors as age, sex, disability status and place of residence. The rate for each class shall be equal to 95 percent of the adjusted average per capita cost for that class. Each month the Secretary shall pay each such organization the appropriate rate, in advance, for the estimated number of individuals in each class entitled under this section to benefits from the organization. The Secretary shall make appropriate retroactive adjustments for differences between the estimated and actual number of individuals. Payments under this paragraph shall be payable by the Secretary as otherwise provided under this title for services furnished during any month for which the Secretary finds that the organization has substantially failed to meet the requirements of this section.

"(2) For purposes of this subsection, the term 'adjusted average per capita cost' means the average per capita amount that the Secretary estimates in advance (on the basis of actual experience, or actuarial equivalent based upon an adequate sample and other information and data) would be payable in any contract year for services covered under parts A and B, and types of expenses otherwise reimbursable under parts A and B (including administrative costs incurred by entities described in sections 1816 and 1842), if payment for the services (and, in the case of services covered only under section 1861(s)(2)(H), if the services were physicians' services or furnished as an incident to a physician's professional service) were to be made other than under this section.

"(3) The payment to a health benefits organization under this section for individuals entitled under this section to benefits from the organization shall be made from the Federal Hospital Insurance Trust Fund and the Supplementary Medical Insurance Trust Fund. The portion of that payment to the organization for a month to be paid by the latter trust fund shall be equal to 200 percent of the sum of—

"(A) the product of (i) the number of such individuals for the month who have attained age 65, and (ii) 95 percent of the monthly actuarial rate for supplementary medical insurance for the month as determined under section 1839(a)(1), and

"(B) the product of (i) the number of such individuals for the month who have not attained age 65, and (ii) 95 percent of the monthly actuarial rate for supplementary medical insurance for the month as determined under section 1839(a)(4).

The remainder of that payment shall be paid by the former trust fund.

"(b) For purposes of this section—

"(1) the term 'health benefits organization' means a voluntary association, corporation, partnership, or other organization which is lawfully engaged in providing or paying for health services under insurance policies or contracts, medical or hospital service agreements, membership or subscription contracts, or similar arrangements, and includes a health benefits plan duly sponsored or underwritten by an employer or by an employee organization, and

"(2) the term 'employment based plan' means a plan under which—

"(A) a health benefits organization provides health benefits to at least all individuals residing in a geographic area who were employees of a particular employer at age 65 or at a lower age specificed in the plan (or, alternatively, had served as employees of that employer for at least 10 years or for a shorter minimum period specified in the plan), but who are not current employees,

"(B) the health benefits organization provides health benefits only to families of individuals who are or were employees of that employer, and

"(C) at least 25 percent of the premium (if any) for each employee or former employee is paid by the employer.

"(c) A health benefits organization—

"(1) shall, for an individual entitled under this section to benefits from the organization, provide the categories of services (such as inpatient hospital services and physicians' services) that are covered under this title only through, or shall pay for those categories of services only if furnished through, entities that are permitted to participate in the programs under this title,

"(2) shall provide or pay for, to the extent prescribed by the Secretary, services furnished on an emergency basis in any location that are within the categories of services covered under this title,

"(3) shall provide for a sufficient number of entities to furnish the categories of services covered under this title, and which the organization provides or pays for, in the geographic area in which the individual re-

sides, so as to assure reasonable access to those categories of services, and

"(4) may offer one or more combinations of benefits, as long as it offers to all individuals residing in a geographic area who are entitled under this section to benefits from the organization under a particular employment based plan each combination of benefits that it offers to any such individual, and as long as it offers to all individuals residing in a geographic area who are entitled under this section to benefits from the organization but not under an employment plan each combination of benefits that it offers to any such individual.

"(d) Subject to the provisions of subsection (e), every individual enrolled in the insurance programs under parts A and B (other than an individual medically determined to have end-stage renal disease or an individual to whom section 1862(b)(3) applies) shall be eligible to enroll under this section with any health benefits organization with which the Secretary has entered into a contract under subsection (i) that serves the geographic area in which the individual resides.

"(e)(1) The Secretary may prescribe the procedures and conditions under which a health benefits organization that has entered into a contract with the Secretary under subsection (i)(A) may inform individuals eligible to enroll under this section with the organization about the organization and (B) may enroll such individuals with the organization.

"(2) An individual may enroll under this section with a health benefits organization—

"(A) during August and September of each year,

"(B) during the initial enrollment period described in section 1837(d),

"(C) during a special enrollment period described in section 1837(i) (but without regard to section 1837(i)(1)(C)), and

"(D) as prescribed by the Secretary (to the extent that the Secretary finds it feasible) to enable the individual to be entitled to benefits from the organization beginning with a month during which he no longer resides in the geographic area served by another health benefits organization from which he was entitled to benefits in a previous month but is no longer so entitled.

"(3) The period during which an individual is entitled to benefits under this section from a health benefits organization shall begin—

"(A) in the case of an enrollment under paragraph (2)(A), on January 1 of the following year,

"(B) in the case of an enrollment under paragraph (2)(B), as specified by section 1838(a),

"(C) in the case of an enrollment under paragraph (2)(C), as specified by section 1838(e), or

"(D) in the case of an enrollment under paragraph (2)(D), as specified by the Secretary.

"(4) The period during which an individual is entitled to benefits under this section from a health benefits organization shall terminate—

"(A) as of the end of any year, if the individual has requested termination in August or September of that year,

"(B) as of the beginning of any month during which the individual is no longer entitled to benefits under part A or is no longer entitled to benefits under part B,

"(C) after the third consecutive month for which the individual has failed to pay the required monthly premium, or

"(D) as of the beginning of any month during which the individual no longer resides in the geographic area that the organization serves, if the individual has requested termination in the preceding month.

"(5) Any individual who ceases to be entitled to benefits under this section but who remains entitled to benefits under part A or part B of this title shall be entitled to those benefits as prescribed other than under this section.

"(6) A health benefits organization may refuse to accept the enrollment of an eligible individual under this section with the organization only if the organization accepts enrollments in the order of application and—

"(A) the organization provides health benefits in a geographic area only under employment based plans and an applicant for enrollment residing in that geographic area is not eligible to participate in one of those plans,

"(B) the enrollment of the individual would result in a total new enrollment under this section in a calendar year exceeding a number that the organization had transmitted to the Secretary by the time specified by the Secretary (but not later than June of the preceding year),

"(C) the enrollment of the individual would result in the organization's failing to meet the requirement of subsection (h), or

"(D) the individual lost entitlement to benefits from a health benefits organization under paragraph (4)(B) during the twelve month period preceding the month in which the individual has applied for enrollment.

"(7) A health benefits organization may not terminate the entitlement under this section of any individual to benefits from the organization other than as prescribed by paragraph (4), and shall so notify each individual at the time of the individual's enrollment.

"(f) Any individual entitled under this section to benefits from a health benefits organization who is dissatisfied by reason of his failure to receive any health benefit to which he believes he is entitled shall, if the amount in controversy is at least $100, be entitled to a hearing before the Secretary to the same extent as is provided in section 205(b), and in any such hearing the Secretary shall make the health benefits organization a party. If the amount in controversy is at least $1,000, the individual or health benefits organization shall, upon notifying the other party, be entitled to judicial review of the Secretary's final decision as provided in section 205(g), and both the individual and the health benefits organization shall be entitled to be parties to that judicial review.

"(g)(1) The actuarial value of the aggregate payments (including deductibles, coinsurance, copayments, amounts above the levels recognized by the health benefits organization, and amounts for services furnished on days after those for which the organization provides benefits, but excluding premiums) that individuals entitled under this section to benefits from a health benefits organization are required to make for the categories of services (such as inpatient hospital services and physicians' services) furnished in any calendar year that are covered under this title may not exceed the actuarial value of the aggregate payments (including deductibles, coinsurance, amounts above the levels recognized under this title, and amounts for services furnished as days after those for which this title provides benefits, but excluding premiums) that those individuals would be required to make for those categories of services if they were not entitled under this section to benefits from the organization. The Secretary shall consult with recognized actuarial bodies with expertise in health benefits actuarial techniques, such as the American Academy of Actuaries, in developing methods to measure the actuarial values described in the preceding sentence.

"(2) A health benefits organization shall provide, or pay in full for, the first ninety days of inpatient hospital services covered under this title and furnished in a calendar year to an individual entitled under this section to benefits from the organization, except that the organization may require the individual to pay not more than the inpatient hospital deductible for that year (as determined under section 1813(b)(2)) for the first day of each inpatient hospital admission, and not more than 25 percent of the inpatient hospital deductible for each remaining day of the ninety days.

"(3) The organization may charge each individual entitled under this section to benefits from the organization a premium set by the organization, but the premium rate for any particular combination of benefits for all individuals residing in a geographical area who are enrolled under a particular employment based plan shall be the same during a calendar year, and the premium rate for any particular combination of benefits for all individuals residing in a geographic area who are not enrolled under an employment based plan shall be the same during a calendar year. The organization may provide rebates, subject to the condition prescribed by the preceding sentence, instead of charging premiums. Rebates may not exceed $500 per individual for any calendar year, and may not be paid to an individual until the individual has been entitled under this section to benefits from the organization for at least one year (but may cover that initial year).

"(4) The health benefits organization may, in the case of services furnished to an individual entitled under this section to benefits from the organization for an illness or injury for which the individual is entitled to benefits under a workmens' compensation law or plan of the United States or a State, under an automobile or liability insurance policy or plan (including a self-insured plan), or under no-fault insurance, charge or authorize the entity furnishing the services to charge, in accordance with the charges allowed under that law, plan, or policy—

"(A) the entity which under that law, plan, or policy is to pay for the provision of those services, or

"(B) the individual, to the extent that he has been paid under that law, plan, to policy for those services.

"(h) (1) Except as otherwise provided in paragraph (2), each health benefits organization with which the Secretary enters into a contract under this section shall, in any geographic area, provide health benefits to at least as many individuals who are not entitled to benefits under this title or under a State plan approved under title XIX as individuals entitled to benefits under this title or under such a State plan.

"(2) The Secretary may modify or waive the requirement imposed by paragraph (1) if the Secretary determines that—

"(A) special circumstances warrant a modification or waiver, and

"(B) the organization is making reasonable efforts to provide health benefits to individuals who are not entitled to benefits

under this title or under State plan approved under title XIX.

"(i)(1) The Secretary shall enter into a contract with any health benefits organization that agrees to meet, and that the Secretary finds will meet, the requirements of this section.

"(2) Each contract under this section shall be for a term of at least 1 year, as determined by the Secretary, and may be made automatically renewable from term to term in the absence of notice by either party of intention to terminate at the end of the current term; except that the Secretary may terminate any such contract at any time (after such reasonable notice and opportunity for hearing to the health benefits organization involved as he may provide in regulations) if he finds that the organization has substantially failed to meet the requirements of this section.

"(3) The effective date of any contract executed pursuant to this subsection shall be specified in the contract.

"(4) Each contract under this section—

"(A) shall provide that the Secretary—

"(i) shall have the right to inspect or otherwise evaluate the quality, appropriateness, and timeliness of services performed under the contract, and

"(ii) shall have the right to audit and inspect any books and records of the health benefits organization that pertain to services performed or determinations of amounts payable under the contract,

"(B) shall require the health benefits organization to report to the Secretary any fraudulent claims submitted to the organization for services furnished to individuals entitled under this section to benefits from the organization,

"(C) shall require the health benefits organization to provide such information to the Secretary as he may request,

"(D) shall require the health benefits organization to provide (and pay for) written notice in advance of the contract's termination,

"(E) shall require the health benefits organization to protect individuals entitled under this section to benefits from the organization and the Secretary from incurring liability for payment of any fees which are the legal obligation of the organization through—

"(i) a contractual arrangement with any hospital that is regularly used by those individuals prohibiting the hospital from holding any of those individuals liable for payment of any fees which are the legal obligation of the organization,

"(ii) insolvency insurance, acceptable to the Secretary,

"(iii) adequate financial reserve, acceptable to the Secretary, or

"(iv) other arrangements, acceptable to the Secretary,

except that the above requirements shall not apply if applicable State law provides those individuals with protection from liability for payment of any fees which are the legal obligation of the organization, and

"(F) shall require the health benfits organization to meet such other conditions as the Secretary may find are needed to carry out effectively the provisions of this section.

"(5) The Secretary may not enter into a contract with a health benefits organization under this subsection if more than one former contract with that organization under this subsection was terminated at the request of the organization within the preceding five year period except in circumstances which the Secretary finds warrant special consideration.

"(6) Any claim of the United States against a health benefits organization shall have priority over any claim of any other entity against the organization.

"(j) The functions vested in the Secretary by subsection (i) may be performed without regard to such provisions of law of regulations relating to the making, performance, amendment, or modification of contracts of the United States as the Secretary may determine to be inconsistent with the furtherance of the purpose of this title.

"(k) The provisions of this section preempt any State or local law or regulation that requires benefits more extensive than the minimum benefits specified in this section.

"(l) Whoever knowingly and willfully—

"(1) makes a false representation that there is a contract in force under subsection (i) between the Secretary and an entity, or

"(2) substantially misrepresents the benefits under a contract under that subsection,

shall be guilty of a felony and upon conviction shall be fined not more than $25,000 or imprisoned for not more than 5 years, or both.".

(b) Section 1833(a)(1)(A) of the Social Security Act (42 U.S.C. 1395l(a)(1)(A)) is amended by striking out "provides medical and other health services (or arranges for their availability) on a prepayment basis may elect to be paid" and inserting instead "has provided medical and other health services (or has arranged for their availability) on a prepayment basis for not more than one year may elect to be paid for not more than 36 months".

(c) Section 1861(s)(2)(H) of the Social Security Act (42 U.S.C. 1395x(s)(2)(H)) is amended by striking out "to a member of an eligible organization" and "to such a member".

(d) Section 1866(a)(1) of the Social Security Act (42 U.S.C. 1395cc(a)(1)) is amended—

(1) by striking out "and" at the end of subparagrah (G),

(2) by substituting ", and " for the period at the end of subparagraph (H), and

(3) by inserting after subparagraph (H) the following:

"(I) in the case of a hospital that has been so requested by a health benefits organization that is receiving payments under section 1876, to accept as payment in full for inpatient hospital services furnished to any individual who is entitled under that section to benefits from the organization the amounts that would be accepted as payment in full if the individual were not so entitled.".

(e) Section 1886(c)(1)(D) of the Social Security Act (42 U.S.C. 1395ww(c)(1)(D)) is amended by striking out "an eligible organization (as defined in section 1876(b))" and inserting instead "a health benefits organization that is receiving payments under section 1876".

(f) The first sentence of section 1903(g)(1) of the Social Security Act (42 U.S.C. 1395b(g)(1)) is amended by striking out "health maintenance organization as defined in section 1876 or which is" and inserting instead "health benefits organization that is receiving payments under section 1876 or with".

(g) Section 114(d) of the Tax Equity and Fiscal Responsibility Act of 1982 (42 U.S.C 1395mm nt.) is repealed.

EFFECTIVE DATE AND TRANSITIONAL PROVISION

SEC. 3. (a) The amendments made by section 2 apply with respect to services furnished after 1986, but shall not apply—

(1) for the periods and under the conditions specified in section 114(c) (other than paragraph (2)(B)) of the Tax Equity and Fiscal Responsibility Act of 1982 (42 U.S.C. 1395mm nt.),

(2) to any individual who at the end of 1986 is enrolled with a health maintenance organization or competitive medical plan with which the Secretary has entered into a contract under section 1876(h) of the Social Security Act (42 U.S.C. 1395mm(h)), unless—

(A) the individual requests at or after that time that the amendments apply, or

(B) the Secretary determines at any time that the amendments should apply to all members of the organization because of administrative costs or other administrative burdens involved and so informs in advance each affected member of the organization, or

(3) with respect to services furnished to any individual receiving benefits under a plan of a State approved under title XIX of the Social Security Act (unless the services are furnished by an entity that has furnished services to such individuals under section 1876 of that Act (42 U.S.C. 1395mm) before 1987) until the Secretary finds that it is administratively feasible for the amendments to apply.

(b) The amendments made by section 2 of this Act shall apply only with respect to the categories of services covered under part B of title XVIII of the Social Security Act for any individual who at the end of 1986 is not enrolled in the program under part A of title XVIII of that Act but is enrolled with a health maintenance organization or competitive medical plan under section 1876 of that Act (42 U.S.C. 1395mm), unless subparagraph (A) or (B) of subsection (a)(2) of this section applies.

(c) Periods of time that have occurred at any time before as well as after the end of 1986 shall be taken into account for purposes of determining the one year period specified in the amendment made by section 2(b) of this Act.

(d) Notwithstanding subsection (i)(1) of section 1876 of the Social Security Act (42 U.S.C. 1395mm), the Secretary may enter into contracts under that section that will expire at the end of 1986 although the contracts are for a term of less than one year.

SUMMARY OF MEDICARE VOUCHER ACT OF 1986

Section 1 would assign the bill the short title "Medicare Voucher Act of 1986".

Section 2 would permit the Secretary to contract with health benefits organizations (HBOs) (a broad range of health insurers and health services providers, including health maintenance organizations (HMOs) and competitive Medical plans (CMPs)) to provide private alternative coverage for medicare beneficiaries (other than individuals suffering from end-stage renal disease, or who are working and for whom Medicare is a secondary payer) who chose to participate in such a private plan. Section 2 would also enact additional amendments to current provisions of law concerned with Medicare contracts with such organizations to—

Establish a single, coordinated open enrollment period during August and September of each year (but only for that number of new enrollees, in order of applications filed, previously specified by an HBO), and

to enable the Secretary, to the extent feasible, to provide for individuals who move from the area served by one HBO to an area served by another (similar to the system used by the health benefits program for Federal employees),

Preclude new enrollments for individuals receiving only Supplementary Medical Insurance (SMI) benefits,

Permit cost-based contracts for up to 36 months only for organizations that have been providing (or arranging for) medical and other health services for not more than one year (including periods of time that have occurred before the effective date of the draft bill), and permit those contracts only for SMI benefits,

Permit HBOs to offer separate benefit packages for employer-based groups,

Permit HBOs to offer one or more benefit packages (with deductibles, coinsurance, copayments, levels of benefit payments, and days of coverage to be determined by the HBO) as long as each package limits the actuarial value of the aggregate payments (including deductibles, coinsurance, copayments, amounts above the levels the HBO recognizes, and amounts for days beyond those for which the HBO will pay, but excluding premiums) that Medicare enrollees in the HBO have to make for the categories of services Medicare covers to the actuarial value of their aggregate payments under Medicare,

Require HBOs to cover inpatient hospital services for at least 90 days annually, with a deductible for the first day of an admission of not more than the Medicare inpatient hospital deductible, and coinsurance for each remaining day of no more than 25 percent of the inpatient hospital deductible,

require any hospital, at the request of an HBO, to accept as payment in full for inpatient hospital services furnished to any enrollee of the HBO the amounts that would be accepted as payment in full if the enrollees had not chosen to enroll in the HBO,

permit HBOs to provide annual rebates of up to $500 (instead of charging premiums), but payment of a rebate could not be actually made until the individual had been covered by the HBO for at least a year,

preempt provisions of State or local law requiring benefits more extensive than those under this section, and

make it a criminal offense to represent falsely that an organization is a contractor under this section, or to substantially misrepresent the benefits an HBO offers.

Section 3 would make the provisions of section 2 applicable to services furnished after 1986. Section 3 would also—

retain the transitional provisions enacted in 1982 when Congress amended the provisions of law providing for payments to HMOs,

permit any enrollee of an HMO or CMP at the end of 1986 who was not already covered by those earlier transition provisions to continue his enrollment under the provisions of law then current if either the HMO or CMP had a cost-based contract with the Secretary, unless the Secretary found that the new provisions should apply to all members of an HMO or CMP because of administrative costs or other administrative burdens,

permit any enrollee of an HMO or CMP at the end of 1986 who was enrolled for Medicare SMI (but not Hospital Insurance) benefits to continue enrollment only for SMI benefits (subject to the conditions stated in the previous paragraph), and

apply the provisions of section 2 to beneficiaries who also receive benefits under Medicaid and who are not enrolled in an HMO or CMP as of the end of 1986 only after the Secretary finds that it is administratively feasible.

Example Calculation of Actuarial Equivalence for the Medicare Voucher

A. BACKGROUND

The proposed medicare voucher program would require that qualified policies would have no greater cost sharing than Medicare. More precisely, the actuarial value of the payments for which patients are responsible in a qualified plan for services as defined for Medicare coverage could not be greater than it is in Medicare.

The standard for comparison would be an idealized Medicare plan, which included all the services that meet the Medicare definitions of eligible services and providers, and require no patient payments. The standard would include all payments which beneficiaries (as opposed to the Medicare program) make for services which are reimbursed in any part by Medicare or would be reimbursed if there were no deductibles, coinsurance or benefit limits in Medicare. This standard is used to compare the proportion of the idealized plan benefits that are paid for by Medicare and by any qualified plan under consideration.

There are thus two components to the calculation, Medicare benefits compared to its idealized version and the proposed qualified plan compared to the idealized Medicare version. Specifically:

(1) The actuarial value, relative to the idealized plan, of the deductibles, coinsurance, services excluded by limits, and the excess of actual over reasonable charges for unassigned bills in Medicare.

(2) The actuarial value of the cost sharing, reimbursement limits, and any services excluded by limits in the proposed qualified plans.

Sample calculation are provided below for both of these components. It should be noted that the calculations for the Medicare program need only be prepared once for each fiscal year (and would change by only small amounts from year to year). It would thus be documented in an annual statement by the Secretary on the basis of the best information available.

B. ACTUARIAL VALUE OF PATIENT PAYMENTS IN MEDICARE

The out-of-pocket costs faced by Medicare beneficiaries for covered services consist of the following:

Inpatient hospital deductible and Part A "coinsurance" payments for long hospital and skilled nursing home stays

The $75 deductible and 20% coinsurance in Part B

Hospital stays beyond the 90 days per spell of illness and those claimed for the 60 day lifetime reserve

Inpatient stays for mental and nervous conditions not reimbursed because of the 190 day lifetime limit

Nursing home stays beyond 100 days per spell of illness

Reasonable charges for outpatient services for mental or nervous conditions beyond $500 of charges in a calendar year

Charges in excess of "reasonable charges" for which no assignment is taken (and are thus a liability for patients).

In the following calculations, no adjustment is made for the 190 day lifetime limit on inpatient mental. It would appear very unlikely that any of the qualified plans would waive this limit. If one did, an additional credit would have to be calculated for it.

SAMPLE CALCULATIONS

Unless otherwise noted, the data for these calculations are from tabulations of the 1977 Medicare History File, adjusted to a 1985 basis.

(1) Paying the inpatient hospital deductible and the part A coinsurance amounts for long hospital and skilled nurisng home stays would increase reimbursements by 7.35%.

(2) Paying the $75 deductible and the 20% coinsurance on Part B raise benefit payments for services covered by Part B by 32%. An additional 1% adjustment is needed to allow for the $500 limit on covered servs ices for mental or nervous conditions. Therefore, the following calculations increase Part B payments by 33% to allow for the added cost of filling in these patient payments.

(3) Paying for days beyond the 150 day maximum per spell of illness adds 0.8% to the total number of days covered. These are probably underreported on the MHSF, however, so we increase this by a factor of 1.25. These long term days include relatively few ancillary charges and thus have a lower average cost. Tabulations of cost per day by length of stay suggest the marginal days cost about 82.1% as much as the average below 150 days. An estimate of the cost of covering unlimited hospital stays is given by:

$$.008 \times 1.25 \times .821 \times .954 = .0078$$

The last factor, .954, allows for the portion of Part A reimbursement and cost sharing accounted for by hospital payments.

(4) 34.6% of skilled nursing home days are beyond the 100 day maximum per spell of illness. Allowing 20% for underreporting of such days to Medicare and 80% for the relative cost of days beyond 100 compared to those reimbursed by Medicare, we have an increase in Part A payments as follows:

$$.346 \times 1.20 \times .8 \times .027 = .0090$$

The last factor accounts for the portion of part A reimbursements and cost sharing that is for skilled nursing home care.

(5) Data from the actuarial appendices to the 1985 Trustees' Report for Part B shows that 82.4% of covered charges were for services affected by the physician screens. Other HCFA data for the same year show that 50% of Medicare physician bills were assigned. The average ratio of Medicare approved charges to actual charges was projected to be 77.5%. No data was available that showed this percentage separately for assigned and unassigned claims. Under the assumption that this ratio was only 70% for unassigned claims, paying the excess of actual over approved charges on unassigned claims would increase Part B outlays (if physicians did not change their assignment patterns) as follows:

$$.824 \times .5 \times (1/.70 - 1) = .177$$

(6) Medicare benefits per capita are $2333 (for the aged), of which $1566 is part A and $767 is part B. Total out-of-pocket expenses can then be computed as follows:

Part A:	
Cost-sharing (1566 × .0735)	115
Days past 150 ((1566 + 115) × .0078)	13
SNG days past 100 ((1566 + 115) × .0090)	15
Part B:	
Cost-sharing (767 × .330)	253

Unassigned excess over reasonable ((767 + 253) × .177)	181
Total out-of-pocket costs	577

The total per capita expense including uncovered days and unassigned excess bills is 2333 + 577, or $2910. The percentage that out-of-pocket expenses represent of the idealized Medicare plan is 577 / 2910, or 19.8%

C. CALCULATION OF THE RELATIVE VALUE OF A SUBMITTED PLAN

For illustrative purposes, suppose an insurer submitted a proposed plan with a $250 deductive and 15% coinsurance, each applicable to all covered services, but excluding the excess of actual over reasonable charges on unassigned claims. Suppose further that the coinsurance was limited so that no patient would pay more than $750 in any calendar year.

The proposed plan in effect has a coinsurance rate of 100% on the first $250 and of 15% on the next $5000. The deductible requires enrollees to pay 5.74% of all expenses, and the coinsurance is applied to 40.13% of all expenses (i.e., 40.13% of charges for Medicare covered services are in excess of $250 but not in excess of $5250). Cost-sharing is thus approximately .0574 + (.15) (.4013), or 11.76% of covered expenses. Covered expenses are 2333 + 115 + 13 + 15 + 253 = $2729 (excess over reasonable is not covered), so cost-sharing is $321. The excess over reasonable charges on unassigned claims must then he added, giving total out-of-pocket costs of 321 + 181 = $502. (This is 17.3% of total expenses.) Thus, this plan would qualify as being at least actuarially equivalent to Medicare.●

By Mr. PELL (for himself and Mr. DANFORTH):

S.J. Res. 252. Joint resolution requesting the President of the United States to negotiate controls upon and the early prohibition of nuclear explosions; to the Committee on Foreign Relations.

TEST BAN RESOLUTION

Mr. PELL. Mr. President, the Senator from Missouri [Mr. DANFORTH] and I are introducing a joint resolution today designed to chart a course toward a complete cessation of nuclear testing. We know that many of our fellow Senators share our deeply held belief that ways must be found to increase nuclear stability and reduce the threat of nuclear war. We believe tighter controls on testing leading to a mutual and verifiable ban could be of crucial importance in that effort, and we urge our fellow Senators to join us as cosponsors.

The joint resolution urges the President, at the earliest possible date, to:

Endorse and request Senate consent to ratification of the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty, signed in 1974 and 1976 respectively;

Call upon the Soviet Union to join in a further agreement reducing the permitted yields of explosions, as specified in the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty, to the lowest possible verifiable levels which advances in seismic detection and other verification capabilities will allow;

Express to the Soviet Union and Great Britain the desire of the United States to resume negotiations to conclude an agreement leading immediately or in balanced steps to a mutual and verifiable ban on nuclear explosions to which all nations would be invited to become party; and

Seek Soviet agreement to facilitate negotiations by declaring at the earliest practicable date a mutual moratorium of finite duration on nuclear explosions.

Mr. President, there is strong bipartisan support for effective arms control. The President speaks for all Americans in his desire for the eventual elimination of nuclear weapons. We hope that significant agreements can be reached at an early date in Geneva.

Unfortunately, one key arms control goal for well over two decades remains curiously absent current discussions. That is a comprehensive ban on nuclear explosions. An end to nuclear explosions could be an invaluable underpinning in efforts both to reduce nuclear arms and to deal with space weapons—the goals at the current negotiations. I am convinced that, as our resolution states, the early prohibition of nuclear explosions would constrain the development and deployment of the threatening new nuclear arms, reduce confidence in and reliance upon nuclear arsenals, and strengthen efforts to prevent nuclear proliferation.

Twenty-two years ago, the United States, Great Britain, and the Soviet Union concluded the Limited Test Ban Treaty, which banned nuclear testing under water and in the atmosphere and space. In 1974, President Nixon signed a treaty, the Threshold Test Ban Treaty, which restricts tests in the only medium in which nuclear tests are allowed—underground—to 150 kilotons. In 1976, President Ford signed a companion treaty—the Peaceful Nuclear Explosions Treaty—to ensure that so-called peaceful explosions were not used as a way to test and gain weapons information outside the strictures of the TTBT and PNET. Although never ratified, the treaties have been respected by both sides since 1976. The treaties remain on the calendar of the Committee on Foreign Relations.

In 1977, the committee held extensive hearings on the TTB and PNE Treaties. They received significant support in the scientific community. Representatives of the Secretary of Defense and the Joint Chief of Staff testified that the treaties were in our national security interests. The committee supported the treaties and would have reported them favorably had not the Carter administration shifted its priorities to early attainment of a comprehensive ban. That negotiation did, indeed, make considerable progress, but it lapsed with the change in administration.

The Soviets have made much of the fact that, since 1972, the United States has not ratified significant arms control agreements which have been painstakingly negotiated. Ratification now would demonstrate our seriousness and could help improve prospects for success in Geneva.

The administration, after an extended period of inaction and review, decided in June 1982, that no ratification of the TTB and PNE treaties was possible unless the Soviets agreed to new talks aimed at expanding the agreements' provisions on verification. It took some additional months for the administration to decide what new verification was wanted, and the matter was finally broached with the Soviets in early 1983. The Soviets have rejected at least three separate United States demarches for such discussions, arguing that any discussion of new provisions should follow, and not precede, ratification. Unfortunately, the two sides remain at impasse with regard to these two treaties.

Since the agreements have not been formally ratified, two important provisions related to verification have not been implemented: First, provisions under the PNE for onsite monitoring of preannounced groups of nuclear explosions with an aggregate yield above 150 kilotons; and second, exchange of data and test calibration information under both treaties that should improve each side's verification confidence level.

The Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty can be verified with high confidence. Recent advances in seismology are helping resolve questions about compliance and reassuring us that we can ratify those treaties without threatening our security. Weapons laboratory chiefs have indicated that they can meet their responsibilities under these constraints. We must remember that we have lived under the treaties for nearly 10 years with no significant problems for our security.

In recent years, the Senate has urged the President to seek Senate advice and consent to the two treaties. I believe that that advice should be reaffirmed strongly as the Senate charts, in our resolution, a course toward a complete ban on tests.

With the treaties formally in place, the administration would be in a position to seek a substantially lowered threshold and expanded verification as appropriate. That should take care of any particular verification problems. A radically lower ceiling for tests—which could be only a small fraction of the current ceiling of 150 kilotons—could be agreed upon in safety, given advances in technologies.

With such steps behind us we would be in an excellent position to move on to negotiation of a complete ban. That could be instituted on a date certain or phased in over several years to allow any necessary testing for reliability and durability to be conducted before the complete stop.

Mr. President, I believe it would be misguided to dismiss the possibility of a mutual moratorium out of hand, as so many seem prepared to do. I believe a moratorium could be tailored which would boost prospects for a total ban without any risk to our security. Last summer, Mr. Gorbachev announced that the Soviets would observe a unilateral moratorium from early August through December. The Soviet leader also invited the United States to join in a bilateral moratorium to extend past December. The President seemed initially attracted to the idea, although the White House later seemed much more dubious. Nevertheless, the President indicated a willingness to engage in a mutual moratorium after our necessary testing is completed.

In September, I and other members of a Senate delegation had an opportunity to discuss the Soviet offer with Mr. Gorbachev. The Soviet leader argued strongly for his proposal, maintaining that a joint moratorium would permit a return to the negotiating table to set the terms of a comprehensive ban.

Regrettably, the two leaders did not deal with the moratorium at the summit. Consequently, there seems to be no current prospect for agreement on a mutual moratorium to follow the present unilateral Soviet halt. Nonetheless, the suggestion advanced by Mr. Gorbachev is too important to be dismissed out of hand. It is in our clear interest to test his seriousness by seeing whether a moratorium of finite duration could be put in place while negotiations proceed.

Specifically, we need to establish what verification provisions would apply; and we need to be assured that, despite Mr. Gorbachev's words, a moratorium would not substitute for a formal agreement. A nonbinding pause of uncertain duration is no substitute for a detailed set of long-term agreed commitments with effective verification provisions.

However, a moratorium of a finite duration—such as 1 year—would open the way to a serious resumption of the negotiations on a comprehensive test ban agreement conducted by the Carter administration. Considerable progress on verification matters had been made in these negotiations. The sides had agreed to allow seismic monitoring stations on their territory, and details on inspections on demand to look into suspicious seismic activity were being worked out. Thus, the two sides would not be starting from scratch. A finite duration to a moratorium would give the sides reason to conclude their work expeditiously, although, if success were in sight, there would be nothing wrong with a brief extension of the moratorium.

Critics argue that a moratorium should be avoided because the Soviets might break out of it, as they did in the moratorium which preceded the Limited Test Ban Treaty of 1963. That concern is based on an erroneous recalling of the record. From 1958 until August 1961, both sides observed a testing moratorium, although President Eisenhower announced in 1959 the United States would no longer be bound, thus opening the way to a similar Soviet decision. The Soviets had said they would not remain bound if any Western powers tested. Indeed, following four French tests, the Soviets resumed testing, and the United Staters followed suit several weeks later.

Mr. President, I believe that the test ban agenda I have described is a practical one. It is clear that steadily improved controls on nuclear testing, culminating in a ban on all nuclear explosions, offers many critically important benefits:

Over time, confidence in the reliability of our warheads would erode, although actual reliability should remain high for some time. Eventually, however, the reliance placed on nuclear weapons by both sides would decline, and that would be to everyone's benefit.

A moratorium followed by a ban would curb the modernization of United States and Soviet nuclear warheads. This could prevent them from developing new, smaller warheads with high weight-to-yield ratios to be proliferated on their missile forces, especially MIRV's. It could also impede the development of new technologies, such as x-ray lasers driven by nuclear explosions.

A moratorium and ban would put pressure on the Chinese and the French to stop their testing programs, and a halt by the nuclear nations would certainly deter other nations from starting their own testing programs.

Finally, such steps by the superpowers would serve to reinforce the resolve of the 127 nations who have foresworn nuclear weapons. A ban open to all nations could well give new life to the crucial effort to stop the spread of nuclear nations.

Mr. President, I hope this resolution will receive substantial support from those Senators concerned about the testing problem, and that it will gain the approval of the Senate next year. As ranking Democratic member of the Committee on Foreign Relations, I will seek hearings on this resolution and the issue of continued nuclear testing.

There is no greater imperative than finding a way to stop the nuclear arms race. I believe that the Geneva talks offer promise if the sides are willing to bring them to fruition. I believe, further, that this resolution would complement that effort without being dependent upon success in Geneva to make its own, independent and crucially important contribution. Application of stiffer controls upon nuclear testing as we move toward a complete ban would represent the keeping of longstanding promises to other nations. Just as importantly, it would represent the keeping of an obligation we have to our children and grandchildren to take those positive steps we have the wisdom and resolve to pursue to remove forever the threat of nuclear holocaust.

Mr. President, I ask, unanimous consent that the resolution the Senator from Missouri [Mr. DANFORTH] and I are introducing be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 252

Whereas the United States, the Soviet Union and Great Britain are committed in the Limited Test Ban Treaty of 1963 and in the Non-Proliferation Treaty of 1968 to seek the discontinuance of all test explosions of nuclear weapons for all time;

Whereas the early prohibition of nuclear explosions would constrain the development and deployment of the threatening new nuclear arms, reduce confidence in and reliance upon nuclear arsenals, and strengthen efforts to prevent nuclear proliferation;

Whereas the early ratification of the Peaceful Nuclear Explosions Treaty and the Threshold Test Ban Treaty and subsequent agreement to reduce the size of permitted nuclear explosions would make completion of a comprehensive test ban treaty and further progress in strategic arms control more probable;

Whereas the President of the United States has spoken for all American in expressing the desire for the eventual elimination of all nuclear weapons: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of American in Congress assembled, That at the earliest possible date the President of the United States should—

(1) Endorse and request Senate consent to ratification of the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty, signed in 1974 and 1976 respectively;

(2) Call upon the Soviet Union to join in a further agreement reducing the permitted yields of explosions, as specified in the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty, to the lowest possible verifiable levels which advances in seismic detection and other verification capabilities will allow;

(3) Express to the Soviet Union and Great Britain the desire of the United States to resume negotiations to conclude an agreement leading immediately or in balanced steps to a mutual and verifiable ban on nuclear explosions to which all nations would be invited to become party; and

(4) Seek Soviet agreement to facilitate negotiations by declaring at the earliest practicable date a mutual moratorium of finite duration on nuclear explosions.

Mr. DANFORTH. Mr. President, I am pleased to join the Senator from Rhode Island, Mr. PELL, in introducing this resolution calling for a series of steps toward a comprehensive ban on nuclear explosions.

For more than a generation, American Presidents have sought a complete ban on the testing of nuclear bombs. The reason is simple: Practically nothing would do a better job of slowing down the development of new and more dangerous weapons than a mutually verifiable agreement among the superpowers to quit performing nuclear tests.

There are other benefits to a test ban. The Nuclear Nonproliferation Treaty of 1968 commits the nuclear weapon States to pursue disarmament in exchange for a commitment by the nonweapon States to forgo weapons of their own. A comprehensive test ban remains the single most important indication of our commitment to this pledge. Continued insistent on testing by the superpowers stands as a major barrier to our efforts to stop the spread of nuclear weapons.

Opponents of a test ban have raised questions about our ability to maintain a reliable stockpile in the absence of testing. Prudent design and regular inspection of our warheads, coupled with careful negotiations, can ensure sufficient reliability, In addition, a slight decrease in each side's confidence in its warheads may well be a good thing. Perfect reliability is a requirement only of a first strike policy; it is not necessary for a strategy of deterrence based on retaliation.

Progress toward a nuclear test ban has been stalled too long. The resolution we are introducing today calls on the President to take a series of actions designed to break this stalemate.

The resolution asks the President to endorse the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty and submit them to the Senate for ratification. The protocols to these treaties contain important precedents in the area of verification, including the exchange of seismic date and limited onsite inspections, that will go into effect only on ratification.

Second, the resolution calls on the President to pursue an additional agreement reducing the permitted yields of explosions to the lowest possible verifiable levels.

Third, the resolution calls on the administration to resume negotiations, broken off in 1980, with the Soviet Union and Great Britain toward a full treaty to implement a comprehensive test ban.

Finally, as a means of facilitating these negotiations, the resolution endorses a temporary, mutual moratorium on nuclear testing. No declared moratorium can be a substitute for a full, verifiable treaty. We must make clear at the outset that a moratorium that does not lead to a treaty should be discontinued. A pause in testing, however, could be a useful step toward those negotiations.

Mr. President, a verifiable and effective test ban treaty is in our interest and our children's interest. We have attempted in this resolution to identify a number of concrete steps that we can take now to advance this goal.

By Mr. HATCH:

S.J. Res. 253. Joint resolution to designate the week of March 2 through 8, 1986, as "Women's History Week"; to the Committee on the Judiciary.

WOMEN'S HISTORY WEEK

Mr. HATCH. Mr. President, this past October I sponsored a women's conference in Salt Lake City, UT. The theme of this conference, "Discovering the Diversity and Unity of Women," emphasizes the important role women have played, are playing, and will continue to play in American life. Women have played a central role as mothers and homemakers as well as politicians, philanthropists, doctors, businesses executive, laborers, civic leaders, and in many other important fields. Yet we have only begun to recognize them for their contributions.

Today, I am pleased to introduce a joint resolution designating the week beginning March 2, 1986, as "Women's History Week." Representative BARBARA BOXER of California has introduced a companion resolution in the House of Representatives. Throughout our Nation's history, many significant improvements in our quality of life can be attributed to our foremothers' vision and dedication as well as to our forefathers'. The hard work of both women and men brought good ideas to fruition.

Let me give you just one example of such a woman from my own State of Utah. Martha Hughes Cannon is probably one of the best known characters in Utah history. As a child, despite her family's limited income, she dreamed of becoming a physician. She saved as much as she could, and in 1876 enrolled in the premedical department of the University of Deseret. She graduated with an M.D. degrees on her 23d birthday. After receiving her degree in medicine, she studied oratory so that she could be a more effective speaker for public health. She enrolled in both the University of Pennsylvania and the National School of Elocution and Oratory. In 1882, she received a bachelor of science degree from the university, the only woman in a class of 75. She also received a bachelor of oratory degree from the School of Elocution.

She moved back to Utah, set up a private medical practice, got married, and became actively involved in politics and the woman suffrage movement. On January 11, 1897, she began her career in the Utah State Senate, where she continued her work for public sanitation and health. She introduced "An Act Creating a State Board of Health and Defining Its Duties." The act passed, and the first Utah Board of Health was created. Martha Hughes Cannon is only one of many women whose vision and perserverence have improved our lives.

Mr. President, I am impressed with the growing support and enthusiasm for this piece of legislation honoring the contribution of women in our Nation's history. Once again, I urge my colleagues to join me in cosponsoring this joint resolution establishing a week to commemorate the impact of women in our history.

ADDITIONAL COSPONSORS

S. 359

At the request of Mr. DURENBERGER, the name of the Senator from West Virginia [Mr. ROCKEFELLER] was added as a cosponsor of S. 359, a bill to provide for medical demonstrations in health promotion and disease prevention.

S. 400

At the request of Mr. BINGAMAN, the name of the Senator from Utah [Mr. HATCH] was added as a cosponosr of S. 400, a bill to provide health promotion and disease prevention services to Indians.

S. 1154

At the request of Mr. MATSUNAGA, the name of the Senator from South Dakota [Mr. ABDNOR] was added as a cosponsor of S. 1154, a bill to amend the title XVIII of the Social Security Act to provide direct medicare reimbursement for services performed by registered nurse anesthetists.

S. 1437

At the request of Mr. THURMOND, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 1437, a bill to amend the Controlled Substances Act to create new penalties for the manufacturing with intent to distribute, the possession with intent to distribute, or the distribution of "designer drugs," and for other purposes.

S. 1525

At the request of Mr. PELL, the name of the Senator from Ohio [Mr. GLENN] was added as a cosponsor of S. 1525, a bill to amend the Elementary and Secondary Education Act of 1965 to provide grants to local educational agencies for dropout prevention demonstration projects.

S. 1562

At the request of Mr. GRASSLEY, the name of the Senator from Maine [Mr. COHEN] was added as a cosponsor of S. 1562, a bill to amend the False Claims Act, and title 18 of the United States Code regarding penalties for false claims, and for other purposes.

S. 1574

At the request of Mr. LUGAR, the name of the Senator from Washington [Mr. EVANS] was added as a cosponsor of S. 1574, a bill to provide for public education concerning the health consequences of using smokeless tobacco products.

S. 1595

At the request of Mr. WARNER, the names of the Senator from Georgia [Mr. MATTINGLY], the Senator from Oklahoma [Mr. NICKLES], the Senator from New Mexico [Mr. BINGAMAN], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Virginia [Mr. TRIBLE], and the Senator from Arizona [Mr. GOLDWATER] were added as cosponsors of S. 1595, a bill to prevent the implementation of Revenue Ruling 83-3 and other similar considerations affecting the housing allowances of the military and clergy.

S. 1740

At the request of Mr. BYRD, his name was added as a cosponsor of S. 1740, a bill to designate Bloomington Lake located on the North Branch of the Potomac River, near Bloomington, MD, and Keyser, WV, as the "Jennings Randolph Lake."

S. 1804

At the request of Mr. HATCH, the name of the Senator from Nevada [Mr. HECHT] was added as a cosponsor of S. 1804, a bill to provide for Federal incentive grants to encourage State health care professional liability reform.

S. 1914

At the request of Mr. GORTON, the names of the Senator from Illinois [Mr. SIMON], and the Senator from New Mexico [Mr. BINGAMAN], were added as cosponsors of S. 1914, a bill to amend the Stevenson-Wydler Technology Innovation Act 1980 to permit cooperative agreements between industry and laboratories owned and operated by the Federal Government, and for other purposes.

S. 1917

At the request of Mr. BRADLEY, the names of the Senator from Missouri [Mr. DANFORTH], and the Senator from Vermont [Mr. STAFFORD] were added as cosponsors of S. 1917, a bill to amend the Foreign Assistance Act of 1961 to provide assistance to promote immunization and oral rehydration, and for other purposes.

S. 1956

At the request of Mr. THURMOND, the names of the Senator from Georgia [Mr. NUNN], the Senator from Colorado [Mr. HART], the Senator from Michigan [Mr. LEVIN], the Senator from Ohio [Mr. GLENN], the Senator from New Mexico [Mr. BINGAMAN], the Senator from Illinois [Mr. DIXON], the Senator from Ohio [Mr. METZENBAUM], the Senator from Wisconsin [Mr. KASTEN], the Senator from Arizona [Mr. GOLDWATER], the Senator from West Virginia [Mr. BYRD], the Senator from Tennessee [Mr. GORE], and the Senator from Alabama [Mr. DENTON] were added as cosponsors of S. 1956, a bill to amend title 5, United States Code, to authorize temporary family housing for certain dependents of deceased members of the Armed Forces; and to amend title 37, United States Code, to authorize temporary payment of an allowance for quarters for certain dependents of deceased members of the uniformed services.

At the request of Mr. WILSON, the name of the Senator from Kentucky [Mr. FORD] was added as a cosponsor of S. 1956, supra.

S. 1966

At the request of Mrs. KASSEBAUM, the name of the Senator from Hawaii [Mr. MATSUNAGA], was added as a cosponsor of S. 1966, a bill to provide for efficient and equitable use of operating rights at congested airports, and for other purposes.

SENATE JOINT RESOLUTION 112

At the request of Mr. PELL, the names of the Senator from South Carolina [Mr. HOLLINGS], and the Senator from Arkansas [Mr. BUMPERS], were added as cosponsors of Senate Joint Resolution 112, a joint resolution to authorize and request the President to call a White House Conference on Library and Information Services to be held not later than 1989, and for other purposes.

S.J. RES. 226

At the request of Mr. RIEGLE the names of the Senator from California [Mr. WILSON], the Senator from Nebraska [Mr. ZORINSKY], and the Senator from California [Mr. CRANSTON] were added as cosponsors of Senate Joint Resolution 226, a joint resolution to designate the week of April 6, 1986, through April 12, 1986, as "World Health Week" and to designate April 7, 1986, as "World Health Day."

SENATE JOINT RESOLUTION 231

At the request of Mr. RIEGLE, the name of the Senator from Illinois [Mr. DIXON], was added as a cosponsor of Senate Joint Resolution 231, a joint resolution to designate the period commencing January 1, 1986, and ending December 31, 1986, as the "Centennial Year of the Gasoline Powered Automobile".

SENATE JOINT RESOLUTION 239

At the request of Mr. DURENBERGER, the name of the Senator from West Virginia [Mr. ROCKEFELLER] was added as a cosponsor of Senate Joint Resolution 239, a joint resolution designating the week beginning on June 1, 1986, as "National Maternal and Child Health Week."

SENATE JOINT RESOLUTION 244

At the request of Mr. GORTON, his name was added as a cosponsor of Senate Joint Resolution 244, a bill to designate October 8, 1986, as "National Fire Fighters Day."

At the request of Mr. DECONCINI, the name of Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of Senate Joint Resolution 244, supra.

SENATE JOINT RESOLUTION 246

At the request of Mr. DIXON, the name of the Senator from Ohio [Mr. METZENBAUM] was added as a cosponsor of Senate Joint Resolution 246, a joint resolution to designate May 25, 1986 as "Hands Across America Day," for the purpose of helping people to help themselves, and commending United Support of Artists for Africa and all participants for their efforts toward combating domestic hunger with a 4,000 mile human chain from coast to coast.

SENATE CONCURRENT RESOLUTION 90

At the request of Mr. LAUTENBERG, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of Senate Concurrent Resolution 90, a concurrent resolution urging the President to convene a conference to develop and International Seaport Security Agreement relating to seaport and passenger vessel security among the United States, its allies, other interested nations, and the private sector.

SENATE CONCURRENT RESOLUTION 98—RELATING TO THE FORMER PRESIDENTIAL YACHT "SEQUOIA"

Mr. GARN (for Mr. SIMPSON, for himself and Mr. CRANSTON) submitted the following concurrent resolution; which was considered and agreed to:

S. CON. RES. 98

Whereas the former Presidential yacht Sequoia served eight Presidents of the United States, from Herbert Hoover to Gerald R. Ford, over a period of forty-four years;

Whereas the Sequoia was the setting for Presidential meetings, negotiations, and decisions of extraordinary significance for and effect on the history of the United States and the course of world events;

Whereas the Sequoia was disposed of in 1977 to reduce Federal expenditures;

Whereas in recognition of Sequoia's unique historical significance, the private, bipartisan, and nonprofit Presidential Yacht Trust was established in 1981 for the purpose of restoring and preserving Sequoia;

Whereas since 1981 many Americans have visited the Sequoia and demonstated support for her preservation and return to service;

Whereas in response to this support, the Presidential Yacht Trust, in consultation

with the United Sates Navy, has determined that the proper future of the Sequoia is her return to Government service in the United States Navy as the Presidential yacht; and

Whereas the Presidential Yacht Trust has taken steps to fully restore the Sequoia by November 15, 1988, to donate her to the Navy as a gift of the Presidential Yacht Trust and the American people, and to establish an endowment sufficient for her future operation and maintenance: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That Congress—

(1) recognizes the unique significance of the former Presidential yacht Sequoia which has made her a symbol of American political heritage and the office of the President:

(2) supports the plans of the Presidential Yacht Trust to donate the Sequoia, with an endowment sufficient for her operation and maintenance, to the United States Navy for service once again as the Presidential yacht.

SENATE CONCURRENT RESOLUTION 99—SUPPORTING INCREASED CULTURAL EXCHANGE BETWEEN THE UNITED STATES AND THE SOVIET UNION

Mr. DODD (for himself and Mr. STEVENS) submitted the following concurrent resolution, which was referred to the Committee on Foreign Relations:

S. CON. RES. 99

Whereas historically the arts have been recognized as a powerful expression of thoughts and feelings, a means to strenghten communication, and one of the most vital ways of understanding the human experience;

Whereas the visual arts, music, theatre, dance, and all other forms of creative expression have the ability to transcend national boundaries;

Whereas nations participating in cultural exchange gain mutual understanding which contributes to continued peaceful coexistence;

Whereas independent citizen groups across the United States have formed to promote cultural contacts between nations, particularly between the United States and the Soviet Union;

Whereas many members of the Senate and House of Representatives have joined together in a Congressional Arts Caucus to demonstrate the importance of the arts to our Nation and the other countries of the world.

Whereas since 1981 the Congressional Arts Caucus has worked to highlight America's cultural activities and the role of these activities in worldwide cooperation; and

Whereas at the recently completed Geneva Summit of November 1985, the President, also recognizing the importance of artistic activity, indicated his intention to secure an increase in cultural exchange between the United States and the Soviet Union: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress strongly supports expanded cultural exchange between the United States and the Soviet Union and pledges to work with the President in strengthening such an expanded cultural exchange which will contribute to mutual cooperation and world peace.

● Mr. DODD. Mr. President, today I am submitting a concurrent resolution supporting expanded cultural exchange between the United States and the Soviet Union. I am pleased to have my distinguished colleague from Alaska, Senator STEVENS, join me as a sponsor of this concurrent resolution.

As a member of the Foreign Relations Committee, I have spent many hours listening to experts testify on new ways to improve diplomatic relations between this country and other nations. Unfortunately, the importance of cultural exchanges among nations is not mentioned often enough. Yet historically, the arts have been proven invaluable in breaking down barriers and fostering cooperative efforts which transcend national boundaries. And such cooperative efforts can lead to the ultimate goal this Nation has pursued since the days of the Founding Fathers: Namely, world peace.

By submitting this concurrent resolution calling for increased cultural exchanges between the United States and the Soviet Union, I am following the lead of independent groups of citizens from my State of Connecticut to California. Such citizens have already taken the first steps in promoting a greater understanding here at home of the cultural heritage of the Soviet people. Likewise, students from my State of Connecticut and many other States have both studied and performed in the U.S.S.R., thereby giving Soviet citizens a better sense of American culture.

At the recent Geneva summit, the President signed an accord to increase artistic exchanges between our country and the U.S.S.R. As a member of the congressional arts caucus, I commend this formal recognition of the importance that the visual arts, music, theater, and dance can play in bringing people of different nationalities together. It is my hope that this Senate concurrent resolution being submitted today will lend further recognition of the important role of the arts in promoting continued peaceful coexistence with the Soviet Union. Identical legislation has been introduced in the House of Representatives by Congressman DOWNEY from New York and Congressman JEFFORDS from Vermont.

In closing, I urge my colleagues to support this concurrent resolution. By so doing, the Senate of the United States will put itself on record as supporting an increased cultural exchange with the Soviet Union.●

● Mr. STEVENS. Mr. President, I'm pleased to join my colleague from Connecticut in submitting this concurrent resolution of support for expanded cultural exchanges between the United States and the Soviet Union.

The exchange agreement reached at last month's summit will significantly enhance communications between our two nations in a variety of fields. In my State of Alaska, our proximity to the U.S.S.R. has meant a real overlap in the anthropological and cultural origins of our native peoples, to say nothing of Alaska's history as a Russian outpost in the 18th and 19th centuries. In addition, our shared arctic climate and the environmental conditions which flow from our existence above the Arctic Circle make Alaska and Siberia one in the challenges posed to us by our geography.

In years past, Alaska Airlines flew direct from Anchorage to Moscow, and the residents of the Bering Sea region had opportunities to visit their Siberian relatives. We have so much in common, so much to share both culturally and scientifically, that this resumption of exchanges between our two countries merits the strongest of congressional support.

Last week, Armand Hammer was in Moscow, meeting with the Cultural Minister and successfully finalizing a bilateral exhibition of masterworks from the Leningrad Hermitage, the National Gallery, Armand Hammer's personal collection, and the Pushkin museum in Moscow. This agreement is the first negotiated under the accord signed at the Geneva summit, and exemplifies what we can hope for in the future, in both the visual and performing arts.

The concurrent resolution we are submitting today is not just a resolution of support, but a resolution of welcome as well. Welcome to the millions of Soviet citizens who, through this sharing of our cultural resources, will be joining their American counterparts in mutual appreciation and increased understanding of our respective nations' cultural heritage.●

SENATE RESOLUTION 278—RELATING TO FUNDING FOR THE OFFICE OF JUVENILE JUSTICE AND DELINQUENCY PREVENTION

Mr. SPECTER (for himself, Mr. LAUTENBERG, Mr. CRANSTON, Mr. SIMON, and Mr. MCCONNELL) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 278

Resolved, That the Senate hereby disapproves the current informal freeze, in the absence of a formal rescission request, on funds of the Office of Juvenile Justice and Delinquency Prevention.

Mr. SPECTER. Mr. President, I submit today a resolution in response to a very disturbing situation which has arisen within the Department of Justice regarding the freezing of funds for the Office of Juvenile Justice and Delinquency Prevention [OJJDP].

It has come to my attention that the Office of Management and Budget has

informally recommended to the Department of Justice the rescission of all fiscal year 1986 appropriations for the Bureau of Justice Assistance [BJA] and OJJDP. The Justice Department sought a reconsideration of the proposed rescission of appropriations for BJA. The Department did not, however, seek to avoid the rescission request as to OJJDP funds.

I have been deluged by calls from organizations which currently receive OJJDP grants, and have learned that all OJJDP funds, including their grant moneys now due, have been frozen pending the resolution of the rescission request. This action will halt extremely important studies on juvenile delinquency, which OJJDP has been funding.

The administration has ordered OJJDP not to spend any of its funds until the rescission issue is resolved, notwithstanding that Congress has not yet received a formal notice of a proposed deferral or rescission of OJJDP funds pursuant to the Impoundment Control Act of 1974. A formal rescission notice from the Administration is not expected to be received by Congress until the end of January 1986, at which time the 45-day time period begins for congressional action.

Mr. President, a delay of over 2 months in Federal funding will impose undue hardship on existing and proposed juvenile justice programs nationwide.

This informal freeze, which also includes unspent fiscal year 1985 funds, plainly violates the Impoundment Control Act of 1974. Moreover, it is a slap in the face to Congress, which repeatedly has rejected every single attempt by the administration to limit or eliminate the funding of OJJDP.

On October 29, 1981, the administration formally proposed deferral of OJJDP funds. In response, on December 15, 1981, the Senate passed Senate Resolution 260, which I introduced, expressing its disapproval of the deferral request.

Each year since 1983, the administration has requested zero funding for OJJDP, and each year Congress has provided level funding of $70 million. In the face of continued administration attempts to eliminate funding for this important office, the Congress in 1984 reauthorized OJJDP for an additional 5 years.

Because Congress has repeatedly rejected the proposed eliminations of OJJDP and continued to fund the Office at this level, an effort has been made to eliminate the Office's functions de facto, by having it not spend the appropriated funds. Earlier this year, the administration requested reprogramming of $12.2 million in unspent fiscal year 1984 juvenile justice funds for other purposes. The Senate Committee on Appropriations adopted, and the full Senate passed, an amendment to the fiscal year 1985 supplemental appropriations bill which rejected this subterfuge and directed that these funds be preserved for OJJDP. Conference report language specifically directed that these funds be allocated to the States within the parameters of the law.

Finally, last month the Senate was notified that the Administrator of OJJDP had failed to spend $13.665 million in appropriated funds. Only a few days ago, Congress again appropriated $70 million for fiscal year 1986 and, in the conference report, directed OJJDP to spend the fiscal year 1985 carryover funds in fiscal year 1986, spend the fiscal year 1986 appropriation in fiscal year 1986, and submit to Congress quarterly reports regarding obligations and expenditures for the previous quarter and proposed obligations and expenditures for the forthcoming quarter.

Against this backdrop, the current Justice Department freeze of OJJDP funds can only be considered a direct and clear violation of the directive of the Congress. It would be a travesty for the Administrator's first quarterly report to Congress, due on January 1, 1986, to reflect zero expenditures.

The Department's informal policy to freeze OJJDP funds already has disrupted many vital juvenile justice programs nationwide. A very serious situation has been created by this freeze and anticipated rescission request: numerous juvenile justice projects nationwide are likely to cease even if there is only a slight delay in the receipt of Federal funds.

As chairman of the Senate Juvenile Justice Subcommittee and cochairman of the Senate Children's Caucus, I have held numerous oversight hearings on OJJDP, and the proceedings repeatedly have highlighted the importance of preserving this Office. The testimony presented at subcommittee hearings illustrates the compelling need for the Federal Government to do more, no less, to address the problems facing young Americans today. Continued operation of OJJDP consistent with congressional intent is an important step toward this goal.

There are thousands of people who administer, need, and benefit from juvenile justice programs nationwide. Funding of these programs is desperately needed. Approval of this resolution by the Senate before it goes out of session will help insure the continuation of this important juvenile justice and delinquency program.

I have written to Attorney General Edwin Meese and Office of Management and Budget Director James Miller to express my extreme concern regarding the freeze and anticipated rescission proposal of OJJDP funds. I now urge my colleagues to support this resolution to avert the impending crisis in juvenile justice funding.

Mr. President, I ask that letters from various juvenile justice groups to Attorney General Edwin Meese be printed in the RECORD.

There being objection, the letters were ordered to be printed in the RECORD, as follows:

NATIONAL COALITION OF STATE
JUVENILE JUSTICE ADVISORY GROUPS,
Cape Elizabeth, ME, December 18, 1985.

Hon. EDWIN MEESE,
Attorney General, Department of Justice, Washington, DC.

DEAR MR. ATTORNEY GENERAL: On behalf of the National Coalition of State Juvenile Justice Advisory Groups, I am compelled to convey my grave concern and deepest disappointment at the action of the Administration in regard to the proposed budget which recommends deletion of fiscal year 1986 funds for Juvenile Justice. It is unquestionable that this action flies in the face of repeated expressions of Congress that the Juvenile Justice Program be continued.

Upon notice that this proposal would be submitted, the Office of Juvenile Justice and Delinquency Prevention placed a "hold" on all unobligated fiscal year 1985 funds and all fiscal year 1986 funds. Such an action, particularly in regard to fiscal year 1986 appropriations, will place the states in an extremely difficult position. As you know, the fiscal year began October 1, 1985, and the funds in question are desperately needed by states to continue programs and operations. Because the funding cycle for some state programs begins in the first part of the current year, some state programs find themselves in serious jeopardy. Without the fiscal year 1986 funds, many programs designed and developed to cover any period of time will be terminated without any ability to permit assumption of their costs by state and local governments. Many discretionary programs, moreover, are subject to immediate termination. In addition, most states cannot insure the integrity of Federal funds already in the cycles, absent the Administration funds provided by the Act. It appears to me outrageous not only that many important programs may be terminated, but that this action also jeopardizes the ability of the states to provide accountability for current Federal program funds.

This action is strongly reminiscent of the actions of former President Nixon when he impounded funds appropriated by the Congress. Congress's response at that time was to pass the Budget Impoundment and Control Act. I sincerely, hope that you will reconsider this similar highhanded attempt to subvert the will of Congress.

Very truly yours,

A.L. CARLISLE,
Chair, National Coalition.

THE NATIONAL PTA,
Chicago, Ill., December 18, 1985.

Hon. EDWIN MEESE III,
Attorney General, U.S. Department of Justice, Washington, DC.

DEAR ATTORNEY GENERAL MEESE: I am writing on behalf of the 5.6 million members of the National Congress of Parents and Teachers (National PTA) in regard to funding of the Office of Juvenile Justice and Delinquency Prevention. The National PTA is outraged to learn that a rescission has been proposed for this vital program

and that all OJJDP monies have been impounded. It is our understanding also, that the Department of Justice did not appeal this rescission.

The National PTA, urgently requests that the Department of Justice immediately appeal this rescission and release for obligation all monies appropriated for OJJDP by the Congress. Inaction on the part of the Department in this regard would bring to a halt juvenile justice programs in the States and local communities throughout the country, thus threatening the well being of our youth and our communities. Such an outcome would be a total contradiction of the national resolve that juvenile justice and delinquency prevention is a federal priority. Congress passed and, last week, President Reagan signed into law the FY 1986 appropriations for the Department of Justice, including level funding of the OJJDP.

The Office of Juvenile Justice provides the national leadership, the incentives, and the seed money that is absolutely necessary for states to implement programs that will accomplish the goals of the Juvenile Justice and Delinquency Act. The National PTA appeals to you to ensure that the historic federal leadership role in juvenile justice is maintained by appealing the OMB rescission and allowing OJJDP to continue its important responsibilities to our nation.

Sincerely,

MILLIE WATERMAN,
Vice President for Legislative Activity.

DECEMBER 18, 1985.

Hon. EDWIN MEESE III,
Attorney General, U.S. Department of Justice, Washington, DC.

DEAR MR. ATTORNEY GENERAL: As Co-Chairmen of the Ad Hoc Coalition for Juvenile Justice and Delinquency Prevention, we are writing to express our strong opposition to the recent "freeze" placed on funding of the Office of Juvenile Justice and Deliquency Prevention (OJJDP). We respectfully urge you to reverse this decision.

The Ad Hoc Coalition for Juvenile Justice, comprised of more than 40 national youth services organizations, has been a strong supporter of the Juvenile Justice and Deliquency Prevention Act. We are especially concerned of the effects which this freeze will have on efforts supported under the Act's formula grants to states provision.

Our purpose in writing at this time is not to argue the cost-effectiveness or success of the federal juvenile justice program. We will be making such a case to you at the appropriate time.

We are requesting, however, that you immediately lift the current freeze on OJJDP funds so that the legal mandates of the Act can be carried out. The intent of Congress, as recently as the December 4th action on OJJDP appropriations, is quite clear. The statuatory mandates and enacted appropriations measures are to be carried out.

As our nation leading law enforcement official, we are confident that you are committed to carrying out the law of the land, in this case, the JJDP Act as signed by the President. This current freeze clearly violates the letter and spirit of the law.

Again, we urge the immediate lifting of the freeze. We welcome the opportunity to meet with you and your staff to discuss ways that the Act can better protect the youths and communities that all of us are committed to protecting.

Sincerely,

SHARON MARTIN,
Co-Chair, The Ad Hoc Coalition, YMCA of the USA.
DONALD W. MATHIS,
Co-Chair, The Ad Hoc Coalition, National Network of Runaway and Youth Services.

NATIONAL FUND FOR RUNAWAY CHILDREN, THE NATIONAL NETWORK OF RUNAWAY AND YOUTH SERVICES, INC.
Washington, DC., December 18, 1985.

Hon. EDWIN MEESE III,
Attorney General, U.S. Department of Justice, Washington, DC.

DEAR ATTORNEY GENERAL MEESE: The National Network of Runaway and Youth Services, comprised of more than 1,200 member agencies across America, is writing to you to oppose the recent freeze on funds which has been placed on programs administered by the Office of Juvenile Justice and Delinquency Prevention (OJJDP). This highly-arbitrary and unsound decision is creating immediate havoc with state and local, public and private juvenile justice programs.

This freeze, which has not even been formally submitted to the Congress as a rescission, is puzzling at best. Given the appropriations cut time line of March 1st by Gramm/Rudman, a freeze at this time places extreme and unanticipated hardship on programs including law enforcement, judges, probation, and a myriad of youth services agencies. This freeze is bad policy and should be lifted immediately.

As you well know, Congress has passed and President Reagan has signed both the reauthorization and appropriation legislation which provide for the Juvenile Justice and Delinquency Prevention Act. I strongly urge you to fulfill these statutory mandates and immediately lift the freeze on OJJDP. Thank you for your consideration of the National Network's position opposing the OJJDP freeze.

Sincerely,

JUNE BUCY,
Executive Director.

● Mr. McCONNELL. Mr. President, I join in the resolution of the Senator from Pennsylvania, and urge my colleagues to support it as well. In my judgment, the attempt by the administration to rescind the 1986 funding for the Office of Juvenile Justice and Delinquency Prevention should be soundly rejected. Similar attempts have been made in the past, and each has been disapproved.

Mr. President, last summer the members of the Subcommittee on Juvenile Justice, under the able leadership of Senator SPECTER, advised OJJDP that it was the unanimous judgment of the subcommittee members that all unspent funds from fiscal year 1985 appropriations for that office should be spent, as directed by the act. In a letter dated November 21, 1985, we advised the distinguished acting chairman of the subcommittee on Commerce, justice, State, and Judiciary that we believed that all funds for OJJDP should be retained by the Senate conferees. In that letter, we noted as follows:

As you know, the conference report prepared by the Committee on Appropriations to accompany H.R. 2965, the Department of Commerce, Justice, and State, the Judiciary, and related agencies appropriation bill for fiscal year 1986, would provide for new appropriations to the Office of Juvenile Justice and Delinquency Prevention of only $62,100,000. This amount would be combined with some $7,900,000 in unobligated balances of funds previously appropriated to that office. In this way, the Administration seeks to provide a total appropriation for OJJDP of $70,000,000 for fiscal year 1986.

While this is characterized by the Administration as level funding for OJJDP, we see it as a cut of nearly $8,000,000 in the level of appropriations from the previous year, a significant and unwarranted cut in the funding for this important office.

When the Appropriations Committee's report on this bill goes to conference with the House, we respectfully request that you advise the Senate conferees that the Senate should concur with the House provision of the bill, providing for funding of the Office for fiscal year 1986 at the same level as 1985 and appropriate $70,000,000. In addition, we would ask that you advise the Senate conferees that it is the Subcommittee's belief that the $7,900,000 of funds previously appropriated and now available in unobligated balance should be redirected to the states, as currently provided for in the Senate report.

Mr. President, those letters represent the unanimous judgment of the members of the Juvenile Justice Subcommittee that the programs funded by OJJDP are vitally important, and are deserving of full funding. Happily, the members of this body have uniformally agreed with that assessment.

Nevertheless, now the Office of Management and Budget has informally recommended to the Department of Justice the rescission of all fiscal year 1986 appropriations for the Bureau of Justice Assistance [BJA], OJJDP, and other programs. The Justice Department sought a reconsideration of the proposed rescission of appropriations for BJA. The Department did not, however, seek to avoid the rescission request as to OJJDP funds. As a result, the administration has ordered OJJDP not to spend any of its funds until the rescission issue is resolved, notwithstanding that Congress has not yet received a formal notice of a proposed deferral or rescission of OJJDP funds pursuant to the Impoundment Control Act of 1974. A formal rescission notice from the administration is not expected to be received by Congress until the end of January 1986, at which time the 45-day time period begins for congressional action.

Consequently, a variety of important programs nationwide stand to be disrupted, notwithstanding the clear congressional intent.

Mr. President, I understand the administration's position on funding for OJJDP, and while I support the ad-

ministration whenever possible, on this issue I disagree most stridently. These programs are necessary, these funds are appropriate, and this resolution is a good one. I urge my colleagues to help defeat this latest attempt to delete these funds for children and adolescents who are in need.

SENATE RESOLUTION 279—RELATING TO THE TRANSFER OF U.S. TERRITORY IN THE ARCTIC OCEAN

Mr. HELMS (for himself, Mr. HECHT, Mr. EAST, and Mr. DENTON) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 279

Whereas Wrangell Island became a part of the United States by right of confirmed discovery during the voyage of Captain Thomas Long, a citizen of the United States, of the barque *Nile* in 1867 and by right of first possession formalized during the voyage of Captain Calvin L. Hooper of the U.S. Revenue Marine steamer *Corwin* in 1881;

Whereas the Senate had printed a "Report of the U.S. Revenue Steamer *Thomas Corwin*, in the Arctic Ocean," as Ex. Doc. No. 204 in the 1st Session of the 48th Congress;

Whereas the House of Representatives had printed reports on the cruise of the United States Revenue Marine steamer *Corwin* in Alaska and the Northwest Arctic Ocean in the 2d Session of the 47th Congress, in the 1st Session of the 49th Congress, and in the 1st Session of the 50th Congress;

Whereas the Senate and House of Representatives of the United States of America approved on March 18, 1878 an Act in aid of a Polar expedition designed by James Gordon Bennett, a citizen of the United States, which authorized the Secretary of the Treasury to issue an American register to the vessel *Jeannette*, purchased in Great Britain;

Whereas the Senate and House of Representatives of the United States of America approved on February 27, 1879 an Act authorizing the Secretary of the Navy to accept and take charge of the ship *Jeannette* for the use of a North Polar Expedition;

Whereas Jeannette Island was discovered on May 16, 1881 and formally taken possession of on June 3, 1881 during the voyage of U.S. Navy Commander George Washington De Long on the *Jeannette;*

Whereas Henrietta Island was discovered on May 24, 1881 and formally taken possession of on June 3, 1881 during the voyage of U.S. Navy Commander George Washington De Long on the *Jeannette;*

Whereas Bennett Island was discovered on July 11, 1881 and formally taken possession of on July 29, 1881 during the voyage of U.S. Navy Commander George Washington De Long on the *Jeannette;*

Whereas Wrangell, Herald, Jeannette, Henrietta, and Bennett islands were surveyed by the United States Navy for the United States Coast and Geodetic Survey in 1881;

Whereas the United States Coast and Geodetic Survey placed Wrangell, Herald, Jeannette, Henrietta, and Bennett islands in the District of Alaska;

Whereas beginning in 1900 the United States Geological Survey included Wrangell, Herald, Jeannette, Henrietta, and Bennett islands as part of the District, later Territory, and State of Alaska; and

Whereas unlike the governments of Canada and Great Britain, the Government of the United States has never surrendered its sovereignty over these islands; Now, therefore, be it

Resolved, That (a) it is the sense of the Senate that under the United States in any territory, outercontinental shelf, exclusive economic zone, or fishery conservation zone, including the territory described in subsection (b), may only be transferred to any other country—

(1) by treaty, in accordance with Article II, section 2, clause 2 of the United States Constitution which states that "[the President] shall have Power, by and with the Advice and Consent of the Senate, to make Treaties, provided two-thirds of the Senators present concur;"; and

(2) by enactment of Congress in accordance with Article IV, section 3, clause 2 of the United States Constitution which states that "[t]he Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States.".

(b) The territory referred to in subsection (a) includes the islands of Wrangell, Herald, Bennett, Henrietta, and Jeannett which are located in the Arctic Ocean and the outer continental shelf of, and the exclusive economic zone surrounding, those islands.

Mr. HELMS. Mr. President, I am deeply concerned that the Department of State is endeavoring to turn over to the Soviet Union five U.S. islands in the Arctic Ocean. These islands are: Wrangell Island, Herald Island, Jeannette Island, Henrietta Island, and Bennett Island.

There is far more at stake here than the ownership of five small islands covered with ice and snow. What is at stake is how, under the rules of international law, the United States will define its Outer Continental Shelf. If we surrender these islands we will be surrendering an area that amounts to almost half of our entire Outer Continental Shelf.

Moreover, these islands lie in the Arctic between the Soviet Union and the North Pole. If we surrender the islands to Soviet sovereignty we may well be surrendering control of the Arctic Ocean to Soviet nuclear submarines.

The State Department refers to this problem as a boundary dispute involving the 1867 Convention Line established with the purchase of Alaska. It is true that there are substantive issues involving the 1867 Convention Line in the Navarin Basin, south of the Bering Strait. These are questions which ought to be carefully studied, both by the administration and by the Senate.

But the islands are all north of the Bering Strait, in the Arctic Ocean, and deserve to be a focus of separate attention. A glance at the map will show that this is hardly a "boundary dispute," a term which might imply drawing a line a hundred miles one way or another. This is a major issue, substantively different from the Navarin Basin problem, which could determine control of the Arctic Ocean for generations to come.

These islands are U.S. territory and property. They were discovered by U.S. citizens and taken possession of on behalf of the United States. The United States has asserted sovereignty over them. The U.S. Congress has acted upon them as our territory and property. Therefore, it is clear that, under the Constitution, they cannot be alienated by the State Department, without the express consent of both Houses of the U.S. Congress.

The resolution which I am submitting today expresses the sense of Congress that the provisions of the Constitution with regard to the disposition of U.S. territory and property be complied with fully. I hope that the Committee on Foreign Relations will schedule hearings on this resolution at an early date next year, so that all aspects of the issue can be considered. Incredibly, there have never been hearings on this issue; yet the State Department has been blithely proceeding as though this were just a minor issue.

The resolution that I am offering today is simple and to the point. It states that it is the sense of the Senate that under the U.S. Constitution any right, title, or interest of the United States in any territory, Outer Continental Shelf, exclusive economic zone or fishery conservation zone may only be transferred to another country by treaty, within the meaning of article II, section 2, clause 2 of the U.S. Constitution, and by enactment of Congress in accordance with article IV, section 3, clause 2 of the U.S. Constitution.

Mr. President, the President has the power to make treaties, by and with the advice and consent of the Senate, provided two-thirds of the Senators concur. There is no dispute over the President's power to make treaties. All we are saying in this resolution is that this matter is a matter which should be handled by treaty. It is not a matter to be considered as a technical issue settled by an Executive order.

Mr. President, the treatymaking power does not stand alone. Where U.S. territory and property is concerned, there are further requirements. Our Constitution in article IV, section 3, clause 2 states clearly that, "(t)he Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States." Nowhere, does our Constitution state that the Department of State has the power to hand over U.S. territory to a foreign power

by means of an Executive agreement or other similar instrument.

The historical facts about United States sovereignty over thise islands are clear. Unfortunately, the Department of State has been spreading all manner of disinformation concerning these islands not only to Members of Congress but also to the public at large.

In a letter to me earlier this year, the State Department referred to this matter as "a maritime boundary" issue. It stated that "all of these islands are claimed by the U.S.S.R." The State Department went on to say that "It has been alleged that the United States has claimed sovereignty over the five islands"—it is noteworthy that the State Department states the Soviet claim as an accepted fact, whereas it asserts that "after extensive research, the Department of State has not found any evidence that the Government of the United States has ever formally asserted a claim to any of these islands."

That statement is totally false. In fact, one of my illustrious predecessors representing North Carolina in the Senate, Senator Robert R. Reynolds, dealt with this matter extensively in 1940. The State Department simply has not bothered to look into the historical record. I have spent some months researching that record, including diaries of the period—newspaper accounts of the discovery period—including previously overlooked accounts in Honolulu newspapers of the last century—the U.S. Geological Survey, the CONGRESSIONAL RECORD, and other official documents of record.

So let us be clear about the historical record.

Wrangell Island was discovered during the voyage of Captain Thomas Long, a citizen of the United States, aboard the barque *Nile* in 1867. A new account of this confirmed discovery appeared in the "Pacific Commercial Advertiser" published in Honolulu on November 9, 1867.

First possession of Wrangell Island was formalized during the voyage of Capt. Calvin L. Hooper of the U.S. revenue marine steamer *Corwin* in 1881. Information about this voyage was printed in Senate Executive Document Number 204 in the first session of the 48th Congress. The title of this report is, "Report of the U.S. Revenue Marine Steamer Thomas Corwin, in the Arctic Ocean." The House of Representatives also printed reports about this voyage during the second session of the 47th Congress; during the first session of the 49th Congress; and during the first session of the 50th Congress.

Mr. President, on March 25, 1922, the distinguished Senator Joseph T. Robinson placed a letter in the RECORD written to him by the Captain Commandant of the U.S. Coast Guard, W.E. Reynolds. In his letter, Commandant Reynolds notes that he was a junior officer aboard the *Corwin* and was the officer assigned to carry our flag during the landing on Wrangell Island on August 12, 1881. In the letter he states, and I quote, "The captain and I landed together, being the first to get ashore. I had the flag, and with the captain's permission waved it and took possession of the new land in the name of liberty and of the Government of the United States of America."

Mr. President, the words of Captain Reynolds of the U.S. Coast Guard are certainly crystal clear with respect to taking formal possession of Wrangell Island.

Senators should also take note of the following entry in the log book of Captain Hooper, and I quote:

Friday, August 12, 1881. Lat. 71-04 Long. 177-40 off Wrangle Land. Got under way at 4:00 a.m. After a good deal of bumping and squeezing we reached the land and anchored in a small clear space off the mouth of a small river. Went on shore and took possession in the name of the U.S.

This quotation is contained in a study entitled, "The Discovery of Wrangel Island" by Samuel L. Hooper. It was published by the California Academy of Sciences as Occasional Paper No. XXIV, in San Francisco in 1956.

Prof. John Muir, a member of this expedition, wrote in his book that, and I quote, "A notable addition was made to the national domain when Captain Calvin L. Hooper landed on Wrangell Land and took formal possession in the name of the United States." John Muir, one of our Nation's most famous naturalists, was the founder of the Sierra Club.

The famed arctic explorer Vilhjalmar Steffansson in his book, "The Adventure of Wrangel Island" describing an expedition undertaken in 1921, wrote that, and I quote, "* * * following 1881 * * * the island was United States territory."

The Soviets have, in the past, claimed that a Russian Lieutenant Wrangel discovered the island. This assertion is groundless according to the lieutenant's own memoirs. Wrangel himself wrote in his work, "The Narrative of a Voyage to the Polar Seas in the Years 1821, 1822, and 1823" that, and I quote, "* * * with a painful feeling of the impossibility of overcoming the obstacles with which nature had opposed us, our last hope vanished of discovering the land which we yet believed to exist * * * we had done what duty and honor demanded, further attempts would have been absolutely hopeless and I decided to return."

Mr. President, the matter of Wrangell Island was before the Senate and the House of Representatives in 1939 and 1940. With the gathering storm of World War II about to engulf our Nation, Members of the Senate and the House became concerned about our Pacific air routes. A bill was offered in the House by Congressman Maas authorizing and directing the Secretary of the Navy to construct a naval air station on Wrangell Island. The bill, H.R. 4286, was introduced on February 17, 1939, and referred to the Committee on Naval Affairs. The State Department influenced the committee to take no action on the bill.

Mr. President, a similar bill was introduced in the Senate by a distinguished predecessor of mine from the State of North Carolina, Senator Robert R. Reynolds. While no action was taken on the bill, in the following year, Senator Reynolds introduced a resolution and articles relative to ownership of Wrangell Island.

Mr. President, so that our colleagues may have Senator Reynold's resolution and statement for immediate reference, I ask unanimous consent that the statement of Senator Reynolds of Monday, April 8, 1940, be printed in the RECORD at the conclusion of my remarks as exhibit 1.

Mr. President, I ask unanimous consent that a scholarly article entitled, "The Right of American Sovereignty over Wrangell Island," by Mr. David Nolan and Mr. Mark Seidenberg which appeared in the Canadian historical journal published by the University of Saskatchewan, "Musk Ox," be printed in the RECORD at the conclusion of my remarks as exhibit 2.

On March 18, 1878, the Senate and the House of Representatives approved an act in aid of a polar expedition designed by James Gordon Bennett, a U.S. citizen which authorized the Secretary of the Treasury to issue an American register to the vessel *Jeannettee* which had been purchased in Great Britain.

On February 27, 1879, the Senate and the House of Representatives approved an act authorizing the Secretary of the Navy to accept and to take charge of the ship *Jeannette* for the purpose of a north polar expedition.

Jeannette Island was discovered on May 16, 1881, and formally taken possession of on June 3, 1881, during the congressionally authorized voyage of U.S. Navy Commander George Washington De Long on the *Jeannette.*

Henrietta Island was discovered on May 24, 1881, and formally taken possession of on June 3, 1881, during this same voyage.

Bennett Island was discovered on July 11, 1881, and formally taken possession of on July 29, 1881, during this same voyage.

Mr. President, there is ample published historical material to verify these facts about the three De Long Islands. For example, Houghton Miff-

lin Co. published a two volume work in 1883 entitled, "The Voyage of the *Jeannette*, The Ship and Ice Journals of George W. De Long." These were edited by his wife, Emma De Long. There is also an extensive collection of clippings and other information about this voyage at the Naval Academy in Annapolis.

Mr. President, I ask unanimous consent that excerpts from Captain De Long's journals relating to Henrietta, Jeannette, and Bennett islands be printed in the RECORD at the end of my remarks as exhibit 3.

Mr. President, I ask unanimous consent that the appropriate citations on these five islands from the bulletin of the U.S. Geologic Survey, No. 187, entitled "Geographic Dictionary of Alaska," written by Marcus Baker, the Secretary of the U.S. Geologic Survey, and published in 1902 be printed in the RECORD at the conclusion of my remarks as exhibit 4.

Senators should note that this "Geographic Dictionary of Alaska" was reprinted in a second edition in 1906 by the U.S. Geological Survey. The same citations to these five islands appear in this edition.

Mr. President, in 1930, the U.S. Geological Survey published its bulletin 817 which was entitled, "Boundaries, Areas, Geographic Centers and Altitudes of the United States and the Several States." This publication was written by Mr. Edward M. Douglas and was a revision and enlargement of the 1923 edition. In the chapter entitled, "Additions to the territory of the United States," Wrangell, Bennett, Henrietta, and Jeannette islands are described. Mysteriously and without explanation, or perhaps owing to the influence of the Department of State, these references were deleted from the 1966 and the 1976 edition of this work which were edited by Mr. Franklin van Zandt. According to information reaching my office, Mr. van Zandt had submitted his manuscript for the 1966 edition to the State Department and was told by the State Department to delete the reference to Wrangell, Bennett, Henrietta, and Jeannette islands.

Mr. President, I ask unanimous consent that the appropriate citations to these islands in the 1930 edition of this bulletin be printed in the RECORD at the end of my remarks as exhibit 5.

The giveaway of these five islands to the masters of the Kremlin is not some obscure action. In fact, back in North Carolina, folks are concerned about this situation as are other citizens around the country judging by the mail that I have received on the issue.

Mr. President, I ask unanimous consent that an excellent article entitled "U.S. Considering Relinquishing Control of Alaskan Islands" which appeared in the Laurinburg Exchange of Laurinburg, NC, on June 5, 1985 be printed in the RECORD at the conclusion of my remarks as exhibit 6.

Mr. President, facts are facts. These five islands are U.S. territory. If the Department of State is endeavoring to give away these islands to the Soviet Union, including the related Outer Continental Shelf areas and economic zone areas, then it is the duty of the Congress to adhere to the Constitution in terms of how territory may be transferred.

Mr. President, this resolution simply expresses the sense of the Senate that the Constitution must be observed in cases where our territory is to be transferred. The resolution outlines the historical facts which I described earlier in order that an accurate description of the sovereign rights of the United States of America over these five islands be presented.

There being no objection, the exhibits were ordered to be printed in the RECORD, as follows:

EXHIBIT 1

[Extension of Remarks of Hon. Robert R. Reynolds of North Carolina in the Senate of the United States, April 8, 1940]

RESOLUTION AND ARTICLES RELATIVE TO OWNERSHIP

Mr. REYNOLDS. Mr. President, under the permission granted me during the course of my remarks, I ask to have printed in the Appendix of the RECORD the resolution (S. Res. 253) to which I referred; a statement which I have prepeared with respect to Wrangell Island; an article from the Washington Post of February 26, 1939; and an article entitled "War of Propaganda May Be Already Won."

There being no objection, the matters referred to were ordered to be printed in the RECORD, as follows:

SENATE RESOLUTION 253

Resolved, That the Secretary of State is requested to make a report to the Senate at the earliest practicable date with respect to whether or not the United States has a valid claim to sovereignty over Wrangell Island.

STATEMENT BY HON. ROBERT R. REYNOLDS OF NORTH CAROLINA

Wrangell Island is, roughly, the size and shape of Jamaica, 80 miles long and 35 miles wide. It is rugged rather than rocky with a maximum elevation of about 2,000 feet. So far as we know, there is no permanent ice or snow, with the snows of winter disappearing completely in summer. The minimum temperature in winter is only a little lower than that of Montreal, about the same as that of Winnipeg, and not nearly so low as that of some of the Russian cities. Because the island is small and surrounded by a small ocean, the warmest summers will not be far different from the month of May throughout some of the northwest sections of Canada and some of the northeast sections of the United States. Essentially it is a prairie land—no trees, and only small bushes. The beach is abundantly supplied with driftwood for fuel and for the building of log houses. It is probably the greatest polar bear country in the world. But bearskins have at present a small commercial value. There are no locations better for the trapping of white and blue foxes, and there are considerable quantities of the remains of the prehistoric elephants—mammoths of that fossil monster may be of some importance. It is an excellent station for the walrus and hair-seal industry. Nothing is known about the presence or absence of minerals. Great herds of reindeer are owned by natives and whites in Alaska and suitable breeding stock could be purchased at reasonable cost and landed in Wrangell Island.

Probably Wrangell Island could support some ten to twenty thousand herd equally in value to double that numbers of sheep.

Although the commercial value of Wrangell Island is small, it is not negligible. As a matter of fact I should not have been in the least interested in this island, however, but for my belief that within 25 years from now the Polar Ocean will be one of the chief theaters of air commerce. It is true that we of the United States have plenty of rich land to develop, both at home and in our Territories, particularly in Alaska, and in speaking of Alaska, may I say that I believe that we have come to need badly a supply station under our own flag somewhere on the northern frontier of Asia such as Wrangell Island, for remember that Asia, Russian territory, is located within a stone's throw of our American Territory of Alaska. Fact is, the Little Diamede Island, which we acquired from Russia together with Alaska and Pribilof in the Aleutian Islands for a consideration of $7,200,000, is only about one-half mile from the Big Diamede Island which belongs to Russia itself.

Every other island on this vast northern frontier of Asia is clearly the property of some other nation, either by discovery or by occupation, but I believe that this one spot, Wrangell Island, is clearly ours and the longer that we let it go and remain in the hands of Russia, as of now, the more difficult will be our chance of obtaining our legal rights.

From a purely commercial standpoint as of now, the island would not be worth anything to us, but as I have heretofore stated, within 25 years from now it would be a very valuable spot, so my chief design, that what I have said and done, shall rest entirely on the grounds of public interest and public spirit.

If one looks at the Polar Ocean on a globe, which is the only way of correctly realizing the situation, you will note that Wrangell Island lies straight across from New York and is almost directly in line between the metropolis of New York and Manila, the capital of the Philippine Commonwealth. Even though it is not strategically the most important island on the northern coast of Siberia, it is the only island to which the United States Government has a claim on that vast frontier.

A couple of years ago when I was in Alaska and at which time I visited Point Barrow, the northernmost point in the Western Hemisphere, as well as Deering, Wainwright, Nome, and Siberian waters, friends of mine there and others whom I have met from time to time and place to place who were familiar with Siberia, impressed upon me how the Japanese were penetrating northward into that great country. And, as a matter of fact, several years ago while in Russia I understood that the Soviet Government was encouraging the immigration of its nationals from the congested cities such as Odessa, Leningrad, and Moscow to Siberia and its northeastern portions on the mainland in the neighborhood of Wrangell Island.

At the present time I am informed that a number of Chuckhees, Russian nationals, are occupying the island as a result of our

nationals having been forcibly taken from the island a number of years ago, concerning which incident I shall return to shortly. We have never asked submission of the question to some form of international court, in which case their occupation, coupled with our neglect, could have established ownership, so in this bill I am merely asking that our State Department inquire into the question of whether or not the United States has a valid claim to sovereignty over this island.

It is my information that in September of 1921 several Britishers, together with a small party of Eskimos, landed on Wrangell Island, where they raised the British flag, which they claimed was the third time that the British flag had been placed upon the soil of Wrangell Island. At that time there were some press stories in the United States to the effect that our Government had protested against Britain's occupation of this island, but as to whether or not these statements are authentic I have not been informed. At that time, however, it is my understanding that the Soviet Government of Russia did protest. This protest contained three reasons on account of which Wrangell Island was said to be Russian.

The first reason was discovery of the island by Baron Wrangell a little more than a hundred years ago. Close students of the baron's journey at the time that he was supposed to have discovered Wrangell Island will reveal that he was never anywhere near it. And in addition to that he states in his description definitely that he failed to discover land. Confirmation of this can be obtained easily.

The second Russian claims are on the basis of a landing between the years 1910 and 1915. As a matter of fact, any nation could have claimed Wrangell Island on the basis of a landing in 1910, 1915, or 1921, the latter of which was claimed by the British.

Thirdly, the Russians advance the claim that Wrangell Island is Russian by reason of its immediate proximity to Siberia. The distance from Siberia is about 100 miles, and as to this claim for ownership through proximity might possibly be agreed upon by some future international convention, but it certainly has not been agreed upon in the past.

In the year 1880 or 1881 the New York Herald fitted out a Polar expedition under the command of Lieutenant De Long, an officer on leave of absence from the United States Navy. This was the famous and tragic *Jeannette* expedition, so called after the ship which De Long took north through the Pacific and through the Bering Straits proceeding into the ice which he met northwest of Alaska, firm in the belief that just beyond were the shores of a great continent. Shortly thereafter, while the *Jeannette* expedition was found in the ices of the great Polar region, the American flag was planted on Wrangell Island either by a member of his expedition or by one of the crew of an expedition that went in search of the members of the *Jeannette* expedition.

I claim that Wrangell Island is originally the property of the United States through right of discovery, but it is a principle of international law that claims arising out of the discovery must be followed up within any reasonable time by exploration or occupancy or else it lapses into the territory of a no-man's land.

The British claim some sort of title as of 1854, by way of discovery or otherwise, and the Russians claim title for the same or similar reasons; but, after all, it is not disputed that the American flag was placed on Wrangell Island in 1881 or 1882, and it was actually occupied by the nationals of the United States when the Russian nationals, forcibly and against their will, removed the nationals of the United States from the island to Siberia, and I understand that since then the Russians have occupied the island.

I think it is pretty well conceded—at least, there is no information to the effect—that any human being ever landed on Wrangell Island before the Americans did in 1881, and we know pretty definitely that no landing was made upon the island thereafter for many, many years.

Those who claim to have a knowledge of aerial navigation say that conditions on the whole there are better than in any other area in the world, and, of course, for the time being, we are interested in the acquisition of this island for the reason that, as I have heretofore stated, within 25 years it will be a very valuable spot, as the condition of the island is such that, without great difficulty or excessive expense, airplane bases could be established. Some have ventured that a harbor at one end of the island is so enclosed that aquaplanes could make safe landings, and in the winter, with the airport covered with snow, great passenger and freight planes could land safely on skis. Not only are flying conditions over the polar area on the whole good, according to those who are familiar with this section, but it is much the smaller of the oceans and therefore the easiest ocean to cross. As the settlements creep northward along the great rivers of Siberia and Canada, the polar mediterranean will continually increase in importance through the airways above which connects the various lands.

In conclusion, may I say that Russia is now in the possession of Wrangell Island. I claim that that possession was obtained by force and not by discovery. Of course, on account of Wrangell Island's being in the immediately proximity of Russian territory, it would be easy for Russia to seize and difficult for us to defend, but surely it would be possible to establish the ownership of the island at an international conference. If Russia—or any other country for that matter—then acted contrary to the decision of the conference, the facts would at least be known and the blame would be laid where it was deserved; and again I wish to say that to use Wrangell Island as a base we would have there a short cut for airplanes flying over the top of the globe from New York to Manila instead of around the circumference by such routes as are taken by ships and trains.

Wrangel Island has an area of about 2,000 square miles. Its elevation rises to 2,500 feet, but there is much less land on the south and north. Shoals and sand spits project to sea on the north and southwest. The west and east coast are steep and lofty. The harbor is on the southeast. Tundra covers many parts.

In 1923 a party of Eskimos under an Alaskan trapper were established on Wrangel Island, but Russia, laying stress on the claim made around 1915, forcibly removed the colony in August of 1924 and shortly afterward brought 50 Chuckhees to form a settlement under Soviet officials, and I understand that the colony was visited by Russian airplanes in 1927. At that time these claims were not officially disputed by the United States, according to my information.

Last year I introduced a bill in Congress calling for the establishment of naval bases on Wrangell Island. This resolution was referred to the Naval Committee of the Senate, and no action to date has been taken thereupon. Fact of the matter is, I think that I was a little premature in the introduction of that resolution. I probably then should have introduced a bill such as I am introducing today, requesting the Secretary of State to make a report to the Senate at the earliest practical date with respect to whether or not the United States has a valid claim to sovereignty over Wrangel Island; and then, after the establishment of this claim, if an international congress awards the island to the United States, then would be the proper time for a bill calling for the establishment of naval bases there. At any rate, last year, when I introduced the aforementioned bill, which was referred to the Naval Affairs Committee of the Senate, there appeared in the Washington Post under date of February 26, 1939, an article entitled "United States Owns Wrangell Island. Not Soviet, Says Reynolds," and the subhead of that story reads. "Retired rear admiral, who planted American flag, revives controversy of Arctic possession." I wish to have this article at this juncture printed as a part of my remarks.

I ask that the resolution be referred to the Foreign Relations Committee, and I hope that we may shortly ascertain the rightful owner of this island, which in the future, I am confident, will prove to be a most valuable possession.

[From the Washington Post of February 26, 1939]

UNITED STATES OWNS WRANGELL ISLAND, NOT SOVIET, SAYS REYNOLDS—RETIRED ADMIRAL, WHO PLANTED AMERICAN FLAG THERE, REVIVES CONTROVERSY OVER ARCTIC POSSESSION

Because "first come first served" still is the law of the masterless lands, Rear Admiral William Edward Reynolds, retired, believes the Russians ought to get off Wrangell Island.

It is a matter of personal pride to him, for he "came first," in this case, he said, and planted the American flag on that ice-bound spot in the Arctic Sea one August morning in 1881.

There is a first-class international squabble ready to flare up over this disputed land, and it was another Reynolds who started it.

Last Friday Senator ROBERT R. REYNOLDS, of North Carolina, introduced a bill in the Senate to establish a naval air base on Wrangell Island, but there is small chance of doing that while the Russians are there.

It seems that in 1924, taking advantage of a claim they had made in 1916 that had never been officially disputed, the Russians abducted one Charles Wells, an American sailor from Seattle, and 12 Eskimos peacefully engaged in fishing and hunting and otherwise making good America's title to the spot, and replaced them with a colony of enthusiastic Communists.

RESTRAINS HIS PRIDE

This is a pretty intolerable situation for 79-year-old William Reynolds, who retired as rear admiral in the Coast Guard just when this was going on. But, mild-mannered and dignified, he restrained his outraged pride yesterday and spoke of the arrogant Bolsheviks with creditable courtesy.

"I don't know what right they had to take our island," he remarked, "but then I don't know much about international law. I took possession of Wrangell Island for the United States, and we were the first white

men that ever landed there. Of course, it's named after a Russian, Baron Wrangell, but he never reached the island; he just saw it."

As a matter of fact, it was something of an accident that led to that historic landing party, the gray-haired seaman admitted. The steamship Corwin, on which he was a junior officer at the time, was not sailing about the Artic looking for new lands for Uncle Sam. She was searching for survivors of the exploring ship Jeannette crushed by ice just before.

They didn't find any survivors, but they found a lot of polar bears and walrus, and a good plateau now useful as an airplane landing field, and they presented this chilly spot to the State Department to file away for the future.

FIFTEEN YEARS TOO LATE

Now Senator REYNOLDS has found a use for it, but he is 15 years too late. When, in 1924, Commander M. Davidoff came back in triumph to Vladivostock with Wells and his Eskimos he proudly boasted that once more the proletarian revolution had scored over the "imperialists," who were attempting to "seize the island" because it "would have made an ideal aerial base."

Poor Wells died before he ever got away from Siberia and as Rear Admiral Reynolds is the last survivor of the officers on that historic cruise of the *Corwin*, he is now the only principal of the drama of Wrangell still able to tell the tale.

But Wells' sponsor, Carl J. Lomen, is still very much alive, and so in his claim against the Russian Government for the 167 foxskins and 40 polar bear skins they relieved him of in 1924, not to mention damaged against his firm, the Loman Reindeer & Trading Corporation, which bought from an English firm the trading interests in the island just in time to have them seized behind their backs by the conquering Russian revolutionaries.

But after all, the whole thing rests with the State Department, and the State Department isn't interested now. Maybe if we build that air base Senator Reynolds wants there will be a showdown, and the Russians will be forced to admit the validity of Rear Admiral Reynolds' deed, and pay Lomen his damages. Such at least is the hope of Reynolds, Reynolds, and Lomen.

WAR OF PROPAGANDA MAY BE ALREADY WON—HUNGER IN JOBLESS HOME MORE PERILOUS THAN ANY FOREIGN SPY, IS VIEW

The little man, sitting in his little home, and wondering where he can get another pail of coal, will ultimately decide whether we get into war or stay out, asserts Samuel Grafton, writing in the New York Post. He adds:

"We are being told to watch out for propaganda. Good enough. But in the larger sense, this is a false steer. The propaganda fight has already been fought and won by the Allies. The United States now hates Hitler more than it hated the Kaiser in 1916. The toothiest of British lecturers can add only a drop to the brimming bucket of our hate. * * *

"History is made when the father of the family says he isn't hungry and slides his food down-table to this children, and the kids take it, trying not to think that's all there is, there isn't any more.

"History is made when the foreman at the plant tells John Smith, American worker, that he can't give him a job until the factory gets another war order, but that the factory isn't getting war orders because the Neutrality Act forbids lending money to the Allies. The muse of history really begins to smirk when John Smith walks down the factory street, feeling the stones through his shoes and wondering why the devil we shouldn't lend money to the Allies when it means a job a man can work at and feed his kids with.

"A decent peacetime job would keep John Smith from making this decision. * * *

"Tracing out the figures nationally, I find that the total of W. P. A. workers has been cut almost in half, from 3,043,367 in February to 1,661,970 in September. The rise in 'war boom' employment doesn't even remotely correspond to this wholesale slaughter of W. P. A. pay envelopes. The cut occurs at a time when a job is the best and most vital antiwar propaganda of all, because it talks to a man 7 days a week and 24 hours a day.

"I have a feeling that we are flunking our national test. We are depending on a Neutrality Act, a dike of words against a sea of need and blood. We are asking men to consult the national interest first, at a time when the interests of their children clamor in their ears. We are asking the little man to be big. That is the measure of the smallness of our approach.

"The stage for war, the stage for our participation, is being set. It is a bare stage and on it are a few kitchen chairs, an empty table, a congealing stove; in one of the chairs sits a man who fears the morning and who will accept any hope that comes. So far, we have been afraid to look at him."

EXHIBIT 2

THE RIGHT OF AMERICAN SOVEREIGNTY OVER WRANGELL ISLAND

(David B. Nolan* and Mark J. Seidenberg†)

ABSTRACT

The dispute over rightful sovereignty to Wrangell Island today continues as an international issue of the Arctic. The Soviet Union, United States, the United Kingdom, and Canada at one time or other have asserted interests over this frozen piece of tundra and mountain. The proximity of the island to both the U.S. and Russia has great strategic value in our push-button nuclear age. The issue itself has implications for the resurgence of American military might, for superpower detente, and for international law.

The history of Wrangell Island is filled with courage and tragedy. It is a tale of kidnapping and death.

The valiant Captain Calvin L. Hooper, the *de facto* governor of the Alaska territory, was the first to land on Wrangell Island. He claimed the island for the United States which perfected this claim through effective occupation in accordance with international law.

The Soviet government seized control of Wrangell Island in 1924 and took American citizens into custody. This act is held to have been in violation of international law and American statutes that sought to protect U.S. territorial rights.

Hence the Soviet Union is believed to have occupied Wrangell Island illegally until the present time. International law does not allow any nation to gain sovereignty in such a fashion. The U.S. sovereignty over Wrangell has never been legally ceded to the Soviet Union, either on account of treaty or due to U.S. inaction.

* * * * *

Extensive exploration of the Arctic did not occur until the nineteenth century. It is not surprising that Wrangell Island.[1] one of the largest yet most inaccessible islands in the Arctic did not become known to the world until this time.

Wrangell Island[2] is located eighty-five miles off the northeast coast of Siberia and two hundred seventy miles northwest of Cape Lisbourne, Alaska. It straddles the 180° meridian and the 71° parallel and encompasses an area to two thousand square miles. As with other islands in the Arctic Ocean, accessibility is limited by thick fog and sea ice. Impenetrable ice floes block access even to its southern shore for at least ten months of each year.

Four nations have asserted interests over this island—the United States, the Soviet Union, the United Kingdom, and Canada. The superiority of the claim by the United States can best be understood when placed in the perspective of arctic history and international law.

Early recorded explorations into the Arctic did not intend to lay formal claim to, and take effective occupation of, arctic territory. Without these elements sovereignty will not arise over discovered land. The Greek navigator Pytheas of Massila made the first recorded voyage into the Arctic Ocean in the fourth century. B.C.E., but was turned back by fog and ice.[3] The next recorded voyage into the Arctic of any significance was by a Norse chief named Ottar who sailed into the White Sea, after passing the Kola Peninsula.[4]

By the sixteenth century, England and other maritime nations sought better trade routes to the Orient than the long and arduous routes around the Cape of Good Hope and Cape Horn. In the year 1553 English merchants organized voyages to China by the Northeast Passage across to top of Europe and Asia.[5] In 1594 the Dutch navigator Willem Barents sailed into the Kara Sea.[6]

A Cossack trader named Simon Dezhnev sailed eastward from the Kolyma River in the summer of 1648. The natives of eastern Siberia told him of a "large country" lying to the north of Chukchi and Alaska. He was the first white man to hear of this land called Beringia.[7]

In 1763, another Cossack named Andreyev heard of this land and traveled to the Medvezhi Ostrova to find it. He claimed to have seen a large land to the East from that island location. However, six years later three Russian surveyors named Leontev, Lesev, and Pushkarov confirmed that there was no land that could be seen from such location.[8] Mirages of islands are not uncommon in the Arctic. This factor, added to the difficulty of obtaining star readings for location determinations in arctic fog, have often made land sightings unreliable.

Baron Ferdinand Petrovich von Wrangell, a lieutenant in the Imperial Russian Navy, also heard the tale of the land's existence from the Chukchi chiefs of Siberia. Between 1820 and 1824 he commanded several expeditions in search of the island but he never saw it, let alone land on or occupy it.[9] In April of 1824, at the end of his last arctic expedition, Wrangell wrote:

---

* Dr. Nolan Assistant Counsel to the President of the United States.

† Mr. Seidenbergy is Vice-President of an American corporation, living in Seal Beach, California.

[1] Footnotes at end of article.

"[W]ith a painful feeling of the impossibility of overcoming the obstacles which nature opposed to us, our last hope vanished of discovering the land which we believed to exist. We saw ourselves compelled to renounce the object for which we had been striving through three years of hardships and danger." [10]

Despite this failure, Wrangell gained worldwide fame as an arctic explorer. He later became Governor of Russian America. Yet he was never to land upon the island that would bear his name in his honour.

During the mid-nineteenth century, England, still looking for a short-cut to the Orient, attempted to find a Northwest Passage. In 1845 Sir John Franklin left England with a company of 129 to travel over the top of America to Petropavlovsk, Kamachatka. By September, 1846, the expedition's ships had become locked in an ice pack twelve miles from King William Island.

On 11 June 1847 Sir John Franklin died. On 22 April 1848 the ships *Erebus* and *Terror* were deserted and what was left of their crew started on a hopeless march to safety. No one survived. [11]

By 1848 the Royal Geographical Society became concerned over the ships' disappearance and the British Admiralty agreed to its request to organize a search. The United States and Canada also organized searches for the missing ships.

On 6 August 1849, Captain Henry Kellett, R.N., of H.M.S. *Herald*, one of the Franklin search vessels, arrived at a small island west of Cape Lisburne. Upon landing, Kellett took possession and named the island Herald after his ship. He hoisted the Union Jack and claimed the island on behalf of Queen Victoria.

Kellett sighted a large land mass beyond Herald Island to the west which he called Plover in honor of another Franklin relief expedition ship. Whereas no land mass existed at the position noted by Kellett on navigation charts, it may have been a mirage rather than Wrangell Island. In any event, no further landing or exploration was made.

Six years later, on 13 August 1855 Captain John Rogers, in his flagship the U.S.S. *Vincennes*, reached the position ascribed to Plover Island, also known as Kellett Land on the Admiralty charts. [13] When there was no land to be seen from the clear horizons, the charts by the Depot of Charts and Instruments of the U.S. Navy were changed accordingly. It should be noted that the Russian author Shvede gives credit to the American, Rogers, for discovering Wrangell Island [14] on that Congressionally authorized voyage. [15]

The United States' legal rights in the northwest of the North American Continent have a foundation in the Treaty of Adams-de Onus of 22 February 1821 which ceded Spanish rights in Oregon Country to the U.S. [16] The United States' claims to northern parts of the Oregon Country (now southern Alaska) are based, in part, upon voyages of discovery and annexation by Don Juan Francisco de la Bodega y Quadra and Don Ignacio Arteiga for the Spanish Government between 1775–1779. [17]

H.I.M. Tsar Aleksandr Pavlovich of Russia issued a ukase in 1821 banning "transaction of Commerce, and the pursuit of whaling and fishing or any other industry . . . all along the North West Coast of America from the Bering Sea to the 51st parallel." [18] This coast was part of the area ceded to the United States by Spain in 1821. The Tsar's ukase prompted U.S. President Monroe, in his message to Congress on 2 December 1823, to proclaim the Monroe Doctrine. A compromise was reached on 11 January 1825. The United States government ceded the coast of America north of the 54°40' parallel to the Imperial Russian Government as part of a Treaty of Navigation and Fisheries of the Northwest Coast. [19]

As will be seen, this accord was superseded by the Seward-de Stoechl Treaty in 1867 which ceded Russian America to the United States. The 1825 treaty has no bearing on sovereignty over Wrangell Island which was undiscovered at the time.

By the middle of the nineteenth century, Russian interests in expansion beyond the Asian mainland waned just as American interest in expanding to the West increased. The loss of the Crimean War illustrated the vulnerability of the Russian Empire at its extremities.

The Russian government, fearing that its American colony was no longer defensible and recognizing its economic liability, sold the North American lands to the United States for 7.2 million dollars on 20 June 1867. [20] This convention between the governments of Russia and the United States ended all Russian claims to sovereignty east of the demarcation line.

On 18 October 1867 the Tsarist double eagle flag was lowered over Novoarkhangelsk, the capital of Russian-America, and the Stars and Stripes was hoisted over the renamed city of Sitka. Alaska was now a possession of the United States. [21]

The Office of the Solicitor, U.S. Department of State, determined after a review of the documents leading up to and including the Seward-de Stoechl Treaty "that the Emperor of all the Russias ceded to the United States certain territories, and that the United States on its part entered into no commitment which could be interpreted as an understanding not to press claims to any land west of the particular line above described." [22] Therefore, there can be no inference that the United States ceded sovereignty to any as yet undiscovered island to the west of the Diomede Islands.

During this period the American whaling industry expanded into arctic waters. On 14 August 1867 Captain Thomas Long of New London, Connecticut, sailed his whaling bark *Nile* along a trek some thirty miles north of the route navigated by U.S.S. *Vincennes* some twelve years earlier. A seaman named Thomas sighted land (Cape Thomas) to the northeast from the ship's masthead. Captain Long named this territory "Wrangell's Land" as an appropriate tribute to the memory of the Russian explorer who spent three consecutive years above the 69th parallel. [23] Long also was the first to sight the identifying volcano of more than 2000 feet in height on Wrangell Island. He sailed past the southern shore and returned to the port of Honolulu. Between 1868 and 1869 the news of the American discovery of "Wrangell's Land" spread worldwide. Geographical Societies in the United States and Europe honored Captain Long for his discovery. [24]

Other American whalers—the captains Raynor of the *Reindeer*, Philips of the *Monticello*, and Bliver of the *Nautilus* also confirmed the sighting of the large land mass discovered by Thomas Long. They spread their belief that Wrangell was not an island but a frozen continent similar to that at the South Pole, a speculation that prompted the New York Herald to outfit an expedition in 1879, led by Naval Lieutenant George Washington De Long, to Wrangell Island and then the North Pole. [25] De Long and his ship, the *Jeannette*, formerly called the *Pandora*, never made it. The *Jeannette* became locked in ice floes and drifted westward past Wrangell Island where it was crushed and sunk in the summer of 1881.

Fearing for the fate of De Long, the U.S. Congress in early 1881 authorized one hundred and seventy-five thousand dollars for a search. The *Jeannette* relief ships, the U.S. Revenue Marine Steamer, the *Thomas Corwin* and the U.S.S. *John Rogers* entered the Bering Sea in the summer of 1881. Commanding officer of the *Corwin* was Captain Calvin Leighton Hooper.

Hooper at the time commanded the Bering Sea Patrol of the U.S. Revenue Marine, which made him the *de facto* Governor of Alaska. During the spring of 1877, jurisdiction of the District of Alaska was transferred from the Department of War to the Treasury Department. Treasury in turn placed Alaska under the charge of the U.S. Revenue Marine from that year until 1884. [26] Hooper clearly had authority at that time to discover and claim sovereignty over land on behalf of the United States. [27] The *Corwin* also carried aboard a complement of scientists. These included the world renowned naturalist, John Muir, who was later to found the Sierra Club.

The *Corwin* landed on Herald Island in hopes of finding the *Jeannette* or its crew. Unsuccessful in the rescue attempt, Hooper valiantly forced his ship through heavy ice floes to Wrangell Island to the west. [28]

On 12 August 1881, Hooper, Muir, and their party of six made the first recorded landing by man upon Wrangell Island. Edward W. Nelson, a member of the landing party later noted.

"The result of our examination of the Island, so far as we saw, gave not the slightest evidence of its ever having been visited by man before. All subsequent examinations of Wrangell Island by those who have visited it later appear to establish the fact that the landing party from the *Corwin* contained the first men to set foot on this island." [29]

Landing at the mouth of the Clark River on the eastern side of the island, Hooper and his fellow officers raised the American flag and took possession of Wrangell Island in the name of the United States. While Hooper and Muir explored the island, other party members erected a rock cairn and deposited documents recording the significant event. William Reynolds, a member of the party, recalled:

"I had the flag and with the Captain's permission waved it and took possession of the new land in the name of liberty and of the Government of the United States of America. I planted the flag on a bluff a little to the northwest of our landing place and left it there together with a record of our visit." [30]

Hooper called the island "New Columbia." He explained,

"It was believed that as the island had become, by our act of landing upon it, a part of the United States, by selecting a name of national character, no disrespect would be shown to the memory or offense given to the friends of the gallant officer whose name it bore, and that the name given would be adopted by all nations." [31]

The name "New Columbia" never replaced Wrangell, however.

Captain Hooper told Captain L. C. Owens of the American whaler *Belvedere* of his plan to annex Wrangell Island to the United States prior to landing there. The *Belvedere* became the second ship to land at Wrangell

on 19 August 1881. "As soon as we got ashore we saw the signal planned by Lieutenant Reynolds, a small American ensign fastened to a slender piece of driftwood, driven into the soil," confirmed a *Belvedere* crew member.[32]

On 26 August 1881 a party from the *Rogers*, the other relief ship, landed on Wrangell Island. They completed an official survey for the U.S. Government on 13 September of the same year. One crew expedition proceeded overland to the mountains, where a general view of land and water could be obtained. Another group found the cairn left by the *Corwin*, and deposited copies of the documents contained therein, taking the originals for the Navy's report. The crew of the U.S.S. *Rogers* also raised the American flag over Wrangell Island.[33] The crew determined that its new U.S. possession was not a continent but a large island.

Major E. W. Clark, the Chief of the United States Revenue Marine Service, informed the U.S. Coast and Geological Survey in 1881 of the annexation of Wrangell Island to the United States. The U.S.C. & G.S. of the U.S. Treasury Department determined that Wrangell Island should be included in the District of Alaska.[34]

Between the years 1881 and 1910 Wrangell Island was visited exclusively by Americans. These were mostly whalers and walrus and seal hunters. On 8 September 1889 the U.S.S. *Thetis* went to Wrangell Island while cruising the Arctic Ocean, "showing the American flag." [35] In the year 1910 Captain Louis Lane sailed the ship *Adler* of Nome, Alaska, to Wrangell Island with a motion picture company from Hollywood, which filmed a polar bear hunt.

For a period of twenty-nine years following Hooper's claim, U.S. and Russian publications recognized United States sovereignty over Wrangell. U.S. Geological Survey Bulletins No. 169 in 1900, No. 187 in 1902, and Nos. 274 and 299 in 1906 included Wrangell Island as part of the U.S. Russian Naval Maps and Encyclopedia at the turn of the century also show the same designation.

In 1910 the Imperial Russian government, interested in compiling hydrographic charts to facilitate shipping routes from Kolyma to Vladivostok, commissioned two steel icebreaking ships, the *Vaigatch* and *Taimyr*. On 16 September 1911 the *Vaigatch* anchored in a cove off Blossom Point at the southwest corner of Wrangell Island while taking shelter from a gale from the northeast.[36] Its captain sent a landing party ashore on 15 September via whaleboat and motor launch to establish the correct astronomical position by celestial observation. The landing party found a coal deposit and erected a ten meter structure to establish the astronomical position of the landing place before leaving.

The Russians then circumnavigated the island, but unfortunately at a distance too far to contribute to the definite outlining of the coast.[37] This was the only visit that the Russians ever made to the Wrangell Island before 1924, nor did they ever make any claim to the island during their stay.

In 1911 Dr. Rollin Harris, an American oceanographer, again raised interest in the possibility of an as-yet-undiscovered arctic continent. He hypothesized the existence of "Harris Land" to explain tidal movements in the Arctic Ocean.

In 1913 the National Geographic Society planned to finance an expedition to the Arctic to find this new land. Sir Robert Borden, Prime Minister of Canada, asked and received permission to finance the expedition for fear that Americans might make new discoveries north of Canada for the United States.[38].

Vilhjalmur Stefansson, a Canadian who had grown up on the plains of North Dakota, was chosen to lead the expedition. The Canadian government directed Stefansson that "any new or partly unknown lands which the expedition would touch would be observed, position fixed, and the British flag would be planted on these lands."[39]

Stefansson's flagship was the whaler *Karluk* under the mastery of Captain Robert A. Bartlett. Bartlett was a U.S. citizen who had commanded the ship *Roosevelt* for the Peary and Henson expedition to the North Pole during the years 1905 to 1909. The *Karluk* suffered the tragic fate of other vessels and became caught in arctic ice, drifted west along the north coast of Alaska, and eventually sank. For two months the survivors walked south across the polar ice cap, arriving at Wrangell Island on 12 March 1914. Two members of the ship's crew. John Munro and Robert Templeman, raised the Canadian flag over Wrangell Island in celebration of Dominion Day, 1 July 1914.

Of course, Wrangell Island had already been formally claimed by the United States, and the previous establishment of U.S. sovereignty served to cut off subsequent rival claims. Furthermore, Great Britain had transferred jurisdiction of her rights to islands in the Arctic Ocean to the Canadian Government in 1880.[40] Therefore, whatever pretention to sovereignty Great Britain might have had to Herald and Wrangell Islands by virtue of the voyage of the H.M.S. *Herald* in 1849, or the landing on Wrangell in 1914, now belonged to Canada.

The shipwrecked members of the *Karluk* also recognized the prior discovery of Wrangell Island. Bartlett later wrote that "we passed Hooper cairn, which was built by a party from the U.S. Revenue cutter *Corwin* in August, 1881. The cairn, as I could see, was still intact." [41]

Captain Bartlett and an Eskimo crew member, Kakatovik, walked across the ice pack to summon help. Upon Bartlett's reaching Alaska, Captain William E. Reynolds, U.S.R.C.S., immediately ordered a rescue attempt. On 7 September 1914 the American ship *King and Wing* picked up the happy survivors on Wrangell Island (Figure 1). Not knowing that the *Karluk* survivors had already been rescued, the *Thomas Corwin* landed at Wrangell a few days later. The same ship that thirty-three years earlier had carried Hooper to claim the island, re-established the flying of the U.S. flag over Wrangell Island.

After the *Karluk* survivors were transferred to the U.S Revenue Cutter *Bear*, they were transported to the ship's home port of Unalaska where the port commander, William Reynolds (who in 1881 had landed on Wrangell with Hooper) told Bartlett that the island was indeed part of Alaska.

On 13 November 1916 a challenge to U.S. sovereignty over Wrangell Island came from a different source. The Imperial Russian Embassy in Washington presented a memorandum to the U.S. Department of State regarding Russia's claim to lands in the Arctic. It claimed that Wrangell Island, Alaska, was one of the islands which "form an extension Northward of the Continental tableland of Siberia." [42] This argument, like that of the sphere of influence, continuity, or sector theory to the Pole has no validity in international law.[43] Before this claim could again be pressed the Imperial Russian Government was overthrown by the Bolsheviks. World events were to continue to play a major part in the issue of sovereignty over Wrangell.

On 7 July 1918 Allied Commanders, and an army that included Japanese troops, assumed protection of the city of Vladivostok. The threat of the Japanese taking an imperialistic hold in eastern Siberia caused concern, just as the expansion of power by the Bolsheviks had done formerly. In 1920 Stefansson became worried that the Japanese government, in their desire to control eastern Siberia, might try to take Wrangell Island. He observed, "I felt certain that within a year or two they would realize the coming importance of Wrangell Island and would occupy it."

Great Britain, Japan, and the United States were allied against the Bolsheviks. However, if the Japanese (future Pacific rivals to the United States) were to occupy Wrangell Island, it would be difficult to oust them in favor of the Bolsheviks. Therefore, Stefansson met in Ann Arbor, Michigan, with Allen Crawford, a Canadian, and Sir Auckland Geddes, British Ambassador to the U.S., for the United Kingdom to plan an expedition to secure Wrangell Island and also to promote their own economic interests.

Crawford led a party that included four Americans on the American ship *Silver Wave*. When they landed on Wrangell Island on 15 September 1921 the crew raised the Stars and Stripes over the island under Captain Jack Hammer's direction. On 16 September 1921 Crawford raised the Union Jack over Wrangell "in the name of the King and the Empire" as a continuation of Stefanson's "right to the island already established by the Stefansson Canadian Arctic Expedition of 1913–18 and the shipwreck of the *Karluk*." [45] He did not tell anyone aboard the *Silver Wave* that he had raised the British flag over the island.

In 1922 it became *cause célèbre* in the British and American press that Stefansson and company had "claimed" Wrangell Island, Alaska, as part of the United Kingdom. Anglo-American relations became strained over an island in which Great Britain had shown no interest since the discovery of Herald Island in 1849.

The Crawford party landed with provisions for only six months, saying they planned to sustain themselves with hunting. Stefansson's relief mission in 1922 was blocked by ice floes. When Harold Noice arrived aboard the relief ship *Donaldson* on 20 August 1923 only an Eskimo seamstress named Ada Blackjack survived of the original group. A new party led by Charles Wells of Uniontown, Pennsylvania, continued settlement of the island.

When Stefansson realized in 1924 that the Canadian government would not back a sovereignty claim as to *dominium directum* rights he sold his title and his *dominium utile* interests in Wrangell Island to the Lomen Brothers company of Nome, Alaska (Figures 2(a) and 2(b)). On 13 May 1924 Secretary of State Charles Evans Hughes declared that the Lomen Brothers were the owners of the island (Figure 3). On 18 June of that year, the British Colonial Secretary stated in a confidential dispatch: "The United States Government is thought to have a strong, if not indisputable, claim to the Island." [45a]

On 20 August 1924 the Soviet gunboat *Red October* landed on Wrangell Island, armed with a six-pound cannon and a com-

pany of Soviet infantry. The Soviets took Wells by force and the other thirteen Americans on the island and told them they were being taken to Alaska. Instead they were forcibly taken to Vladivostok.[46] The Soviet officials confiscated all the pelts which the trappers had accumulated during the twelve bitter months on the island.[47] Following intervention by the U.S. Consul at Harbin, Manchuria, the Soviets released the twelve Americans still living. The Bolsheviks claimed that Wells had died of pneumonia. His diary was never found.

A year later the Soviets proclaimed Wrangell Island as their territory. But in 1930 the U.S. Department of the Interior publication entitled *Boundaries, Areas, Geographic Centers and Altitudes of the United States and the Several States* expressly included Wrangell Island as an American possession. Since that time no abandonment by the U.S. of its rightful sovereignty has occurred, nor under international law could such abandonment occur following a deprivation of sovereignty by force.

Besides the abducting of Americans on Wrangell Island, the Russians violated federally promulgated Alaskan law that prohibits the exercise of foreign jurisdiction. The Alaskan Organic Act of 1884 adopted Oregon law, which in turn had adopted the Iowa Territory prohibitions against foreign governmental interference with American sovereignty.[48]

In 1973 the State Department reissued the *Hackworth Digest of International Law* which explained, "The United States has not relinquished its claim to Wrangell Island." In the centennial year of the American landing on Wrangell, the United States government's position has not changed. Captain Hooper formally claimed Wrangell Island on 12 August 1881 and the U.S. established effective occupation until the Soviet invasion.

FOOTNOTES

[1] The island has also been spelled Wrangel and Vrangel. The U.S. Board of Geographic names, by resolution named 29 July 1901 determined that Wrangell Island, Alaska, in the Arctic Ocean should be spelled with two l's. The island was named in tribute to Ferdinand Petrovich von Wrangell who spelled his own name with two l's when he wrote in the Roman alphabet.

[48] On 7 May 1884 the U.S. Congress passed "An Act providing a Civil Government for Alaska", c. 53, 23 *Stat. at Large 24.* That act adopted Oregon law providing it does not conflict with other provisions of Alaskan law. This Act extended to Alaska "An Act Adopting the Statutes and Laws of the Territory of Iowa and the Common Law." *Oregon Acts and Laws Passed by the House of Representatives at a Meeting Held in Oregon City, August, 1845* (New York: N.A. Phemister Company, 1921), p. 16. It should be remembered that the Act of 12 August 1845 became part of the laws of the Territory of Oregon through "An Act to Establish the Territorial Government of Oregon", of 14 August 1848. c. 177. *Stat. at Large 323* (known as the Oregon Organic Act. Laws of the Territory of Iowa, passed at the Extra Session of the Legislative Assembly, begun and held in the City of Burlington: J. H. M. Kenny, 1840, and Des Moines: Historical Department of Iowa, 1902), c. 85.

EXHIBIT 3

THE VOYAGE OF THE JEANNETTE—THE SHIP AND ICE JOURNALS OF GEORGE W. DE LONG, LIEUTENANT-COMMANDER U.S.N., AND COMMANDER OF THE POLAR EXPEDITION OF 1879-1881.

May 16th, Monday.—Land! There is something then besides ice in this world. About seven o'clock this evening Mr. Dunbar, who usually winds his way aloft several times a day, could hardly believe his eyes when they rested on an island to the westward. He called Chipp to look at it, and Chipp saw it was land sure enough, and sent Ericksen to inform me. I had just finished working out our position when the extraordinary news came, and was writing out the result: Latitude 76° 43′ 20″ N., longitude 161° 53′ 45″ E., a drift since the 14th of five and a half miles to N. 16° E. Of course I dropped my books and ran up to the fore yard, and there, sure enough, I saw a small island one half point forward of our starboard beam, the first land that has greeted our eyes since March 24, 1880, nearly fourteen months ago. And our voyage, thank God, is not a perfect blank, for here we have discovered something, however small it may be. Some fog is resting over it, and to the right hand or northward of it, and we do not think we see all of our wonderful landfall. Bearings I take at once, and find our island bears S. 78°45′ W. (magnetic), or (the variation being 18° E.) N. 83° 15′ W. (true), but we can do nothing more. Its distance we cannot estimate. If low land comparatively, it may be forty miles distant (see our idea of Herald Island's distance), and if high land seventy to eighty miles. But after a number of days, if we change the bearing of it to some extent, I can compute its distance, and determine if, and in what manner, we can land upon and take possession of and explore our discovery. Cooped up as we have been for over twenty months, we shall enjoy getting our foot on solid earth or stone as much as if it were Central Park, for it will be a change. But whether it will be earth or stone we do not know of course. What this poor desolate island, standing among icy wastes, may have to do in the economy of nature I do not know, or in fact care. It is solid land, whether of volcanic origin or otherwise, and will stand still long enough to let a man realize where he is. Moreover, this must be the spot to which the ducks and geese have been steadily flying, and if we can get some of them for a change to our canned meats, what a treat! And then bears must swarm on our island! In fine, this island is to us our all in all. We gaze at it, we criticise it, we guess at its distance, we wish for a favoring gale to drive us toward it, and no doubt we would accept an assertion that it contained a gold mine which would make us all as rich as the treasury without its debts. I believe most of us look carefully at our island before we go to bed, to make sure it has not melted away. Fourteen months without anything to look at but ice and sky, and twenty months drifting in the pack, will make a little mass of volcanic rock like our island as pleasing to the eye as an oasis in the desert.

Beside this stupendous island, the other events of the day sink into insignificance.

May 17th, Tuesday.—Our island continues to be the cynosure of all eyes, of course, and as the fog which hung over it yesterday has disappeared today, we are able to define its appearance better, the white portion which the fog hid yesterday showing as a snowy slope extending back to some distance. The shaded portions seem to be rock, with clefts or gulleys in it, in which snow has lodged. The highest and further corner seems to be a volcano top. We are watching the land anxiously enough, and getting our position by observations daily, but of course in one day we have not altered hearings at all. That may be a question of weeks, unless we have stiff winds. Sights today place us in latitude N. 76° 43′ 38″, longitude E. 161° 42′ 30″,—a drift since yesterday of two and one half miles N. 83° W., or exactly toward the island.

Soundings forty-three fathoms (mud and pebbles), a slight drift N. by E. being indicated by the lead line. Temperature, maximum, 11.5°; minimum, minus 5.5°. What lovely weather for the middle of May!

May 18th, Wednesday.—Latitude N. 76° 44′ 50″, longitude E. 161° 30′ 45″. As we draw ahead of our island, we open out quite a face to the northward, and Mr. Dunbar is quite certain that he saw high land above and beyond it to the westward. My repeated visits to the crow's-nest show me a strong appearance of high land, but I have not yet been able to say positively that it is not cloud. At one time I thought I could see a connecting snow-line, as if the upper part of our island sloped backward and upward to a higher ridge beyond, but I was unable to see a snow-peak that Mr. Dunbar saw just before I could join him in the crow's-nest. Weather generally clear, bright, and pleasant. An E. wind freshening, and promising a stronger blow for tomorrow.

The ice opened in a crack about five hunderd yards to the eastward of the ship, and came together toward midnight, the ship receiving several shocks when the ice edges met.

We are favored with an occasional dovekie (black guillemot), shot by some of our people, the luckless bird being attracted by the little lanes and cracks in the ice near us instead of making for the island, where it would be safe. Last Saturday we in the cabin had one apiece for dinner, and I am in hopes of seeing enough hanging to the main boom to have them for dinner fore and aft next Saturday.

May 19th, Thursday.—E.S.E. winds make us move along at a brisk rate, evidenced by our opening out our island's north side. Centre of island bears W. (true).

At 9:30 A.M. the ice quietly opened seventy yards from our starboard bow, and a lane of water about twenty feet in width extended north and south for about three miles, and several other cracks and lanes were visible to the northwest. Whether when we get to the westward of our island the ice will spread and open remains to be seen; but the land is quite close enough, unless we can use it for an advance. We have a crack under our starboard counter that may connect, and a crack ahead in the line of our keel as a starter, which may at any time leave our whole starboard side bare.

May 20th, Friday.—Latitude 76° 52′ 22″ N., longitude 161° 7′ 45″ E.,—a drift since the 18th of nine miles N. 35° W. As the island point observed on the 16th now bears S. 78° 30° W. (true), I can compute the distance by the change in bearing, and the result is twenty-four and three fifths miles (and thirty-four and seven tenths miles on the 16th). The dimensions of it I cannot accurately measure yet, though with an octant I find it subtends an angle of 2° 10′ on this bearing. But from our point of view the island is foreshortened, for I think its greatest length is in an east and west direction. As we draw to the northwest, we open out the western face and shut in the eastern face correspondingly, but I have taken the same point each time for my bearing by the course indicator on the bridge. There now seems to be a curious little island off the western end, which looks like a mound with a beehive on it, but I hope soon to be able to say whether it is a separate island or a continuation of the first one.

Toward midnight a strong appearance of land was seen bearing west by north roughly, like an inclined plane, but clouds rested on so much of it that I cannot speak positively.

Soundings in forty-two fathoms; drift N. W. indicated. At this rate we shall soon get to the shortest distance from our island, which I locate by computation of its distance before mentioned to be in latitude N. 76° 47′ 28″, longitude 159° 20′ 45″ E. E. S. E. gale seventeen to twenty-one miles an hour, and a pleasant temperature plus 16°. At 8:30 a.m. the ship received a blow under water, seemingly near the stern post, and doubtless from some drifting, submerged ice-block.

May 21st, Saturday.—A dull, gloomy day, E. S. E. gale, and I manage to get a meridian altitude, showing that we have made seven miles in latitude at all events. Our island appears only occasionally, but bearing S. 72° W. There seems to be no immediate chance of this blow abating, so it will be a question of waiting to see in what position it leaves us before deciding upon our ability to land upon and take possession of our island.

I am sorry to record the mysterious disappearance of another of our dogs, generally known as Lauterbach, and heretofore recognizable by his having a hairless tail, the result of a scalding accident. He has gone and laid himself away somewhere, for he has been missing several days.

May 22d, Sunday.—At nine a.m. the ship received another severe shock, probably striking ice under water.

May 23d, Monday.—I am sorry to be obliged to record the addition of Chipp to our sick-list. For a long time past he has been in poor condition, growing thin and weak, but insisting on going about and attending to his duty. He has strong dislikes to medicines and medical treatment, and would not believe he stood in need of either. Being overruled in that respect by me, he did take a tonic prescribed by the doctor; but of course, as it was taken unwillingly, under protest, no good was experienced from its use, and it was discontinued. Now nature asserts itself, and he is so reduced, by reason of his failure to eat enough, and so nervous and restless. because of continued loss of sleep, that it is simply impossible for him to keep up, and he is forced to his bed. The doctor hopes to have him around in a few days, but I am not satisfied that a few days can repair the damage already done. Considerable fall of soft, large snowflakes.

May 24th, Tuesday.—The first thing I heard upon arising this morning was that more land was in sight, and the next thing was that the ice was very slack, with many large lanes of water. The strong appearance of land on the 20th, toward midnight, proves to have been land in reality,—another island being added to our discoveries, somewhat longer (if not less distant) than our first named. Upon going up to the crow's nest I had a good view of both islands and of more water than we have seen since September, 1879. In consequence of the subsidence of the wind, the ice has become very slack, and numerous long openings or lanes have occurred, varying in width from twenty to one hundred feet, and in length

from one eighth mile to three miles. Unfortunately for purposes of navigation they are not connected, and though having a general northwest and southeast direction, do not lead to anything. Just at this moment I would be contented if by any means I could get the ship into one of these islands for a temporary breathing spell, and a chance to get some game for our supplies; but, unfortunately, I cannot saw through thirty miles of ice or blast that amount out of my way. The lanes of water are very tantalizing, for they indicate what might be done if there were more of them. They seem to be in our neighborhood only, or within radius of five miles, while the islands are thirty, and say forty miles off—and from that five miles radius to the islands the ice is as close and compact as ever.

However, we made all the use we could of the openings. The iron dingy, the two kyacks, and the oumiack were put into requisition, and away went parties to hunt for birds and seals, dragging the boats from one lead to another, as occasion required. And while a party of men were thus employed in transportating the oumiack on their shoulders she slipped, and brought so much weight on John Lauterbach (a coal heaver) as to double him up and severely strain his back.

"It never rains but it pours," is an old saying, and it seems to be proven in our case, for hardly had we prepared ourselves to take care of Chipp when we have another case, Lauterbach. When I saw him being supported back to the ship by a shipmate, I was afraid he had shot himself, or had been shot by a companion,—accidentally, of course, in both cases,—and I ran out to meet him with considerable alarm. For some time it was impossible to find out what was the matter, for the man was in great pain and unable to talk. However, beyond a severe wrench to the small of his back, there was no injury inflicted, and except for his being laid up for some days no serious consequences are to be anticipated.

Now for the land. It is an island beyond doubt; and its nearest point, which I take to be its southern extremity, bears S. 69° 30′ W., and it subtends an angle of 3° 35′, while our first discovery's eastern end bears S. 17° W., and subtends an angle of 2° 42′. I think both islands extend in a west by north and east by south direction. Computation of the position of our first island from our change of its bearing of the 20th and 24th, would put it more accurately in latitude N. 76° 48′, longitude E. 159°; and until I can get its bearing due south (true), this bearing of today and the 20th are more nearly accurate as to longitude than those of the 16th and 20th.

Latitude N. 77° 16′, longitude E. 159° 33′ 30″. A drift since the 20th of thirty-two and one half miles N. 41° W. This is progress indeed,—eight miles a day. Considering that we commenced the year in latitude 73° 48′, longitude E. 177° 32′, we have no reason to complain at the long step we have made,—310 miles N. 47° W.

Soundings in forty and one half fathoms, and temperature comparatively cheerful, plus 27°.

Our engineer's force are occupied in putting together the windmill pump and getting it ready for the summer's work. Chipp is still quite weak, and in consequence obliged to keep his bed. I have taken every precaution to keep his surroundings as quiet as possible, muffling chair legs, not striking the ship's bell, etc., and he has had a peaceful day in consequence.

May 25th, Wednesday.—Our invalids are progressing slowly. Chipp is still very weak, and obliged to keep his bed altogether by the surgeon's orders, as a surety for rest and quiet. Danenhower is just the same, but as he caught a cold some days ago, he is forced to stay below at all times, except at meal hours. Lauterbach is better, though his back will feel the wrench it received for some days. Alexey is slowly getting his leg to heal, there being now but a very small hole open. Otherwise, we are all as well as usual, and all hands are certainly free from scorbutic taint.

Many of our lanes are found closed today, the ice having come together during the night. A light film, say one eighth of an inch of ice, formed over the lanes not disturbed. Our islands were in plain sight all day, giving me a chance to get good bearings and angles, which are sufficiently indicated by the sketches on the preceding pages.

May 26th, Thursday.—A dull, gloomy day, with overcast sky, and N. N. W. breezes puffing fitfully. The islands were invisible until six p.m., when they came out from the dull, thick haze. The ice seemed to slack up again today, numerous unconnected lanes and ponds showing themselves, but of no use to us yet. Took advantage of the breeze to make the windmill do all the pumping after noon, to the relief of the men on watch, who must have learned to hate the hand-pumps many months since.

May 27th, Friday.—Latitude 77° 14′ 45″ N., longitude 159° 16′ E. A drift since the 25th of five miles S. W. This brings us much nearer our second island, and it is very tantalizing to be gazing at what seems a fine bay and not be able to sail into it. Soundings in thirty-nine fathoms, slight drift S. W. On account of light winds had to close the water gates again and fall back upon hand pumping.

May 28th, Saturday.—Soundings forty fathoms, and the state of the temperature is by no means pleasant, maximum 19°, minimum 15°. Our invalids give me the usual anxiety. Chipp is very weak, and I fear it will take a long time to build him up. Danenhower, of course, will be of no use so long as he is in the ship. Alexey slowly recovers. Lauterbach is improving, his back slowly recovering from the strain. But with many things crowding in on me I almost feel that the crucial moment in our voyage is at hand.

May 29th, Sunday.—We get considerable work out of the windmill today, and our men are consequently relieved from the endless clang-clang of the handpump. Our dull and gloomy weather continues, to my disappointment, for I can get no observations for position. These are particularly desirable now, because I want to fix the position of Henrietta Island. It is very difficult to get good bearings from deck of anything, because the ice-hummocks and ridges are so high and so continuous that it is only here and there that we can see even the plainest land; and then it looks so much like the black spots in the ice, that when one puts his eye down to the sight-vane of the compass, he is as apt to take the bearing of a black spot as of the land. Besides, we cannot see extreme points from the land. Angling with a sextant from aloft is cold work, and some points show too faintly to get a reflection, so that though I have measured angles several times, I have only recorded them when I have been sure of them.

We were startled this afternoon by an enormous flock of ducks, estimated to be five hundred in number—more than any one had ever seen before—flying quite low, and heading to the northward, where I suppose there must be more land. Our dogs took after them in a body, until stopped by water, and turned back.

The ice seems to be very close again, an easterly breeze setting it in motion enough to press against the islands and close all lanes.

Inspection and divine service as usual on Sundays.

May 30th, Monday.—I have decided to send a party to try to make a landing on Henrietta Island. Tired of waiting for a chance to get observations to determine its position, I accept twelve miles as its probable distance southwest and a half west, true. Though I know the traveling will be heavy, I hope that by sending two officers, four men, fifteen dogs, with a sled and light dingy (for ferriage), and seven days' provisions, as the only heavy weights, they will be able to accomplish my object,—landing, leaving a record of our condition, and perhaps bringing back a good supply of birds. Having but one commissioned officer available, Melville, he must take charge of the party. With Chipp and Danenhower both on the sick-list, they can neither be sent, nor left in charge of the ship if I go myself, as is my strong desire. The doctor cannot go, for his steady sick-list puts him hors concours, and my responsibility for the ship and the safety of all hands will not permit me to leave her in charge of Mr. Dunbar, the only sailor man in the cabin besides myself fit for duty. Consequently I make out orders for Mr. Melville to go in command, and to take Mr. Dunbar, Nindemann, Ericksen, Bartlett, and Sharvell with him, and to start tomorrow morning. The weather continues good, with light winds, and barometer rising to 30, and I think we are drawing in toward the island all the time with the ship. Such arrangements as I have made for them and their return I will write out in full tomorrow. To-day I had Sweetman remove the porch from the starboard side of the galley, and I set the men to work digging a trench around the ship. We are now beginning to be straitened for dog food; all our condemned meats, fish, and other suitable articles are ended. Having tried the dogs upon everything to their seeming satisfaction, we at last tried them with potatoes (desiccated). But here was the dividing line. They turned up their noses and walked away in disgust, and no matter how great their hunger, they cannot be induced to astonish their stomachs with such an excellent (?) anti-scorbutic. In fine, something else had to be done, and so I ordered one half pound English pemmican, and one half pound corn meal to be served out to every dog every second day from the ship's stores; and in order that no more of such precious food than was absolutely necessary should be expended for dogs, I gave orders that three old and worn-out dogs should be quietly removed from the ship and shot. Of course I regret taking even a dog's life, but where it is a question of sentiment only in putting priceless food into a dog, from which no work can ever be obtained, the sentiment cannot be tolerated.

May 31st, Tuesday.—At nine a.m., everything being ready, the sledge party, in charge of Melville, started. Mr. Dunbar, Nindemann, Ericksen, Bartlett, and Sharvell composed the personnel, and the following the material:—

15 dogs,
42 lbs. American pemmican,
6 sleeping-bags,
10½ lbs. sardines,

21 lbs. pigs' feet,
42 oz. lime juice,
1 McClintock sled,
1 McClintock dingy,
1 tent,
5 tent-poles,
210 lbs. English pemmican,
42 lbs. bread,
1 cooking-stove and mess gear,
42 lbs. mutton-broth,
5¼ lbs. coffee,
2⅝ lbs. tea,
5¼ lbs. chocolate,
10½ lbs. sugar,
2 rubber blankets,
6 packed knapsacks,
2 rifles,
2 shot-guns,

sextant, artificial horizon, prismatic compass, opera-glass, ensign, medicine, etc.

We all assembled on the ice, and of course cheers were exchanged. Away they went merrily enough until they came to an ice opening, where they were obliged to make a ferriage. Here some of their dogs ran away and returned to the ship, but I sent them back at once, and followed up the sled until they made a new departure. I watched them frequently from the crow's-nest, and at six p.m. I saw them about five miles from the ship, evidently halting for a rest. Of course I sent lime juice, and moreover I started them with eleven gallons fresh water; and besides having Dr. Ambler prepare medical advice and suggestions, I directed Melville frequently to rest his party, to look out for snow-blindness, and to avoid using surface snow and floe ice. Should the distilled water give our during the trip to the island, he was directed to scrape the brokendown crystals from the tops of old hummocks. From the moment of his departure, a large black flag eleven feet six inches square was to be kept flying at the main, and he was frequently to take bearings to it. Should it shut in thick after he had been away forty-eight hours, one of the whale guns or the brass piece will be fired every four hours; and in clear, bright weather, from and after the third noon from his departure, a fire of some material, giving plenty of smoke, will be made at meridian. He is not to remain at the island more than twenty-four hours, and is to do as much as he can in carrying out my written orders.

Of course there is some risk in the this trip. But the weather remains good, light northerly winds prevail, and our drift seems to be directly toward the island. I want to know whether there is any bay in which I can place the ship, and perhaps remedy her leak; whether there is any animal or bird life with which I can replenish our waning stock of provisions; and whether, in the event of disaster, we can fall back upon this island as a place to live, and make a fresh departure for the Siberian coast; whether there is any more land in sight from its summit; and very particularly what is the appearance of the world beyond, whether interminable ice or a chance of water. Should the ice break up around us, I want to know what are the prospects; and so much knowledge can be gained by this visit, as well as the satisfaction of planting our flag upon a newly discovered piece of the earth, that I think the risk of undertaking the journey is justified. During the afternoon, when the weather cleared up, I got good bearings, and I find Jeannette Island on our port bow (S. 11° E. true) and Henrietta Island on our starboard bow (S. 51° W. true), verifying my belief that we are drifting toward the latter island, and heading between the two. My anxiety will be endless and unremitting until I get all hands under my wing again; and I pray God so to aid them and guide us that no mishap may occur.

Soundings in thirty-nine fathoms; slight drift S.S.W., and a low temperature to close our month—9°. Lauterbach restored to duty from sickness.

June 1st, Wednesday.—What next? The doctor informs me this morning that he is of opinion that several of our party under his treatment are suffering from lead poisoning. Newcomb is quite under the weather with severe colic, and Kuehne is about the same. Alexey is complaining in a similar manner, and our steward is very ill indeed. The doctor says he is a little disturbed also, and Chipp has had a sharp touch of it. No less than six people, and the sledge party yet to hear from. Suspicion was first directed to the water, for as all joints about the distiller are red leaded to make them tight, we fear that some of the lead was carried over with the steam and deposited in the receiver. This, unfortunately, cannot be entirely avoided, though it may be reduced. Then I examined all vessels in which drinking water is carried or tea and coffee made, and I put out of commission all having any solder patches, substituting iron vessels lined with procelain. But upon examining our tomatoes, they were found to show traces of lead in larger amounts than the water, and the doctor thinks that the distemper, if I may so call it, is due to our large consumption of that vegetable. The acid of the tomato acts chemically upon the solder used in the tins, and the dangerous mixture is formed; and since we have had tomatoes every day for dinner subsequent to May 4th, it is assumed that we have become largely dosed with lead, and some of us have had to succumb. Inasmuch as we all eat tomatoes, the exemption of the majority is due to their greater capacity for lead, I suppose, for no good reason presents itself to my mind. It has transpired that the steward, who is the worst case, is remarkably fond of this vegetable, and eats of its unsparingly. Of course we have eaten tomatoes four times a week ever since our commissioning, and until May 4th, without any bad result, but that does not prove anything. A very interesting question here comes in. Our canned fruits have, I believe, similar chemical action upon the lead soldering, and no doubt we are absorbing more or less lead all the time. Now does this chemical action begin at once or at the end of two years? A very important question to an Arctic expedition, for of what use is it to secure exemption from scurvy for two years if disabling lead poison finishes you in the third year? The doctor says each severe attack may be mitigated by medicine, but a continued absorption of the lead will produce palsy, and that would certainly be a perplexing disease to deal with in an Arctic ship. If the chemical action begins as soon as the tomato is canned one is in danger at all times. However, as we stood the vegetable four times a week, I order a return to that issue to see what effect well be produced.

We are certainly drawing in upon Henrietta Island, and getting Jeannette Island well opened on the port bow. Bearings today: ship's head S. 10° W. (true); east end Jeannette Island, S. 10° 30′ E.; south end Henrietta Island, S. 51° W.; north end, S. 57° W.; latitude 77° 16′ 14″; but I could get no time sight.

During the forenoon our traveling party were sighted from aloft, apparently more than half way to the island.

Dull and gloomy weather; temperature, maximum 15°, minimum 8°,—lovely for a June day. (Strawberries will be late this year in these latitudes.) The ice seems to have slacked up again, a wide opening occurring about twenty yards west of the ship, and extending for a mile north northwest and south southeast.

June 2d, Thursday,—Henrietta Island has been in sight all day and very plainly too, and I am very much deceived if it is more than eight miles distant.

Our lead invalids are responding to treatment, the steward more slowly than the rest, as his attack was the most severe. I have had occasion hereto fore to note how naturally one of our two Chinese does the work of both whenever one is sick, and I am not surprised, therefore, to see the cook calmly cook for all hands and look out for the cabin and ward-room, and wait upon the table; and just now, with extra things like arrow-root, beef-tea, etc., for the sick, and the serving of one sick officer's meals in his room, he has no easy time of it. But it is all done, and Ah Sam nurses Charles Tong Sing meanwhile. My respect and admiration for these two men are boundless. Everything about the ice seems to have come to a stand again. Ice has formed over all openings.

June 3d, Friday.—Nothing yet to be seen of Melville and his party. Taking all things into consideration, I do not expect him before tomorrow night or Sunday morning; but though neither of these times are here yet, I cannot help the constant uneasiness which I experience. Henrietta Island was in plain sight all day, and we are assuredly closing in on it. Bearings of the south end, S. 52° W. (true), and of the north end S. 61° W (true) I fix our position today in latitude 77° 13′ N., longitude 158° 12′ E.; and by the change of bearing since May 24th I fix the south end of the island in latitude 77.8° N., longitude 157° 43′ E., and that makes it eight miles distant. Our drift since May 25th has been S. 74° W. nineteen miles.

We discovered this morning that the ice under the stern was domed up and cracked, and we came to the conclusion that the ship was trying to rise in her bed. To facilitate this operation, and to prevent too much strain being brought on her keel which prolongs under the rudder, the men were set to work digging away the ice. It was a tough job, for it is as hard as flint, and clings like an old and tried friend. Here and there the mark of the fibre of the wood shows in the attached ice, and in several places the oakum has been torn out of the seams when the ship has been raised a little.

We rig our quarter deck pumps for an hour today, and pump the ship out dry, getting up much of the dirty water which has been stagnant all winter, and of late has occasionally greeted our noses. By counting the number of strokes of our pumps and computing the work done, I find that our leak now amounts to 4,874 gallons a day, or about 203 gallons an hour.

The steward has gone back to duty today, to our great comfort. He seems quite recovered from his share of lead. Chipp is, however, set back again by an imprudent eating of raisins yesterday. Newcomb is terribly down in the mouth, and looks as woe-begone as possible. He has suffered considerably. Curious that so many of us feel no effects of "Lead in ours" as yet! And we are all on the same diet. I hope none of the traveling party have been afflicted, for assuredly they have enough to do for well men.

June 4th, Saturday.—With one thing and another a lively day. As a fog shut everything in after three p.m., I got our brass gun out and loaded it for a signal to our traveling party should they be within range. Before noon it was fairly clear and pleasant weather, and at eleven a.m. I had a fire made on the ice ahead of the ship, and with tar and oakum we made a good black smoke for an hour. About two p.m. I heard a shot,

and going out to see about it I learned that a bear had come up near the ship without being seen by the man on watch (a bright lookout on Dressler's part), and when Starr, who was astern, ran out to get a shot, his aim was so disturbed by his breathlessness that he missed, and away ran Bruin. Chase was given him, of course, and he was fired at; but alas! our 600 pounds of fresh meat escaped.

From Starr's account, he came up and looked at our few remaining dogs, and they looked at him without making a sign. Then Bruin walked to the nearest clothes-pole, deliberately used it to scratch his back and sides against, and then, seeing Starr, commenced to walk away. As he heard the bullet sing he quickened his pace to a run and (why prolong it) escaped. Our tar smoke, no doubt, attracted him. Fired the guns at four p.m. At eight p.m., with a good clearing, we could see nothing of the sledge party.

June 5th, Sunday.—At six a.m., Manson, the man on watch, informed me that the traveling party was in sight. Going out on deck, I could see the silk flag here and there appearing among the hummocks as the sled advanced through the ice. I ordered our colors to be shown, and the men to be turned out to receive the travelers, and then hastening out on the ice tried to fire the whale-gun as a signal to our people that they were seen. After failing once or twice, I left the gun in charge of the men who had come on deck, and came on board. As I reached the mainmast I heard a slight explosion, and, anxious to know whether it was our gun or a shot from the returning party, I was rushing up on the bridge, when crash! I got a terrible blow on the head. Forgetful of the windmill, in my anxiety for the travelers, I had rushed up in time to get a blow from one of its wings flying before a ten-mile wind. Stunned and confused I crawled back, while the blood sprinkled on the ladder and quarter deck, and the quartermaster ran toward me in alarm. Feeling that my head must be cut, I called the steward to get me some water in a basin, and when he came I told him to see what was wrong. He looked at my head, and exclaimed, "Oh my! great big hole!" upon which I concluded I wanted the doctor's opinion, loath as I was to disturb him and add to his already great care and anxiety. When Dr. Ambler came up in the cabin, I learned that I had my head cut open in a four-inch gash, etc. Stitching and plastering followed, and then I resumed my scrutiny of the returning party.

To my relief I could count six people, and all hands seemingly had come to a halt. As soon as possible, I sent out Mr. Cole and the starboard watch to meet them and help them in. At 8.50 A. M. along came the sled, drawn by the dogs and three of the six travelers. Melville and Sharvell had remained with the boat, and Mr. Dunbar was carried part way and walked part way, and reached the ship snow-blind. He was disabled at noon on the third day out, and led or carried thenceforth. Melville sent me the following message, on receipt of which I sent the port watch in Sweetman's charge with a spare sled, and, accompanied by the doctor, I went forward shortly after. By 9.40 A. M. I had them all on board, worn and tired, it is true, but no one disabled but Mr. Dunbar.

Melville's message:

10.30 A. M. I have just broken the sleigh runner, dismounted my boat, and am in the midst of a heavy jam of ice. Please send another sled at once. Landed on the island 5.10 P. M., third day out.

Respectfully,

MELVILLE.

To Lieutenant De Long, Commanding Jeannette.

The party landed on the island on Thursday, June 2d (Friday, June 3d), hoisted our silk flag, took possession of the island in the name of the Great Jehovak and the United States of America, and, agreeably to my orders, named it Henrietta Island. They build a cairn and placed within it the record which I send with them, and made as much examination of the island and search for vegetation as their limited stay would permit. The island is a desolate rock, surmounted by a snow-cap, which feeds several discharging glaciers on its east face. Dovekies, nesting in the face of the rock are the only signs of game. A little moss, some grass, and a handful of rock were brought back as trophies. The cliffs are inaccessible, because of their steepness. The ice between the ship and the island is something frightful. Road-digging, ferrying, and its attendant loading and unloading, arm-breaking hauls, and panic-stricken dogs made their journey a terribly severe one. Near the island the ice was all alive, and Melville left his boat and supplies, and carrying only a day's provisions and his instruments, at the risk of his life went through the terrible mass, actually dragging the dogs, which from fear refused to follow their human leaders. If this persistence on landing upon this island, in spite of the superhuman difficulties he encountered, is not reckoned a brave and meritorious action, it will not be from any failure on my part to make it known. I issued a general order communicating the names and positions of the two islands: Jeannette Island (our discovery of May 16th), in latitude N. 76° 47', longitude E. 158° 56'; and Henrietta Island (our discovery of May 24th), in latitude N. 77° 8', longitude E. 157° 43'; and in the evening I ordered a double ration of whiskey served out forward. At ten a.m. I read the Articles of War and inspected the ship, and at 1:30 p.m. I read divine service.

Thank God, we have at least landed upon a newly discovered part of this earth, and a perilous journey has been accomplished without disaster. It was a great risk, but it has resulted in some advantage.

July 11th, Monday, everything was advanced one and a half miles, and I was counting upon completing another three miles this day, when a lead was found open a quarter of a mile from our dinner camp. Every time I stopped before midnight I could hear the soft roar of water lapping against ice, and I was not much surprised when water was found close at hand. Turned to at 1.50 A.M., and advanced everything to the lead by 3.50. The opening had widened considerably, and several of them followed in close succession, requiring ferrying and bridging, and at 6.40 A.M., when we pitched camp, I am sorry to say we had advanced only two miles altogether instead of three.

While waiting for everything to come up to the first ferry, I was much struck with the unusual appearance of the clouds to the southwest, which gave more indications of water than anything we had yet seen. Calling Mr. Dunbar's attention to them, he expressed his opinion that such clouds did not hang over ice. Climbing to the top of a hummock twenty feet above the water-level, and examining carefully with a glass, I saw unmistakable land and water. It now appears that this was the land seen yesterday. At all events it is land, sure enough, and water, too. What it may be no one can say—whether newly discovered land, or (our longitude being out) some portion of Siberia. It can hardly be any one of the Liakhoff Islands.

Another pleasant feature is our course, southwest being a straight line to it. My change from south to southwest may therefore be a wise act, resulting in our speedier liberation. Judging by ordinary distances, I should say the land is ten to fifteen miles distant; and as I could see quite a large expanse of water, with long streams of detached ice, it may be that once at the margin of this ice-field through which we are now toiling we may have open water to the Siberian coast, thus verifying some part of the statement of Russian explorers. We have exploded so many theories of other people that it will be hard to make us believe that we can have left the ice behind us short of the Arctic circle.

One month ago today our ship went down, and I do not see any one the worse for the work that has fallen to us since. That it is hard work there can be no dispute. It is conceded by everybody to be the hardest work they ever did. The drag, drag, the slips and jerks, the sudden bringing up of the hauling belt across the chest, are fearfully trying; and the working with pickaxes through flinty ice makes every bone ache. From the looks of the weather at camping, I judge we are in for a southeast blow. The sky is overcast, a nasty fog shuts in everything. If we have a southeaster we may be blown miles to the northwest before we can get to this land or water.

Our cocoa and chocolate being exhausted (to my satisfaction, for I like neither), we commenced this evening (morning) on our tea,—one ounce per man is too much, and I shall reduce it to a half ounce. Pipe down at nine a.m. Men to stand watches of two hours. Called all hands at six p.m.; breakfast at seven for everybody but No. 1, and we were delayed until 7.20; occasionally the cooks get bothered with the stoves, and this was the case with our cook, Ericksen, this morning. Found the barometer had fallen to 29.55 at 38°, and the temperature risen to 35°. A thick fog shut in everything at short distances, but we had so much water around us that we seemed already to have reached the margin of the ice. Rain fell at six p.m. heavily, and the S.E. wind, which blew freshly during our sleep, was now only a moderate breeze from south southwest. At eight p.m. I took the dingy and went ahead to look at our prospects. So much fog prevailed that from the camp it was impossible to see the other side of the water around us. Just after I started rain fell again, but the wind shifted to southwest, and a clearing along the horizon indicated a change for the better. I found that in order to make any progress we must ferry our things down a lead about three hundred yards in length, and then drag them across in intervening floe piece to another lead which we must cross. Emptying the first and second cutters at nine p.m., they were made to serve as ferry boats. Hauling loose packages, tents, sleeping-bags, knapsacks, and even dogs and dog sleds was easy enough, but the loaded sleds gave much annoyance, lest improper managing should damage a boat. Using the first cutter alone for this purpose, and hauling one sled at a time over the stern, two trips were made, and then I took her and gave her the two remaining sleds to carry, one over the bow and one over the stern, while six of us got amidships to distribute

weight while we hauled her over. It was risky, I admit, but I did not want to lose the time which would be required to unload, load, and relash the four heavy sleds. I do not think, as it was, we made more than one quarter of a mile good when the arrival of—

July 12th, Tuesday, gave the signal of halting for dinner, which we ate at one a.m. The weather was sensibly colder, and the wind had veered to the west. The sun began to show brightly, and we could see for some distance. The ice ahead of us had all opened with the change of wind, and ferrying was the order of the day. Though not disagreeable work it is at times fearfully slow, particularly when no suitably sized pieces are at hand, and we have to take an island as long as a mail steamer, and seven to ten feet thick, for a ferry boat. However, over we went, traversed two floes one quarter of a mile each in extent, and, finally at 6:30 a.m., halted and camped on an island of ice five hundred years in diameter, and averaging ten feet in thickness, as the best camping place available. Our outlook was not encouraging. Lanes of water not large enough to help us, but wide enough to bother us, and some rough-looking ice lay before us for our next task. The wind had got to northwest and the weather was bright and sunny, but somewhat squally. Distance made good one and a half miles. Nothing could be seen of the land and water we saw yesterday. The southwest horizon was foggy. Many dovekies (guillemots) were seen, several gulls, one auk, and, strange to say, the doctor picked up a live butterfly, which I have preserved. This last is not an habitué of the ice, and was certainly blown from the land by the southeaster of yesterday, or by the southwester which followed it.

Supper at 7:30 a.m. Nobody under our conditions could write very fully all the occurrences of a day, and I am very glad before turning in each morning to remember even as much as I write. The hundred trials and difficulties in getting along, the heavy hauling, etc., are regular, and once mentioned need no repetition. No doubt, one of these days I can more satisfactorily describe our march over the frozen ocean, but just now these rough notes must suffice. Sounded in twenty-five fathoms; muddy bottom, rapid drift S.E. Piped down at nine a.m. Called all hands at six p.m., breakfasted at seven p.m.; fresh N.W. wind; barometer, 30.05 at 40°; thermometer, 31°; cloudy and foggy; under way at eight p.m. Immediately we had to ferry all our things across from the island on which we camped to the one alongside of it, and from there to adjoining ones, and at 12:30 a.m.,

July 13th, Wednesday, we had only made on half mile good, reaching then a strip of ice about a mile long. Halted for dinner, and at 1:50 went ahead again. Traversed this one mile piece, and then came to an opening about two hundred feet wide, separating us from an ice-island, which on the opposite side was near enough to a floe piece to make access easy. By great look there were three large cakes floating along this two hundred and a foot opening; we seized on them, dragged them into position for a bridge, and were thus able to proceed without much delay. Beyond them was a long, flat floe one half mile in extent northeast and southwest, and probably five miles northwest and southeast. As we only took so much of it as was on our course, the one half mile was all that we traversed, and at 6.35 A.M. halted and camped, satisfied that our one and three fourths miles were well made. While the boats were being brought up, Mr. Dunbar and I took the dingy and went down the lead at which our floe terminated, to see what it promised. It resulted in nothing except giving me a high hummock from which I could see well around me. I at once made up my mind that to go on our course tomorrow would be impossible. For not only did we have a fearful half mile of repeated ferryings before we reached good ice again, but the unloading of the boats, and a whole day, would be thus involved. By going across the lead due west we had a level floe running west southwest for two miles, which then connected with good ice, and would enable us to resume our course southwest. This I decided to be my plan of action on again breaking camp. Returning to our camping place I again saw the curious-looking clouds noticed in the southwest on the 11th, and looked anxiously for the same land and water then seen, but was disappointed. Shortly after Mr. Dunbar came to me and said he saw the open water. After some looking in vain, I at last saw it, with ice-streams in it, but no land, and judging from relative distances and my range of view, I think it was inside of eight miles southwest. The weather since midnight had been dull and gloomy. Large ponds, larger than any we had yet seen, were crossed, and more lay beyond us. These, and the remarkable looseness of the ice, led us to infer that we were near open water. As a good clear horizon would decide this question beyond doubt at any time, our foggy weather is all the more deplorable before camping.

And now occurred the first serious breach of discipline among the crew since our commissioning, over two years ago, and on the part of a man whose conduct has been so uniform beyond reproach as to make it the more surprising. It appears that Melville had placed a pair of soles in the stern of one of the boats, and the shaking of the boat in dragging had shifted them on the sleeping-bag of Ed. Starr (seaman). Upon halting to camp, Starr went to the boat, picked up the soles, and flung them some distance on the ice, in a temper. Melville informed him they belonged to him, and ordered Starr to pick them up, at the same time saying, "Don't do that again." To the order Staff paid no attention, but growled something about wet soles and his sleeping-bag, and he did not care whose they were. Hearing Melville repeating his order, and Starr making argumentative and sulky replies I went to the scene, and to my surprise found Starr showing no intention to pick up the soles, but continuing to speak in a surly and disrespectful manner. I at once ordered him to stop talking, and to obey Mr. Melville's order. He paid no attention to either order, but continued his rummaging in the boat; and his growl continued, "A nice place to put wet boot soles," etc., etc. And it was only upon my three or four times repeated order to pick up those soles that he did so. But to my order to keep silent he paid no obedience till he apparently had no more to say. I ordered him to stand up apart from everybody, and in a few moments asked him if he had anything to say in explanation of his conduct—disobedience of Mr. * * * repairs exceed our supply. I have already authorized the use of the leather from the dingy's oars, and this morning I had to have the leather cut off the first cutter's steering oar for patches. This leather will last longer than skin patches, it is true, but I hope the time is not far distant when I can have at least this one care and anxiety removed from my mind. Supper at 7:20 a.m. Piped down at nine a.m. Called all hands at six p.m. Breakfast at seven p.m. Moderate N.W. wind; weather dull and gloomy, with some fog. Under way at 8:15 p.m., some little time having been lost in harnessing up the dogs. Some of them, during our sleep, devoted themselves to eating the hide part of two harnesses carelessly placed within their reach. There were no less than eleven openings in the ice ahead of us before dinner, and we had to bridge and watch three of them. In momentary fear that all eleven might open and give us any amount of trouble, I hurried everything along with all speed, and I am satisfied that by one a.m. we had made a good mile and a half.

July 15th, Friday.—Before midnight the horizon to the northwest began to brighten, and there were indications of a clearing. The heavy masses of fog and clouds began to roll away, and occasional glimpses could be had of the sun and blue sky, with cirrocumulus clouds which seemed to me to be rising from the southeast. By midnight the sky was clearing also to the west and southwest, and I was beginning to peer around for our land and water, when I saw Aneguin ahead of me on a high hummock looking intently to the westward. Hastening forward, he showed me a long black streak on the western horizon, calling it an island. I looked, but saw what I called water, and so it proved upon getting my glasses. I saw the long, regular curve mentioned on the 13th, and, perhaps, the same seen on the 11th. I certainly think it is the open ocean. As from our elevation our horizon could not exceed six miles, I feel satisfied that the edge of the ice must be within that distance, and as the point of the land came down in the middle of the water it is equally evident that we shall come to the water before reaching the land. As the land now bears S. 60° W. magnetic (about W. by S. true) we have been drifting a long distance to the southeast, or else we are vey close to it, for a change of bearing of five points has occurred in fifty-two hours. We have not had wind enough during that time to make any very extensive drift, and our course has been steadily southwest. All things taken into consideration, therefore I assume that we are near land and water, and I decide upon resuming our march after dinner, to head W. by S. directly for both. During dinner (1.40 to 2.20) we saw the moon for the first time, I think, in two months, and what was more satisfactory we saw a seal in a lead near us, and Mr. Collins shot him, while the dingy this time got him before he sunk. Upon resuming the march at 2.20, therefore, we headed W. by S. (true), and I directed Mr. Dunbar to take Anequin with him and go ahead a prudent distance to see whether we were really approaching the open sea, without paying attention to the movements of the sleds. I was certain that Mr. Dunbar and Anequin could go three miles while we were advancing half a mile, and from this three miles a better view could be obtained, and a more correct opinion formed as to its remoteness. If the water were only six miles off, going three miles toward it would permit a very accurate estimate of the remaining distance. Mr. Dunbar carried a rifle and ammunition and some pemmican.

By 5.50 A. M. we had advanced everything three quarters of a mile, and then had come to a smooth place for camping, the only suitable place except one at a much greater distance than I thought we could make in reasonable time. Camped therefore and very fortunately, for no sooner were the tents pitched than it commenced to rain steadily.

The wind had backed to west northwest, the sky had become covered with clouds generally in north and south lines.

The seal comes in splendidly for two things,—food, and grease for our leaking boots. Before camping I had Iversen break off from boat-hauling, and set to work on the preparation of pussy. Removing the backbone and blubber the meat was cut up into small pieces for convenience in stewing, and the amount, twenty lbs., proportionally divided among the five tents. A similar division was made of the blubber, so that I am sure each man got his share for his food and for greasing his boots. Extra alcohol for cooking (2 oz. of salt), and a potful of broken bread to each tent,—seemed to promise a good supper. At 7.15 A. M. we sat down in No. 1 tent to a simply delicious repast. After our long diet of pemmican the change alone was a luxury. We did not stand upon our ship ideas of hanging the seal up until the animal heat had departed, or keeping it for a few days. The seal was shot at 2.30, skinned at four, and eaten at seven, and we feel as if we had dined at Delmonico's. Our seven thirty-thirds of twenty lbs. were cut up in small lumps, boiled in water, three and one half ounces Liebig added, one pint bread crumbs added to that, and salt to the extent of one ounce, and for a feast I shall long remember it. No. 4 tried to fry their six thirty-thirds, and so very successfully that Melville says the taste was like fried oysters!

At 7:30 Mr. Dunbar and Aneguin returned, and I was informed of the result of their journey. They went about three and one half miles, and Mr. Dunbar says he thinks they were half way to the open water. He was raising it very fast, but the land remained as distant as ever,—that is, he could see nothing but the faint snow curve which we have seen all along. Evidently, then, the land is distant, and may be, after all, one of the Liakhoff Islands. But I thank God that our chances seem so good for a speedy getting afloat, and thus rendering comparatively easy our access to it. Piped down at nine A.M. Called all hands at six P.M.

Weather, curiously enough, bright and pleasant, though from the temperature (34° in the sun) one would expect our customary fog.

Under way at eight P.M. Had "a rocky road" ahead of us with some digging, and, though we crossed several leads, but one bridging had to be done.

CHAPTER XIV.—BENNETT ISLAND

16 July—5 August, 1881.

Nearer View of the Island.—A Narrow Escape from Drowning.—Open Water in Various Directions.—Crimson Snow.—Perplexing Views of the Island.—Land or Water?—Making for the Land.—Impassable Roads.—Needle Ice.—Walrus.—Rotten Ice.—Confusion of the Moving Ice.—Clear Weather and New Views.—Recourse to Boats.—Fearful Work.—The Constant Change of the Ice.—Drifting Away from the Island.—How Relief is called.—Sudden Discovery of a Cliff.—A Rush for the Island.—A Terrible Landing.—Taking Possession of Bennett Island.—Plan of Operation.—Assignment of Work.—Geological Foundation of the Island.—Tidal Observations.—Reconnoissance by Mr. Dunbar.—Coal on the Island.—Mr. Chipp sent on an Expedition.—Return of Mr. Dunbar.—His Report.—Disagreeable Weather.—Return of Mr. Chipp.—Record made for Deposit.—The Cold Storm.—Shooting of Dogs.

July 16th, Saturday.—By 12:30 a.m. we had made a good mile from our camp, and halted for dinner. The weather continued bright and pleasant, and a few cirrus clouds were all that could be observed. The island shows more plainly than yesterday, but no water could be seen. At two a.m. resumed our march, and advanced everything another good half a mile by 5:30 a.m. Here there was but a poor place to camp, and, as I was closely occupied with getting sights, I sent Mr. Dunbar ahead to choose a place. He informed me that a quarter of a mile ahead there was a good place, and that, though there had been several leads open, they were not closed, and we might sled right over. I gave the order, therefore, to go ahead, and returned to my work of a Sumner. As I have to carry my instrument box on a dog sled, my movements and those of the sled do not correspond, and I generally have to send to the rear to get my box brought up, and keep by it during the interval between sights to prevent it getting out of my reach. Mr. Dunbar had gone ahead to get a good hummock to look for the water. Much time elapsed without Melville coming back for the second fleet, and I could not understand why. Finally I rushed ahead, with my sextant in one hand and my artificial horizon in the other, and at least found the cause of the delay; the ice had opened again, and left us in a fearful mess. The dog sleds had got over and discharged, but could not get back, and Melville was trying to get his two sleds out of the snarl in which he found himself. I saw we were in for a time, and so it was; for not until nine a.m. did we get all our traps into camp, requiring three hours for what we expected to do in one. However, we are consoled, for Mr. Collins shot a seal meanwhile, the dingy got him, and we have another luxurious supper ahead.

Previous to getting sights, I had a mishap which was annoying. Going to the top of a hummock to take a look at the land, Mr. Dunbar and I had to go out of the road and jump some rather wide openings. Going was all right, but jumping across a four foot opening the ice broke under me as I jumped, and I went into the water up to my neck. My clothes held me up for a moment, and Mr. Dunbar grabbed be by the hood, as he thought, but by the whiskers principally, as I realized, for he nearly took my head off. My knapsack was away to the fear, and I sent Johnson back for it when I reached the dingy. However, I soon got dry clothes on, and, thanks to the bright sun, my wet ones were soon drying. By capsizing of a dog sled we lost 270 pounds of pemmican. Mr. Newcomb shot a bird new to us,—a Mollemokki. The event of the day, however, was the seal,—a fine, large, fat one, giving us food and boot grease. Not much less in importance was the appearance of a walrus,—the first one seen by us in a very, very long time. Though fired at and hit by Mr. Collins and Nindemann, he remained under water finally after many reappearances.

The land showed somewhat plainly today, but I could see no water. Mr. Dunbar thinks he saw it, about seven a.m., to the left of the land, but I do not think he was right.

Supper at 10.15 a.m. Our seal was simply delicious. As it was so late (11:05) when we had finished supper, I concluded to sit up for a meridian altitude, which, when obtained, gave me 76° 41' N. for our latitude, agreeing fairly with my Sumner, roughly plotted as it was. I shall now work my first sight over, with this correct latitude, and see our exact position.

As we have started the lashings of No. 1 sled, and as, in anticipation of rough roads ahead, I have concluded to lighten its load anyhow, we have some work ahead of us before our next march, and shall probably make a late start; I therefore, on piping down at 11.15, ordered all hands to be called at eight p.m. Wind light northwest; barometer 30.40 at 40°; thermometer 31°; sky beginning to cover with cirrus and cirro-cumulus clouds.

Called all hands at eight p.m.; light west breeze, overcast sky; breakfasted at nine p.m. Chipp was discharged from the sick-list and returned to duty. This relieves Melville, who now takes charge of the road and bridge making, in place of the doctor, who now becomes a reserve.

Set to work repairing and lightening Nos. 1 and 2 sleds. Sent Mr. Dunbar ahead to flag out, and upon his return he told me he had seen the water. I now was able to see it from a hummock alongside the camp, and it was to the right of the island. The island itself was much plainer in sight than ever. I am again in hopes that we have made another discovery.

Working my longitude over with correct latitude, I find we are in 76°41'N., and 153°30'E. Soundings, twenty-three fathoms—mud.

The brings me along to—

July 17th, Sunday, upon the arrival of which we promptly sat down to dinner. Turned to at one a.m., and started ahead, leaving Mr. Cole and a sled crew to finish lashing and bring No. 4 sled. At two hundred yards from camp we had some bridging to do, and five hundred yards further some more serious. However, Melville managed it well, and Chipp lost no time in jumping things across, and we finally reached a stretch of hard ice, over which we could make good time, so that, by 6.45 a.m., I am satisfied we had made one and a half miles good. We then halted and camped.

During our march, from the top of a hummock we saw the water to the right and left of the island, and on the right, through spaces between hummocks, we could see it continue for a short distance. Believing we were close to it Mr. Dunbar went ahead one and a half of his miles, and kept raising the water very fast. From his turning point, he says he thinks the water about twice as far as he went, making its distance four and a half miles. After he returned we advanced half a mile more, so that, upon camping, we ought not to be more than four miles off. The land seemed as distant as ever. He says the ice is very much better, much of it being smooth and of last winter's growth, and thinks in two days we can reach the water. But we shall see.

To-day I saw some faint "crimson snow" and several pieces of muddy ice. A very curious seal trick came to light by my breaking through the ice. He had two holes leading from the sea connected by a covered way under the snow and thin crust. I suppose it was to give him a resort in case a bear headed him off. On the ice, by one hole, was a cavity in which the seal had lain and rubbed the shedding hair off his skin.

Supper at 7.45 a.m. Divine service at 8.30. Piped down at nine. Called all hands at six p.m.; breakfasted at seven p.m. Under way at eight p.m. About one quarter of a mile from the camp we came to our first opening in the ice, which, simple enough for the leading dog sled, became very difficult for the heavy sleds and boats, because of a sudden widening. Two other leads beyond widened also, and altogether we had a very delicate amount of work, requiring much care and attention.

Anxious to see what Mr. Dunbar saw before camping, I hastened forward with him to the same high ridge at which he stopped, and which commanded a good view. Here, to my unpleasant surprise, I could see land enough, but no water; and though Mr. Dunbar averred he could see water with streaks of ice in it, I felt inclined to think it was an effect of refraction. After undergoing many kaleidoscopic changes, I began to believe it had settled into land and water, both. The whole back curve remained as a dim outline, but lower down there were apparently dark cliffs and snow patches, but infinitely less distinct and regular. The more I looked the more confused I became, and Mr. Dunbar was nonplussed. At one time I was ready to declare that nothing but ice extended to the land; at another, that the land was very distant, and that we were near an open ocean, with pieces of drifting ice; and again, that mirage had raised and inverted ice hummocks and small peaks, and that there was neither land nor water. This last I abandoned, however, because the light curve above had been too often seen and too well maintained its regularity to be an effect of refraction. I sat and studied this thing for an hour, watching every change carefully with a glass, and I finally made up my mind that part of the dark looking mass was land, but that the lower strata was certainly water. I decided, however, to send Dunbar and the doctor ahead after dinner, to look nearer and speak more surely. Turning back to see what kept Chipp and the boats behind, I learned of the serious ice-openings, and, having got everything advanced a good three quarters of a mile since breaking camp, I halted at midnight and prepared for dinner. Just then Mr. Collins called out to me, "Captain, is that land or water?" Looking south, where he pointed, behold there were some more uncertainties. Was this land or water? If land, then we had seen no water west. If water, then our only land west was the faint curve drawn above and very distant. I was fairly staggered, and Mr. Dunbar looked as if he had been dropped from the clouds. It was a confusing moment to me. The south appearance indicated much greater distance, and if I made for it a S.E. wind might spring up and drift me away from it faster than I could go toward it, and I might, by going to the westward, reach the land or water before a southeaster set me away from it. I decided to await the result of the trip of Dunbar and the doctor.

July 18th, Monday.—At 12:50 a.m. ahead went those two gentlemen, and at 1:15 a.m. we moved along with our effects. After crossing two small leads we struck a long piece—two miles—of smooth ice, made last winter, and got along splendidly. Next to the smooth ice was a long floe of hard, older ice (two miles), and I was beginning to contemplate a good day's work when some unexpected openings occurred among the last winter's ice and threw us back somewhat, and, in consequence, when I halted and camped on the old ice at 5:40 a.m., I think we had barely made two miles good since our breakfast.

The weather had remained pleasant. The sun was frequently obscured, and enabled us to dispense from time to time with our snow-glasses, to the great relief of many who have difficulty in wearing them. Light west airs, the clouds having a slow motion from that direction.

At six a.m. the doctor and Mr. Dunbar returned. They had gone, they thought, four miles ahead of our dinner-camp, and from there had concluded they saw no water at all, but all land; and, though they could form no estimate of the distance of the land, they thought the ice extended to its base. This is slightly different from the "open water in two days," but it cannot be helped. After mature consideration, I have decided to keep on heading for the land for several days yet. From the manner in which we have raised it in two days, I hope it is less distant than supposed; and, as the appearance south can no longer be seen, it is evident that the land west is the nearer, Chipp says he saw a similar appearance north this morning.

If we can get on this land, we shall, at all events, know that we are stationary, and that the wind will not carry us around aimlessly. Unless the Liakhoff Islands are incorrectly charted, this land is not one of them, for the northern point on the chart is still south of west considerably of our position on the 16th. If there ever was open water north of these liakhoff Islands, as stated by Wrangel, Anjou, and Hedenstrom, we may get to it from the south side of this land. "A bird in the hand is worth two in the bush," and I will head for what I can plainly see, instead of bearing away across a shifting sea of ice for something which I cannot see.

Supper at 6:30 a.m. Piped down at nine a.m. Called all hands at six p.m. Breakfasted at seven p.m. Bright and absolutely cloudless. Thermometer 31°. Temperature inside tent No. 6, 48.5°. Under way at eight p.m., and immediately had a stretch of three fourths of a mile, over good ice, bringing up at a lead two hundred years wide. In this we secured a large floe piece, and having everything on it by 10.15 p.m., we ferried across. Then we had a mile of splendid going over smooth ice, and when we halted for dinner at 12.30 a.m.,—

July 19th, Tuesday, I am sure we had made one and three fourths miles good, over a west and north (true) course. The weather bright and sunny, a few cirrocumulus clouds only having appeared in the northeast. The wind remained at south, and seemed inclined to freshen. The land was in plain sight, and though I was so puzzled yesterday, I am not satisfied yet that there is no water.

Turned to at 1.50 a.m. and went ahead. For two miles we had a good road, and then we came to a fearful mess of small ice lumps and water, with a rare large block. It was the kind of ice over which one might walk, but dragging anything was out of the question, while a boat would be knocked to pieces. Some fearful disturbance has occurred here at some time or other, and huge blocks have been reared up on end, and at all angles. Traveling looks something like this:—

In vain I climbed up several large hummocks and kept Mr. Dunbar running around in quest of a better place for crossing. Melville had already commenced the herculean task of digging away some of these huge slabs to level a road, in case we could manage the water-gaps, which seemed almost impossible, when the doctor said he had seen what he thought a better way of crossing farther to the northward. We hastened to the spot, and by some work and management, I think we can get across this mess and on the level ice beyond. But it was now six a.m. and our usual supper time and we had made mearly four miles. The work of crossing would probably require three hours; so, instead of continuing at once, I decided to get supper first and proceed afterwards. I am too anxious to leave this mess behind us, to camp on this side of it, and though we have made a good three and one fourth miles already, I must kept the men at it for a little while longer. The barometer is falling rapidly, 29.95 at 44°, and though the temperature is 31°, I anticipate a S.E wind, and do not want to lose the grip I almost feel I have on the land.

The action of the ice in formation is nicely shown by blocks of wasted (needle) ice, which we pick up and can pull in pieces. The doctor called my attention today to the distinct manner in which the hexagonal prisms were visible, and the vacuole, as well as the lines of successive freezing. The formation is like that of muriate of ammonia, or the basaltic columns in Fingal's Cave. The blocks can be easily separated, flake by flake, vertically and at each freezing line horizontally. (See Appendix G.)

By 7.20 a.m. everything was up to the edge of the rotten pack, and we sat down as soon as possible to supper. The sky remained nearly cloudless, and the sun shone brightly. As everybody was complaining of the heat, I exposed a thermometer to the sun, getting 35°. At 8:40 a.m. turned to and set to work, and from this time to three p.m. we had the hardest time we have had yet. Such a mess of loose cakes, rotten ice, water holes, and pack ice I have never seen. We tried everything, bridging, road-making, and finally, by means of rope, to join the moving mass together. Everything succeeded for a few moments, and then came to nothing; and it was only by rushes and jumps and risks that we got everything on solid ice and camped,—four and a quarter miles good. Towards noon clouds rose rapidly from the southward, and covered the sky so as to prevent my getting a latitude, which I very much desired. Called all hands at eleven p.m., and at midnight sat down to breakfast. Soundings in twenty-two and one half fathoms

July 20th, Wednesday.—Hard as our work was last night I congratulate myself that it was not left till this morning, for we have a thick fog, which would have made our task an impossibility. Temperature 27°, due to the evaporation, for the pools on the ice show not the slightest sign of freezing. Found Foxy dead in the water. He probably had a fit and fell in.

Got under way at 1:30 a.m., and though our work was not so difficult as yesterday, it was still sufficiently trying, and by the time we had succeeded in getting all our things across the one half mile intervening between the hard ice on which we camped and the long level plain beyond, it was six a.m. and I decided to go no further. Tents were accordingly pitched and preparations made for supper. While loading the first detachment of sleds on a cake of ice for ferrying, we were surprised by seeing a walrus come up alongside us, and apparently intent upon getting on our cake too. Mr. Collins hurried along with his gun and fired at him, hitting him near the eye. Down went the walrus, and we thought we had seen the last of him. Soon after, however, we heard a sound of hard "blowing" to the northward of us, among the fearful mess of broken ice, and looking along in that direction, we could see large patches of blood on the ice where it had been ejected in breathing. The doctor at once set out on the hard ice to the west, and Mr. Collins on that to the east, while I sent Mr. Dunbar along to the scene. Soon I heard a shot and a cry for a rope, and then four more shots, and, in five, we killed him and secured the game.

While the doctor was firing at him the walrus was in the water, and, no doubt, if he had been killed at once he would have sunk, but while stunned for moment, Mr. Dunbar cut a hole in a flipper with a knife, and rove in it the doctor's belt, and then one more shot finished him. We hauled him down to camp. He was a young bull, from 1,200 to 1,500 pounds in weight,—more meat than we and the dogs can eat under the circumstances. The choice parts, tenderloin, sirloin, heart, liver, brain, and flippers, will more than suffice for three meals for us, and the dogs may eat all day if they like. The skin will be cut up into pieces and divided for boot soles. The tusks go to Mr. Collins, one of which he gave to the doctor. In the walrus's stomache there were shrimps and small fish like smelt, and numerous sea anemones or sea cucumbers(?).

Fog cleared away about four A.M., but weather remained cloudy and dull. No land in sight up to seven A.M.

We found our walrus stew excellent. It was not as good as stew, the meat being coarser and not so sweet. We shall repeat for breakfast, and carry as much as we can conveniently in the dingy. Piped down at nine a.m. Called all hands at six p.m. Nothing visible on account of fog.

Breakfast should have been ready at seven p.m., but as both our supper and breakfast were cooked by burning blubber, much longer time was required, and it was not until 7.45 that we in No. 1 sat down to our meal. The saving in alcohol has been effected at the expense of time.

Under way at 8.30 p.m., and after advancing three quarters of a mile over our course, W. and S. (magnetic) we came to a broken and confused mass of water and ice, much resembling our recent serious experience, and here I halted the leading sleds. Two of our McClintock sleds had received some hard usage in our troublous trip over the "mess" on the 19th, and needed relashing, and the dingy sled was cripped, one runner being doubled under entirely. Ericksen's dog sled was also hors de combat, and much work was thus in readiness for Sweetman. This delayed us considerably, for I could not attempt to cross the rotten and ugly mess before us with crippled sleds, and I dared not leave anything behind me.

At eleven p.m. the wind had got to N. E. and commenced to blow. Rain fell also, and seemed likely to fall for some time. The ice in the opening (one quarter of a mile of lumps, hummocks and floebergs) commenced moving, and I began to fear it was now impossible to cross. Altogether it was a dreary prospect. Everybody was getting wet. We could not advance over a living, moving, rotting pack, and the increasing wind promised a gale. So I concluded to pitch the tents where we were, as a shelter, and get dinner.

July 21st, Thursday.—At one a.m. the tents came along, and the cooking stoves, and while the cooks pitched camp and prepared dinner, Chipp took the rest of the men back and brought forward the dingy, with walrus meat enough for supper. At two a.m. dinner was ready, alcohol being used as fuel. Rain still continued in squalls, and the ice in front of us was moving before the moderate northeast gale. Clearly this was a case of a lost day, and I accepted the situation.

At 5:30 a.m. the land showed quite plainly between W.S.W. and a half W., and W. by N. Soundings in twenty-two fathoms, and a rapid drift W.S.W. (two points to right of leeward). Supper at seven a.m., and as our bags were the most comfortable things we had at one disposal, we in No. 1 crawled into them at eight a.m. Piped down at nine a.m. During the sleeping time the wind tore around our tents in fierce gusts, threatening to pull them out and whirl them away. Rain fell from time to time. Called all hands at six p.m. Breakfasted at seven p.m. Ice still moving in the lead. Land in plain sight, and much nearer too, extending from S. 87° W. to N. 56° W., both magnetic. Wind strong from east, but moderating somewhat.

The confusion before us was such that I dared not risk trying to cross anything. Large blocks, small lumps, and floebergs were moving along to the southward, and occasionally a large piece, seemingly free, would suddenly be shot up in the air as it was squeezed by larger ones, or its submerged portions became freed from overriding masses. If one of our sleds had been caught in such a predicament, or one of our boats, the result would not be doubtful. The wind seemed inclined to freshen again, and going ahead was out of the question. A quarter of a mile of this living, moving ice would hold a Goliath back.

Looking further north we saw the most promising place yet, which seemingly offered an easy transit across the narrowest part of this ice channel. Sending Mr. Dunbar ahead to pick out the road, I hurried back to bring up the sleds, and at 9:35 P.M. we commenced our first forward movement. Some little pickaxe work gave us a fairly good road, though three jams were threatening to relax and leave water gaps every movement. In fact, hardly had we got the boats through than one of them opened. Meanwhile, a cold fog had shut us in and hidden the island from our sight.

July 22d, Friday.—As but one sled or one boat could be hauled at one time through the passageway above described, it was one A.M. before our last boat was through, and we halted for dinner. We were on a good piece of hard ice, lumpy, but giving fair traveling. This was separated from a much larger piece of hard, old, smooth ice by another ugly mess, which we could get over if it held together; but it was threatening to open at any moment.

Before dinner I had sent Melville forward to cut a road, which was done, and by great good fortune at 2:20 A.M., when we turned to, we got everything through without trouble. Before us there lay a mile of excellent going, which we took so well that at 5.45 A.M., when I pitched camp, I felt satisfied that two miles might be scored as made good from our starting-point at 9:35 P.M. yesterday.

Dunbar and I had gone half a mile further ahead on hard, smooth ice (after passing a ridge at which we camped), and were then brought to a stand by some more confused mess, across and beyond which the fog prevented us from seeing. Though we might have gone as far as this before camping, I preferred to have a clear stretch at first for our next move, hoping to see the land meanwhile, and perhaps change our course to more favorable ice. Saw several murres, one loon, and many gulls. Walrus meat again for supper, and then, except his flippers, we have eaten all the choice parts. Our dogs have literally gorged themselves on the remainder, and some of them are too fat for comfort.

We are, thank heaven, rid of the wet, slushy travel which tried us so long. So many holes have been made through the ice, either old seal-holes or places where mud had collected, that the surface snow in melting has drained off, leaving good, fine, hard traveling. Our only enemy now is an ice-opening, and unfortunately this occurs frequently.

Piped down at nine a.m.; called all hands at six p.m. The sun shining brightly, though much fog around the horizon prevented us from seeing the land. Under way at 8:10 p.m., and made good time over the mile of smooth ice which lay before us. At the end of this mile we came to some trouble; a mess of loose pack, fifty feet in width, and some rough ice beyond, separated us from hard ice one quarter of a mile distant. However, we made a flying bridge, or ferry rather, and by 12:10 a.m.,

July 23d, Saturday, had everything across in safety on the hard ice, and halted for dinner. Turned to at 1:20 a.m. and went ahead. The fog seemed inclined to lift, and we could see a point showing which, from its bearing N.40° W. (magnetic), I judged to be the point which yesterday bore N. 56° W. (magnetic). Shaped a course to carry us to the left of it. We came to some good hard ice again after crossing one bad mess, and I hurried along a good mile and a half to a high ridge, to watch with Mr. Dunbar the reappearance of the land. Upon the ridge we began to see a headland working out from the fog, and bearing N. 84° W. (magnetic), and apparently good ice leading to it. Almost calm at four. At 5:40 a.m. halted and camped, having, I consider, made an advance of two and a half miles west northwest since breaking camp yesterday evening.

The fog now almost uncovered the island and enabled me to determine that the land was one island and not two, as I for some time supposed. The bearings of its extreme points were S. 82° W. and N. 27° W., both magnetic. Other bearings will appear in the sketch which I have directed Mr. Collins to make. I do not think it is now five miles distant, and a long, low point of land, sloping to the ice. I think somewhat nearer. Magnificant weather, calm and cloudless, save for a few streaks of cirro-stratus clouds. Sufficient mist and fog rest over the top of the land to hide whatever is in the background; but several have said they saw high rolling land back from the cliffs, which are shown in the sketch. Broiling hot sun, though the thermometer reads 27°. Got a Sumner, and determined our position to be in latitude N. 76°40', longitude E. 151°25', a change of position since the 16th of twenty-eight and a half miles to S. 88° W. Soundings, twenty and a half fathoms; rapid drift to westward.

Piped down at nine a.m., but I remained up until noon to get a meridian altitude; latitude resulting 76°39'15". So my Sumner was very nearly exact. In fact we are drawing in so rapidly upon the land all the time that I dare say my Sumner is quite exact. Called all hands at six p.m.; under way at eight p.m. Bright, nearly cloudless weather; an appearance of land to the southwest.

Before getting under way got fresh bearings. The extreme points were found to bear as follows: S. 87° W. and N. 18° W., both magnetic, and the low point at which I headed, west (magnetic). Though the weather was bright and pleasant, a fogbank was in the eastern horizon and threatened to advance upon us. In order to give this new island a chance to see the "Stars and Stripes" before the fog shut in, our colors were displayed.

For one and three quarters of a mile we advanced over a good road, and then came to an opening with large and small blocks of ice, but yet water enough to permit a ferry. The ice was all in motion, and as everything might change favorably before we were

ready to cross, no useless labor was indulged in by getting ready bridges or ferrying pieces. At 11:50 p.m. all our sleds and boats were up. At ten the fog had covered us and shut in the land, while an easterly breeze sprang up that changed our sensations from those of uncomfortable heat to those of uncomfortable cold, though probably the temperature remained unchanged.

July 24th, Sunday.—At 12.20 a.m. we sat down to dinner by the opened ice. Some little excitement was created by the appearance of a seal, which Mr. Collins killed; but it sank before the dingy could reach it, and thus our luxurious supper faded away. At 12.50 a.m. turned to; the ice had been alternately moving east and west during dinner, but had now subsided, leaving a lane fifty yards wide of clear water between us and a neighboring hard floe. I at once decided this to be a case for floating boats, and as soon as I had run a line across in the dingy, and Mr. Dunbar had secured its end, the boats were in turn drawn over. The first cutter upon arrival was emptied, and used to ferry dogs, dog sleds, and loose packages, and in one and a quarter hours everything was across, then we proceeded for a short distance three quarters of a mile, and were again confronted by an ice freshet. Large blocks were being swirled around and carried first west and then east; leads were opening and closing every moment; water lanes opened now, where a moment before a good road appeared, and such a state of activity as we have not before seen. Beyond this lay a stretch of good hard ice, and better than that a lead of water on our course west (magnetic), and fifty to one hundred feet wide, while extending as far as the fog would permit us to see, which, it is true, was not far. But the sliding, shifting mess, before alluded to, bothered us exceedingly; though there were three dog-sled trips for each sled, and four trips for the men, a new way had to be found each time, going and returning, and it was not until 6.40 a.m. we got all things over and camped. Mr. Collins, however, at 6.30 shot a seal, and we know that to-morrow we shall have a seal for supper. The land showed just once, about 5 a.m., and we are seemingly quite close to our point. It still bears west, but hardly had we seen it than down shut the fog thicker than ever.

Supper at 7.30. Divine service at 8.30. Piped down at nine a.m. Immediately after a cry was raised "a bear," and away rushed three or four in pursuit. We soon heard two shots, but at 9.45 a.m. all returned without any game. The natives fired at about one thousand yards, but rather wildly, I imagine. Bruin is described as not very large, (sour grapes?) and of a dirty brown color.

As I was very tired upon turning in, I at first slept very soundly; but towards morning (i.e. evening) I became wakeful. During one of these breaks, I heard two shots fired at some distance. Supposing it to be another wild goose chase, I paid no attention to it, and resumed my sleep; but at six p.m., when Mr. Cole called all hands, I learned that at four p.m. Görtz had killed a bear. Bruin came within five hundred yards of the camp, and Görtz crawled within one hundred yards of him unnoticed, and planted his two bullets with good results.

Fog still continues. Light airs from east. Temperature 28°. What lovely weather for the last week in July! Breakfast at seven p.m. Under way at eight p.m. Start fleet where lead bent to West. Go down it in dingy. Lead closes. Much trouble. Strike hard ice finally, but much difficulty in getting gear up to it. Succeed by 12.45 a.m.

July 25th, Monday.—Sent Dunbar ahead, across an ugly mess. He and doctor go together. Strike hard ice, and at its edge they see low point, through fog, one eighth mile distant, bearing west. Turn to at 1:45 a.m. Very ugly time crossing mess. Little or nothing accomplished in distance by six a.m., our usual supper time. Conclude to work all night. Land suddenly shows plainly, and we seem about one mile from it. Moss plainly seen on the face of the cliffs. Go ahead at eight a.m., and from that time to noon, frightful work: ice opening, swirling, swinging us off from land, separating our things in spite of us. Rain sets in and continues in showers. Get our things together and dine at 12:45 p.m. Getting our reckoning straight at the expense of rest. Under canvas to avoid rain. Apparently we are drawing into a bay making an indentation on south side of island. Rain ceases. Turn to at two p.m.; go ahead. Simply fearful work which I can never forget, and ending at six p.m. in a fog which hid everything. Got on a piece of good ice and pitched camp. Bear meat for supper. Twenty-four hours since we commenced work. Wind S.E. Temperature 30.5°. Tired, cold, wet, hungry, sleepy, disappointed, and disgusted; but ready to tackle it again to-morrow. Piped down at nine p.m. This affords me a chance to return to our natural way of living, working by day and sleeping at night.

July 26th, Tuesday.—during the night I was frequently awake, and could hear the wind getting up, and occasionally the rain pattered down. As I gave everybody a good long rest, it was eight a.m. before all hands were called. I then found a northeast gale blowing, a thick fog, and only unsatisfactory glimpses of the land now and then obtainable. The ice to the eastward of us was all in motion, and much water and drift-ice pieces lay between us and the land. Several of the watch declared that during the night, when they saw the land, it was much nearer than when we camped; and Mr. Collins, who turned out during the night, said we were in front of the valley, and he could see clear water between us and an ice-foot, or strip of ice next the land. The situation I think is as follows:—

I think we are far enough under the lee of the point east to escape drifting with the ice pressing down along the island, and passing the point east, even if we are not in an eddy so created, and thus pushed in closer to the land. As nothing can be seen clearly, it would be folly to move into a probably endless confusion, and I shall therefore wait until some plan can be safely carried out.

I do not think I shall ever forget yesterday. Such a time of difficulty and vexation can be experienced nowhere else. Such a shifting of ice and opening of leads! Hardly had we commenced to move our things along what seemed a fair road, than the road broke up; ice broke under us, ice slid away from us, ice moved to the right, when we wanted to go to the left, and vice versa, and each installment of provisions got safely across was considered by me as barely rescued from destruction. And all this time the land, not one half mile off, was tempting us by its solidity, and appealing to our desire for rest by its moss-covered hills and slopes. At eight a.m. yesterday, when we concluded to go on, and worked for twenty-four hours, so many good roads, each leading seemingly directly on shore, presented themselves, that I was embarrassed in a choice. In fifteen minutes they had fallen to pieces, and became puzzling masses of ice and water. There was no question that when I gave it up at six p.m., everybody was used up, and could not possibly have gone further. Everybody was wet up to his knees, stiff legs and cramps annoyed us until we had been an hour or two in our bags, and we were too tired, in fact, to get the rest we stood so much in need of. However, we are all right again this morning, and none the worse off, better off, in fact, for if we had not put in the twenty-four hours in full, we should have been out in the heavy drift ice, and probably miles away from the land by the time this gale is over.

At noon the fog broke away and showed the land for a few moments. We were exactly as I had supposed and indicated by the sketch on the preceding page. The pressure of the ice in swinging off the east point has backed us in toward the bay, and between our floe and the land there is about two miles of water nearly clear of ice. Jammed against our floe are a number of large blocks and hummocks, offering serious difficulty to any attempt to launch our boats. On the off side of these hummocks the sea is breaking considerably. The wind tears around us in fierce gusts. No. 6 tent has been twice blown down. We shall see what the state of affairs is after dinner. Dined at 12:30 p.m. luxuriously on bear stew.

By 1:30 the land was again in fog, and otherwise the situation was as before. My desire was to go ahead, but prudence told me to wait until the weather moderated. The barometer is still falling, the rain beats down from time to time, and nothing can be seen through the fog. I decide to wait for an improvement, and then I shall push on in the second cutter and try to land some provisions.

Soundings in thirteen fathoms; no drift indicated. Our ice is evidently jammed tight. Probably at the first chance the loose hummocks now pressing against it will slack off and leave us place to launch our boats, even if our floe piece does not go bodily in toward the land.

During the afternoon the ice scene was constantly changing. At one moment ice seemed to reach from our floe to the land; at another time lanes of water were seen, and once our floe was left as an island, while it would have been possible to launch a boat and reach the shore. I confess I was tempted to try it, but I realized that the whaleboat could carry nothing more than her crew safely until her garboards were repaired, and that it would take six or seven trips of the two other boats to carry our efforts. The whaleboat has leaked badly each time she has been floated, and the weather to-day (the first chance for repairs) has been such that Sweetman could not handle his tools. Before I could have got one boat in the water ice shoved in between us and the land, and we were once more helpless. It seems as if Providence were directing our movements, for the floe upon which we camped last night is the only large piece of ice to be seen; all else is confusion and trouble. Had I gone farther, or stopped short of this place, it is hard to say where we should be now.

We are moving west slowly, about a mile or a mile and a half from the land, and are now (seven p.m.) abreast a large glacier, whose broken edge (it may be twenty feet high) we can see with a glass. I have watched carefully all day for a landing-place, but not one has shown. The coast is either steep cliff or glacier, and neither is a successful landing-place. The barometer is now at a stand,—I think 29.63 at 33°,—and, though rain is occassionally falling, and the

sky is dark and threatening where the fog does not hide it altogether, I am in hopes the weather will improve during the night. Supper (bear stew) at six p.m. Piped down at nine.

July 27th, Wednesday.—Called all hands at six. Breakfasted at seven. The wind has veered to E., and is dying away. A thick fog continues, hiding everything fifty yards distant. The barometer is rising,—29.67 at 36°, the temperature is 28.5°, from which two things I anticipate clearing weather. Meanwhile, we remain where we are. "Hope deferred maketh the heart sick." Patiently and hopefully have I waited all the forenoon for a clearing, but still, at one p.m., does the fog hang about us impenetrably. The barometer still goes up (29.72 at 35°), and the temperature is 30°

Soundings in sixteen fathoms water, and I am afraid we have drifted down abreast the point west, and are too far west to hope for any benefit from the bay in which yesterday we shoaled our water to thirteen fathoms, in which case we are now beginning to open the west face of the island. This will be the last forlorn hope for open water in this neighborhood.

And yet there is much to be thankful for; everybody is in excellent health, in spite of our terribly hard work; the appetites are something wonderful to thank of, and our sleep is sound and unbroken. Forth-one days of our march over the frozen sea have had no bad effect. Our bear is so nearly consumed that for supper we have only half our usual ration to serve out. (In five meals we have eaten about 250 pounds bear meat. The gross weight was probably 450 pounds.) The only trace our marching shows on us is tender feet, and that probably arises from their being so often wet. Wading through pools would make wet feet if our foot gear was changed every hour.

Chipp described to me the queer way in which the man on watch "calls" his relief. Instead of calling him, which would wake everybody else up, or of crawling over to him, which would also waken everybody, a boat-hook is employed. Chipp says, while awake the other night he saw, to his amazement, a boat-hook slowly coming through this tent door, and poising a moment over Sharvell, poke him vigorously in the back. To show how soundly the man slept, it is worthy of mention that he merely tried to brush it away, as a troublesome fly. This ought to make a good Arctic sketch.

At six p.m. had supper. At 6.45 the fog lifted a little, and showed us the land, seemingly about half a mile off. We have drifted along ashore since last evening, and have left on our right hand the glacier which we were in front of last night; but ahead of us, and apparently extending in to the land, was a very heavy floe of blue ice, separated from us by a few insignificant openings. Such a chance was not to be lost. All hands were at once turned to, and at 7.15 we went ahead with all four sleds, officers dragging also, and then bounced along the boats, and in one hour we had everything on the heavy floe. This we now found to be one and one half miles in width upon going over it, and we were still separated from the land by a half mile of broken ice, water lanes, etc. I at once made up my mind that it could not be done to-night, and that I had better devote a day to it.

The wind had veered to E. S. E., was blowing fresh, and rain began to fall steadily, and when, at 10:45 p.m., just inside the blue floe edge, I gave the order to camp, I think I did a very prudent and sensible thing.

July 28th, Thursday.—Called all hands at seven. Breakfasted at eight. Windy (E.S.E.), foggy, and disagreeable. Land in sight at times. We have gone a short distance to westward. Temperature 29°. Under way at 8:50 a.m. Sent Mr. Dunbar ahead, and after a while we succeeded in crossing the broken ice which had stopped us last night. Here we had a small floe, across which we speeded. The fog now shut in impenetrably, and I feared we were in for a troublesome time. Mr. Dunbar returned, however, and informed me, that after crossing this floe we should find large ice blocks, with only two-foot openings, and that these extended to the ice-foot, or fast ice, and that, moreover, he had climbed up on the ice-foot, and advanced one hundred yards over it toward the land. This was too good a chance to lose, and away we went. But though we made all haste, and got over our last ferry, and acrosss the small floe in splended time, when we reached the further edge we found everything fallen to pieces, and more water and rapidly moving ice than we could undertake. Much of the moving ice looked like small bergs broken off from a glacier foot, and from the rounded lumps of ice on top, and their almost straight edges, I am inclined to think they were icebergs. By 12:30 p.m. we had everything up to the floe edge, and halted for dinner.

The sun now tried to break through the fog, and I hoped for a clearing; but at 1:30 p.m., when we turned to, the fog was as thick as ever. The situation had improved somewhat, for another floe piece had now come along, and a few loose pieces offered a convenient bridge. Away we went, but the floe piece was a small one, and we soon reached its edge. Here was another confusion, but we could make out a larger floe ahead. Everything was embarked on an ice-cake for a ferryboat, and a hauling line run to the floe. By great effort we got our piece clear by four p.m. and commenced to haul over. Suddenly everybody gave a shout, "Look!" Away up over our heads 2,500 (?) feet towered the land, and we were sweeping past it like a mill-stream. Hurriedly sounded in eighteen and one half fathoms. Soon our floe was reached. Away we jumped our sleds and boats, and, seeing two or three large cakes nearly together, ran everything rapidly over until we at last stood at the base of the ice-cap. It was a narrow squeeze, for the men with the tents and remaining loose provisions on their shoulders had hard work to run fast enough to get on the last cake before the other cakes were swept away. Now that we were on the last cake our situation became critical. We could not get up on the ice-foot, for ten feet of water and small lumps intervened, and we were sweeping along by it at the rate of three miles an hour. Our cake was none of the strongest, and in the swirling and running masses, and small bergs, I feared we should be broken up and separated. It was an anxious moment. The southwest cape of the island was not half a mile away, and this was our last chance. Over two weeks of dragging and working to reach this island seemed about to be thrown away. I soon noticed our cake begin to turn around, and saw that it might be whirled into a kind of corner against the fast ice, where, if it remained long enough, a landing might be effected. "Stand by," was the order now, and with sled ropes in hand we waited the trying moment. Soon our cake caught and held. "Now is the time, Chipp!" I shouted, and away we went.

One sled got over on the rough ice-foot all right; a second nearly fell overboard; the third did fall overboard, dragging in Cole; and a piece of ice had to be dragged in by sheer force to bridge for the fourth. When I started the St. Michael's sleds, they seemed to stick somewhere. Watching our cake closely, I saw signs of its giving way. "Away with the boats!"—but how? Nindemann sang out, that he thought we could float the boats below, and haul them over. No sooner said than done, and down they went into the water. The men were hurried from the sleds to the boats, and I saw the first cutter just beginning to haul out, when away swept our ice-cake, carrying Melville, Iversen, Aneguin, and myself, with six dogs. Wilson had carried one load of dogs over in the dingy, but he could not get back for the remainder. Chipp was on the ice-foot with the boats, and I knew he could look out for them, and I felt pretty certain we had saved everything. For ourselves, on the drifting ice-cake, I had some little anxiety, but one corner of our cake fortunately soon after drifted near a fast berg, and by making a flying leap through the air, we escaped in safety. At last! But though standing still, we were not ashore. The ice-foot extended out from the land, and was a confused mass of piled up ice-blocks and ridges,—honeycombed, cracked, and broken,—and presenting a simple impassable road for travel with sleds. Glad enough was I to get a solid foothold anywhere, and I gave the order to camp at 6:30 p.m. (our first sled having got on the ice-foot about five), everything being hauled in as near to the land as possible, say fifty feet from it. Rocks were occasionally slipping down and falling into a little stream of water at the foot of the cliff, the stream being where the thawing of surface ice has left a channel about four feet deep.

The face of the cliff was literally alive with dovekies. Supper at 7:30 p.m. At 8:30 p.m. all hands were called to muster and, led by me, everybody waded, or jumped, or ferried over to the land, where we held on as well as we could to the steep slopes of débris, while our colors were displayed. When all had gathered around me, I said, "I have to announce to you that this island, towards which we have been struggling for more than two weeks, is newly discovered land. I therefore take possession of it in the name of the President of the United States, and name it Bennett Island. I now call upon you to give three cheers." And never were three more lusty cheers given. With great kindness three were then given to me.

I now change the date to the correct one, and record that at 8:30 p.m.,

July 29th, Friday, I added Bennett Island to American soil. Our landing cape I named Cape Emma. Piped down at nine p.m.; fresh E. wind, thick fog; ice off shore rapidly moving west. The birds kept up a fearful chattering all night, but we slept well in spite of it.

EXHIBIT 4

GEOLOGICAL SURVEY NO. 187 SERIES F, GEOGRAPHY, 27

Bennett; island, in the Arctic ocean, north of the New Siberian islands. Discovered by De Long, in 1881, and named by him, after Mr. James Gordon Bennett.

Henrietta; island, in the Arctic ocean, north of the New Siberian islands. Discovered and so named by De Long in 1881.

Herald; island (856 feet high), east of Wrangell island, Arctic ocean. Discovered and landed upon in July, 1849, by Captain Kellett, of H.M.S. *Herald* and named by him after his ship.

Jeannette; island, northeast of the New Siberian islands, Arctic ocean. Discovered by De Long, in 1881, and named by him after his ship *Jeannette.*

Wrangell; island, off the northern shore of Siberia, northwesterly from Bering strait. The existence of this land was reported by natives, in March and April, 1823, to Baron von Wrangell, who then made an unsuccessful search for it. It was first clearly seen and its shore delineated by Capt. Thomas Long, of the New London whaling bark *Nile,* in August, 1867, and by him called Wrangell's Land. From that date to 1881 it was shown on maps as the south end of a tract extending indefinitely northward and, by some, thought to connect with Greenland across the north pole. Its insular character was established by Berry, in 1881, and since that time it has borne the name of Wrangell island. Possibly Plover island of Kellett, in 1849, may be some peak of this island seen from afar.

EXHIBIT 5

BOUNDARIES, AREAS, GEOGRAPHIC CENTERS AND ALTITUDES OF THE UNITED STATES AND THE SEVERAL STATES

WRANGELL ISLAND

Wrangell Island is in the Arctic Ocean, about 100 miles from the Siberian coast. A harbor in the southeastern part is in latitude 70° 57′ N. and longitude 178° 10′ W. The island is about 80 miles long and 30 miles wide; its highest point is 2,500 feet above sea level. It was sighted in 1867 by the captain of a United States sailing vessel. In 1881 officers from United States naval vessels landed on the island and claimed it for the United States.[51] According to newspaper reports of October 4, 1926, the Soviet Government had landed a colony of 50 persons on this island, hoisted the Russian flag, and claimed it for that country. An airplane survey is said to have been made and the area found to be 2,925 square miles.

BENNETT, HENRIETTA, AND JEANNETTE ISLANDS

Bennett, Henrietta, and Jeannette Islands were discovered by the DeLong polar expedition and claimed for the United States in 1881, but were only partly explored.

Bennett, the largest of the three, is about 300 miles from the mainland of Siberia, in latitude 76° 38′ N., approximate longitude 149° E. This island probably has an area of several hundred square miles, possibly more than 1,000, and altitudes above sea level of 300 feet or more.

Henrietta Island is in latitude 77° 8′ N., longitude 157° 45′ E., and Jeannette Island in latitude 76° 47′ N., longitude 158° 56′ E.; each has an area of approximately 50 square miles and an altitude of more than 500 feet.[52]

EXHIBIT 6

U.S. CONSIDERS RELINQUISHING CONTROL OF ALASKAN ISLANDS

"The State Department appears ready and willing to surrender five strategic Alaskan islands and hundreds of thousands of square miles of oil-rich Alaskan outer continental shelf to the Soviet Union without full public debate and Senate ratification of a treaty," according to Carl Olson, Executive Vice President of The Conservative Caucus Research, Analysis & Education Foundation, Inc., of Vienna, Virginia.

"This giveway of literally billions of barrels of America's oil reserves and Alaskan sovereign territory makes the Panama Canal fiasco look insignificant in comparison," Olson declared.

This giveaway was the subject of a high-level State Department delegation which went to Moscow for the week of July 23-27, headed by the department's Legal Adviser Davis Robinson and supported by his staff members Elizabeth Verville and Scott Hajost, and by Harry Marshall and Richard T. Scully of the department's Bureau of Oceans and International Environmental and Scientific Affairs, and by Robert W. Smith of the office of the Geographer.

The enormous size of the giveaway of strategic oil reserves is reflected in official Department of the Interior estimates. The oil-rich outer continental shelf off Alaska is equal in area to six Californias—or three-quarters of the entire U.S. outer continental shelf. Seabeds equal to about twice the size of California lie to the east of the 1867 Convention Line, and seabeds equal to about four Californias lie the west in the vicinity of the Alaskan islands of Wrangell, Herald, Bennett, Heneritta, and Jeannette. The estimated hydrocarbon reserves of the seabeds to the east of the 1867 Convention Line are 12.2 billion barrels of oil equivalent. (The Navarin Basin alone contains 1.9 billion barrels of reserves.) To the west of the 1867 line, which has twice the area, the reserves have not been officially estimated, but it would not be unreasonable to place them at twice the amount for the area to the east of the line. Or, in other words, the State Department is contemplating giving away about 25 billion barrels of oil equivalent to the Soviets.

The State Department's basis for the giveaway involves its novel (and incorrect) portrayal of the "U.S.-Russia Convention Line of 1867", which was used in the purchase of Alaska from Russia in 1867 for $7,200,000.

This stance by the State Department appeared in the Federal Register notice of the leasing of the Navarin Basin (p. 10065, March 16, 1964). In paragraph 16, under the heading "Jurisdiction", was the following language: "The differing claims relate to differing depictions of the line established by the 1867 Conventions Ceding Alaska between the United States and Russia. The United States depicts the 1867 Convention Line as the maritime boundary by arcs of great circles while the Soviet Union depicts the 1867 Convention Line as rhumb lines." There is no question in the State Department's position that the 1867 Convention Line is "the maritime boundary".

Contradicting this characterization is a mass of historical evidence and even the State Department's own words. In the State Department's International Boundary Study No. 14 (revised 1965) on "U.S.-Russia Convention Line of 1867", the language is very clear:

"Rather than a boundary per se, this report concerns a convention line which ordinarily appears on official maps in the same manner as a boundary . . .

"Furthermore, in keeping with the policy that the line does not constitute a boundary, the standard symbol for the representation of an international boundary should never be used."

So far, the State Department has failed to explain how the United States has relinquished its claim to the islands and seabeds between 1965 and 1984. No treaty, agreement, or other public understanding had been cited for this surrender of American sovereignty.

Even as late as 1978 the noted authority Dr. William E. Butler, Professor of Comparative Law at the University of London, wrote in the book International Straits of the World, Volume 1 "Northeast Arctic Passage as follows: "The Russo-American Convention Line of 1867 is not regarded as a state frontier, and the continental shelf boundary in the Chukchi Sea and northward remain to be negotiated."

The five Arctic Alaskan Islands—Wrangell, Herald, Bennett, Henrietta, and Jeannette—were never considered in the purchase of Alaska. Four has not yet been discovered in 1867. Americans discovered and claimed them on Arctic expeditions in following decades. Herals Islands was discovered and claimed by the British in 1849, and was later acquired by the United States.

Bennett, Henrietta, and Jeannette Islands were discovered and claimed by U.S.N. Commander George Washington DeLong aboard the Jeannette in the 1879-81 expedition. The islands still bear his name (the DeLong Islands), and the U.S. Naval Academy in Annapolis has a monument to that expedition.

Wrangell Island, the largest of the five with an area of 2,800 square miles (the size of Rhode Island and Delaware combined), was discovered and claimed on August 12, 1881, by Captain Calvin Leighton Hooper aboard the U.S. Revenue Marine (Coast Guard) ship Thomas Corwin. Among the landing party on Wrangell Island was the famed explorer John Muir, who wrote of his trip in the book. The Cruise of the Corwin, Various surveys, expeditions, and settlements were made on Wrangell Island in the next four decades by Americans. This ended when the Soviet Union invaded the island with a landing of infantry from the ship Red October on August 20, 1924, and took as prisoners the 14 Americans of the Lomen Brothers Company's fur settlement and confiscated all the gear, pelts, and other property. The 12 surviving Americans were eventually released from their imprisonment in Vladisvostok. The Soviets currently maintain slave labor camps on the island.

It is significant to note that in the State Department's reissue of the book Digest of International Law by Green Haywood Hackworth in 1973, the unequivocal settlements is made:

"The United States has not relinguished its claim to Wrangell Island."

Numerous efforts by various parties, including the owners of Wrangell Island, have been made over the decades to take back their property and collect damages for the unlawful occupation by the Soviet Union. Unfortunately, the State Department has not seen fit yet to honor those claims or even the decision by the Foreign Claims Settlement Commission in 1959 in favor of the Lorne Brothers.

"This impending giveaway of the five islands and the enormous tracts of oil-rich outer continental shelf to the Soviets demands the most searching public scrutiny and debate. It must be made in issues for a national decision-making," Olson stated. "The State Department is not empowered to surrender American real estate and seabeds. Only the Congress has that power. It must be brought up in the form of a treaty, signed by the President, and debated and

[52] For further information regarding these islands see The voyage of the *Jeannette,* ed. by Emma DeLong, vol. 2, pp. 679-689, Boston 1883, and 47th Cong., 2d sess., H. Ex. Doc. 108, p. 361, 1883.

ratified by the Senate in order to receive the full force of law. The Constitution cannot be ignored in this potentially massive cession of strategic American interests so close to home."

In an ironic comparison with the apparent lenient attitude that the State Department has exhibited toward the Soviets over the seabed boundaries, the State Department has adopted a hardline position toward our ally Canada in the Arctic. This position came to light with the leasing on August 22 of the Diapir Field which borders Canada. The Federal Register announcement of July 23, 1984 (p. 29726) noted a "Jurisdictional Dispute" with Canada over some of the blocks being offered. Although the notice did not say so explicitly, the U.S. position is that the seabed boundary should reflect the "equidistant" theory of boundaries, while this dispute continues, the three petroleum companies which bid on these leases (Union Oil Co. of Calif., Amoco Production Co., and Shell Western E & P Inc.) will have their bid money deposit lie in escrow. Their total winning bids for the four blocks totalled $5,105,000—a substantial affirmation of the rich nature of the Arctic Alaskan outer continental shelf.

AMENDMENTS SUBMITTED

TEMPORARY FAMILY HOUSING FOR DEPENDENTS OF VICTIMS OF THE GANDER, NEWFOUNDLAND AIR CRASH

THUMOND (AND OTHERS) AMENDMENT NO. 1421

Mr. THURMOND (for himself, Mr METZENBAUM, Mr. BYRD, and Mr. FORD) proposed an amendment to the bill (S. 1956) to amend title 5, United States Code, to authorize temporary family housing for certain dependents of deceased members of the Armed Forces; and to amend title 37, United States Code, to authorize temporary payment of an allowance for quarters for certain dependents of deceased members of the uniformed services; as follows:

Strike out the phrase "60 days" both places it appears in the bill and insert in lieu thereof "90 days".

RELIEF OF HAMILTON JORDAN

HATCH AMENDMENT NO. 1422

(Ordered to lie on the table.)

Mr. HATCH submitted an amendment intended to be proposed by him to the bill (H.R. 3363) for the relief of Hamilton Jordan of Lawrenceville, GA; as follows:

At the end of the bill, add the following new section:

SEC. .

(a) Sec. 706 of Title 2, United States Code, is amended by inserting after the words "not to exceed $5,000." and before the words "No action" the following:

"This civil penalty shall be the exclusive penalty for such knowing and willful violation of Section 702 of this title, notwithstanding any other provision of the United States Code, including Section 1001 of Title 18. This section shall be deemed to be effective on the date of enactment of the Ethics in Government Act."

(b) Sec. 304 of Title 28 App. , United States Code, is amended by inserting after the words "not to exceed $5,000." the following:

"This civil penalty shall be the exclusive penalty for such knowing and willful violation of Section 302 of this title, notwithstanding any other provision of the United States Code, including Section 1001 of Title 18. This section shall be deemed to be effective on the date of enactment of the Ethics in Government Act."

(c) Sec. 204 of Title 5 App. 4, United States Code, is amended by inserting after the words "not to exceed $5,000." the following:

"This civil penalty shall be the exclusive penalty for such knowing and willful violation of Section 202 of this title, notwithstanding any other provision of the United States Code, including Section 1001 of Title 18. This section shall be deemed to be effective on the date of enactment of the Ethics in Government Act."

UNFAIR TRADE PRACTICES OF JAPAN

HOLLINGS AMENDMENT NO. 1423

(Ordered to lie on the table.)

Mr. HOLLINGS submitted an amendment intended to be proposed by him to the bill (S. 1404) to require the President to respond to unfair trade practices of Japan; as follows:

At the end of the bill, add the following:

TITLE I—TEXTILE AND APPAREL TRADE ENFORCEMENT

SEC. 101. SHORT TITLE.

This title may be cited as the "Textile and Apparel Trade Enforcement Act of 1985".

SEC. 102. POLICY.

The policy of this title is—

(1) to prevent further disruption of the United States textiles and textile products markets, damage to United States textile and apparel manufacturers, and loss of jobs by United States workers by providing for orderly and nondisruptive growth of imports of textiles and textile products; and

(2) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

SEC. 103. FINDINGS.

The Congress finds that—

(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

(2) the Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December 1981, through July 1986, contemplates a 6 per centum annual rate of growth for imports for most exporting countries and provides for a lower rate of growth for imports from significant exporting countries;

(3) since 1980, the objective of orderly growth of imports of textiles and textile products provided for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984 imports of textiles and textile products into the United States have grown at an annual rate of 19 per centum, far in excess of the 1 per centum growth rate of the United States market for textiles and textile products during the same period and far in excess of the annual rate of import growth of less than 2 per centum that prevailed during the period 1974 through 1980;

(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last six years, reaching a level of 50 per centum in 1984;

(6) based on a nationwide audit of major retail outlets, the import penetration of such major items of apparel as trousers, blouses, shirts, suits, skirts, and sweaters exceeds 50 per centum of domestic consumption;

(7) since the most recent extension of the Multi-Fiber Arrangement, certain exporting countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States market for textiles and textile products and have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

(8) imports of textiles and textile products into the United States are predominantly the product of significant producing countries, with five large producing countries now accounting for more than 50 per centum of all imports of textiles and textile products;

(9) the domination of import trade by producers in the significant producing countries has limited participation in the United States market by other producing countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment, with the United States;

(10) a change in United States textile trade policy to afford the smaller producing countries and countries in the Caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 per centum over 1983, and accounted for 13 per centum of the Nation's overall merchandise trade deficit;

(12) the current level of imports of textiles and textile products, ten billion square yard equivalents in 1984, represents over one million job opportunities lost to United States workers;

(13) imported textiles and textile products now account for 38 per centum (the equivalent of three million two hundred thousand bales of cotton) of the annual cotton consumption in the United States; only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States; the result of the massive increases in cotton textile and apparel

imports has been a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone, which was only partially offset by Federal cotton program benefits; another result is that United States cotton producers, who are spending about $20,000,000 annually in research and promotion efforts, have built markets not for themselves but for foreign growers;

(14) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool; the Multi-Fiber Arrangement recognizes that imports of certain products, such as wool products, in certain countries, including the United States, pose particular problems for certain industries, such as, the wool products industries in those countries and import growth rates of 1 per centum or less have been permitted in such cases;

(15) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

(16) the increase in imports and increased import penetration of the United States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more modern equipment, productivity, as measured by output per man hour, in the textile mill products sector has increased in the last ten years at the average annual rate of 4.2 per centum and in the apparel sector at the average annual rate of 3.4 per centum, as compared with the lower productivity growth of all manufacturing in the same period of 1.9 per centum;

(17) the factors described above are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Act;

(18) based on experience during the past ten years and on other factors, the growth of the United States market for textiles and textile products is unlikely to exceed an average annual rate of 1 per centum during the next several years;

(19) if the rate of growth of imports of textiles and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

(20) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

(A) to require the establishment of import levels for textiles and textile products supplied by major producing countries that reflect—

(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 per centum annual growth rate contemplated by the Multi-Fiber Arrangement, or 1 per centum in the case of wool products, or

(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 per centum,

whichever is the lesser,

(B) to require the establishment of import levels for textiles and textile products supplied by producing countries that reflect their 1984 import levels,

(C) to require the establishment of import levels for textiles and textile products supplied by small producing countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

(D) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

(21) the establishment of import levels, and limitation of future import growth to levels, that reflect effective enforcement of the Multi-Fiber Arrangement and that also reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United States regarding trade in textiles and apparel;

(22) as the Department of Defense has long recognized, a strong, viable and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

(23) the developments that have led to the sharp increase in imports of textiles and textile products since 1980 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

(24) the sharp increase in imports of textiles and textile products since 1980, and the effect of this increase on the United States textiles and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Multi-Fiber Arrangement and its Protocol.

SEC. 104. DEFINITIONS.

For purposes of this title—

(1) The term "textiles and textile products" includes, but is not limited to, all tops, yarns, man-made fibers, piece goods, made-up articles, apparel, and other textile manufactured products (which derive their chief characteristics from their textile components) made in whole or in part from any natural or manmade fiber, or blend thereof, that are classified under schedule 3, part 6 of schedule 6, parts 1 (except subpart A but including item number 700.75), 4, 5 (except subpart E), 7 or 13 (except item number 790.57) of schedule 7, or part 1 of schedule 8 of the Tariff Schedules of the United States, or part 1 of the Appendix to the Tariff Schedules of the United States; such term does not include apparel containing 70 per centum or more by weight of silk except articles classified under item numbers 373.20 and 373.22 of the Tariff Schedules of the United States;

(2) The term "category" means, with respect to textiles and textile products that are the product of a country, each of the following—

(A) each category of textiles and textile products identified by a three-digit textile category number in the Department of Commerce publication "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated", dated January 1985 and, subsequently, in the first edition of such document that is revised to reflect the adoption by the United States of the Nomenclature Structure of the Harmonized System;

(B) with respect to each country with which the United States has (i) an agreement on the date of enactment of this title limiting exports of textiles and textile products to the United States that includes specific limitations on subdivisions of a category described in subparagraph (A), or (ii) taken unilateral action to limit products entered under such a subdivision, each such subdivision;

(C) a category consisting of the man-made fiber products not covered by a category described in subparagraph A and classified under subpart E of part 1 of schedule 3 to the Tariff Schedules of the United States; and

(D) each category consisting of each of the following products when, because of fiber content, that product is not subject to the Multi-Fiber Arrangement:

(i) yarn,

(ii) fabric,

(iii) apparel, and

(iv) other textile products;

(3) The term "import sensitive category" means—

(A) each category (other than a category applicable to textiles and textile products that are a product of a country in the Caribbean region) for which the ratio of imports to domestic production, as reported in the Department of Commerce publication "U.S. Production, Imports and Import/Production Ratios for Cotton, Wool and Man-Made Fiber Textiles and Apparel", equals or exceeds 40.0 for the preceding calendar year; and

(B) each category covering wool products;

(4) The term "country" means a foreign country (other than Canada and the Member States of the European Economic Community as constituted on January 1, 1985), a foreign territory, an insular possession of the United States, or any other territory, possession, colony, trusteeship or political entity, whether affiliated with the United States or not, that is outside the customs territory of the United States;

(5) The term "major producing country" means a country the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in subparagraph (2)(A) of this section during calendar year 1984 equaled or exceeded 10 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

(6) The term "producing country" means a country (other than a major producing country and a country in the Caribbean region) the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in subparagraph (2)(A) of this section during calendar year 1984 equaled or exceeded 1.25 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the

Member States of the European Economic Community during calendar year 1984;

(7) The term "small producing country" means a country other than a major producing country and a producing country;

(8) The term "country in the Caribbean region" means the United Mexican States and a country eligible for designation as a beneficiary country under section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702);

(9) The term "wool product" means an article containing over 17 per centum by weight;

(10) The term "cotton, wool and man-made fiber sweaters" means articles classified under categories 345, 445, 446, 645 or 646 as defined in the Department of Commerce publication "Correlation Textile and Apparel Categories with Tariff Schedules of the United States Annotated," dated January 1985;

(11) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States; and

(12) The term "Multi-Fiber Arrangement" means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva, December 22, 1981.

SEC. 105. LIMITS ON TEXTILE AND APPAREL IMPORTS.

(a) CALENDAR YEAR 1985.—Notwithstanding any other provision of law, the aggregate quantity of textiles and textile products classified under a category that is entered during calendar year 1985 shall not exceed—

(1) in the case of textiles and textile products that are a product of a major producing country, other than textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to a specific limitation under an agreement with a major producing country) the lesser of an amount equal to 101 per centum (A) of the aggregate quantity of such products of such country classified under such category that would have entered during calendar year 1984 if the aggregate quantity of such products of such country classified under such category entered during calendar year 1980 had increased by 6 per centum annually, or 1 per centum annually in the case of a category covering a wool product, during calendar years 1981, 1982, 1983, and 1984, or (B) if the United States has an agreement with such country providing for an annual growth rate for such category of less than 6 per centum, of the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984;

(2) in the case of textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to specific limitation under an agreement with a major producing country, the specific limitation quantity in effect as of the date of enactment of this title;

(3) in the case of textiles and textile products that are a product of a producing country, an amount equal to the aggregate quantity of (A) such products of such country classified under such category that entered during calendar year 1984, or (B) in the case of textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to specific limitation under an agreement with an exporting country, the specific limitation quantity in effect as of the date of enactment of this title;

(4) in the case of textiles and textile products that are a product of a small producing country (other than cotton, wool, and man-made fiber sweaters described in paragraph (5)), an amount equal to the sum of (A) the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984, plus (B) an amount equal to (i) 15 per centum of such quantity, in the case of a category that is not an import sensitive category, or (ii) 1 per centum of such quantity, in the case of a category that is an import sensitive category; and

(5) in the case of cotton, wool, and man-made fiber sweaters that are—

(A) the product of substantial assembly operations in Guam from otherwise completed knit-to-shape component parts, an aggregate amount equal to 160,000 dozen; and

(B) the product of substantial assembly operations in the Commonwealth of the Northern Mariana Islands from otherwise completed knit-to-shape component parts, an aggregate amount equal to 70,000 dozen.

If application of paragraph (1) would result in the aggregate quantity of textiles and textile products of a major producing country classified under all categories permitted to enter during calendar year 1985 to be less than 70 per centum of the aggregate quantity of such products of such country that entered during calendar year 1984, then, notwithstanding paragraph (1), the aggregate quantity of textiles and textile products of such country that may be entered under each category during calendar year 1985 shall not be less than 40 per centum of the aggregate quantity of such products of such country that entered under such category during calendar year 1984.

(b) GROWTH ADJUSTMENT.—For calendar years after 1985, the aggregate quantity of textiles and textile products classified under each category that may be entered during each such calendar year shall—

(1) in the case of such products that are a product of a major producing country or of a producing country, be increased by an amount equal to 1 per centum of the aggregate quantity that could be entered under such category during the preceding calendar year; and

(2) in the case of such products that are a product of a small producing country, be increased by an amount equal to—

(A) in the case of a category (other than an import sensitive category), 6 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year, and

(B) in the case of an import sensitive category, 1 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year.

If the aggregate quantity that could be entered under a category for a calendar year after 1985 is reduced under section 111(b), then, in the first calendar year in which there is no such reduction, this subsection shall be applied as if there had been no reduction under section 111(b) in previous calendar years.

(c) MINIMUM QUANTITIES.—If, under subsection (a) or (b), the aggregate quantity of textiles and textile products of a country that may be entered during a calendar year under a category is—

(1) less than one million square yard equivalents, in the case of a category covering yarn, fabric, made-ups, and miscellaneous products, other than wool products;

(2) less than seven hundred thousand square yard equivalents, in the case of a category covering apparel, other than wool products apparel; or

(3) less than one hundred thousand square yard equivalents, in the case of a category covering wool products,

then, notwithstanding subsection (a) or (b), the aggregate quantity of textiles and textile products of such country that may be entered under such category during the calendar year shall be one million, seven hundred thousand, or one hundred thousand square yard equivalents, respectively. The amount prescribed in the preceding sentence shall be accorded growth subject to the provisions of subsection (b) beginning the first calendar year after the aggregate quantity of products of such country entered under such category equals the minimum quantity prescribed under this subsection.

(d) SPECIAL RULE.—For purposes of this section, if during any calendar year after 1984, the aggregate quantity of textiles and textile products that are the product of a small producing country (other than a country in the Caribbean region) and that are entered under the categories referred to in subparagraph 2(A) of section 104 of this title equals or exceeds 1.25 per centum of all textiles and textile products entered under such categories from all countries and from Canada and the Member States of the European Economic Community during such calendar year, then such small producing country shall be considered to be a producing country for all succeeding calendar years.

(e) ENFORCEMENT.—The Secretary of Commerce shall prescribe such regulations governing the entry, or withdrawal from warehouse, for consumption of textiles and textile products as may be necessary to carry out this title.

SEC. 106. IMPORT LICENSING.

In order to ensure the equitable and efficient administration of section 105 of this title, the Secretary of Commerce shall, within six months after the date of enactment of this title, establish and administer an import licensing system under which an importer of any textiles and textile products from any country and from Canada and the Member States of the European Economic Community, will be required to present an import permit as a condition of entry. The Secretary shall charge a fee for import licenses in such amount as may be necessary to cover the cost of administration of the system. The Secretary of the Treasury shall make all determinations regarding classification under the Tariff Schedules of the United States, appraisement, and valuation of products subject to licensing under this section.

SEC. 107. ANNUAL REPORT.

Not later than March 15, 1986, and March 15 of each calendar year thereafter, the President shall submit to the Congress a report on the administration of this title during the preceding calendar year. Such report shall include detailed information about the implementation and operation of the limitations established under section 105. The report shall also include a detailed report by the Department of Commerce on the implementation and enforcement for the provisions of this title exempting from import limitations certain articles of silk apparel, with special regard to the extent to which nonsilk articles, and silk articles not exempt from import limitations, are erroneously or fraudulently classified as silk items exempt from import limitations and are entered under this title. All departments and agencies shall cooperate in preparation of this report as requested by the President.

SEC. 108. REVIEW.

The Secretary of Commerce shall commence ten years after the date of enactment of this title a formal review of the operation of the Textile Import Control Program under the provisions of this title. The Secretary shall consult Members and committees of Congress, representatives of the labor unions and the industries affected by the program, the Secretary of the Treasury, and other appropriate government officials. Within six months after the commencement of the study, the Secretary shall submit to Congress his findings as well as his recommendations for the future conduct of the program.

SEC. 109. DUTY FREE ENTRY OF CERTAIN SWEATERS FROM GUAM AND THE NORTHERN MARIANAS.

Subpart A of part 7, schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by adding at the end thereof the following new item:

"385.97	Cotton, wool and man-made fiber sweaters that are entitled to enter under the quotas established under section 105(a)(5) of the Textile and Apparel Trade Enforcement Act of 1985 or the increased quotas under section 105(b) of such Act that adjust the quotas under such section 105(a)(5) and that do not contain foreign materials to the value of more than 50 percent of their total value as this standard is applied pursuant to Headnote 3(a) of the General Headnotes and Rules of Interpretation	Free".

SEC. 110. PRODUCTS OF THE INSULAR POSSESSIONS OF THE UNITED STATES.

(a) GENERAL RULE.—Notwithstanding section 104(4) of this title, textiles and textile products that are the product of an insular possession of the United States shall not be considered to be products of a country, within the meaning of section 104(4), if such products meet the requirements of subsection (b).

(b) POSSESSION CONTENT.—

(1) Subsection (a) shall apply to an article if—

(A) that article is imported directly from an insular possession of the United States into the customs territory of the United States; and

(B) the sum of (i) the cost or value of the materials produced in such insular possession of the United States or in the customs territory of the United States plus (ii) the direct costs of processing operations performed in such insular possession of the United States is not less than 85 per centum of the appraised value of such article at the time it is entered.

(2) The Secretary of the Treasury shall prescribe such regulations as may be necessary to carry out this section, except that the rules of origin contained in 19 CFR 12.130 shall be the rules of origin for purposes of this section.

(3) As used in this subsection, the phrase "direct costs of processing operations" includes—

(A) all actual labor costs attributable to permanent residents of the insular possession involved in the growth, production, manufacture, or assembly of the specific merchandise, including fringe benefits, on-the-job training and the cost of engineering, supervisory, quality control, and similar personnel; and

(B) dies, molds, tooling, and depreciation on machinery and equipment which are allocable to the specific merchandise.

Such phrase does not include costs which are attributable to nonpermanent resident labor, are not directly attributable to the merchandise concerned, or are not costs of manufacturing the product, such as (i) profit, and (ii) general expenses of doing business which are either not allocable to the specific merchandise or are not related to the growth, production, manufacture, or assembly of the merchandise, such as administrative salaries, casualty and liability insurance, advertising, and salesmen's salaries, commissions or expenses.

SEC. 111. EFFECTIVE DATE.

(a) IN GENERAL.—Subject to the provisions of subsection (b), the provisions of this title shall apply to textiles and textile products entered, or withdrawn from warehouse, for consumption on or after the date of enactment of this title.

(b) CALENDAR YEARS 1985 AND 1986.—The Secretary of Commerce shall prescribe by regulation the aggregate quantity, if any, of textiles and textile products that may be entered under section 105 (a) or (c) of this title from each country under each category during the period beginning on the date of enactment of this title and ending December 31, 1985. Notwithstanding subsection (a), to the extent that the aggregate quantity of imports of textiles and textile products of a country entered under a category after December 31, 1984, and before the date of enactment of this title exceeds the quantity permitted entry for such products of such country and such category during calendar year 1985 under subsection 5 (a) or (c) of section 105, then the limit that would otherwise apply under section 105 (b) or (c) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 105 (b) or (c) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 105(b) for such category for such country for calendar year 1986, then the limit for such category and country for calendar years after 1986 shall be reduced until such excess is accounted for.

TITLE II

SEC. 201. SHORT TITLE.

This title may be cited as the "American Footwear Industry Recovery Act of 1985".

SEC. 202. FINDINGS AND PURPOSE.

(a) The Congress finds that—

(1) The domestic nonrubber footwear industry is important to the national economy, and footwear firms are vital to the economic health of small towns throughout the United States.

(2) The domestic nonrubber footwear industry is highly labor intensive, and low capital requirements for entry into footwear production make it a primary target for industrializing or newly industrialized countries. As a consequence, footwear is produced in virtually every footwear consuming country in the world.

(3) Tremendous competitive pressure has been created in the world footwear market in the last decade as a result of rapidly growing production and capacity in numerous developing and developed countries. This development has resulted in the widespread erection of tariff and nontariff barriers by foreign countries designed to protect their domestic footwear industries.

(4) The United States has historically resisted the protectionist trends of other producing nations and has instead maintained a market distinguished by its accessibility. As a result, the United States market has become a focal point for world trade in nonrubber footwear.

(5) The diversion of international trade to the United States market has resulted in serious injury to domestic producers as manifested by—

(A) the loss of 155,000 footwear jobs since 1968,

(B) a decline in domestic production and production capacity, and

(C) the permanent closure of over 500 plants during the same period.

(6) The serious injury to domestic producers poses a significant danger to the industry's supplier base as well.

(7) The domestic nonrubber footwear producers have made a significant commitment to the future of the industry through substantial capital investment.

(8) Since the termination of temporary import relief in 1981, capital investment in the domestic nonrubber footwear industry has declined as the industry struggled to battle the massive surge in imports which increased the percentage share of imported footwear in the United States market from, 51 per centum in 1981 to 77 per centum in 1985.

(9) Without the restriction of import levels, capital investment in this domestic industry will continue to decrease.

(10) The domestic nonrubber footwear industry has thrice been judged by the International Trade Commission, as recently as May 1985, to be seriously injured by imports.

(11) Since the termination of the two, 4-year orderly marketing agreements in 1981, the harm to the domestic industry is even more critical than the serious injury which triggered the Commission's unanimous findings in 1976 and 1977.

(12) The domestic nonrubber footwear industry has not been afforded adequate and appropriate relief from imports; therefore, the Congress concludes that—

(A) the administrative process under sections 201, 202, and 203 of the Trade Act of 1974 has proven inadequate; and

(B) in the absence of and effective remedy under such process, legislative relief is essential.

(b)(1) It is the purpose of Congress in enacting this section to—

(A) promote and expand the economic health of the United States nonrubber footwear industry,

(B) preserve the jobs of American workers, and

(C) prevent the further decline of this important domestic industry.

(2) It is declared to be the policy of Congress that access to the United States market for foreign-produced nonrubber footwear should be on an equitable basis to ensure orderly trade in nonrubber footwear, reduce unfair trade in nonrubber footwear, and address United States balance-of-payments problems, of which footwear is the seventh largest component. In order to accomplish these objectives, it is deemed necessary and appropriate to limit imports of nonrubber footwear into the United States market.

SEC. 203. DEFINITIONS.

For purposes of this title—

(1) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

(2) The term "Secretary" means Secretary of Commerce.

(3) The term "nonrubber footwear" means the following categories of nonrubber footwear products, identified by reference to the following item numbers of the Tariff Schedules of the United States (as in effect on January 1, 1985): 700.05 through 700.45; 700.56; 700.72 through 700.83; and 700.95; except alpine (down hill) ski boots and nordic (cross country and jumping) ski boots.

(4) The term "apparent domestic consumption" means, with respect to any 1-year period, the sum of imports plus domestic production less exports.

SEC. 204. QUANTITATIVE LIMITATION ON NONRUBBER FOOTWEAR.

(a)(1) During the 8-year period beginning on the date of enactment of this title, the aggregate number of pairs of nonrubber footwear which may be entered during any 1-year period shall not exceed 60 per centum of the estimated apparent domestic consumption of nonrubber footwear for such period.

(2) The quantitative limitation imposed by paragraph (1) for any 1-year period shall be distributed among the following categories of nonrubber footwear so that the aggregate number of pairs of nonrubber footwear in such category which may be entered during any 1-year period shall not exceed the quantity equal to—

(A) in the case of nonrubber footwear with a customs value that does not exceed $1.25 per pair, 10 per centum of apparent domestic consumption of nonrubber footwear for such period,

(B) in the case of nonrubber footwear with a customs value that exceeds $1.25 per pair but does not exceed $2.50 per pair, 5.4 per centum of apparent domestic consumption of nonrubber footwear for such period, and

(C) in the case of nonrubber footwear with a customs value that exceeds $2.50 per pair, 44.6 per centum of apparent domestic consumption of nonrubber footwear for such period.

(b) Within 60 days after the effective date of this title, and on the first day of the fourth quarter of each 1-year period thereafter, the Secretary shall determine on the basis of the best information available, including his own or independent forecasts, the expected apparent domestic consumption of nonrubber footwear for, in the case of the initial determination, the remainder of the current 1-year period and in the case of the first day of the fourth quarter of each 1-year period thereafter, the next succeeding 1-year period. On each such date, the Secretary shall determine and publish in the Federal Register the allocation for the next succeeding 1-year period of permissible imports of nonrubber footwear as required by this section.

(c) On the first days of the first, second, and third quarters of each 1 year period, the Secretary shall revise the determinations of expected apparent domestic consumption made under subsection (b) for the current 1 year period on the basis of the best information then available and shall make such adjustments in the quantity of nonrubber footwear permitted to be imported under this section as indicated by the revision. All revisions and adjustments made under this subsection shall be published in the Federal Register.

(d) If the revised determination of expected apparent domestic consumption published in the Federal Register under subsection (c) on the first day of the third quarter in any 1 year period for nonrubber footwear varies from the actual apparent domestic consumption of nonrubber footwear for such 1 year period, the Secretary shall publish in the Federal Register on the first day of the second quarter of such succeeding 1 year period a revision to the determination of expected apparent domestic consumption for such 1 year period made under subsection (c) of this section. The revision shall be in the amount of such variance and shall be in addition to any other revision that would be made on any such first day of the second quarter under subsection (c) of this section.

(e)(1) The Secretary and the Secretary of the Treasury shall take such actions within their respective jurisdictions as may be necessary or appropriate to enforce the provisions of this section, including without limitation, the issuance of orders to Customs officers to bar entry to merchandise if the entry of such merchandise would cause the limitations established under this section to be exceeded.

(2)(A) The Secretary and the Secretary of the Treasury are each authorized to issue such implementing regulations, including the issuance of import licenses, as may be necessary or appropriate to effect the purposes of this section and to enforce the provisions of this section.

(B) Before prescribing any regulations under subparagraph (A), the Secretary or the Secretary of the Treasury, as the case may be, shall—

(i) consult with interested domestic parties,

(ii) afford an opportunity for such parties to comment on the proposed regulations, and

(iii) consider all such comments before prescribing final regulations.

SEC. 205. COMPENSATION AUTHORITY.

For purposes of section 123 of the Trade Act of 1974 (19 U.S.C. 2133), the imposition of the quantitative limitation under section 204 shall be treated as action taken under section 203 of the Trade Act of 1974 (19 U.S.C. 2253).

TITLE III—COPPER

SEC. 301. SHORT TITLE.

This title may be cited as the "Copper Free Market Restoration Act of 1985".

SEC. 302. FINDINGS, PURPOSE, AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) the copper industry of the United States is critical to the national defense and the maintenance of a strong economy, but has suffered a substantial economic setback, including a 50 per centum reduction in employment levels, a 25 per centum drop in production, the closure of 16 major mines, and the permanent loss of copper reserves;

(2) the substantial economic setback to the domestic copper industry is attributable to the steep decline in world copper prices that has resulted from—

(A) the continued overproduction of copper by government-owned foreign producers that—

(i) have been encouraged to overproduce by their host governments in order to generate foreign exchange and maintain employment levels, and

(ii) enjoy unfair competitive advantage over United States producers because of subsidized loans from their governments and from international lending institutions, such as the World Bank, and the absence of adequate environmental regulation; and

(B) the overvaluation of the dollar and its impact on domestic copper prices;

(3) the extent of the economic setback to the domestic copper industry was documented in 1984 when the United States International Trade Commission unanimously found that the industry had been injured by foreign competition under the terms of section 201 of the Trade Act of 1974 and recommended that appropriate relief be granted;

(4) while copper producers in the United States have made a substantial commitment to the modernization of the industry, more improvements are needed, and the reinvestment in the United States copper industry that is needed for those improvements is seriously jeopardized by the failure of existing trade statutes to deal effectively with the problem of excess world production; and

(5) a 5-year stabilization of foreign copper production is needed if the domestic copper industry is to attract the necessary capital for reinvestment.

(b) PURPOSE.—The purpose of this title is to—

(1) ensure an adequate supply of domestic copper,

(2) expand employment in the copper industry, and

(3) stabilize foreign copper production at levels that will enable domestic copper producers to make necessary improvements and modernization.

(c) POLICY.—The Congress declares it to be the national policy that the United States must seek to negotiate agreements temporarily limiting copper production by foreign copper producers so that the purposes of this title can be fulfilled.

SEC. 303. DEFINITIONS.

For purposes of this title—

(1) The term "agreement negotiation period" means the 9-month period beginning on the first day of the first calendar month beginning after the date of enactment of this Act.

(2) The term "major copper producing country" means any foreign country whose production of unwrought copper during 1984 exceeded 300,000 metric tons.

(3) The term "significant copper producing country" means any foreign country whose production of unwrought copper during 1984 exceeded 200,000 metric tons but did not exceed 300,000 metric tons.

(4) The term "unwrought copper" means articles provided for in items 612.02 through 612.06 of the Tariff Schedules of the United States.

(5) The term "restraint period" means the 5-year period beginning at the close of the agreement negotiation period.

SEC. 304. NEGOTIATIONS AND ACTION REGARDING AGREEMENTS TO VOLUNTARILY RESTRAIN COPPER PRODUCTION.

(a) NEGOTIATIONS.—

(1) The President, acting through the United States Trade Representative and the Secretary of the Interior, shall undertake negotiations during the agreement negotiation period with all major copper producing countries for the purpose of obtaining voluntary restraint agreements under which the aggregate production of unwrought copper by the major copper producing countries during each 1-year period within the restraint period will not exceed the aggregate production of unwrought copper by those countries during calendar year 1982.

(2) The President, acting through the United States Trade Representative and the Secretary of the Interior, shall undertake negotiations during the agreement negotiation period with all significant copper producing countries for the purpose of obtaining voluntary restraint agreements under which the aggregate production of unwrought

copper by the significant copper producing countries during each 1-year period within the restraint period will not exceed the sum of—

(A) the aggregate production of unwrought copper by those countries during calendar year 1984, plus

(B) the estimated growth in demand for unwrought copper for such 1-year period within the restraint period.

(b) REPORTS.—

(1) At the close of each 3-month period within the agreement negotiation period, the President shall submit to the Congress a report on the progress of negotiations conducted under subsection (a). Such report shall—

(A) set forth the terms of any voluntary restraint agreement that has been entered into under subsection (a) during such 3-month period,

(B) contain a summary of the actions taken by the President during such 3-month period to obtain agreements under subsection (a) with each major copper producing country and significant copper producing country that has not entered into such an agreement,

(C) contain a summary of the responses (including counteroffers) made during such 3-month period by each of the countries described in subparagraph (B) to the actions of the President described in subparagraph (B),

(D) include a description of the obstacles and objections encountered by the President during such 3-month period to the achievement of agreements under subsection (a), and

(E) include an assessment of whether each country described in subparagraph (B) is negotiating in good faith.

(2) The final report that is required to be submitted under paragraph (1) shall include—

(A) a determination by the President of whether the agreements entered into under subsection (a) will achieve the purposes of this title, and

(B) recommendations of the President regarding any actions that should be taken against any major copper producing country or significant copper producing country which refuses to enter into a voluntary restraint agreement under subsection (a).

(c) ACTION IF VOLUNTARY RESTRAINT AGREEMENTS TAKE EFFECT.—If voluntary restraint agreements described in subsection (a) take effect between the United States and the major copper producing countries or significant copper producing countries—

(1) the United States Trade Representative, with the cooperation of other appropriate Federal officers, shall monitor the production of unwrought copper by those countries during each 1-year period within the restraint period for the purpose of ascertaining if the terms of the agreements are being complied with during such 1-year period, and

(2) the United States Trade Representative shall, within 30 days after the close of each 1-year period within the restraint period, report to the Congress on the results of the monitoring carried out during such 1-year period.

TITLE IV—FOREIGN LABOR PRACTICES

SEC. 401. REPORTS.

(a)(1) The United States International Trade Commission shall conduct a study of the wage rates, labor costs, and other labor practices of each foreign country which had a surplus in the balance of trade between the United States and such foreign country for calendar year 1984 that exceeded $4,000,000,000. Such study should consider labor practices existing throughout the economy of each of such countries and the labor practices of the industries in each of such countries that were responsible for such balance of trade surplus.

(2) The study conducted under paragraph (1) shall include, with respect to each foreign country described in paragraph (1), analyses of—

(A) the effects of the labor practices of such foreign country studied under paragraph (1) on the competitive position of United States exports in foreign markets and in United States markets,

(B) the relationship between—

(i) the wages and other compensation paid to workers in United States industries producing goods that face substantial competition from products of such foreign country, and

(ii) the wages and other compensation paid to workers in such foreign country who produce such competitive products,

(C) the relationship, if any, between the labor practices of such foreign country studied under paragraph (1) and the cultural, religious, and political practices or values of such foreign country.

(D) the extent to which such labor practices are encouraged or enforced by the government of such foreign country,

(E) the history, duration, and extent of such labor practices, and

(F) the extent to which private or public forces that are anticompetitive encourage such labor practices.

(3) By no later than the date that is 9 months after the date of enactment of this Act, the United States International Trade Commission shall submit a report on the study conducted under paragraph (1) to the Congress, the Secretary of Labor, and the Secretary of Commerce.

(b)(1) The Secretary of Labor and the Secretary of Commerce shall each conduct a separate investigation to—

(A) identify each of the labor practices discussed in the report submitted under subsection (a)(3) that—

(i) is illegal under existing laws of the United States or of any State, or

(ii) should be prohibited by all countries under an international labor law code,

(B) determine what labor principles and rules should be included in an international labor law code, and

(C) determine the issues involved in, and the prospects for achieving, the elimination of labor practices identified under subparagraph (A) through negotiations with foreign countries.

(2) By no later than 3 months after the date on which the report is submitted under subsection (a)(3), the Secretary of Labor and the Secretary of Commerce shall each submit to the Congress a report on the investigation conducted under paragraph (1).

TRADE NEGOTIATIONS AND EXPORTS

HOLLINGS AMENDMENT NO. 1424

(Ordered referred to the Committee on Finance.)

Mr. HOLLINGS proposed an amendment to the bill (S. 1860) to amend the Trade Act of 1974 to eliminate barriers and distortions ~~to trade~~, to provide authority for a new round of trade negotiations, to promote U.S. exports, and for other purposes; as follows:

At the end of the bill, add the following:

TITLE I—TEXTILE AND APPAREL TRADE ENFORCEMENT

SEC. 101. SHORT TITLE.

This title may be cited as the "Textile and Apparel Trade Enforcement Act of 1985".

SEC. 102. POLICY.

The policy of this title is—

(1) to prevent further disruption of the United States textiles and textile products markets, damage to United States textile and apparel manufacturers, and loss of jobs by United States workers by providing for orderly and nondisruptive growth of imports of textiles and textile products; and

(2) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

SEC. 103. FINDINGS.

The Congress finds that—

(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

(2) the Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December 1981, through July 1986, contemplates a 6 per centum annual rate of growth for imports for most exporting countries and provides for a lower rate of growth for imports from significant exporting countries;

(3) since 1980, the objective of orderly growth of imports of textiles and textile products provided for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984 imports of textiles and textile products into the United States have grown at an annual rate of 19 per centum, far in excess of the 1 per centum growth rate of the United States market for textiles and textile products during the same period and far in excess of the annual rate of import growth of less than 2 per centum that prevailed during the period 1974 through 1980;

(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last six years, reaching a level of 50 per centum in 1984;

(6) based on a nationwide audit of major retail outlets, the import penetration of such major items of apparel as trousers, blouses, shirts, suits, skirts, and sweaters exceeds 50 per centum of domestic consumption;

(7) since the most recent extension of the Multi-Fiber Arrangement, certain exporting countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States

market for textiles and textile products and have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

(8) imports of textiles and textile products into the United States are predominantly the product of significant producing countries, with five large producing countries now accounting for more than 50 per centum of all imports of textiles and textile products;

(9) the domination of import trade by producers in the significant producing countries has limited participation in the United States market by other producing countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment, with the United States;

(10) a change in United States textile trade policy to afford the smaller producing countries and countries in the Caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 per centum over 1983, and accounted for 13 per centum of the Nation's overall merchandise trade deficit;

(12) the current level of imports of textiles and textile products, ten billion square yard equivalents in 1984, represents over one million job opportunities lost to United States workers;

(13) imported textiles and textile products now account for 38 per centum (the equivalent of three million two hundred thousand bales of cotton) of the annual cotton consumption in the United States; only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States; the result of the massive increases in cotton textile and apparel imports has been a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone, which was only partially offset by Federal cotton program benefits; another result is that United States cotton producers, who are spending about $20,000,000 annually in research and promotion efforts, have built markets not for themselves but for foreign growers;

(14) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool; the Multi-Fiber Arrangement recognizes that imports of certain products, such as wool products, in certain countries, including the United States, pose particular problems for certain industries, such as, the wool products industries in those countries and import growth rates of 1 per centum or less have been permitted in such cases;

(15) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

(16) the increase in imports and increased import penetration of the United States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more modern equipment, productivity, as measured by output per man hour, in the textile mill products sector has increased in the last ten years at the average annual rate of 4.2 per centum and in the apparel sector at the average annual rate of 3.4 per centum, as compared with the lower productivity growth of all manufacturing in the same period of 1.9 per centum;

(17) the factors described above are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Act;

(18) based on experience during the past ten years and on other factors, the growth of the United States market for textiles and textile products is unlikely to exceed an average annual rate of 1 per centum during the next several years;

(19) if the rate of growth of imports of textiles and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

(20) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

(A) to require the establishment of import levels for textiles and textile products supplied by major producing countries that reflect—

(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 per centum annual growth rate contemplated by the Multi-Fiber Arrangement, or 1 per centum in the case of wool products, or

(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 per centum,

whichever is the lesser,

(B) to require the establishment of import levels for textiles and textile products supplied by producing countries that reflect their 1984 import levels,

(C) to require the establishment of import levels for textiles and textile products supplied by small producing countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

(D) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

(21) the establishment of import levels, and limitation of future import growth to levels, that reflect effective enforcement of the Multi-Fiber Arrangement and that also reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United States regarding trade in textiles and apparel;

(22) as the Department of Defense has long recognized, a strong, viable and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

(23) the developments that have led to the sharp increase in imports of textiles and textile products since 1980 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

(24) the sharp increase in imports of textiles and textile products since 1980, and the effect of this increase on the United States textiles and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Multi-Fiber Arrangement and its Protocol.

SEC. 104. DEFINITIONS.

For purposes of this title—

(1) The term "textiles and textile products" includes, but is not limited to, all tops, yarns, man-made fibers, piece goods, made-up articles, apparel, and other textile manufactured products (which derive their chief characteristics from their textile components) made in whole or in part from any natural or manmade fiber, or blend thereof, that are classified under schedule 3, part 6 of schedule 6, parts 1 (except subpart A but including item number 700.75), 4, 5 (except subpart E), 7 or 13 (except item number 790.57) of schedule 7, or part 1 of schedule 8 of the Tariff Schedules of the United States, or part 1 of the Appendix to the Tariff Schedules of the United States; such term does not include apparel containing 70 per centum or more by weight of silk except articles classified under item numbers 373.20 and 373.22 of the Tariff Schedules of the United States;

(2) The term "category" means, with respect to textiles and textile products that are the product of a country, each of the following—

(A) each category of textiles and textile products identified by a three-digit textile category number in the Department of Commerce publication "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated", dated January 1985 and, subsequently, in the first edition of such document that is revised to reflect the adoption by the United States of the Nomenclature Structure of the Harmonized System;

(B) with respect to each country with which the United States has (i) an agreement on the date of enactment of this title limiting exports of textiles and textile products to the United States that includes specific limitations on subdivisions of a category described in subparagraph (A), or (ii) taken unilateral action to limit products entered under such a subdivision, each such subdivision;

(C) a category consisting of the man-made fiber products not covered by a category described in subparagraph A and classified under subpart E of part 1 of schedule 3 to the Tariff Schedules of the United States; and

(D) each category consisting of each of the following products when, because of fiber content, that product is not subject to the Multi-Fiber Arrangement:

(i) yarn,

(ii) fabric,

(iii) apparel, and

(iv) other textile products;

(3) The term "import sensitive category" means—

(A) each category (other than a category applicable to textiles and textile products that are a product of a country in the Caribbean region) for which the ratio of imports to domestic production, as reported in the Department of Commerce publication "U.S. Production, Imports and Import/Production Ratios for Cotton, Wool and Man-Made Fiber Textiles and Apparel", equals or exceeds 40.0 for the preceding calendar year; and

(B) each category covering wool products;

(4) The term "country" means a foreign country (other than Canada and the Member States of the European Economic Community as constituted on January 1, 1985), a foreign territory, an insular possession of the United States, or any other territory, possession, colony, trusteeship or political entity, whether affiliated with the United States or not, that is outside the customs territory of the United States;

(5) The term "major producing country" means a country the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in subparagraph (2)(A) of this section during calendar year 1984 equaled or exceeded 10 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

(6) The term "producing country" means a country (other than a major producing country and a country in the Caribbean region) the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in subparagraph (2)(A) of this section during calendar year 1984 equaled or exceeded 1.25 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

(7) The term "small producing country" means a country other than a major producing country and a producing country;

(8) The term "country in the Caribbean region" means the United Mexican States and a country eligible for designation as a beneficiary country under section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702);

(9) The term "wool product" means an article containing over 17 per centum by weight;

(10) The term "cotton, wool and man-made fiber sweaters" means articles classified under categories 345, 445, 446, 645 or 646 as defined in the Department of Commerce publication "Correlation Textile and Apparel Categories with Tariff Schedules of the United States Annotated," dated January 1985;

(11) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States; and

(12) The term "Multi-Fiber Arrangement" means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva, December 22, 1981.

SEC. 105. LIMITS ON TEXTILE AND APPAREL IMPORTS.

(a) CALENDAR YEAR 1985.—Notwithstanding any other provision of law, the aggregate quantity of textiles and textile products classified under a category that is entered during calendar year 1985 shall not exceed—

(1) in the case of textiles and textile products that are a product of a major producing country, other than textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to a specific limitation under an agreement with a major producing country) the lesser of an amount equal to 101 per centum (A) of the aggregate quantity of such products of such country classified under such category that would have entered during calendar year 1984 if the aggregate quantity of such products of such country classified under such category entered during calendar year 1980 had increased by 6 per centum annually, or 1 per centum annually in the case of a category covering a wool product, during calendar years 1981, 1982, 1983, and 1984, or (B) if the United States has an agreement with such country providing for an annual growth rate for such category of less than 6 per centum, of the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984;

(2) in the case of textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to specific limitation under an agreement with a major producing country, the specific limitation quantity in effect as of the date of enactment of this title;

(3) in the case of textiles and textile products that are a product of a producing country, an amount equal to the aggregate quantity of (A) such products of such country classified under such category that entered during calendar year 1984, or (B) in the case of textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to specific limitation under an agreement with an exporting country, the specific limitation quantity in effect as of the date of enactment of this title;

(4) in the case of textiles and textile products that are a product of a small producing country (other than cotton, wool, and man-made fiber sweaters described in paragraph (5)), an amount equal to the sum of (A) the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984, plus (B) an amount equal to (i) 15 per centum of such quantity, in the case of a category that is not an import sensitive category, or (ii) 1 per centum of such quantity, in the case of a category that is an import sensitive category; and

(5) in the case of cotton, wool, and man-made fiber sweaters that are—

(A) the product of substantial assembly operations in Guam from otherwise completed knit-to-shape component parts, an aggregate amount equal to 160,000 dozen; and

(B) the product of substantial assembly operations in the Commonwealth of the Northern Mariana Islands from otherwise completed knit-to-shape component parts, an aggregate amount equal to 70,000 dozen.

If application of paragraph (1) would result in the aggregate quantity of textiles and textile products of a major producing country classified under all categories permitted to enter during calendar year 1985 to be less than 70 per centum of the aggregate quantity of such products of such country that entered during calendar year 1984, then, notwithstanding paragraph (1), the aggregate quantity of textiles and textile products of such country that may be entered under each category during calendar year 1985 shall not be less than 40 per centum of the aggregate quantity of such products of such country that entered under such category during calendar year 1984.

(b) GROWTH ADJUSTMENT.—For calendar years after 1985, the aggregate quantity of textiles and textile products classified under each category that may be entered during each such calendar year shall—

(1) in the case of such products that are a product of a major producing country or of a producing country, be increased by an amount equal to 1 per centum of the aggregate quantity that could be entered under such category during the preceding calendar year; and

(2) in the case of such products that are a product of a small producing country, be increased by an amount equal to—

(A) in the case of a category (other than an import sensitive category), 6 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year, and

(B) in the case of an import sensitive category, 1 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year.

If the aggregate quantity that could be entered under a category for a calendar year after 1985 is reduced under section 111(b), then, in the first calendar year in which there is no such reduction, this subsection shall be applied as if there had been no reduction under section 111(b) in previous calendar years.

(c) MINIMUM QUANTITIES.—If, under subsection (a) or (b), the aggregate quantity of textiles and textile products of a country that may be entered during a calendar year under a category is—

(1) less than one million square yard equivalents, in the case of a category covering yarn, fabric, made-ups, and miscellaneous products, other than wool products;

(2) less than seven hundred thousand square yard equivalents, in the case of a category covering apparel, other than wool products apparel; or

(3) less than one hundred thousand square yard equivalents, in the case of a category covering wool products,

then, notwithstanding subsection (a) or (b), the aggregate quantity of textiles and textile products of such country that may be entered under such category during the calendar year shall be one million, seven hundred thousand, or one hundred thousand square yard equivalents, respectively. The amount prescribed in the preceding sentence shall be accorded growth subject to the provisions of subsection (b) beginning the first calendar year after the aggregate quantity of products of such country entered under such category equals the minimum quantity prescribed under this subsection.

(d) SPECIAL RULE.—For purposes of this section, if during any calendar year after 1984, the aggregate quantity of textiles and textile products that are the product of a small producing country (other than a country in the Caribbean region) and that are entered under the categories referred to in subparagraph 2(A) of section 104 of this title equals or exceeds 1.25 per centum of all textiles and textile products entered under such categories from all countries and from Canada and the Member States of the European Economic Community during such calendar year, then such small producing country shall be considered to be a producing country for all succeeding calendar years.

(e) ENFORCEMENT.—The Secretary of Commerce shall prescribe such regulations governing the entry, or withdrawal from warehouse, for consumption of textiles and tex-

tile products as may be necessary to carry out this title.

SEC. 106. IMPORT LICENSING.

In order to ensure the equitable and efficient administration of section 105 of this title, the Secretary of Commerce shall, within six months after the date of enactment of this title, establish and administer an import licensing system under which an importer of any textiles and textile products from any country and from Canada and the Member States of the European Economic Community, will be required to present an import permit as a condition of entry. The Secretary shall charge a fee for import licenses in such amount as may be necessary to cover the cost of administration of the system. The Secretary of the Treasury shall make all determinations regarding classification under the Tariff Schedules of the United States, appraisement, and valuation of products subject to licensing under this section.

SEC. 107. ANNUAL REPORT.

Not later than March 15, 1986, and March 15 of each calendar year thereafter, the President shall submit to the Congress a report on the administration of this title during the preceding calendar year. Such report shall include detailed information about the implementation and operation of the limitations established under section 105. The report shall also include a detailed report by the Department of Commerce on the implementation and enforcement for the provisions of this title exempting from import limitations certain articles of silk apparel, with special regard to the extent to which nonsilk articles, and silk articles not exempt from import limitations, are erroneously or fraudulently classified as silk items exempt from import limitations and are entered under this title. All departments and agencies shall cooperate in preparation of this report as requested by the President.

SEC. 108. REVIEW.

The Secretary of Commerce shall commence ten years after the date of enactment of this title a formal review of the operation of the Textile Import Control Program under the provisions of this title. The Secretary shall consult Members and committees of Congress, representatives of the labor unions and the industries affected by the program, the Secretary of the Treasury, and other appropriate government officials. Within six months after the commencement of the study, the Secretary shall submit to Congress his findings as well as his recommendations for the future conduct of the program.

SEC. 109. DUTY FREE ENTRY OF CERTAIN SWEATERS FROM GUAM AND THE NORTHERN MARIANAS.

Subpart A of part 7, schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by adding at the end thereof the following new item:

"385.97	Cotton, wool and man-made fiber sweaters that are entitled to enter under the quotas established under section 105(a)(5) of the Textile and Apparel Trade Enforcement Act of 1985 or the increased quotas under section 105(b) of such Act that adjust the quotas under such section 105(a)(5) and that do not contain foreign materials to the value of more than 50 percent of their total value as this standard is applied pursuant to Headnote 3(a) of the General Headnotes and Rules of Interpretation	Free".

SEC. 110. PRODUCTS OF THE INSULAR POSSESSIONS OF THE UNITED STATES.

(a) GENERAL RULE.—Notwithstanding section 104(4) of this title, textiles and textile products that are the product of an insular possession of the United States shall not be considered to be products of a country, within the meaning of section 104(4), if such products meet the requirements of subsection (b).

(b) POSSESSION CONTENT.—

(1) Subsection (a) shall apply to an article if—

(A) that article is imported directly from an insular possession of the United States into the customs territory of the United States; and

(B) the sum of (i) the cost or value of the materials produced in such insular possession of the United States or in the customs territory of the United States plus (ii) the direct costs of processing operations performed in such insular possession of the United States is not less than 85 per centum of the appraised value of such article at the time it is entered.

(2) The Secretary of the Treasury shall prescribe such regulations as may be necessary to carry out this section, except that the rules of origin contained in 19 CFR 12.130 shall be the rules of origin for purposes of this section.

(3) As used in this subsection, the phrase "direct costs of processing operations" includes—

(A) all actual labor costs attributable to permanent residents of the insular possession involved in the growth, production, manufacture, or assembly of the specific merchandise, including fringe benefits, on-the-job training and the cost of engineering, supervisory, quality control, and similar personnel; and

(B) dies, molds, tooling, and depreciation on machinery and equipment which are allocable to the specific merchandise.

Such phrase does not include costs which are attributable to nonpermanent resident labor, are not directly attributable to the merchandise concerned, or are not costs of manufacturing the product, such as (i) profit, and (ii) general expenses of doing business which are either not allocable to the specific merchandise or are not related to the growth, production, manufacture, or assembly of the merchandise, such as administrative salaries, casualty and liability insurance, advertising, and salesmen's salaries, commissions or expenses.

SEC. 111. EFFECTIVE DATE.

(a) IN GENERAL.—Subject to the provisions of subsection (b), the provisions of this title shall apply to textiles and textile products entered, or withdrawn from warehouse, for consumption on or after the date of enactment of this title.

(b) CALENDAR YEARS 1985 AND 1986.—The Secretary of Commerce shall prescribe by regulation the aggregate quantity, if any, of textiles and textile products that may be entered under section 105 (a) or (c) of this title from each country under each category during the period beginning on the date of enactment of this title and ending December 31, 1985. Notwithstanding subsection (a), to the extent that the aggregate quantity of imports of textiles and textile products of a country entered under a category after December 31, 1984, and before the date of enactment of this title exceeds the quantity permitted entry for such products of such country and such category during calendar year 1985 under subsection 5 (a) or (c) of section 105, then the limit that would otherwise apply under section 105 (b) or (c) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 105 (b) or (c) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 105(b) for such category for such country for calendar year 1986, then the limit for such category and country for calendar years after 1986 shall be reduced until such excess is accounted for.

TITLE II

SEC. 201. SHORT TITLE.

This title may be cited as the "American Footwear Industry Recovery Act of 1985".

SEC. 202. FINDINGS AND PURPOSE.

(a) The Congress finds that—

(1) The domestic nonrubber footwear industry is important to the national economy, and footwear firms are vital to the economic health of small towns throughout the United States.

(2) The domestic nonrubber footwear industry is highly labor intensive, and low capital requirements for entry into footwear production make it a primary target for industrializing or newly industrialized countries. As a consequence, footwear is produced in virtually every footwear consuming country in the world.

(3) Tremendous competitive pressure has been created in the world footwear market in the last decade as a result of rapidly growing production and capacity in numerous developing and developed countries. This development has resulted in the widespread erection of tariff and nontariff barriers by foreign countries designed to protect their domestic footwear industries.

(4) The United States has historically resisted the protectionist trends of other producing nations and has instead maintained a market distinguished by its accessibility. As a result, the United States market has become a focal point for world trade in nonrubber footwear.

(5) The diversion of international trade to the United States market has resulted in serious injury to domestic producers as manifested by—

(A) the loss of 155,000 footwear jobs since 1968,

(B) a decline in domestic production and production capacity, and

(C) the permanent closure of over 500 plants during the same period.

(6) The serious injury to domestic producers poses a significant danger to the industry's supplier base as well.

(7) The domestic nonrubber footwear producers have made a significant commitment to the future of the industry through substantial capital investment.

(8) Since the termination of temporary import relief in 1981, capital investment in the domestic nonrubber footwear industry has declined as the industry struggled to battle the massive surge in imports which increased the percentage share of imported footwear in the United States market from, 51 per centum in 1981 to 77 per centum in 1985.

(9) Without the restriction of import levels, capital investment in this domestic industry will continue to decrease.

(10) The domestic nonrubber footwear industry has thrice been judged by the International Trade Commission, as recently as May 1985, to be seriously injured by imports.

(11) Since the termination of the two, 4-year orderly marketing agreements in 1981, the harm to the domestic industry is even more critical than the serious injury which triggered the Commission's unanimous findings in 1976 and 1977.

(12) The domestic nonrubber footwear industry has not been afforded adequate and appropriate relief from imports; therefore, the Congress concludes that—

(A) the administrative process under sections 201, 202, and 203 of the Trade Act of 1974 has proven inadequate; and

(B) in the absence of and effective remedy under such process, legislative relief is essential.

(b)(1) It is the purpose of Congress in enacting this section to—

(A) promote and expand the economic health of the United States nonrubber footwear industry,

(B) preserve the jobs of American workers, and

(C) prevent the further decline of this important domestic industry.

(2) It is declared to be the policy of Congress that access to the United States market for foreign-produced nonrubber footwear should be on an equitable basis to ensure orderly trade in nonrubber footwear, reduce unfair trade in nonrubber footwear, and address United States balance-of-payments problems, of which footwear is the seventh largest component. In order to accomplish these objectives, it is deemed necessary and appropriate to limit imports of nonrubber footwear into the United States market.

SEC. 203. DEFINITIONS.

For purposes of this title—

(1) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

(2) The term "Secretary" means Secretary of Commerce.

(3) The term "nonrubber footwear" means the following categories of nonrubber footwear products, identified by reference to the following item numbers of the Tariff Schedules of the United States (as in effect on January 1, 1985): 700.05 through 700.45; 700.56; 700.72 through 700.83; and 700.95; except alpine (down hill) ski boots and nordic (cross country and jumping) ski boots.

(4) The term "apparent domestic consumption" means, with respect to any 1-year period, the sum of imports plus domestic production less exports.

SEC. 204. QUANTITATIVE LIMITATION ON NONRUBBER FOOTWEAR.

(a)(1) During the 8-year period beginning on the date of enactment of this title, the aggregate number of pairs of nonrubber footwear which may be entered during any 1-year period shall not exceed 60 per centum of the estimated apparent domestic consumption of nonrubber footwear for such period.

(2) The quantitative limitation imposed by paragraph (1) for any 1-year period shall be distributed among the following categories of nonrubber footwear so that the aggregate number of pairs of nonrubber footwear in such category which may be entered during any 1-year period shall not exceed the quantity equal to—

(A) in the case of nonrubber footwear with a customs value that does not exceed $1.25 per pair, 10 per centum of apparent domestic consumption of nonrubber footwear for such period,

(B) in the case of nonrubber footwear with a customs value that exceeds $1.25 per pair but does not exceed $2.50 per pair, 5.4 per centum of apparent domestic consumption of nonrubber footwear for such period, and

(C) in the case of nonrubber footwear with a customs value that exceeds $2.50 per pair, 44.6 per centum of apparent domestic consumption of nonrubber footwear for such period.

(b) Within 60 days after the effective date of this title, and on the first day of the fourth quarter of each 1-year period thereafter, the Secretary shall determine on the basis of the best information available, including his own or independent forecasts, the expected apparent domestic consumption of nonrubber footwear for, in the case of the initial determination, the remainder of the current 1-year period and in the case of the first day of the fourth quarter of each 1-year period thereafter, the next succeeding 1-year period. On each such date, the Secretary shall determine and publish in the Federal Register the allocation for the next succeeding 1-year period of permissible imports of nonrubber footwear as required by this section.

(c) On the first days of the first, second, and third quarters of each 1 year period, the Secretary shall revise the determinations of expected apparent domestic consumption made under subsection (b) for the current 1 year period on the basis of the best information then available and shall make such adjustments in the quantity of nonrubber footwear permitted to be imported under this section as indicated by the revision. All revisions and adjustments made under this subsection shall be published in the Federal Register.

(d) If the revised determination of expected apparent domestic consumption published in the Federal Register under subsection (c) on the first day of the third quarter in any 1 year period for nonrubber footwear varies from the actual apparent domestic consumption of nonrubber footwear for such 1 year period, the Secretary shall publish in the Federal Register on the first day of the second quarter of such succeeding 1 year period a revision to the determination of expected apparent domestic consumption for such 1 year period made under subsection (c) of this section. The revision shall be in the amount of such variance and shall be in addition to any other revision that would be made on any such first day of the second quarter under subsection (c) of this section.

(e)(1) The Secretary and the Secretary of the Treasury shall take such actions within their respective jurisdictions as may be necessary or appropriate to enforce the provisions of this section, including without limitation, the issuance of orders to Customs officers to bar entry to merchandise if the entry of such merchandise would cause the limitations established under this section to be exceeded.

(2)(A) The Secretary and the Secretary of the Treasury are each authorized to issue such implementing regulations, including the issuance of import licenses, as may be necessary or appropriate to effect the purposes of this section and to enforce the provisions of this section.

(B) Before prescribing any regulations under subparagraph (A), the Secretary or the Secretary of the Treasury, as the case may be, shall—

(i) consult with interested domestic parties,

(ii) afford an opportunity for such parties to comment on the proposed regulations, and

(iii) consider all such comments before prescribing final regulations.

SEC. 205. COMPENSATION AUTHORITY.

For purposes of section 123 of the Trade Act of 1974 (19 U.S.C. 2133), the imposition of the quantitative limitation under section 204 shall be treated as action taken under section 203 of the Trade Act of 1974 (19 U.S.C. 2253).

TITLE III—COPPER

SEC. 301. SHORT TITLE.

This title may be cited as the "Copper Free Market Restoration Act of 1985".

SEC. 302. FINDINGS, PURPOSE, AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) the copper industry of the United States is critical to the national defense and the maintenance of a strong economy, but has suffered a substantial economic setback, including a 50 per centum reduction in employment levels, a 25 per centum drop in production, the closure of 16 major mines, and the permanent loss of copper reserves;

(2) the substantial economic setback to the domestic copper industry is attributable to the steep decline in world copper prices that has resulted from—

(A) the continued overproduction of copper by government-owned foreign producers that—

(i) have been encouraged to overproduce by their host governments in order to generate foreign exchange and maintain employment levels, and

(ii) enjoy unfair competitive advantage over United States producers because of subsidized loans from their governments and from international lending institutions, such as the World Bank, and the absence of adequate environmental regulation; and

(B) the overvaluation of the dollar and its impact on domestic copper prices;

(3) the extent of the economic setback to the domestic copper industry was documented in 1984 when the United States International Trade Commission unanimously found that the industry had been injured by foreign competition under the terms of section 201 of the Trade Act of 1974 and recommended that appropriate relief be granted;

(4) while copper producers in the United States have made a substantial commitment to the modernization of the industry, more improvements are needed, and the reinvestment in the United States copper industry that is needed for those improvements is seriously jeopardized by the failure of existing trade statutes to deal effectively with the problem of excess world production; and

(5) a 5-year stabilization of foreign copper production is needed if the domestic copper industry is to attract the necessary capital for reinvestment.

(b) PURPOSE.—The purpose of this title is to—

(1) ensure an adequate supply of domestic copper,

(2) expand employment in the copper industry, and

(3) stabilize foreign copper production at levels that will enable domestic copper producers to make necessary improvements and modernization.

(c) POLICY.—The Congress declares it to be the national policy that the United States must seek to negotiate agreements temporarily limiting copper production by foreign copper producers so that the purposes of this title can be fulfilled.

SEC. 303. DEFINITIONS.

For purposes of this title—

(1) The term "agreement negotiation period" means the 9-month period beginning on the first day of the first calendar

month beginning after the date of enactment of this Act.

(2) The term "major copper producing country" means any foreign country whose production of unwrought copper during 1984 exceeded 300,000 metric tons.

(3) The term "significant copper producing country" means any foreign country whose production of unwrought copper during 1984 exceeded 200,000 metric tons but did not exceed 300,000 metric tons.

(4) The term "unwrought copper" means articles provided for in items 612.02 through 612.06 of the Tariff Schedules of the United States.

(5) The term "restraint period" means the 5-year period beginning at the close of the agreement negotiation period.

SEC. 304. NEGOTIATIONS AND ACTION REGARDING AGREEMENTS TO VOLUNTARILY RESTRAIN COPPER PRODUCTION.

(a) NEGOTIATIONS.—

(1) The President, acting through the United States Trade Representative and the Secretary of the Interior, shall undertake negotiations during the agreement negotiation period with all major copper producing countries for the purpose of obtaining voluntary restraint agreements under which the aggregate production of unwrought copper by the major copper producing countries during each 1-year period within the restraint period will not exceed the aggregate production of unwrought copper by those countries during calendar year 1982.

(2) The President, acting through the United States Trade Representative and the Secretary of the Interior, shall undertake negotiations during the agreement negotiation period with all significant copper producing countries for the purpose of obtaining voluntary restraint agreements under which the aggregate production of unwrought copper by the significant copper producing countries during each 1-year period within the restraint period will not exceed the sum of—

(A) the aggregate production of unwrought copper by those countries during calendar year 1984, plus

(B) the estimated growth in demand for unwrought copper for such 1-year period within the restraint period.

(b) REPORTS.—

(1) At the close of each 3-month period within the agreement negotiation period, the President shall submit to the Congress a report on the progress of negotiations conducted under subsection (a). Such report shall—

(A) set forth the terms of any voluntary restraint agreement that has been entered into under subsection (a) during such 3-month period,

(B) contain a summary of the actions taken by the President during such 3-month period to obtain agreements under subsection (a) with each major copper producing country and significant copper producing country that has not entered into such an agreement,

(C) contain a summary of the responses (including counteroffers) made during such 3-month period by each of the countries described in subparagraph (B) to the actions of the President described in subparagraph (B),

(D) include a description of the obstacles and objections encountered by the President during such 3-month period to the achievement of agreements under subsection (a), and

(E) include an assessment of whether each country described in subparagraph (B) is negotiating in good faith.

(2) The final report that is required to be submitted under paragraph (1) shall include—

(A) a determination by the President of whether the agreements entered into under subsection (a) will achieve the purposes of this title, and

(B) recommendations of the President regarding any actions that should be taken against any major copper producing country or significant copper producing country which refuses to enter into a voluntary restraint agreement under subsection (a).

(c) ACTION IF VOLUNTARY RESTRAINT AGREEMENTS TAKE EFFECT.—If voluntary restraint agreements described in subsection (a) take effect between the United States and the major copper producing countries or significant copper producing countries—

(1) the United States Trade Representative, with the cooperation of other appropriate Federal officers, shall monitor the production of unwrought copper by those countries during each 1-year period within the restraint period for the purpose of ascertaining if the terms of the agreements are being complied with during such 1-year period, and

(2) the United States Trade Representative shall, within 30 days after the close of each 1-year period within the restraint period, report to the Congress on the results of the monitoring carried out during such 1-year period.

TITLE IV—FOREIGN LABOR PRACTICES

SEC. 401. REPORTS.

(a)(1) The United States International Trade Commission shall conduct a study of the wage rates, labor costs, and other labor practices of each foreign country which had a surplus in the balance of trade between the United States and such foreign country for calendar year 1984 that exceeded $4,000,000,000. Such study should consider labor practices existing throughout the economy of each of such countries and the labor practices of the industries in each of such countries that were responsible for such balance of trade surplus.

(2) The study conducted under paragraph (1) shall include, with respect to each foreign country described in paragraph (1), analyses of—

(A) the effects of the labor practices of such foreign country studied under paragraph (1) on the competitive position of United States exports in foreign markets and in United States markets,

(B) the relationship between—

(i) the wages and other compensation paid to workers in United States industries producing goods that face substantial competition from products of such foreign country, and

(ii) the wages and other compensation paid to workers in such foreign country who produce such competitive products,

(C) the relationship, if any, between the labor practices of such foreign country studied under paragraph (1) and the cultural, religious, and political practices or values of such foreign country,

(D) the extent to which such labor practices are encouraged or enforced by the government of such foreign country,

(E) the history, duration, and extent of such labor practices, and

(F) the extent to which private or public forces that are anticompetitive encourage such labor practices.

(3) By no later than the date that is 9 months after the date of enactment of this Act, the United States International Trade Commission shall submit a report on the study conducted under paragraph (1) to the Congress, the Secretary of Labor, and the Secretary of Commerce.

(b)(1) The Secretary of Labor and the Secretary of Commerce shall each conduct a separate investigation to—

(A) identify each of the labor practices discussed in the report submitted under subsection (a)(3) that—

(i) is illegal under existing laws of the United States or of any State, or

(ii) should be prohibited by all countries under an international labor law code,

(B) determine what labor principles and rules should be included in an international labor law code, and

(C) determine the issues involved in, and the prospects for achieving, the elimination of labor practices identified under subparagraph (A) through negotiations with foreign countries.

(2) By no later than 3 months after the date on which the report is submitted under subsection (a)(3), the Secretary of Labor and the Secretary of Commerce shall each submit to the Congress a report on the investigation conducted under paragraph (1).

NATIONAL TRADE DATA BANK

HOLLINGS AMENDMENT NO. 1425

(Ordered referred to the Committee on Finance.)

Mr. HOLLINGS submitted an amendment intended to be proposed by him to the bill (S. 1837) to establish a National Trade Data Bank, to provide authority to revise certain trade and financial agreements, and for other purposes; as follows:

At the end of the bill, add the following:

TITLE I—TEXTILE AND APPAREL TRADE ENFORCEMENT

SEC. 101. SHORT TITLE.

This title may be cited as the "Textile and Apparel Trade Enforcement Act of 1985".

SEC. 102. POLICY.

The policy of this title is—

(1) to prevent further disruption of the United States textiles and textile products markets, damage to United States textile and apparel manufacturers, and loss of jobs by United States workers by providing for orderly and nondisruptive growth of imports of textiles and textile products; and

(2) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

SEC. 103. FINDINGS.

The Congress finds that—

(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

(2) the Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December 1981, through July 1986, contemplates a 6 per centum annual rate of growth for imports for most exporting countries and provides for a lower rate of growth for imports from significant exporting countries;

(3) since 1980, the objective of orderly growth of imports of textiles and textile products provided for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984 imports of textiles and textile products into the United States have grown at an annual rate of 19 per centum, far in excess of the 1 per centum growth rate of the United States market for textiles and textile products during the same period and far in excess of the annual rate of import growth of less than 2 per centum that prevailed during the period 1974 through 1980;

(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last six years, reaching a level of 50 per centum in 1984;

(6) based on a nationwide audit of major retail outlets, the import penetration of such major items of apparel as trousers, blouses, shirts, suits, skirts, and sweaters exceeds 50 per centum of domestic consumption;

(7) since the most recent extension of the Multi-Fiber Arrangement, certain exporting countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States market for textiles and textile products and have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

(8) imports of textiles and textile products into the United States are predominantly the product of significant producing countries, with five large producing countries now accounting for more than 50 per centum of all imports of textiles and textile products;

(9) the domination of import trade by producers in the significant producing countries has limited participation in the United States market by other producing countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment, with the United States;

(10) a change in United States textile trade policy to afford the smaller producing countries and countries in the Caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 per centum over 1983, and accounted for 13 per centum of the Nation's overall merchandise trade deficit;

(12) the current level of imports of textiles and textile products, ten billion square yard equivalents in 1984, represents over one million job opportunities lost to United States workers;

(13) imported textiles and textile products now account for 38 per centum (the equivalent of three million two hundred thousand bales of cotton) of the annual cotton consumption in the United States; only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States; the result of the massive increases in cotton textile and apparel imports has been a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone, which was only partially offset by Federal cotton program benefits; another result is that United States cotton producers, who are spending about $20,000,000 annually in research and promotion efforts, have built markets not for themselves but for foreign growers;

(14) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool; the Multi-Fiber Arrangement recognizes that imports of certain products, such as wool products, in certain countries, including the United States, pose particular problems for certain industries, such as, the wool products industries in those countries and import growth rates of 1 per centum or less have been permitted in such cases;

(15) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

(16) the increase in imports and increased import penetration of the United States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more modern equipment, productivity, as measured by output per man hour, in the textile mill products sector has increased in the last ten years at the average annual rate of 4.2 per centum and in the apparel sector at the average annual rate of 3.4 per centum, as compared with the lower productivity growth of all manufacturing in the same period of 1.9 per centum;

(17) the factors described above are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Act;

(18) based on experience during the past ten years and on other factors, the growth of the United States market for textiles and textile products is unlikely to exceed an average annual rate of 1 per centum during the next several years;

(19) if the rate of growth of imports of textiles and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

(20) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

(A) to require the establishment of import levels for textiles and textile products supplied by major producing countries that reflect—

(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 per centum annual growth rate contemplated by the Multi-Fiber Arrangement, or 1 per centum in the case of wool products, or

(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 per centum,

whichever is the lesser,

(B) to require the establishment of import levels for textiles and textile products supplied by producing countries that reflect their 1984 import levels,

(C) to require the establishment of import levels for textiles and textile products supplied by small producing countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

(D) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

(21) the establishment of import levels, and limitation of future import growth to levels, that reflect effective enforcement of the Multi-Fiber Arrangement and that also reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United States regarding trade in textiles and apparel;

(22) as the Department of Defense has long recognized, a strong, viable and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

(23) the developments that have led to the sharp increase in imports of textiles and textile products since 1980 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

(24) the sharp increase in imports of textiles and textile products since 1980, and the effect of this increase on the United States textiles and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Multi-Fiber Arrangement and its Protocol.

SEC. 104. DEFINITIONS.

For purposes of this title—

(1) The term "textiles and textile products" includes, but is not limited to, all tops, yarns, man-made fibers, piece goods, made-up articles, apparel, and other textile manufactured products (which derive their chief characteristics from their textile components) made in whole or in part from any natural or manmade fiber, or blend thereof, that are classified under schedule 3, part 6 of schedule 6, parts 1 (except subpart A but including item number 700.75), 4, 5 (except subpart E), 7 or 13 (except item number 790.57) of schedule 7, or part 1 of schedule 8 of the Tariff Schedules of the United States, or part 1 of the Appendix to the Tariff Schedules of the United States; such term does not include apparel containing 70 per centum or more by weight of silk except articles classified under item numbers 373.20

and 373.22 of the Tariff Schedules of the United States;

(2) The term "category" means, with respect to textiles and textile products that are the product of a country, each of the following—

(A) each category of textiles and textile products identified by a three-digit textile category number in the Department of Commerce publication "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated", dated January 1985 and, subsequently, in the first edition of such document that is revised to reflect the adoption by the United States of the Nomenclature Structure of the Harmonized System;

(B) with respect to each country with which the United States has (i) an agreement on the date of enactment of this title limiting exports of textiles and textile products to the United States that includes specific limitations on subdivisions of a category described in subparagraph (A), or (ii) taken unilateral action to limit products entered under such a subdivision, each such subdivision;

(C) a category consisting of the man-made fiber products not covered by a category described in subparagraph A and classified under subpart E of part 1 of schedule 3 to the Tariff Schedules of the United States; and

(D) each category consisting of each of the following products when, because of fiber content, that product is not subject to the Multi-Fiber Arrangement:

(i) yarn,

(ii) fabric,

(iii) apparel, and

(iv) other textile products;

(3) The term "import sensitive category" means—

(A) each category (other than a category applicable to textiles and textile products that are a product of a country in the Caribbean region) for which the ratio of imports to domestic production, as reported in the Department of Commerce publication "U.S. Production, Imports and Import/Production Ratios for Cotton, Wool and Man-Made Fiber Textiles and Apparel", equals or exceeds 40.0 for the preceding calendar year; and

(B) each category covering wool products;

(4) The term "country" means a foreign country (other than Canada and the Member States of the European Economic Community as constituted on January 1, 1985), a foreign territory, an insular possession of the United States, or any other territory, possession, colony, trusteeship or political entity, whether affiliated with the United States or not, that is outside the customs territory of the United States;

(5) The term "major producing country" means a country the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in subparagraph (2)(A) of this section during calendar year 1984 equaled or exceeded 10 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

(6) The term "producing country" means a country (other than a major producing country and a country in the Caribbean region) the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in subparagraph (2)(A) of this section during calendar year 1984 equaled or exceeded 1.25 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

(7) The term "small producing country" means a country other than a major producing country and a producing country;

(8) The term "country in the Caribbean region" means the United Mexican States and a country eligible for designation as a beneficiary country under section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702);

(9) The term "wool product" means an article containing over 17 per centum by weight;

(10) The term "cotton, wool and man-made fiber sweaters" means articles classified under categories 345, 445, 446, 645 or 646 as defined in the Department of Commerce publication "Correlation Textile and Apparel Categories with Tariff Schedules of the United States Annotated," dated January 1985;

(11) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States; and

(12) The term "Multi-Fiber Arrangement" means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva, December 22, 1981.

SEC. 105. LIMITS ON TEXTILE AND APPAREL IMPORTS.

(a) CALENDAR YEAR 1985.—Notwithstanding any other provision of law, the aggregate quantity of textiles and textile products classified under a category that is entered during calendar year 1985 shall not exceed—

(1) in the case of textiles and textile products that are a product of a major producing country, other than textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to a specific limitation under an agreement with a major producing country) the lesser of an amount equal to 101 per centum (A) of the aggregate quantity of such products of such country classified under such category that would have entered during calendar year 1984 if the aggregate quantity of such products of such country classified under such category entered during calendar year 1980 had increased by 6 per centum annually, or 1 per centum annually in the case of a category covering a wool product, during calendar years 1981, 1982, 1983, and 1984, or (B) if the United States has an agreement with such country providing for an annual growth rate for such category of less than 6 per centum, of the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984;

(2) in the case of textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to specific limitation under an agreement with a major producing country, the specific limitation quantity in effect as of the date of enactment of this title;

(3) in the case of textiles and textile products that are a product of a producing country, an amount equal to the aggregate quantity of (A) such products of such country classified under such category that entered during calendar year 1984, or (B) in the case of textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to specific limitation under an agreement with an exporting country, the specific limitation quantity in effect as of the date of enactment of this title;

(4) in the case of textiles and textile products that are a product of a small producing country (other than cotton, wool, and man-made fiber sweaters described in paragraph (5)), an amount equal to the sum of (A) the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984, plus (B) an amount equal to (i) 15 per centum of such quantity, in the case of a category that is not an import sensitive category, or (ii) 1 per centum of such quantity, in the case of a category that is an import sensitive category; and

(5) in the case of cotton, wool, and man-made fiber sweaters that are—

(A) the product of substantial assembly operations in Guam from otherwise completed knit-to-shape component parts, an aggregate amount equal to 160,000 dozen; and

(B) the product of substantial assembly operations in the Commonwealth of the Northern Mariana Islands from otherwise completed knit-to-shape component parts, an aggregate amount equal to 70,000 dozen.

If application of paragraph (1) would result in the aggregate quantity of textiles and textile products of a major producing country classified under all categories permitted to enter during calendar year 1985 to be less than 70 per centum of the aggregate quantity of such products of such country that entered during calendar year 1984, then, notwithstanding paragraph (1), the aggregate quantity of textiles and textile products of such country that may be entered under each category during calendar year 1985 shall not be less than 40 per centum of the aggregate quantity of such products of such country that entered under such category during calendar year 1984.

(b) GROWTH ADJUSTMENT.—For calendar years after 1985, the aggregate quantity of textiles and textile products classified under each category that may be entered during each such calendar year shall—

(1) in the case of such products that are a product of a major producing country or of a producing country, be increased by an amount equal to 1 per centum of the aggregate quantity that could be entered under such category during the preceding calendar year; and

(2) in the case of such products that are a product of a small producing country, be increased by an amount equal to—

(A) in the case of a category (other than an import sensitive category), 6 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year, and

(B) in the case of an import sensitive category, 1 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year.

If the aggregate quantity that could be entered under a category for a calendar year after 1985 is reduced under section 111(b), then, in the first calendar year in which there is no such reduction, this subsection shall be applied as if there had been no reduction under section 111(b) in previous calendar years.

(c) MINIMUM QUANTITIES.—If, under subsection (a) or (b), the aggregate quantity of textiles and textile products of a country that may be entered during a calendar year under a category is—

(1) less than one million square yard equivalents, in the case of a category cover-

ing yarn, fabric, made-ups, and miscellaneous products, other than wool products;

(2) less than seven hundred thousand square yard equivalents, in the case of a category covering apparel, other than wool products apparel; or

(3) less than one hundred thousand square yard equivalents, in the case of a category covering wool products,

then, notwithstanding subsection (a) or (b), the aggregate quantity of textiles and textile products of such country that may be entered under such category during the calendar year shall be one million, seven hundred thousand, or one hundred thousand square yard equivalents, respectively. The amount prescribed in the preceding sentence shall be accorded growth subject to the provisions of subsection (b) beginning the first calendar year after the aggregate quantity of products of such country entered under such category equals the minimum quantity prescribed under this subsection.

(d) SPECIAL RULE.—For purposes of this section, if during any calendar year after 1984, the aggregate quantity of textiles and textile products that are the product of a small producing country (other than a country in the Caribbean region) and that are entered under the categories referred to in subparagraph 2(A) of section 104 of this title equals or exceeds 1.25 per centum of all textiles and textile products entered under such categories from all countries and from Canada and the Member States of the European Economic Community during such calendar year, then such small producing country shall be considered to be a producing country for all succeeding calendar years.

(e) ENFORCEMENT.—The Secretary of Commerce shall prescribe such regulations governing the entry, or withdrawal from warehouse, for consumption of textiles and textile products as may be necessary to carry out this title.

SEC. 106. IMPORT LICENSING.

In order to ensure the equitable and efficient administration of section 105 of this title, the Secretary of Commerce shall, within six months after the date of enactment of this title, establish and administer an import licensing system under which an importer of any textiles and textile products from any country and from Canada and the Member States of the European Economic Community, will be required to present an import permit as a condition of entry. The Secretary shall charge a fee for import licenses in such amount as may be necessary to cover the cost of administration of the system. The Secretary of the Treasury shall make all determinations regarding classification under the Tariff Schedules of the United States, appraisement, and valuation of products subject to licensing under this section.

SEC. 107. ANNUAL REPORT.

Not later than March 15, 1986, and March 15 of each calendar year thereafter, the President shall submit to the Congress a report on the administration of this title during the preceding calendar year. Such report shall include detailed information about the implementation and operation of the limitations established under section 105. The report shall also include a detailed report by the Department of Commerce on the implementation and enforcement for the provisions of this title exempting from import limitations certain articles of silk apparel, with special regard to the extent to which nonsilk articles, and silk articles not exempt from import limitations, are erroneously or fraudulently classified as silk items exempt from import limitations and are entered under this title. All departments and agencies shall cooperate in preparation of this report as requested by the President.

SEC. 108. REVIEW.

The Secretary of Commerce shall commence ten years after the date of enactment of this title a formal review of the operation of the Textile Import Control Program under the provisions of this title. The Secretary shall consult Members and committees of Congress, representatives of the labor unions and the industries affected by the program, the Secretary of the Treasury, and other appropriate government officials. Within six months after the commencement of the study, the Secretary shall submit to Congress his findings as well as his recommendations for the future conduct of the program.

SEC. 109. DUTY FREE ENTRY OF CERTAIN SWEATERS FROM GUAM AND THE NORTHERN MARIANAS.

Subpart A of part 7, schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by adding at the end thereof the following new item:

"385.97	Cotton, wool and man-made fiber sweaters that are entitled to enter under the quotas established under section 105(a)(5) of the Textile and Apparel Trade Enforcement Act of 1985 or the increased quotas under section 105(b) of such Act that adjust the quotas under such section 105(a)(5) and that do not contain foreign materials to the value of more than 50 percent of their total value as this standard is applied pursuant to Headnote 3(a) of the General Headnotes and Rules of Interpretation	Free".

SEC. 110. PRODUCTS OF THE INSULAR POSSESSIONS OF THE UNITED STATES.

(a) GENERAL RULE.—Notwithstanding section 104(4) of this title, textiles and textile products that are the product of an insular possession of the United States shall not be considered to be products of a country, within the meaning of section 104(4), if such products meet the requirements of subsection (b).

(b) Possession Content.—

(1) Subsection (a) shall apply to an article if—

(A) that article is imported directly from an insular possession of the United States into the customs territory of the United States; and

(B) the sum of (i) the cost or value of the materials produced in such insular possession of the United States or in the customs territory of the United States plus (ii) the direct costs of processing operations performed in such insular possession of the United States is not less than 85 per centum of the appraised value of such article at the time it is entered.

(2) The Secretary of the Treasury shall prescribe such regulations as may be necessary to carry out this section, except that the rules of origin contained in 19 CFR 12.130 shall be the rules of origin for purposes of this section.

(3) As used in this subsection, the phrase "direct costs of processing operations" includes—

(A) all actual labor costs attributable to permanent residents of the insular possession involved in the growth, production, manufacture, or assembly of the specific merchandise, including fringe benefits, on-the-job training and the cost of engineering, supervisory, quality control, and similar personnel; and

(B) dies, molds, tooling, and depreciation on machinery and equipment which are allocable to the specific merchandise.

Such phrase does not include costs which are attributable to nonpermanent resident labor, are not directly attributable to the merchandise concerned, or are not costs of manufacturing the product, such as (i) profit, and (ii) general expenses of doing business which are either not allocable to the specific merchandise or are not related to the growth, production, manufacture, or assembly of the merchandise, such as administrative salaries, casualty and liability insurance, advertising, and salesmen's salaries, commissions or expenses.

SEC. 111. EFFECTIVE DATE.

(a) IN GENERAL.—Subject to the provisions of subsection (b), the provisions of this title shall apply to textiles and textile products entered, or withdrawn from warehouse, for consumption on or after the date of enactment of this title.

(b) CALENDAR YEARS 1985 AND 1986.—The Secretary of Commerce shall prescribe by regulation the aggregate quantity, if any, of textiles and textile products that may be entered under section 105 (a) or (c) of this title from each country under each category during the period beginning on the date of enactment of this title and ending December 31, 1985. Notwithstanding subsection (a), to the extent that the aggregate quantity of imports of textiles and textile products of a country entered under a category after December 31, 1984, and before the date of enactment of this title exceeds the quantity permitted entry for such products of such country and such category during calendar year 1985 under subsection 5 (a) or (c) of section 105, then the limit that would otherwise apply under section 105 (b) or (c) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 105 (b) or (c) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 105(b) for such category for such country for calendar year 1986, then the limit for such category and country for calendar years after 1986 shall be reduced until such excess is accounted for.

TITLE II

SEC. 201. SHORT TITLE.

This title may be cited as the "American Footwear Industry Recovery Act of 1985".

SEC. 202. FINDINGS AND PURPOSE.

(a) The Congress finds that—

(1) The domestic nonrubber footwear industry is important to the national economy, and footwear firms are vital to the economic health of small towns throughout the United States.

(2) The domestic nonrubber footwear industry is highly labor intensive, and low capital requirements for entry into footwear production make it a primary target for industrializing or newly industrialized countries. As a consequence, footwear is produced in virtually every footwear consuming country in the world.

(3) Tremendous competitive pressure has been created in the world footwear market in the last decade as a result of rapidly

growing production and capacity in numerous developing and developed countries. This development has resulted in the widespread erection of tariff and nontariff barriers by foreign countries designed to protect their domestic footwear industries.

(4) The United States has historically resisted the protectionist trends of other producing nations and has instead maintained a market distinguished by its accessibility. As a result, the United States market has become a focal point for world trade in nonrubber footwear.

(5) The diversion of international trade to the United States market has resulted in serious injury to domestic producers as manifested by—

(A) the loss of 155,000 footwear jobs since 1968,

(B) a decline in domestic production and production capacity, and

(C) the permanent closure of over 500 plants during the same period.

(6) The serious injury to domestic producers poses a significant danger to the industry's supplier base as well.

(7) The domestic nonrubber footwear producers have made a significant commitment to the future of the industry through substantial capital investment.

(8) Since the termination of temporary import relief in 1981, capital investment in the domestic nonrubber footwear industry has declined as the industry struggled to battle the massive surge in imports which increased the percentage share of imported footwear in the United States market from, 51 per centum in 1981 to 77 per centum in 1985.

(9) Without the restriction of import levels, capital investment in this domestic industry will continue to decrease.

(10) The domestic nonrubber footwear industry has thrice been judged by the International Trade Commission, as recently as May 1985, to be seriously injured by imports.

(11) Since the termination of the two, 4-year orderly marketing agreements in 1981, the harm to the domestic industry is even more critical than the serious injury which triggered the Commission's unanimous findings in 1976 and 1977.

(12) The domestic nonrubber footwear industry has not been afforded adequate and appropriate relief from imports; therefore, the Congress concludes that—

(A) the administrative process under sections 201, 202, and 203 of the Trade Act of 1974 has proven inadequate; and

(B) in the absence of and effective remedy under such process, legislative relief is essential.

(b)(1) It is the purpose of Congress in enacting this section to—

(A) promote and expand the economic health of the United States nonrubber footwear industry,

(B) preserve the jobs of American workers, and

(C) prevent the further decline of this important domestic industry.

(2) It is declared to be the policy of Congress that access to the United States market for foreign-produced nonrubber footwear should be on an equitable basis to ensure orderly trade in nonrubber footwear, reduce unfair trade in nonrubber footwear, and address United States balance-of-payments problems, of which footwear is the seventh largest component. In order to accomplish these objectives, it is deemed necessary and appropriate to limit imports of nonrubber footwear into the United States market.

SEC. 203. DEFINITIONS.

For purposes of this title—

(1) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

(2) The term "Secretary" means Secretary of Commerce.

(3) The term "nonrubber footwear" means the following categories of nonrubber footwear products, identified by reference to the following item numbers of the Tariff Schedules of the United States (as in effect on January 1, 1985): 700.05 through 700.45; 700.56; 700.72 through 700.83; and 700.95; except alpine (down hill) ski boots and nordic (cross country and jumping) ski boots.

(4) The term "apparent domestic consumption" means, with respect to any 1-year period, the sum of imports plus domestic production less exports.

SEC. 204. QUANTITATIVE LIMITATION ON NONRUBBER FOOTWEAR.

(a)(1) During the 8-year period beginning on the date of enactment of this title, the aggregate number of pairs of nonrubber footwear which may be entered during any 1-year period shall not exceed 60 per centum of the estimated apparent domestic consumption of nonrubber footwear for such period.

(2) The quantitative limitation imposed by paragraph (1) for any 1-year period shall be distributed among the following categories of nonrubber footwear so that the aggregate number of pairs of nonrubber footwear in such category which may be entered during any 1-year period shall not exceed the quantity equal to—

(A) in the case of nonrubber footwear with a customs value that does not exceed $1.25 per pair, 10 per centum of apparent domestic consumption of nonrubber footwear for such period,

(B) in the case of nonrubber footwear with a customs value that exceeds $1.25 per pair but does not exceed $2.50 per pair, 5.4 per centum of apparent domestic consumption of nonrubber footwear for such period, and

(C) in the case of nonrubber footwear with a customs value that exceeds $2.50 per pair, 44.6 per centum of apparent domestic consumption of nonrubber footwear for such period.

(b) Within 60 days after the effective date of this title, and on the first day of the fourth quarter of each 1-year period thereafter, the Secretary shall determine on the basis of the best information available, including his own or independent forecasts, the expected apparent domestic consumption of nonrubber footwear for, in the case of the initial determination, the remainder of the current 1-year period and in the case of the first day of the fourth quarter of each 1-year period thereafter, the next succeeding 1-year period. On each such date, the Secretary shall determine and publish in the Federal Register the allocation for the next succeeding 1-year period of permissible imports of nonrubber footwear as required by this section.

(c) On the first days of the first, second, and third quarters of each 1 year period, the Secretary shall revise the determinations of expected apparent domestic consumption made under subsection (b) for the current 1 year period on the basis of the best information then available and shall make such adjustments in the quantity of nonrubber footwear permitted to be imported under this section as indicated by the revision. All revisions and adjustments made under this subsection shall be published in the Federal Register.

(d) If the revised determination of expected apparent domestic consumption published in the Federal Register under subsection (c) on the first day of the third quarter in any 1 year period for nonrubber footwear varies from the actual apparent domestic consumption of nonrubber footwear for such 1 year period, the Secretary shall publish in the Federal Register on the first day of the second quarter of such succeeding 1 year period a revision to the determination of expected apparent domestic consumption for such 1 year period made under subsection (c) of this section. The revision shall be in the amount of such variance and shall be in addition to any other revision that would be made on any such first day of the second quarter under subsection (c) of this section.

(e)(1) The Secretary and the Secretary of the Treasury shall take such actions within their respective jurisdictions as may be necessary or appropriate to enforce the provisions of this section, including without limitation, the issuance of orders to Customs officers to bar entry to merchandise if the entry of such merchandise would cause the limitations established under this section to be exceeded.

(2)(A) The Secretary and the Secretary of the Treasury are each authorized to issue such implementing regulations, including the issuance of import licenses, as may be necessary or appropriate to effect the purposes of this section and to enforce the provisions of this section.

(B) Before prescribing any regulations under subparagraph (A), the Secretary or the Secretary of the Treasury, as the case may be, shall—

(i) consult with interested domestic parties,

(ii) afford an opportunity for such parties to comment on the proposed regulations, and

(iii) consider all such comments before prescribing final regulations.

SEC. 205. COMPENSATION AUTHORITY.

For purposes of section 123 of the Trade Act of 1974 (19 U.S.C. 2133), the imposition of the quantitative limitation under section 204 shall be treated as action taken under section 203 of the Trade Act of 1974 (19 U.S.C. 2253).

TITLE III—COPPER

SEC. 301. SHORT TITLE.

This title may be cited as the "Copper Free Market Restoration Act of 1985".

SEC. 302. FINDINGS, PURPOSE, AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) the copper industry of the United States is critical to the national defense and the maintenance of a strong economy, but has suffered a substantial economic setback, including a 50 per centum reduction in employment levels, a 25 per centum drop in production, the closure of 16 major mines, and the permanent loss of copper reserves;

(2) the substantial economic setback to the domestic copper industry is attributable to the steep decline in world copper prices that has resulted from—

(A) the continued overproduction of copper by government-owned foreign producers that—

(i) have been encouraged to overproduce by their host governments in order to generate foreign exchange and maintain employment levels, and

(ii) enjoy unfair competitive advantage over United States producers because of subsidized loans from their governments and from international lending institutions,

such as the World Bank, and the absence of adequate environmental regulation; and

(B) the overvaluation of the dollar and its impact on domestic copper prices;

(3) the extent of the economic setback to the domestic copper industry was documented in 1984 when the United States International Trade Commission unanimously found that the industry had been injured by foreign competition under the terms of section 201 of the Trade Act of 1974 and recommended that appropriate relief be granted;

(4) while copper producers in the United States have made a substantial commitment to the modernization of the industry, more improvements are needed, and the reinvestment in the United States copper industry that is needed for those improvements is seriously jeopardized by the failure of existing trade statutes to deal effectively with the problem of excess world production; and

(5) a 5-year stabilization of foreign copper production is needed if the domestic copper industry is to attract the necessary capital for reinvestment.

(b) PURPOSE.—The purpose of this title is to—

(1) ensure an adequate supply of domestic copper,

(2) expand employment in the copper industry, and

(3) stabilize foreign copper production at levels that will enable domestic copper producers to make necessary improvements and modernization.

(c) POLICY.—The Congress declares it to be the national policy that the United States must seek to negotiate agreements temporarily limiting copper production by foreign copper producers so that the purposes of this title can be fulfilled.

SEC. 303. DEFINITIONS.

For purposes of this title—

(1) The term "agreement negotiation period" means the 9-month period beginning on the first day of the first calendar month beginning after the date of enactment of this Act.

(2) The term "major copper producing country" means any foreign country whose production of unwrought copper during 1984 exceeded 300,000 metric tons.

(3) The term "significant copper producing country" means any foreign country whose production of unwrought copper during 1984 exceeded 200,000 metric tons but did not exceed 300,000 metric tons.

(4) The term "unwrought copper" means articles provided for in items 612.02 through 612.06 of the Tariff Schedules of the United States.

(5) The term "restraint period" means the 5-year period beginning at the close of the agreement negotiation period.

SEC. 304. NEGOTIATIONS AND ACTION REGARDING AGREEMENTS TO VOLUNTARILY RESTRAIN COPPER PRODUCTION.

(a) NEGOTIATIONS.—

(1) The President, acting through the United States Trade Representative and the Secretary of the Interior, shall undertake negotiations during the agreement negotiation period with all major copper producing countries for the purpose of obtaining voluntary restraint agreements under which the aggregate production of unwrought copper by the major copper producing countries during each 1-year period within the restraint period will not exceed the aggregate production of unwrought copper by those countries during calendar year 1982.

(2) The President, acting through the United States Trade Representative and the Secretary of the Interior, shall undertake negotiations during the agreement negotiation period with all significant copper producing countries for the purpose of obtaining voluntary restraint agreements under which the aggregate production of unwrought copper by the significant copper producing countries during each 1-year period within the restraint period will not exceed the sum of—

(A) the aggregate production of unwrought copper by those countries during calendar year 1984, plus

(B) the estimated growth in demand for unwrought copper for such 1-year period within the restraint period.

(b) REPORTS.—

(1) At the close of each 3-month period within the agreement negotiation period, the President shall submit to the Congress a report on the progress of negotiations conducted under subsection (a). Such report shall—

(A) set forth the terms of any voluntary restraint agreement that has been entered into under subsection (a) during such 3-month period,

(B) contain a summary of the actions taken by the President during such 3-month period to obtain agreements under subsection (a) with each major copper producing country and significant copper producing country that has not entered into such an agreement,

(C) contain a summary of the responses (including counteroffers) made during such 3-month period by each of the countries described in subparagraph (B) to the actions of the President described in subparagraph (B),

(D) include a description of the obstacles and objections encountered by the President during such 3-month period to the achievement of agreements under subsection (a), and

(E) include an assessment of whether each country described in subparagraph (B) is negotiating in good faith.

(2) The final report that is required to be submitted under paragraph (1) shall include—

(A) a determination by the President of whether the agreements entered into under subsection (a) will achieve the purposes of this title, and

(B) recommendations of the President regarding any actions that should be taken against any major copper producing country or significant copper producing country which refuses to enter into a voluntary restraint agreement under subsection (a).

(c) ACTION IF VOLUNTARY RESTRAINT AGREEMENTS TAKE EFFECT.—If voluntary restraint agreements described in subsection (a) take effect between the United States and the major copper producing countries or significant copper producing countries—

(1) the United States Trade Representative, with the cooperation of other appropriate Federal officers, shall monitor the production of unwrought copper by those countries during each 1-year period within the restraint period for the purpose of ascertaining if the terms of the agreements are being complied with during such 1-year period, and

(2) the United States Trade Representative shall, within 30 days after the close of each 1-year period within the restraint period, report to the Congress on the results of the monitoring carried out during such 1-year period.

TITLE IV—FOREIGN LABOR PRACTICES

SEC. 401. REPORTS.

(a)(1) The United States International Trade Commission shall conduct a study of the wage rates, labor costs, and other labor practices of each foreign country which had a surplus in the balance of trade between the United States and such foreign country for calendar year 1984 that exceeded $4,000,000,000. Such study should consider labor practices existing throughout the economy of each of such countries and the labor practices of the industries in each of such countries that were responsible for such balance of trade surplus.

(2) The study conducted under paragraph (1) shall include, with respect to each foreign country described in paragraph (1), analyses of—

(A) the effects of the labor practices of such foreign country studied under paragraph (1) on the competitive position of United States exports in foreign markets and in United States markets,

(B) the relationship between—

(i) the wages and other compensation paid to workers in United States industries producing goods that face substantial competition from products of such foreign country, and

(ii) the wages and other compensation paid to workers in such foreign country who produce such competitive products,

(C) the relationship, if any, between the labor practices of such foreign country studied under paragraph (1) and the cultural, religious, and political practices or values of such foreign country.

(D) the extent to which such labor practices are encouraged or enforced by the government of such foreign country,

(E) the history, duration, and extent of such labor practices, and

(F) the extent to which private or public forces that are anticompetitive encourage such labor practices.

(3) By no later than the date that is 9 months after the date of enactment of this Act, the United States International Trade Commission shall submit a report on the study conducted under paragraph (1) to the Congress, the Secretary of Labor, and the Secretary of Commerce.

(b)(1) The Secretary of Labor and the Secretary of Commerce shall each conduct a separate investigation to—

(A) identify each of the labor practices discussed in the report submitted under subsection (a)(3) that—

(i) is illegal under existing laws of the United States or of any State, or

(ii) should be prohibited by all countries under an international labor law code,

(B) determine what labor principles and rules should be included in an international labor law code, and

(C) determine the issues involved in, and the prospects for achieving, the elimination of labor practices identified under subparagraph (A) through negotiations with foreign countries.

(2) By no later than 3 months after the date on which the report is submitted under subsection (a)(3), the Secretary of Labor and the Secretary of Commerce shall each submit to the Congress a report on the investigation conducted under paragraph (1).

EXTENSION OF CERTAIN PROVISIONS OF LAW

HOLLINGS AMENDMENT NO. 1426

(Ordered referred to the Committee on Finance.)

Mr. HOLLINGS submitted an amendment intended to be proposed by him to the bill (H.R. 3722) to extend until December 14, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the Railroad Unemployment Insurance Program; as follows:

Add at the end thereof the following:

TITLE I—TEXTILE AND APPAREL TRADE ENFORCEMENT

SEC. 101. SHORT TITLE.

This title may be cited as the "Textile and Apparel Trade Enforcement Act of 1985".

SEC. 102. POLICY.

The policy of this title is—

(1) to prevent further disruption of the United States textiles and textile products markets, damage to United States textile and apparel manufacturers, and loss of jobs by United States workers by providing for orderly and nondisruptive growth of imports of textiles and textile products; and

(2) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

SEC. 103. FINDINGS.

The Congress finds that—

(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

(2) the Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December 1981, through July 1986, contemplates a 6 per centum annual rate of growth for imports for most exporting countries and provides for a lower rate of growth for imports from significant exporting countries;

(3) since 1980, the objective of orderly growth of imports of textiles and textile products provided for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984 imports of textiles and textile products into the United States have grown at an annual rate of 19 per centum, far in excess of the 1 per centum growth rate of the United States market for textiles and textile products during the same period and far in excess of the annual rate of import growth of less than 2 per centum that prevailed during the period 1974 through 1980;

(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last six years, reaching a level of 50 per centum in 1984;

(6) based on a nationwide audit of major retail outlets, the import penetration of such major items of apparel as trousers, blouses, shirts, suits, skirts, and sweaters exceeds 50 per centum of domestic consumption;

(7) since the most recent extension of the Multi-Fiber Arrangement, certain exporting countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States market for textiles and textile products and have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

(8) imports of textiles and textile products into the United States are predominantly the product of significant producing countries, with five large producing countries now accounting for more than 50 per centum of all imports of textiles and textile products;

(9) the domination of import trade by producers in the significant producing countries has limited participation in the United States market by other producing countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment, with the United States;

(10) a change in United States textile trade policy to afford the smaller producing countries and countries in the Caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 per centum over 1983, and accounted for 13 per centum of the Nation's overall merchandise trade deficit;

(12) the current level of imports of textiles and textile products, ten billion square yard equivalents in 1984, represents over one million job opportunities lost to United States workers;

(13) imported textiles and textile products now account for 38 per centum (the equivalent of three million two hundred thousand bales of cotton) of the annual cotton consumption in the United States; only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States; the result of the massive increases in cotton textile and apparel imports has been a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone, which was only partially offset by Federal cotton program benefits; another result is that United States cotton producers, who are spending about $20,000,000 annually in research and promotion efforts, have built markets not for themselves but for foreign growers;

(14) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool; the Multi-Fiber Arrangement recognizes that imports of certain products, such as wool products, in certain countries, including the United States, pose particular problems for certain industries, such as, the wool products industries in those countries and import growth rates of 1 per centum or less have been permitted in such cases;

(15) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

(16) the increase in imports and increased import penetration of the United States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more modern equipment, productivity, as measured by output per man hour, in the textile mill products sector has increased in the last ten years at the average annual rate of 4.2 per centum and in the apparel sector at the average annual rate of 3.4 per centum, as compared with the lower productivity growth of all manufacturing in the same period of 1.9 per centum;

(17) the factors described above are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Act;

(18) based on experience during the past ten years and on other factors, the growth of the United States market for textiles and textile products is unlikely to exceed an average annual rate of 1 per centum during the next several years;

(19) if the rate of growth of imports of textiles and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

(20) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

(A) to require the establishment of import levels for textiles and textile products supplied by major producing countries that reflect—

(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 per centum annual growth rate contemplated by the Multi-Fiber Arrangement, or 1 per centum in the case of wool products, or

(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 per centum,

whichever is the lesser,

(B) to require the establishment of import levels for textiles and textile products supplied by producing countries that reflect their 1984 import levels,

(C) to require the establishment of import levels for textiles and textile products supplied by small producing countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

(D) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

(21) the establishment of import levels, and limitation of future import growth to levels, that reflect effective enforcement of the Multi-Fiber Arrangement and that also

reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United States regarding trade in textiles and apparel;

(22) as the Department of Defense has long recognized, a strong, viable and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

(23) the developments that have led to the sharp increase in imports of textiles and textile products since 1980 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

(24) the sharp increase in imports of textiles and textile products since 1980, and the effect of this increase on the United States textiles and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Multi-Fiber Arrangement and its Protocol.

SEC. 104. DEFINITIONS.

For purposes of this title—

(1) The term "textiles and textile products" includes, but is not limited to, all tops, yarns, man-made fibers, piece goods, made-up articles, apparel, and other textile manufactured products (which derive their chief characteristics from their textile components) made in whole or in part from any natural or manmade fiber, or blend thereof, that are classified under schedule 3, part 6 of schedule 6, parts 1 (except subpart A but including item number 700.75), 4, 5 (except subpart E), 7 or 13 (except item number 790.57) of schedule 7, or part 1 of schedule 8 of the Tariff Schedules of the United States, or part 1 of the Appendix to the Tariff Schedules of the United States; such term does not include apparel containing 70 per centum or more by weight of silk except articles classified under item numbers 373.20 and 373.22 of the Tariff Schedules of the United States;

(2) The term "category" means, with respect to textiles and textile products that are the product of a country, each of the following—

(A) each category of textiles and textile products identified by a three-digit textile category number in the Department of Commerce publication "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated", dated January 1985 and, subsequently, in the first edition of such document that is revised to reflect the adoption by the United States of the Nomenclature Structure of the Harmonized System;

(B) with respect to each country with which the United States has (i) an agreement on the date of enactment of this title limiting exports of textiles and textile products to the United States that includes specific limitations on subdivisions of a category described in subparagraph (A), or (ii) taken unilateral action to limit products entered under such a subdivision, each such subdivision;

(C) a category consisting of the man-made fiber products not covered by a category described in subparagraph A and classified under subpart E of part 1 of schedule 3 to the Tariff Schedules of the United States; and

(D) each category consisting of each of the following products when, because of fiber content, that product is not subject to the Multi-Fiber Arrangement:

(i) yarn,

(ii) fabric,

(iii) apparel, and

(iv) other textile products;

(3) The term "import sensitive category" means—

(A) each category (other than a category applicable to textiles and textile products that are a product of a country in the Caribbean region) for which the ratio of imports to domestic production, as reported in the Department of Commerce publication "U.S. Production, Imports and Import/Production Ratios for Cotton, Wool and Man-Made Fiber Textiles and Apparel", equals or exceeds 40.0 for the preceding calendar year; and

(B) each category covering wool products;

(4) The term "country" means a foreign country (other than Canada and the Member States of the European Economic Community as constituted on January 1, 1985), a foreign territory, an insular possession of the United States, or any other territory, possession, colony, trusteeship or political entity, whether affiliated with the United States or not, that is outside the customs territory of the United States;

(5) The term "major producing country" means a country the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in subparagraph (2)(A) of this section during calendar year 1984 equaled or exceeded 10 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

(6) The term "producing country" means a country (other than a major producing country and a country in the Caribbean region) the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in subparagraph (2)(A) of this section during calendar year 1984 equaled or exceeded 1.25 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

(7) The term "small producing country" means a country other than a major producing country and a producing country;

(8) The term "country in the Caribbean region" means the United Mexican States and a country eligible for designation as a beneficiary country under section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702);

(9) The term "wool product" means an article containing over 17 per centum by weight;

(10) The term "cotton, wool and man-made fiber sweaters" means articles classified under categories 345, 445, 446, 645 or 646 as defined in the Department of Commerce publication "Correlation Textile and Apparel Categories with Tariff Schedules of the United States Annotated," dated January 1985;

(11) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States; and

(12) The term "Multi-Fiber Arrangement" means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva, December 22, 1981.

SEC. 105. LIMITS ON TEXTILE AND APPAREL IMPORTS.

(a) CALENDAR YEAR 1985.—Notwithstanding any other provision of law, the aggregate quantity of textiles and textile products classified under a category that is entered during calendar year 1985 shall not exceed—

(1) in the case of textiles and textile products that are a product of a major producing country, other than textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to a specific limitation under an agreement with a major producing country) the lesser of an amount equal to 101 per centum (A) of the aggregate quantity of such products of such country classified under such category that would have entered during calendar year 1984 if the aggregate quantity of such products of such country classified under such category entered during calendar year 1980 had increased by 6 per centum annually, or 1 per centum annually in the case of a category covering a wool product, during calendar years 1981, 1982, 1983, and 1984, or (B) if the United States has an agreement with such country providing for an annual growth rate for such category of less than 6 per centum, of the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984;

(2) in the case of textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to specific limitation under an agreement with a major producing country, the specific limitation quantity in effect as of the date of enactment of this title;

(3) in the case of textiles and textile products that are a product of a producing country, an amount equal to the aggregate quantity of (A) such products of such country classified under such category that entered during calendar year 1984, or (B) in the case of textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to specific limitation under an agreement with an exporting country, the specific limitation quantity in effect as of the date of enactment of this title;

(4) in the case of textiles and textile products that are a product of a small producing country (other than cotton, wool, and man-made fiber sweaters described in paragraph (5)), an amount equal to the sum of (A) the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984, plus (B) an amount equal to (i) 15 per centum of such quantity, in the case of a category that is not an import sensitive category, or (ii) 1 per centum of such quantity, in the case of a category that is an import sensitive category; and

(5) in the case of cotton, wool, and man-made fiber sweaters that are—

(A) the product of substantial assembly operations in Guam from otherwise completed knit-to-shape component parts, an aggregate amount equal to 160,000 dozen; and

(B) the product of substantial assembly operations in the Commonwealth of the Northern Mariana Islands from otherwise completed knit-to-shape component parts, an aggregate amount equal to 70,000 dozen.

If application of paragraph (1) would result in the aggregate quantity of textiles and textile products of a major producing country classified under all categories permitted to enter during calendar year 1985 to be less than 70 per centum of the aggregate quanti-

ty of such products of such country that entered during calendar year 1984, then, notwithstanding paragraph (1), the aggregate quantity of textiles and textile products of such country that may be entered under each category during calendar year 1985 shall not be less than 40 per centum of the aggregate quantity of such products of such country that entered under such category during calendar year 1984.

(b) GROWTH ADJUSTMENT.—For calendar years after 1985, the aggregate quantity of textiles and textile products classified under each category that may be entered during each such calendar year shall—

(1) in the case of such products that are a product of a major producing country or of a producing country, be increased by an amount equal to 1 per centum of the aggregate quantity that could be entered under such category during the preceding calendar year; and

(2) in the case of such products that are a product of a small producing country, be increased by an amount equal to—

(A) in the case of a category (other than an import sensitive category), 6 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year, and

(B) in the case of an import sensitive category, 1 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year.

If the aggregate quantity that could be entered under a category for a calendar year after 1985 is reduced under section 111(b), then, in the first calendar year in which there is no such reduction, this subsection shall be applied as if there had been no reduction under section 111(b) in previous calendar years.

(c) MINIMUM QUANTITIES.—If, under subsection (a) or (b), the aggregate quantity of textiles and textile products of a country that may be entered during a calendar year under a category is—

(1) less than one million square yard equivalents, in the case of a category covering yarn, fabric, made-ups, and miscellaneous products, other than wool products;

(2) less than seven hundred thousand square yard equivalents, in the case of a category covering apparel, other than wool products apparel; or

(3) less than one hundred thousand square yard equivalents, in the case of a category covering wool products,

then, notwithstanding subsection (a) or (b), the aggregate quantity of textiles and textile products of such country that may be entered under such category during the calendar year shall be one million, seven hundred thousand, or one hundred thousand square yard equivalents, respectively. The amount prescribed in the preceding sentence shall be accorded growth subject to the provisions of subsection (b) beginning the first calendar year after the aggregate quantity of products of such country entered under such category equals the minimum quantity prescribed under this subsection.

(d) SPECIAL RULE.—For purposes of this section, if during any calendar year after 1984, the aggregate quantity of textiles and textile products that are the product of a small producing country (other than a country in the Caribbean region) and that are entered under the categories referred to in subparagraph 2(A) of section 104 of this title equals or exceeds 1.25 per centum of all textiles and textile products entered under such categories from all countries and from Canada and the Member States of the European Economic Community during such calendar year, then such small producing country shall be considered to be a producing country for all succeeding calendar years.

(e) ENFORCEMENT.—The Secretary of Commerce shall prescribe such regulations governing the entry, or withdrawal from warehouse, for consumption of textiles and textile products as may be necessary to carry out this title.

SEC. 106. IMPORT LICENSING.

In order to ensure the equitable and efficient administration of section 105 of this title, the Secretary of Commerce shall, within six months after the date of enactment of this title, establish and administer an import licensing system under which an importer of any textiles and textile products from any country and from Canada and the Member States of the European Economic Community, will be required to present an import permit as a condition of entry. The Secretary shall charge a fee for import licenses in such amount as may be necessary to cover the cost of administration of the system. The Secretary of the Treasury shall make all determinations regarding classification under the Tariff Schedules of the United States, appraisement, and valuation of products subject to licensing under this section.

SEC. 107. ANNUAL REPORT.

Not later than March 15, 1986, and March 15 of each calendar year thereafter, the President shall submit to the Congress a report on the administration of this title during the preceding calendar year. Such report shall include detailed information about the implementation and operation of the limitations established under section 105. The report shall also include a detailed report by the Department of Commerce on the implementation and enforcement for the provisions of this title exempting from import limitations certain articles of silk apparel, with special regard to the extent to which nonsilk articles, and silk articles not exempt from import limitations, are erroneously or fraudulently classified as silk items exempt from import limitations and are entered under this title. All departments and agencies shall cooperate in preparation of this report as requested by the President.

SEC. 108. REVIEW.

The Secretary of Commerce shall commence ten years after the date of enactment of this title a formal review of the operation of the Textile Import Control Program under the provisions of this title. The Secretary shall consult Members and committees of Congress, representatives of the labor unions and the industries affected by the program, the Secretary of the Treasury, and other appropriate government officials. Within six months after the commencement of the study, the Secretary shall submit to Congress his findings as well as his recommendations for the future conduct of the program.

SEC. 109. DUTY FREE ENTRY OF CERTAIN SWEATERS FROM GUAM AND THE NORTHERN MARIANAS.

Subpart A of part 7, schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by adding at the end thereof the following new item:

"385.97 Cotton, wool and man-made fiber sweaters that are entitled to enter under the quotas established under section 105(a)(5) of the Textile and Apparel Trade Enforcement Act of 1985 or the increased quotas under section 105(b) of such Act that adjust the quotas under such section 105(a)(5) and that do not contain foreign materials to the value of more than 50 percent of their total value as this standard is applied pursuant to Headnote 3(a) of the General Headnotes and Rules of Interpretation	Free".

SEC. 110. PRODUCTS OF THE INSULAR POSSESSIONS OF THE UNITED STATES.

(a) GENERAL RULE.—Notwithstanding section 104(4) of this title, textiles and textile products that are the product of an insular possession of the United States shall not be considered to be products of a country, within the meaning of section 104(4), if such products meet the requirements of subsection (b).

(b) POSSESSION CONTENT.—

(1) Subsection (a) shall apply to an article if—

(A) that article is imported directly from an insular possession of the United States into the customs territory of the United States; and

(B) the sum of (i) the cost or value of the materials produced in such insular possession of the United States or in the customs territory of the United States plus (ii) the direct costs of processing operations performed in such insular possession of the United States is not less than 85 per centum of the appraised value of such article at the time it is entered.

(2) The Secretary of the Treasury shall prescribe such regulations as may be necessary to carry out this section, except that the rules of origin contained in 19 CFR 12.130 shall be the rules of origin for purposes of this section.

(3) As used in this subsection, the phrase "direct costs of processing operations" includes—

(A) all actual labor costs attributable to permanent residents of the insular possession involved in the growth, production, manufacture, or assembly of the specific merchandise, including fringe benefits, on-the-job training and the cost of engineering, supervisory, quality control, and similar personnel; and

(B) dies, molds, tooling, and depreciation on machinery and equipment which are allocable to the specific merchandise.

Such phrase does not include costs which are attributable to nonpermanent resident labor, are not directly attributable to the merchandise concerned, or are not costs of manufacturing the product, such as (i) profit, and (ii) general expenses of doing business which are either not allocable to the specific merchandise or are not related to the growth, production, manufacture, or assembly of the merchandise, such as administrative salaries, casualty and liability insurance, advertising, and salesmen's salaries, commissions or expenses.

SEC. 111. EFFECTIVE DATE.

(a) IN GENERAL.—Subject to the provisions of subsection (b), the provisions of this title shall apply to textiles and textile products entered, or withdrawn from warehouse, for consumption on or after the date of enactment of this title.

(b) CALENDAR YEARS 1985 AND 1986.—The Secretary of Commerce shall prescribe by regulation the aggregate quantity, if any, of textiles and textile products that may be entered under section 105 (a) or (c) of this title from each country under each category during the period beginning on the date of enactment of this title and ending December 31, 1985. Notwithstanding subsection (a), to the extent that the aggregate quantity of imports of textiles and textile products of a country entered under a category after December 31, 1984, and before the date of enactment of this title exceeds the quantity permitted entry for such products of such country and such category during calendar year 1985 under subsection 5 (a) or (c) of section 105, then the limit that would otherwise apply under section 105 (b) or (c) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 105 (b) or (c) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 105(b) for such category for such country for calendar year 1986, then the limit for such category and country for calendar years after 1986 shall be reduced until such excess is accounted for.

TITLE II

SEC. 201. SHORT TITLE.

This title may be cited as the "American Footwear Industry Recovery Act of 1985".

SEC. 202. FINDINGS AND PURPOSE.

(a) The Congress finds that—

(1) The domestic nonrubber footwear industry is important to the national economy, and footwear firms are vital to the economic health of small towns throughout the United States.

(2) The domestic nonrubber footwear industry is highly labor intensive, and low capital requirements for entry into footwear production make it a primary target for industrializing or newly industrialized countries. As a consequence, footwear is produced in virtually every footwear consuming country in the world.

(3) Tremendous competitive pressure has been created in the world footwear market in the last decade as a result of rapidly growing production and capacity in numerous developing and developed countries. This development has resulted in the widespread erection of tariff and nontariff barriers by foreign countries designed to protect their domestic footwear industries.

(4) The United States has historically resisted the protectionist trends of other producing nations and has instead maintained a market distinguished by its accessibility. As a result, the United States market has become a focal point for world trade in nonrubber footwear.

(5) The diversion of international trade to the United States market has resulted in serious injury to domestic producers as manifested by—

(A) the loss of 155,000 footwear jobs since 1968,

(B) a decline in domestic production and production capacity, and

(C) the permanent closure of over 500 plants during the same period.

(6) The serious injury to domestic producers poses a significant danger to the industry's supplier base as well.

(7) The domestic nonrubber footwear producers have made a significant commitment to the future of the industry through substantial capital investment.

(8) Since the termination of temporary import relief in 1981, capital investment in the domestic nonrubber footwear industry has declined as the industry struggled to battle the massive surge in imports which increased the percentage share of imported footwear in the United States market from, 51 per centum in 1981 to 77 per centum in 1985.

(9) Without the restriction of import levels, capital investment in this domestic industry will continue to decrease.

(10) The domestic nonrubber footwear industry has thrice been judged by the International Trade Commission, as recently as May 1985, to be seriously injured by imports.

(11) Since the termination of the two, 4-year orderly marketing agreements in 1981, the harm to the domestic industry is even more critical than the serious injury which triggered the Commission's unanimous findings in 1976 and 1977.

(12) The domestic nonrubber footwear industry has not been afforded adequate and appropriate relief from imports; therefore, the Congress concludes that—

(A) the administrative process under sections 201, 202, and 203 of the Trade Act of 1974 has proven inadequate; and

(B) in the absence of and effective remedy under such process, legislative relief is essential.

(b)(1) It is the purpose of Congress in enacting this section to—

(A) promote and expand the economic health of the United States nonrubber footwear industry,

(B) preserve the jobs of American workers, and

(C) prevent the further decline of this important domestic industry.

(2) It is declared to be the policy of Congress that access to the United States market for foreign-produced nonrubber footwear should be on an equitable basis to ensure orderly trade in nonrubber footwear, reduce unfair trade in nonrubber footwear, and address United States balance-of-payments problems, of which footwear is the seventh largest component. In order to accomplish these objectives, it is deemed necessary and appropriate to limit imports of nonrubber footwear into the United States market.

SEC. 203. DEFINITIONS.

For purposes of this title—

(1) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

(2) The term "Secretary" means Secretary of Commerce.

(3) The term "nonrubber footwear" means the following categories of nonrubber footwear products, identified by reference to the following item numbers of the Tariff Schedules of the United States (as in effect on January 1, 1985): 700.05 through 700.45; 700.56; 700.72 through 700.83; and 700.95; except alpine (down hill) ski boots and nordic (cross country and jumping) ski boots.

(4) The term "apparent domestic consumption" means, with respect to any 1-year period, the sum of imports plus domestic production less exports.

SEC. 204. QUANTITATIVE LIMITATION ON NONRUBBER FOOTWEAR.

(a)(1) During the 8-year period beginning on the date of enactment of this title, the aggregate number of pairs of nonrubber footwear which may be entered during any 1-year period shall not exceed 60 per centum of the estimated apparent domestic consumption of nonrubber footwear for such period.

(2) The quantitative limitation imposed by paragraph (1) for any 1-year period shall be distributed among the following categories of nonrubber footwear so that the aggregate number of pairs of nonrubber footwear in such category which may be entered during any 1-year period shall not exceed the quantity equal to—

(A) in the case of nonrubber footwear with a customs value that does not exceed $1.25 per pair, 10 per centum of apparent domestic consumption of nonrubber footwear for such period,

(B) in the case of nonrubber footwear with a customs value that exceeds $1.25 per pair but does not exceed $2.50 per pair, 5.4 per centum of apparent domestic consumption of nonrubber footwear for such period, and

(C) in the case of nonrubber footwear with a customs value that exceeds $2.50 per pair, 44.6 per centum of apparent domestic consumption of nonrubber footwear for such period.

(b) Within 60 days after the effective date of this title, and on the first day of the fourth quarter of each 1-year period thereafter, the Secretary shall determine on the basis of the best information available, including his own or independent forecasts, the expected apparent domestic consumption of nonrubber footwear for, in the case of the initial determination, the remainder of the current 1-year period and in the case of the first day of the fourth quarter of each 1-year period thereafter, the next succeeding 1-year period. On each such date, the Secretary shall determine and publish in the Federal Register the allocation for the next succeeding 1-year period of permissible imports of nonrubber footwear as required by this section.

(c) On the first days of the first, second, and third quarters of each 1 year period, the Secretary shall revise the determinations of expected apparent domestic consumption made under subsection (b) for the current 1 year period on the basis of the best information then available and shall make such adjustments in the quantity of nonrubber footwear permitted to be imported under this section as indicated by the revision. All revisions and adjustments made under this subsection shall be published in the Federal Register.

(d) If the revised determination of expected apparent domestic consumption published in the Federal Register under subsection (c) on the first day of the third quarter in any 1 year period for nonrubber footwear varies from the actual apparent domestic consumption of nonrubber footwear for such 1 year period, the Secretary shall publish in the Federal Register on the first day of the second quarter of such succeeding 1 year period a revision to the determination of expected apparent domestic consumption for such 1 year period made under subsection (c) of this section. The revision shall be in the amount of such variance and shall be in addition to any other revision that would be made on any such first day of the second quarter under subsection (c) of this section.

(e)(1) The Secretary and the Secretary of the Treasury shall take such actions within their respective jurisdictions as may be necessary or appropriate to enforce the provisions of this section, including without limitation, the issuance of orders to Customs officers to bar entry to merchandise if the entry of such merchandise would cause the

limitations established under this section to be exceeded.

(2)(A) The Secretary and the Secretary of the Treasury are each authorized to issue such implementing regulations, including the issuance of import licenses, as may be necessary or appropriate to effect the purposes of this section and to enforce the provisions of this section.

(B) Before prescribing any regulations under subparagraph (A), the Secretary or the Secretary of the Treasury, as the case may be, shall—

(i) consult with interested domestic parties,

(ii) afford an opportunity for such parties to comment on the proposed regulations, and

(iii) consider all such comments before prescribing final regulations.

SEC. 205. COMPENSATION AUTHORITY.

For purposes of section 123 of the Trade Act of 1974 (19 U.S.C. 2133), the imposition of the quantitative limitation under section 204 shall be treated as action taken under section 203 of the Trade Act of 1974 (19 U.S.C. 2253).

TITLE III—COPPER

SEC. 301. SHORT TITLE.

This title may be cited as the "Copper Free Market Restoration Act of 1985".

SEC. 302. FINDINGS, PURPOSE, AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) the copper industry of the United States is critical to the national defense and the maintenance of a strong economy, but has suffered a substantial economic setback, including a 50 per centum reduction in employment levels, a 25 per centum drop in production, the closure of 16 major mines, and the permanent loss of copper reserves;

(2) the substantial economic setback to the domestic copper industry is attributable to the steep decline in world copper prices that has resulted from—

(A) the continued overproduction of copper by government-owned foreign producers that—

(i) have been encouraged to overproduce by their host governments in order to generate foreign exchange and maintain employment levels, and

(ii) enjoy unfair competitive advantage over United States producers because of subsidized loans from their governments and from international lending institutions, such as the World Bank, and the absence of adequate environmental regulation; and

(B) the overvaluation of the dollar and its impact on domestic copper prices;

(3) the extent of the economic setback to the domestic copper industry was documented in 1984 when the United States International Trade Commission unanimously found that the industry had been injured by foreign competition under the terms of section 201 of the Trade Act of 1974 and recommended that appropriate relief be granted;

(4) while copper producers in the United States have made a substantial commitment to the modernization of the industry, more improvements are needed, and the reinvestment in the United States copper industry that is needed for those improvements is seriously jeopardized by the failure of existing trade statutes to deal effectively with the problem of excess world production; and

(5) a 5-year stabilization of foreign copper production is needed if the domestic copper industry is to attract the necessary capital for reinvestment.

(b) PURPOSE.—The purpose of this title is to—

(1) ensure an adequate supply of domestic copper,

(2) expand employment in the copper industry, and

(3) stabilize foreign copper production at levels that will enable domestic copper producers to make necessary improvements and modernization.

(c) POLICY.—The Congress declares it to be the national policy that the United States must seek to negotiate agreements temporarily limiting copper production by foreign copper producers so that the purposes of this title can be fulfilled.

SEC. 303. DEFINITIONS.

For purposes of this title—

(1) The term "agreement negotiation period" means the 9-month period beginning on the first day of the first calendar month beginning after the date of enactment of this Act.

(2) The term "major copper producing country" means any foreign country whose production of unwrought copper during 1984 exceeded 300,000 metric tons.

(3) The term "significant copper producing country" means any foreign country whose production of unwrought copper during 1984 exceeded 200,000 metric tons but did not exceed 300,000 metric tons.

(4) The term "unwrought copper" means articles provided for in items 612.02 through 612.06 of the Tariff Schedules of the United States.

(5) The term "restraint period" means the 5-year period beginning at the close of the agreement negotiation period.

SEC. 304. NEGOTIATIONS AND ACTION REGARDING AGREEMENTS TO VOLUNTARILY RESTRAIN COPPER PRODUCTION.

(a) NEGOTIATIONS.—

(1) The President, acting through the United States Trade Representative and the Secretary of the Interior, shall undertake negotiations during the agreement negotiation period with all major copper producing countries for the purpose of obtaining voluntary restraint agreements under which the aggregate production of unwrought copper by the major copper producing countries during each 1-year period within the restraint period will not exceed the aggregate production of unwrought copper by those countries during calendar year 1982.

(2) The President, acting through the United States Trade Representative and the Secretary of the Interior, shall undertake negotiations during the agreement negotiation period with all significant copper producing countries for the purpose of obtaining voluntary restraint agreements under which the aggregate production of unwrought copper by the significant copper producing countries during each 1-year period within the restraint period will not exceed the sum of—

(A) the aggregate production of unwrought copper by those countries during calendar year 1984, plus

(B) the estimated growth in demand for unwrought copper for such 1-year period within the restraint period.

(b) REPORTS.—

(1) At the close of each 3-month period within the agreement negotiation period, the President shall submit to the Congress a report on the progress of negotiations conducted under subsection (a). Such report shall—

(A) set forth the terms of any voluntary restraint agreement that has been entered into under subsection (a) during such 3-month period,

(B) contain a summary of the actions taken by the President during such 3-month period to obtain agreements under subsection (a) with each major copper producing country and significant copper producing country that has not entered into such an agreement,

(C) contain a summary of the responses (including counteroffers) made during such 3-month period by each of the countries described in subparagraph (B) to the actions of the President described in subparagraph (B),

(D) include a description of the obstacles and objections encountered by the President during such 3-month period to the achievement of agreements under subsection (a), and

(E) include an assessment of whether each country described in subparagraph (B) is negotiating in good faith.

(2) The final report that is required to be submitted under paragraph (1) shall include—

(A) a determination by the President of whether the agreements entered into under subsection (a) will achieve the purposes of this title, and

(B) recommendations of the President regarding any actions that should be taken against any major copper producing country or significant copper producing country which refuses to enter into a voluntary restraint agreement under subsection (a).

(c) ACTION IF VOLUNTARY RESTRAINT AGREEMENTS TAKE EFFECT.—If voluntary restraint agreements described in subsection (a) take effect between the United States and the major copper producing countries or significant copper producing countries—

(1) the United States Trade Representative, with the cooperation of other appropriate Federal officers, shall monitor the production of unwrought copper by those countries during each 1-year period within the restraint period for the purpose of ascertaining if the terms of the agreements are being complied with during such 1-year period, and

(2) the United States Trade Representative shall, within 30 days after the close of each 1-year period within the restraint period, report to the Congress on the results of the monitoring carried out during such 1-year period.

TITLE IV—FOREIGN LABOR PRACTICES

SEC. 401. REPORTS.

(a)(1) The United States International Trade Commission shall conduct a study of the wage rates, labor costs, and other labor practices of each foreign country which had a surplus in the balance of trade between the United States and such foreign country for calendar year 1984 that exceeded $4,000,000,000. Such study should consider labor practices existing throughout the economy of each of such countries and the labor practices of the industries in each of such countries that were responsible for such balance of trade surplus.

(2) The study conducted under paragraph (1) shall include, with respect to each foreign country described in paragraph (1), analyses of—

(A) the effects of the labor practices of such foreign country studied under paragraph (1) on the competitive position of United States exports in foreign markets and in United States markets,

(B) the relationship between—

(i) the wages and other compensation paid to workers in United States industries producing goods that face substantial competition from products of such foreign country, and

(ii) the wages and other compensation paid to workers in such foreign country who produce such competitive products,

(C) the relationship, if any, between the labor practices of such foreign country studied under paragraph (1) and the cultural, religious, and political practices or values of such foreign country.

(D) the extent to which such labor practices are encouraged or enforced by the government of such foreign country,

(E) the history, duration, and extent of such labor practices, and

(F) the extent to which private or public forces that are anticompetitive encourage such labor practices.

(3) By no later than the date that is 9 months after the date of enactment of this Act, the United States International Trade Commission shall submit a report on the study conducted under paragraph (1) to the Congress, the Secretary of Labor, and the Secretary of Commerce.

(b)(1) The Secretary of Labor and the Secretary of Commerce shall each conduct a separate investigation to—

(A) identify each of the labor practices discussed in the report submitted under subsection (a)(3) that—

(i) is illegal under existing laws of the United States or of any State, or

(ii) should be prohibited by all countries under an international labor law code,

(B) determine what labor principles and rules should be included in an international labor law code, and

(C) determine the issues involved in, and the prospects for achieving, the elimination of labor practices identified under subparagraph (A) through negotiations with foreign countries.

(2) By no later than 3 months after the date on which the report is submitted under subsection (a)(3), the Secretary of Labor and the Secretary of Commerce shall each submit to the Congress a report on the investigation conducted under paragraph (1).

INTERNATIONAL TRADE IN TELECOMMUNICATIONS

HOLLINGS AMENDMENT NO. 1427

(Ordered to lie on the table.)

Mr. HOLLINGS submitted an amendment intended to be proposed by him to the bill (S. 942) to promote expansion of international trade in telecommunications equipment and services, and for other purposes; as follows:

At the end of the bill, add the following:

TITLE I—TEXTILE AND APPAREL TRADE ENFORCEMENT

SEC. 101. SHORT TITLE.

This title may be cited as the "Textile and Apparel Trade Enforcement Act of 1985".

SEC. 102. POLICY.

The policy of this title is—

(1) to prevent further disruption of the United States textiles and textile products markets, damage to United States textile and apparel manufacturers, and loss of jobs by United States workers by providing for orderly and nondisruptive growth of imports of textiles and textile products; and

(2) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

SEC. 103. FINDINGS.

The Congress finds that—

(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

(2) the Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December 1981, through July 1986, contemplates a 6 per centum annual rate of growth for imports for most exporting countries and provides for a lower rate of growth for imports from significant exporting countries;

(3) since 1980, the objective of orderly growth of imports of textiles and textile products provided for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984 imports of textiles and textile products into the United States have grown at an annual rate of 19 per centum, far in excess of the 1 per centum growth rate of the United States market for textiles and textile products during the same period and far in excess of the annual rate of import growth of less than 2 per centum that prevailed during the period 1974 through 1980;

(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last six years, reaching a level of 50 per centum in 1984;

(6) based on a nationwide audit of major retail outlets, the import penetration of such major items of apparel as trousers, blouses, shirts, suits, skirts, and sweaters exceeds 50 per centum of domestic consumption;

(7) since the most recent extension of the Multi-Fiber Arrangement, certain exporting countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States market for textiles and textile products and have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

(8) imports of textiles and textile products into the United States are predominantly the product of significant producing countries, with five large producing countries now accounting for more than 50 per centum of all imports of textiles and textile products;

(9) the domination of import trade by producers in the significant producing countries has limited participation in the United States market by other producing countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment, with the United States;

(10) a change in United States textile trade policy to afford the smaller producing countries and countries in the Caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 per centum over 1983, and accounted for 13 per centum of the Nation's overall merchandise trade deficit;

(12) the current level of imports of textiles and textile products, ten billion square yard equivalents in 1984, represents over one million job opportunities lost to United States workers;

(13) imported textiles and textile products now account for 38 per centum (the equivalent of three million two hundred thousand bales of cotton) of the annual cotton consumption in the United States; only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States; the result of the massive increases in cotton textile and apparel imports has been a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone, which was only partially offset by Federal cotton program benefits; another result is that United States cotton producers, who are spending about $20,000,000 annually in research and promotion efforts, have built markets not for themselves but for foreign growers;

(14) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool; the Multi-Fiber Arrangement recognizes that imports of certain products, such as wool products, in certain countries, including the United States, pose particular problems for certain industries, such as, the wool products industries in those countries and import growth rates of 1 per centum or less have been permitted in such cases;

(15) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

(16) the increase in imports and increased import penetration of the United States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more modern equipment, productivity, as measured by output per man hour, in the textile mill products sector has increased in the last ten years at the average annual rate of 4.2 per centum and in the apparel sector at the average annual rate of 3.4 per centum, as compared with the lower productivity growth of all manufacturing in the same period of 1.9 per centum;

(17) the factors described above are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Act;

(18) based on experience during the past ten years and on other factors, the growth of the United States market for textiles and textile products is unlikely to exceed an average annual rate of 1 per centum during the next several years;

(19) if the rate of growth of imports of textiles and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

(20) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

(A) to require the establishment of import levels for textiles and textile products supplied by major producing countries that reflect—

(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 per centum annual growth rate contemplated by the Multi-Fiber Arrangement, or 1 per centum in the case of wool products, or

(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 per centum,

whichever is the lesser,

(B) to require the establishment of import levels for textiles and textile products supplied by producing countries that reflect their 1984 import levels,

(C) to require the establishment of import levels for textiles and textile products supplied by small producing countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

(D) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

(21) the establishment of import levels, and limitation of future import growth to levels, that reflect effective enforcement of the Multi-Fiber Arrangement and that also reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United States regarding trade in textiles and apparel;

(22) as the Department of Defense has long recognized, a strong, viable and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

(23) the developments that have led to the sharp increase in imports of textiles and textile products since 1980 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

(24) the sharp increase in imports of textiles and textile products since 1980, and the effect of this increase on the United States textiles and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Multi-Fiber Arrangement and its Protocol.

SEC. 104. DEFINITIONS.

For purposes of this title—

(1) The term "textiles and textile products" includes, but is not limited to, all tops, yarns, man-made fibers, piece goods, made-up articles, apparel, and other textile manufactured products (which derive their chief characteristics from their textile components) made in whole or in part from any natural or manmade fiber, or blend thereof, that are classified under schedule 3, part 6 of schedule 6, parts 1 (except subpart A but including item number 700.75), 4, 5 (except subpart E), 7 or 13 (except item number 790.57) of schedule 7, or part 1 of schedule 8 of the Tariff Schedules of the United States, or part 1 of the Appendix to the Tariff Schedules of the United States; such term does not include apparel containing 70 per centum or more by weight of silk except articles classified under item numbers 373.20 and 373.22 of the Tariff Schedules of the United States;

(2) The term "category" means, with respect to textiles and textile products that are the product of a country, each of the following—

(A) each category of textiles and textile products identified by a three-digit textile category number in the Department of Commerce publication "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated", dated January 1985 and, subsequently, in the first edition of such document that is revised to reflect the adoption by the United States of the Nomenclature Structure of the Harmonized System;

(B) with respect to each country with which the United States has (i) an agreement on the date of enactment of this title limiting exports of textiles and textile products to the United States that includes specific limitations on subdivisions of a category described in subparagraph (A), or (ii) taken unilateral action to limit products entered under such a subdivision, each such subdivision;

(C) a category consisting of the man-made fiber products not covered by a category described in subparagraph A and classified under subpart E of part 1 of schedule 3 to the Tariff Schedules of the United States; and

(D) each category consisting of each of the following products when, because of fiber content, that product is not subject to the Multi-Fiber Arrangement:

(i) yarn,

(ii) fabric,

(iii) apparel, and

(iv) other textile products;

(3) The term "import sensitive category" means—

(A) each category (other than a category applicable to textiles and textile products that are a product of a country in the Caribbean region) for which the ratio of imports to domestic production, as reported in the Department of Commerce publication "U.S. Production, Imports and Import/Production Ratios for Cotton, Wool and Man-Made Fiber Textiles and Apparel", equals or exceeds 40.0 for the preceding calendar year; and

(B) each category covering wool products;

(4) The term "country" means a foreign country (other than Canada and the Member States of the European Economic Community as constituted on January 1, 1985), a foreign territory, an insular possession of the United States, or any other territory, possession, colony, trusteeship or political entity, whether affiliated with the United States or not, that is outside the customs territory of the United States;

(5) The term "major producing country" means a country the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in subparagraph (2)(A) of this section during calendar year 1984 equaled or exceeded 10 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

(6) The term "producing country" means a country (other than a major producing country and a country in the Caribbean region) the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in subparagraph (2)(A) of this section during calendar year 1984 equaled or exceeded 1.25 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

(7) The term "small producing country" means a country other than a major producing country and a producing country;

(8) The term "country in the Caribbean region" means the United Mexican States and a country eligible for designation as a beneficiary country under section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702);

(9) The term "wool product" means an article containing over 17 per centum by weight;

(10) The term "cotton, wool and man-made fiber sweaters" means articles classified under categories 345, 445, 446, 645 or 646 as defined in the Department of Commerce publication "Correlation Textile and Apparel Categories with Tariff Schedules of the United States Annotated," dated January 1985;

(11) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States; and

(12) The term "Multi-Fiber Arrangement" means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva, December 22, 1981.

SEC. 105. LIMITS ON TEXTILE AND APPAREL IMPORTS.

(a) CALENDAR YEAR 1985.—Notwithstanding any other provision of law, the aggregate quantity of textiles and textile products classified under a category that is entered during calendar year 1985 shall not exceed—

(1) in the case of textiles and textile products that are a product of a major producing country, other than textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to a specific limitation under an agreement with a major producing country) the lesser of an amount equal to 101 per centum (A) of the aggregate quantity of such products of such country classified under such category that would have entered during calendar year 1984 if the aggregate quantity of such products of such country classified under such category entered during calendar year 1980 had increased by 6 per centum annually, or 1 per centum annually in the case of a category covering a wool product, during calendar years 1981, 1982, 1983, and 1984, or (B) if the United States has an agreement with such country providing for an annual growth rate for such category of less than 6 per centum, of the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984;

(2) in the case of textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to specific limitation under an agreement with a major producing country, the specific limitation quantity in effect as of the date of enactment of this title;

(3) in the case of textiles and textile products that are a product of a producing country, an amount equal to the aggregate quantity of (A) such products of such country classified under such category that entered during calendar year 1984, or (B) in the case of textile luggage, textile handbags, and textile flat goods subject (as of the date of enactment of this title) to specific limitation under an agreement with an exporting country, the specific limitation quantity in effect as of the date of enactment of this title;

(4) in the case of textiles and textile products that are a product of a small producing country (other than cotton, wool, and man-made fiber sweaters described in paragraph (5)), an amount equal to the sum of (A) the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984, plus (B) an amount equal to (i) 15 per centum of such quantity, in the case of a category that is not an import sensitive category, or (ii) 1 per centum of such quantity, in the case of a category that is an import sensitive category; and

(5) in the case of cotton, wool, and man-made fiber sweaters that are—

(A) the product of substantial assembly operations in Guam from otherwise completed knit-to-shape component parts, an aggregate amount equal to 160,000 dozen; and

(B) the product of substantial assembly operations in the Commonwealth of the Northern Mariana Islands from otherwise completed knit-to-shape component parts, an aggregate amount equal to 70,000 dozen.

If application of paragraph (1) would result in the aggregate quantity of textiles and textile products of a major producing country classified under all categories permitted to enter during calendar year 1985 to be less than 70 per centum of the aggregate quantity of such products of such country that entered during calendar year 1984, then, notwithstanding paragraph (1), the aggregate quantity of textiles and textile products of such country that may be entered under each category during calendar year 1985 shall not be less than 40 per centum of the aggregate quantity of such products of such country that entered under such category during calendar year 1984.

(b) GROWTH ADJUSTMENT.—For calendar years after 1985, the aggregate quantity of textiles and textile products classified under each category that may be entered during each such calendar year shall—

(1) in the case of such products that are a product of a major producing country or of a producing country, be increased by an amount equal to 1 per centum of the aggregate quantity that could be entered under such category during the preceding calendar year; and

(2) in the case of such products that are a product of a small producing country, be increased by an amount equal to—

(A) in the case of a category (other than an import sensitive category), 6 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year, and

(B) in the case of an import sensitive category, 1 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year.

If the aggregate quantity that could be entered under a category for a calendar year after 1985 is reduced under section 111(b), then, in the first calendar year in which there is no such reduction, this subsection shall be applied as if there had been no reduction under section 111(b) in previous calendar years.

(c) MINIMUM QUANTITIES.—If, under subsection (a) or (b), the aggregate quantity of textiles and textile products of a country that may be entered during a calendar year under a category is—

(1) less than one million square yard equivalents, in the case of a category covering yarn, fabric, made-ups, and miscellaneous products, other than wool products;

(2) less than seven hundred thousand square yard equivalents, in the case of a category covering apparel, other than wool products apparel; or

(3) less than one hundred thousand square yard equivalents, in the case of a category covering wool products,

then, notwithstanding subsection (a) or (b), the aggregate quantity of textiles and textile products of such country that may be entered under such category during the calendar year shall be one million, seven hundred thousand, or one hundred thousand square yard equivalents, respectively. The amount prescribed in the preceding sentence shall be accorded growth subject to the provisions of subsection (b) beginning the first calendar year after the aggregate quantity of products of such country entered under such category equals the minimum quantity prescribed under this subsection.

(d) SPECIAL RULE.—For purposes of this section, if during any calendar year after 1984, the aggregate quantity of textiles and textile products that are the product of a small producing country (other than a country in the Caribbean region) and that are entered under the categories referred to in subparagraph 2(A) of section 104 of this title equals or exceeds 1.25 per centum of all textiles and textile products entered under such categories from all countries and from Canada and the Member States of the European Economic Community during such calendar year, then such small producing country shall be considered to be a producing country for all succeeding calendar years.

(e) ENFORCEMENT.—The Secretary of Commerce shall prescribe such regulations governing the entry, or withdrawal from warehouse, for consumption of textiles and textile products as may be necessary to carry out this title.

SEC. 106. IMPORT LICENSING.

In order to ensure the equitable and efficient administration of section 105 of this title, the Secretary of Commerce shall, within six months after the date of enactment of this title, establish and administer an import licensing system under which an importer of any textiles and textile products from any country and from Canada and the Member States of the European Economic Community, will be required to present an import permit as a condition of entry. The Secretary shall charge a fee for import licenses in such amount as may be necessary to cover the cost of administration of the system. The Secretary of the Treasury shall make all determinations regarding classification under the Tariff Schedules of the United States, appraisement, and valuation of products subject to licensing under this section.

SEC. 107. ANNUAL REPORT.

Not later than March 15, 1986, and March 15 of each calendar year thereafter, the President shall submit to the Congress a report on the administration of this title during the preceding calendar year. Such report shall include detailed information about the implementation and operation of the limitations established under section 105. The report shall also include a detailed report by the Department of Commerce on the implementation and enforcement for the provisions of this title exempting from import limitations certain articles of silk apparel, with special regard to the extent to which nonsilk articles, and silk articles not exempt from import limitations, are erroneously or fraudulently classified as silk items exempt from import limitations and are entered under this title. All departments and agencies shall cooperate in preparation of this report as requested by the President.

SEC. 108. REVIEW.

The Secretary of Commerce shall commence ten years after the date of enactment of this title a formal review of the operation of the Textile Import Control Program under the provisions of this title. The Secretary shall consult Members and committees of Congress, representatives of the labor unions and the industries affected by the program, the Secretary of the Treasury, and other appropriate government officials. Within six months after the commencement of the study, the Secretary shall submit to Congress his findings as well as his recommendations for the future conduct of the program.

SEC. 109. DUTY FREE ENTRY OF CERTAIN SWEATERS FROM GUAM AND THE NORTHERN MARIANAS.

Subpart A of part 7, schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by adding at the end thereof the following new item:

"385.97	Cotton, wool and man-made fiber sweaters that are entitled to enter under the quotas established under section 105(a)(5) of the Textile and Apparel Trade Enforcement Act of 1985 or the increased quotas under section 105(b) of such Act that adjust the quotas under such section 105(a)(5) and that do not contain foreign materials to the value of more than 50 percent of their total value as this standard is applied pursuant to Headnote 3(a) of the General Headnotes and Rules of Interpretation	Free".

SEC. 110. PRODUCTS OF THE INSULAR POSSESSIONS OF THE UNITED STATES.

(a) GENERAL RULE.—Notwithstanding section 104(4) of this title, textiles and textile products that are the product of an insular possession of the United States shall not be considered to be products of a country, within the meaning of section 104(4), if such products meet the requirements of subsection (b).

(b) Possession Content.—

(1) Subsection (a) shall apply to an article if—

(A) that article is imported directly from an insular possession of the United States into the customs territory of the United States; and

(B) the sum of (i) the cost or value of the materials produced in such insular possession of the United States or in the customs territory of the United States plus (ii) the direct costs of processing operations per-

formed in such insular possession of the United States is not less than 85 per centum of the appraised value of such article at the time it is entered.

(2) The Secretary of the Treasury shall prescribe such regulations as may be necessary to carry out this section, except that the rules of origin contained in 19 CFR 12.130 shall be the rules of origin for purposes of this section.

(3) As used in this subsection, the phrase "direct costs of processing operations" includes—

(A) all actual labor costs attributable to permanent residents of the insular possession involved in the growth, production, manufacture, or assembly of the specific merchandise, including fringe benefits, on-the-job training and the cost of engineering, supervisory, quality control, and similar personnel; and

(B) dies, molds, tooling, and depreciation on machinery and equipment which are allocable to the specific merchandise.

Such phrase does not include costs which are attributable to nonpermanent resident labor, are not directly attributable to the merchandise concerned, or are not costs of manufacturing the product, such as (i) profit, and (ii) general expenses of doing business which are either not allocable to the specific merchandise or are not related to the growth, production, manufacture, or assembly of the merchandise, such as administrative salaries, casualty and liability insurance, advertising, and salesmen's salaries, commissions or expenses.

SEC. 111. EFFECTIVE DATE.

(a) IN GENERAL.—Subject to the provisions of subsection (b), the provisions of this title shall apply to textiles and textile products entered, or withdrawn from warehouse, for consumption on or after the date of enactment of this title.

(b) CALENDAR YEARS 1985 AND 1986.—The Secretary of Commerce shall prescribe by regulation the aggregate quantity, if any, of textiles and textile products that may be entered under section 105 (a) or (c) of this title from each country under each category during the period beginning on the date of enactment of this title and ending December 31, 1985. Notwithstanding subsection (a), to the extent that the aggregate quantity of imports of textiles and textile products of a country entered under a category after December 31, 1984, and before the date of enactment of this title exceeds the quantity permitted entry for such products of such country and such category during calendar year 1985 under subsection 5 (a) or (c) of section 105, then the limit that would otherwise apply under section 105 (b) or (c) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 105 (b) or (c) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 105(b) for such category for such country for calendar year 1986, then the limit for such category and country for calendar years after 1986 shall be reduced until such excess is accounted for.

TITLE II

SEC. 201. SHORT TITLE.

This title may be cited as the "American Footwear Industry Recovery Act of 1985".

SEC. 202. FINDINGS AND PURPOSE.

(a) The Congress finds that—

(1) The domestic nonrubber footwear industry is important to the national economy, and footwear firms are vital to the economic health of small towns throughout the United States.

(2) The domestic nonrubber footwear industry is highly labor intensive, and low capital requirements for entry into footwear production make it a primary target for industrializing or newly industrialized countries. As a consequence, footwear is produced in virtually every footwear consuming country in the world.

(3) Tremendous competitive pressure has been created in the world footwear market in the last decade as a result of rapidly growing production and capacity in numerous developing and developed countries. This development has resulted in the widespread erection of tariff and nontariff barriers by foreign countries designed to protect their domestic footwear industries.

(4) The United States has historically resisted the protectionist trends of other producing nations and has instead maintained a market distinguished by its accessibility. As a result, the United States market has become a focal point for world trade in nonrubber footwear.

(5) The diversion of international trade to the United States market has resulted in serious injury to domestic producers as manifested by—

(A) the loss of 155,000 footwear jobs since 1968,

(B) a decline in domestic production and production capacity, and

(C) the permanent closure of over 500 plants during the same period.

(6) The serious injury to domestic producers poses a significant danger to the industry's supplier base as well.

(7) The domestic nonrubber footwear producers have made a significant commitment to the future of the industry through substantial capital investment.

(8) Since the termination of temporary import relief in 1981, capital investment in the domestic nonrubber footwear industry has declined as the industry struggled to battle the massive surge in imports which increased the percentage share of imported footwear in the United States market from, 51 per centum in 1981 to 77 per centum in 1985.

(9) Without the restriction of import levels, capital investment in this domestic industry will continue to decrease.

(10) The domestic nonrubber footwear industry has thrice been judged by the International Trade Commission, as recently as May 1985, to be seriously injured by imports.

(11) Since the termination of the two, 4-year orderly marketing agreements in 1981, the harm to the domestic industry is even more critical than the serious injury which triggered the Commission's unanimous findings in 1976 and 1977.

(12) The domestic nonrubber footwear industry has not been afforded adequate and appropriate relief from imports; therefore, the Congress concludes that—

(A) the administrative process under sections 201, 202, and 203 of the Trade Act of 1974 has proven inadequate; and

(B) in the absence of and effective remedy under such process, legislative relief is essential.

(b)(1) It is the purpose of Congress in enacting this section to—

(A) promote and expand the economic health of the United States nonrubber footwear industry,

(B) preserve the jobs of American workers, and

(C) prevent the further decline of this important domestic industry.

(2) It is declared to be the policy of Congress that access to the United States market for foreign-produced nonrubber footwear should be on an equitable basis to ensure orderly trade in nonrubber footwear, reduce unfair trade in nonrubber footwear, and address United States balance-of-payments problems, of which footwear is the seventh largest component. In order to accomplish these objectives, it is deemed necessary and appropriate to limit imports of nonrubber footwear into the United States market.

SEC. 203. DEFINITIONS.

For purposes of this title—

(1) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

(2) The term "Secretary" means Secretary of Commerce.

(3) The term "nonrubber footwear" means the following categories of nonrubber footwear products, identified by reference to the following item numbers of the Tariff Schedules of the United States (as in effect on January 1, 1985): 700.05 through 700.45; 700.56; 700.72 through 700.83; and 700.95; except alpine (down hill) ski boots and nordic (cross country and jumping) ski boots.

(4) The term "apparent domestic consumption" means, with respect to any 1-year period, the sum of imports plus domestic production less exports.

SEC. 204. QUANTITATIVE LIMITATION ON NONRUBBER FOOTWEAR.

(a)(1) During the 8-year period beginning on the date of enactment of this title, the aggregate number of pairs of nonrubber footwear which may be entered during any 1-year period shall not exceed 60 per centum of the estimated apparent domestic consumption of nonrubber footwear for such period.

(2) The quantitative limitation imposed by paragraph (1) for any 1-year period shall be distributed among the following categories of nonrubber footwear so that the aggregate number of pairs of nonrubber footwear in such category which may be entered during any 1-year period shall not exceed the quantity equal to—

(A) in the case of nonrubber footwear with a customs value that does not exceed $1.25 per pair, 10 per centum of apparent domestic consumption of nonrubber footwear for such period,

(B) in the case of nonrubber footwear with a customs value that exceeds $1.25 per pair but does not exceed $2.50 per pair, 5.4 per centum of apparent domestic consumption of nonrubber footwear for such period, and

(C) in the case of nonrubber footwear with a customs value that exceeds $2.50 per pair, 44.6 per centum of apparent domestic consumption of nonrubber footwear for such period.

(b) Within 60 days after the effective date of this title, and on the first day of the fourth quarter of each 1-year period thereafter, the Secretary shall determine on the basis of the best information available, including his own or independent forecasts, the expected apparent domestic consumption of nonrubber footwear for, in the case of the initial determination, the remainder of the current 1-year period and in the case of the first day of the fourth quarter of each 1-year period thereafter, the next succeeding 1-year period. On each such date, the Secretary shall determine and publish in the Fed-

eral Register the allocation for the next succeeding 1-year period of permissible imports of nonrubber footwear as required by this section.

(c) On the first days of the first, second, and third quarters of each 1 year period, the Secretary shall revise the determinations of expected apparent domestic consumption made under subsection (b) for the current 1 year period on the basis of the best information then available and shall make such adjustments in the quantity of nonrubber footwear permitted to be imported under this section as indicated by the revision. All revisions and adjustments made under this subsection shall be published in the Federal Register.

(d) If the revised determination of expected apparent domestic consumption published in the Federal Register under subsection (c) on the first day of the third quarter in any 1 year period for nonrubber footwear varies from the actual apparent domestic consumption of nonrubber footwear for such 1 year period, the Secretary shall publish in the Federal Register on the first day of the second quarter of such succeeding 1 year period a revision to the determination of expected apparent domestic consumption for such 1 year period made under subsection (c) of this section. The revision shall be in the amount of such variance and shall be in addition to any other revision that would be made on any such first day of the second quarter under subsection (c) of this section.

(e)(1) The Secretary and the Secretary of the Treasury shall take such actions within their respective jurisdictions as may be necessary or appropriate to enforce the provisions of this section, including without limitation, the issuance of orders to Customs officers to bar entry to merchandise if the entry of such merchandise would cause the limitations established under this section to be exceeded.

(2)(A) The Secretary and the Secretary of the Treasury are each authorized to issue such implementing regulations, including the issuance of import licenses, as may be necessary or appropriate to effect the purposes of this section and to enforce the provisions of this section.

(B) Before prescribing any regulations under subparagraph (A), the Secretary or the Secretary of the Treasury, as the case may be, shall—

(i) consult with interested domestic parties,

(ii) afford an opportunity for such parties to comment on the proposed regulations, and

(iii) consider all such comments before prescribing final regulations.

SEC. 205. COMPENSATION AUTHORITY.

For purposes of section 123 of the Trade Act of 1974 (19 U.S.C. 2133), the imposition of the quantitative limitation under section 204 shall be treated as action taken under section 203 of the Trade Act of 1974 (19 U.S.C. 2253).

TITLE III—COPPER

SEC. 301. SHORT TITLE.

This title may be cited as the "Copper Free Market Restoration Act of 1985".

SEC. 302. FINDINGS, PURPOSE, AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) the copper industry of the United States is critical to the national defense and the maintenance of a strong economy, but has suffered a substantial economic setback, including a 50 per centum reduction in employment levels, a 25 per centum drop in production, the closure of 16 major mines, and the permanent loss of copper reserves;

(2) the substantial economic setback to the domestic copper industry is attributable to the steep decline in world copper prices that has resulted from—

(A) the continued overproduction of copper by government-owned foreign producers that—

(i) have been encouraged to overproduce by their host governments in order to generate foreign exchange and maintain employment levels, and

(ii) enjoy unfair competitive advantage over United States producers because of subsidized loans from their governments and from international lending institutions, such as the World Bank, and the absence of adequate environmental regulation; and

(B) the overvaluation of the dollar and its impact on domestic copper prices;

(3) the extent of the economic setback to the domestic copper industry was documented in 1984 when the United States International Trade Commission unanimously found that the industry had been injured by foreign competition under the terms of section 201 of the Trade Act of 1974 and recommended that appropriate relief be granted;

(4) while copper producers in the United States have made a substantial commitment to the modernization of the industry, more improvements are needed, and the reinvestment in the United States copper industry that is needed for those improvements is seriously jeopardized by the failure of existing trade statutes to deal effectively with the problem of excess world production; and

(5) a 5-year stabilization of foreign copper production is needed if the domestic copper industry is to attract the necessary capital for reinvestment.

(b) PURPOSE.—The purpose of this title is to—

(1) ensure an adequate supply of domestic copper,

(2) expand employment in the copper industry, and

(3) stabilize foreign copper production at levels that will enable domestic copper producers to make necessary improvements and modernization.

(c) POLICY.—The Congress declares it to be the national policy that the United States must seek to negotiate agreements temporarily limiting copper production by foreign copper producers so that the purposes of this title can be fulfilled.

SEC. 303. DEFINITIONS.

For purposes of this title—

(1) The term "agreement negotiation period" means the 9-monih period beginning on the first day of the first calendar month beginning after the date of enactment of this Act.

(2) The term "major copper producing country" means any foreign country whose production of unwrought copper during 1984 exceeded 300,000 metric tons.

(3) The term "significant copper producing country" means any foreign country whose production of unwrought copper during 1984 exceeded 200,000 metric tons but did not exceed 300,000 metric tons.

(4) The term "unwrought copper" means articles provided for in items 612.02 through 612.06 of the Tariff Schedules of the United States.

(5) The term "restraint period" means the 5-year period beginning at the close of the agreement negotiation period.

SEC. 304. NEGOTIATIONS AND ACTION REGARDING AGREEMENTS TO VOLUNTARILY RESTRAIN COPPER PRODUCTION.

(a) NEGOTIATIONS.—

(1) The President, acting through the United States Trade Representative and the Secretary of the Interior, shall undertake negotiations during the agreement negotiation period with all major copper producing countries for the purpose of obtaining voluntary restraint agreements under which the aggregate production of unwrought copper by the major copper producing countries during each 1-year period within the restraint period will not exceed the aggregate production of unwrought copper by those countries during calendar year 1982.

(2) The President, acting through the United States Trade Representative and the Secretary of the Interior, shall undertake negotiations during the agreement negotiation period with all significant copper producing countries for the purpose of obtaining voluntary restraint agreements under which the aggregate production of unwrought copper by the significant copper producing countries during each 1-year period within the restraint period will not exceed the sum of—

(A) the aggregate production of unwrought copper by those countries during calendar year 1984, plus

(B) the estimated growth in demand for unwrought copper for such 1-year period within the restraint period.

(b) REPORTS.—

(1) At the close of each 3-month period within the agreement negotiation period, the President shall submit to the Congress a report on the progress of negotiations conducted under subsection (a). Such report shall—

(A) set forth the terms of any voluntary restraint agreement that has been entered into under subsection (a) during such 3-month period,

(B) contain a summary of the actions taken by the President during such 3-month period to obtain agreements under subsection (a) with each major copper producing country and significant copper producing country that has not entered into such an agreement,

(C) contain a summary of the responses (including counteroffers) made during such 3-month period by each of the countries described in subparagraph (B) to the actions of the President described in subparagraph (B),

(D) include a description of the obstacles and objections encountered by the President during such 3-month period to the achievement of agreements under subsection (a), and

(E) include an assessment of whether each country described in subparagraph (B) is negotiating in good faith.

(2) The final report that is required to be submitted under paragraph (1) shall include—

(A) a determination by the President of whether the agreements entered into under subsection (a) will achieve the purposes of this title, and

(B) recommendations of the President regarding any actions that should be taken against any major copper producing country or significant copper producing country which refuses to enter into a voluntary restraint agreement under subsection (a).

(c) ACTION IF VOLUNTARY RESTRAINT AGREEMENTS TAKE EFFECT.—If voluntary restraint agreements described in subsection (a) take effect between the United States and the major copper producing countries or significant copper producing countries—

(1) the United States Trade Representative, with the cooperation of other appropriate Federal officers, shall monitor the production of unwrought copper by those coun-

tries during each 1-year period within the restraint period for the purpose of ascertaining if the terms of the agreements are being complied with during such 1-year period, and

(2) the United States Trade Representative shall, within 30 days after the close of each 1-year period within the restraint period, report to the Congress on the results of the monitoring carried out during such 1-year period.

TITLE IV—FOREIGN LABOR PRACTICES

SEC. 401. REPORTS.

(a)(1) The United States International Trade Commission shall conduct a study of the wage rates, labor costs, and other labor practices of each foreign country which had a surplus in the balance of trade between the United States and such foreign country for calendar year 1984 that exceeded $4,000,000,000. Such study should consider labor practices existing throughout the economy of each of such countries and the labor practices of the industries in each of such countries that were responsible for such balance of trade surplus.

(2) The study conducted under paragraph (1) shall include, with respect to each foreign country described in paragraph (1), analyses of—

(A) the effects of the labor practices of such foreign country studied under paragraph (1) on the competitive position of United States exports in foreign markets and in United States markets,

(B) the relationship between—

(i) the wages and other compensation paid to workers in United States industries producing goods that face substantial competition from products of such foreign country, and

(ii) the wages and other compensation paid to workers in such foreign country who produce such competitive products,

(C) the relationship, if any, between the labor practices of such foreign country studied under paragraph (1) and the cultural, religious, and political practices or values of such foreign country.

(D) the extent to which such labor practices are encouraged or enforced by the government of such foreign country,

(E) the history, duration, and extent of such labor practices, and

(F) the extent to which private or public forces that are anticompetitive encourage such labor practices.

(3) By no later than the date that is 9 months after the date of enactment of this Act, the United States International Trade Commission shall submit a report on the study conducted under paragraph (1) to the Congress, the Secretary of Labor, and the Secretary of Commerce.

(b)(1) The Secretary of Labor and the Secretary of Commerce shall each conduct a separate investigation to—

(A) identify each of the labor practices discussed in the report submitted under subsection (a)(3) that—

(i) is illegal under existing laws of the United States or of any State, or

(ii) should be prohibited by all countries under an international labor law code,

(B) determine what labor principles and rules should be included in an international labor law code, and

(C) determine the issues involved in, and the prospects for achieving, the elimination of labor practices identified under subparagraph (A) through negotiations with foreign countries.

(2) By no later than 3 months after the date on which the report is submitted under subsection (a)(3), the Secretary of Labor and the Secretary of Commerce shall each submit to the Congress a report on the investigation conducted under paragraph (1).

ARMED FORCES SURVIVORS HOUSING ALLOWANCES

THURMOND (AND OTHERS) AMENDMENT NO. 1428

Mr. SIMPSON for Mr. THURMOND (for himself, Mr. WILSON, Mr. DOLE, Mr. GLENN, Mr. KENNEDY, Mr. MCCONNELL, Mr. GOLDWATER, Mr. SIMPSON, Mr. NUNN, Mr. COCHRAN, Mr. STENNIS, Mr. SASSER, Mr. EXON, Mr. LEVIN, Mr. D'AMATO, Mr. HART, Mr. BINGAMAN, and Mr. DIXON) proposed an amendment to the bill (H.R. 3974) to amend title 10, United States Code, to include in the death gratuity payable to survivors of a member of the Armed Forces who dies on active duty an amount equivalent to 2 months' housing allowances; as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That section 403 of title 37, United States Code, is amended by adding at the end thereof the following new subsection:

"(l)(1) The Secretary of Defense, or the Secretary of Transportation in the case of the Coast Guard when not operating as a service in the Navy, may allow the dependents of a member of the armed forces who dies in line of duty and whose dependents are occupying family housing provided by the Department of Defense, or by the Department of Transportation in the case of the Coast Guard, other than on a rental basis on the date of the member's death to continue to occupy such housing without charge for a period of 90 days.".

"(2) The Secretary concerned may pay an allowance for quarters to the dependents of a member of the uniformed services who dies in line of duty and whose dependents are not occupying a housing facility under the jurisdiction of a uniformed service on the date of the member's death or are occupying such housing on a rental basis on such date, or whose dependents vacate such housing sooner than 90 days after the date of the members death. The amount of the allowance for quarters shall be the same amount that would be payable to the deceased member under sections 403, 403a, and 405 of this title if the member had not died. The payment of an allowance for quarters under this subsection shall terminate 90 days after the date of the member's death.".

SEC. 2. The amendments made by section 1 of this Act shall take effect December 12, 1985, and shall apply only with respect to housing for and payment of an allowance for quarters to dependents of members of the uniformed services who died on or after that date.

SEC. 3. SERVICEMEN'S GROUP LIFE INSURANCE PROGRAM.—Section 401(c) of Public Law 99-166 is amended to read as follows:

"(c) EFFECTIVE DATE.—Except as provided in paragraph (2), the amendments made by subsections (a) and (b) shall take effect on January 1, 1986.

"(2) The amendment made by subsection (a)(1)(A) shall be deemed to have taken effect on December 12, 1985, with respect to members who—

"(A) died after December 11, 1985, and before January 1, 1986; and

"(B) were, on the date of death, insured in the amount of $35,000 under subchapter III of chapter 19 of title 38, United States Code.".

ADDITIONAL STATEMENTS

TAX REFORM AND THE FUTURE OF 401(k)S

● Mr. BAUCUS. Mr. President, a priority issue for the Senate in the second session will be the tax legislation. My colleagues and I on the Finance Committee will be devoting many hours, days, and weeks to this subject in 1986. A major issue we will have to resolve will be the impact of the tax bill of the private, voluntary retirement savings system and, in particular, on cash-or-deferred retirement savings plans, popularly known as 401(k)'s.

Recently, Tax Notes carried an information and timely exchange on the value and future of 401(k)'s. Authored by Stuart J. Brahs, executive director of the Association of Private Pension and Welfare Plans (pro) and Dr. Gerard M. Brannon, Tax Notes editorial page editor (con), the article discusses the merits, shortcomings, and future of this popular and growing retirement program. I believe this article is a useful contribution to the public debate over one important aspect of the tax reform initiative and I commend it to our colleagues' attention.

The article follows:

[From Tax Notes, Nov. 25, 1985]

CODA'S AND IRA'S

(Commentators: Gerard M. Brannon and Stuart J. Brahs)

SPEAKING OUT

(Gerard M. Brannon)

In its various tax reform proposals, Treasury has been both for and against cash-or-deferred arrangements (CODAs or 401(k) plans). Under a CODA, an employee can take part of his or her current salary as deferred income. Commonly, employers match employee contributions. The arrangement can work like a pension plan, except CODA deferrals can sometimes be withdrawn or borrowed before retirement.

CODAs, like individual retirement accounts (IRAs), usually supplement qualified pension plans. Both arrangements involve some individual choice; in standard pension plans, a "Jiminy Cricket" employee cannot opt out, except by changing jobs. CODAs differ from IRAs by having an employer tie-in; employer matching constitutes pressure on employees to be squirrels rather than crickets.

CODAs are open-ended—they are not subject to the $2,000 contribution limit that applies to IRAs—and I consider this to be a very serious problem. Because individuals with high incomes normally save more and would use CODAs more than low- and middle-income earners. Congress created special nondiscrimination rules for CODAs. Roughly, the eligibility of employees to elect deferral must be like pension plan eligibility, and the deferral rate among the

highest-paid third of qualified employees cannot be more than 150 percent of the deferral rate for the lowest two-thirds.

Treasury I recommended eliminating section 401(k). Treasury II relented to the extent of proposing a dollar ceiling. Treasury 11½, the Baker-Rostenkowski plan, would have retained current law. The Ways and Means Committee's reform bill would place a ceiling on the combined CODA and IRA.

THE CODE ISN'T CONSISTENT

First, let me just list some relevant personal judgments about basic tax policy.

Judgment 1—CODAs, IRAs, and pension plans are all part of a crazy patchwork of savings incentives in present law. We don't encourage all savings, only selected savings (for home, retirement, etc.). Worse, we don't even pay attention to *net* saving; present law encourages borrowing by way of the interest deduction.

Judgment 2—On the whole, the crazy patchwork mostly gives tax reductions for savings that would have occurred anyway. The overwhelming fact is that as we reduced tax penalties on savings, the savings rate didn't rise.

Judgment 3—The institution of qualified pension plans probably has a positive impact on savings. Low-income workers who probably would not save on their own save through pension plans.

Judgment 4—If we were serious about encouraging saving, we should specifically tax consumption. Several feasible consumption tax techniques are available.

Quite apart from these judgments, there are several policy points on which I detect a near consensus among policymakers, as of 1985.

Consensus 1—We won't go to consumption tax.

Consensus 2—We should move toward a law which taxes *income* more consistently, with fewer incentives for saving.

Consensus 3—Through tax reform we should not do anything basic to take away the tax advantages of pension plans.

THE INCENTIVES DON'T WORK

Unlike most pension plans, CODAs and IRAs each have an "individual choice" feature which makes it most likely that they will be used by people who would have saved anyway, i.e., they won't result in more retirement saving.

Among all workers, the IRA participation rate is eight times higher among those earning $50,000 or more than it is among those earning $5,000 to $10,000. Between these same brackets, the rate of CODA use is 20 times higher. This is not just a matter of unfairness, but it means that these provisions are being used by people who would save a substantial amount anyway and it indicates that savings incentives do not increase the savings rate. (These calculations are based on tabulations of the May 1983 Current Population Survey Pension Supplement, done by the Employee Benefit Research Institute.)

I find even less socially redeeming character in CODAs since they are not limited to pension saving. The opportunities to cash them in early without penalty makes them ordinary savings, and if we want to encourage saving through the tax system, the only way to go is to a consumption tax which nets savings against borrowing.

I do find some merit in IRAs as they were before 1981—limited to people not covered by pension plans. Even here, IRAs will be used by those with higher incomes, but they will at least offset some of the unfairness caused by the fact that pension plans apply to some workers but not others.

A problem in a strategy of once-a-generation tax reform is that the Treasury can't stir up many issues. It is hard to get the technical work done on very many topics and each new topic introduced rouses a new hostile constituency. Clearly Treasury was unwilling to do much about pension plans and I guess their position on IRAs was dictated by the number of IRA investors out there. CODAs are growing very fast and in a few years may present as intimidating a political problem as pension plans and IRAs do now. If the Administration is sincere about taxing all income, it should go back to pushing outright repeal of section 401(k) and it should at least hold the line on the dollar limits on IRAs and pension plans so that the growth of money income will narrow these tax benefits.—GERARD M. BRANNON.

ANOTHER VIEW

(Stuart J. Brahs)

The likelihood that meaningful "once-in-a-generation tax reform" will be voted upon by the 99th Congress is uncertain. What is certain is that both the Administration and the Ways and Means Committee have set their sights on pension and other retirement income programs to please the demanding but elusive goal of revenue neutrality. The Administration's back and forth attitude toward cash-or-deferred arrangements (CODAs), or 401(k)s—and more recently, the House tax writers' action to seriously undermine these valuable programs—are a good example of why the tax reform process is the worst possible arena for determining something as important and far-reaching as national retirement income policy.

Unfortunately, Jere, your views on 401(k)s serve only to cloud the issue of what tax reform and retirement income policy should accomplish.

Unlike IRAs, 401(k)s offer employees the prearranged discipline of regular savings managed and professionally invested by their employer who, surveys show, match employees' contributions in 80 percent of plans. While some preretirement withdrawals for specially defined "hardship" cases are permitted in many plans, actual utilization is infrequent and no abuse of this plan feature has been demonstrated. More importantly, however, is the fact that this very feature attracts participation by younger workers (who are typically the least likely to save) because they know they can access these funds in an emergency.

WHO PARTICIPATES

As many as 19 million Americans are now eligible to participate in 401(k)s. Data indicate that between 60-63 percent of eligible employees do participate, for an estimated 10 to 15 million active participants nationwide. Participation rates for workers earning between $10,000-$25,000 are double the IRA participation rates for workers in the same income group. At *every* income level, a higher percentage of those eligible participate in 401(k) plans instead of IRAs. CODAs are subject to strict rules enforcing nondiscrimination. IRA usage—not subject to such rules—is skewed toward upper-income individuals.

CODAs are engendering a revolution in worker savings behavior. 401(k)s play a major role in adapting retirement income options to the needs of a rapidly changing workforce. While we have made great strides in expanding pension coverage, some nagging problems still exist—particularly for workers in small businesses with fewer than 100 employees and for highly mobile workers. Workers who enter and leave the workforce with some regularity, such as working mothers, often have problems with vesting requirements.

401(k)s are contributing greatly to expanding pension coverage for these employees. One reason for the rapid growth of 401(k)s has been the ease of implementation and adoption by small companies and nonprofit organizations who never before could provide an effective retirement income plan. Once vested, workers participating in a 401(k) can roll over their "account" into a qualified plan such as an IRA. Recent data also indicate that for the overwhelming majority of 401(k) plans, full vesting is either immediate or occurs within five years, making CODAs especially attractive to younger, more mobile workers, such as working mothers and those in high tech and other volatile service occupations.

While I fear you're confusing the issue by raising the idea of a consumption tax, Jere, I will agree with you—and you make the point somewhere—that current tax reform proposals, and indeed current tax policies, often penalize savings and seemingly reward borrowing.

THE SAVINGS RATE IS TOO LOW

There is justifiable concern today over the woefully low U.S. savings rate—the lowest of all major industrialized countries and lower than projected for this year by most economists. The U.S. personal savings rate for September 1985 was a dismal 1.9 percent, the lowest it has been since the early 1950s. One cause of the current disheartening trend of borrowing over saving is that a chief byproduct of the 1950s—the baby boomers—is borrowing for homes, cars, and possibly computers to figure their tax returns. And they are not saving nearly enough.

Here, I think the question should not be whether we have a consumption tax instead of a reformed income tax, but whether the U.S. tax code should be an instrument for encouraging responsible behavior, such as saving. One needn't be a Nobel award-winning economist to know the answer to that. If those baby boomers haven't put enough away for retirement by the end of this century, Uncle Sam is going to have to make up the difference between a meager and an adequate retirement for this politically potent age group.

For over four decades, the tax code has been an effective tool to expand coverage of workers in employer-sponsored retirement programs. Since World War II, coverage under benefit plans sponsored voluntarily in the private sector has grown dramatically. Private sector pension plans, as you say in Judgment 3, have had "a positive impact on savings by applying to a lot of low-income workers who probably would not have saved on their own." Fully 70 percent of U.S. workers between the ages of 25 and 64 and in their full-time jobs over one year are now covered by some form of pension plan where they work. But, nearly a third of them have little or no savings beyond what's accrued in their employer-provided plan. These plans comprise an increasingly larger percentage of savings in the United States: 12.7 percent in 1950, 20 percent in 1970, and 30.9 percent in 1980. Without the growth in employer-

sponsored arrangements, the savings rate in this country might be even lower.

WE NEED MORE SQUIRRELS

Now is not a time when we should discourage savings or create new disincentives toward saving for retirement. This is a time we must aggressively seek expanded savings as a deliberate national policy. Or as you put it, create more squirrels.

You have not made an effective or even an ancedotal case against 401(k)s. They are not "open-ended"—the amounts contributed by lower- and middle-income participants in a 401(k) plan determine the amounts that upper-income-employees contribute. There have been no abuses of withdrawals on loans; CODAs are subject to nondiscrimination rules; they have encouraged savings by all income groups. You have not backed up your "fact" that the tax code "mostly gives tax reductions for savings that would have occurred anyway." Given the abysmal savings rate, where is your evidence? Why shouldn't we encourage greater savings by all income groups, especially if savings by the higher income earners in 401(k) plans, for example, leverage greater savings by middle- to lower-income earners?

The real problem we have is that the "crazy patchwork" of retirement income programs should not be toyed with in a fast-paced revenue-driven, tax reform process. There are real questions that should be answered, but there is no time to ask them. You put it well in Consensus #3: "Through tax reform we should not do anything basic to take away the tax advantage of pension plans." AGREED!!!

Tax reform, as the President presented it, was to accomplish fairness, growth, and simplicity. So far, Administration and Joint Taxation Committee options, as applied to 401(k) plans specifically and retirement income and savings policy generally, meet none of these criteria. Pensions and other employee benefits are not "fringes" for the rich, but mainstays of lower- to middle-income working Americans. This applies to 401(k) plans. And just watch the constituency for them grow!!

STUART J. BRAHS,
Executive Director, The Association of Private Pension and Welfare Plans.

POSTSCRIPT

I disagree with Stu. CODAs are not revolutionizing savings behavior, because the total savings rate has not changed with all the so-called savings incentives in the tax law. This crazy system gives tax relief for borrowing and gives relief for liquidating one investment to acquire another. It's not an incentive for saving.

I agree with Stu that IRA usage is skewed to upper incomes and that 401(k) usage *among eligible employees* is less skewed than IRA's When you add the fact that upper-income workers are more likely to be eligible, my numbers show 401(k) usage more skewed than IRA. Both are pretty bad. This ties into my point that the crazy system (tax relief for selected kinds of saving with incentives for borrowing) is just relief for saving that would have occurred anyway.

If one were serious about saving, one should abandon the crazy system and tax consumption, i.e., untax *all net* saving.—GERARD M. BRANNON.●

THE FREE ENTERPRISE SYSTEM

Mr. SYMMS. Mr. President, my colleagues in this body know me as a champion of free enterprise and individual opportunity without government interference. I wish to bring to the attention of my colleagues an example of what creative free enterprise can accomplish through our system which encourages individual initiative.

We in the Pacific Northwest are accustomed to a salad dressing which cannot be surpassed anywhere in America: Lighthouse Dressing. This business owned and operated by my good friends Ed Hawkins and his sons Doug and Ed Jr., is a 3,000 jar per day business which now employs 35 people in Sandpoint, ID.

Lighthouse started as a summer venture to make a little money for college. In 1985, Ed Hawkins' restaurant, the Lighthouse Restaurant, featured a dressing that not only brought customers back for more, but brought them back with empty containers wanting more of Ed's unique dressing.

The free market system and a top quality product soon turned Lighthouse Dressing into a thriving business offering 14 different flavors plus jams and candy in great demand throughout the Pacific Northwest and Western Canada.

Mr. President, I ask that the following article from the Idaho Business Review about the Hawkins' successful venture be printed in the RECORD.

The article follows:

[From the Idaho Business Review, Dec. 9, 1985]

LITEHOUSE DRESSING—A FAMILY AFFAIR

(By Kathy Johansen)

SANDPOINT.—What began as a summer venture to earn extra college money has turned into a successful business for a Sandpoint family. In the summer of 1963, the Hawkins family of Hope, Idaho, began the Litehouse Dressing industry.

A familiar site today in the produce sections of many supermarkets, Litehouse Dressing was born at the Litehouse Restaurant of Hope. The restaurant, purchased by Ed Hawkins in 1958, featured a salad dressing so popular that restaurant patrons brought their empty jars from home to fill with dressing.

The elder Hawkins saw the dressing as a supplement to his restaurant business, but his sons, Doug and Ed Jr., had bigger visions. During his summer break from college, Doug bought 100 jars, filled them with the dressing and literally went door-to-door to businesses to sell his product.

The reception was good, said Doug, and sales continued at a "nice level" until 1974, when the brothers decided to escalate their production. They moved from Hope to Sandpoint, where their plant is presently located on the northwest edge of town.

Along with productions, the Hawkins also broadened the dressing's marketing area which reaches throughout the Northwest and into parts of Canada. Litehouse now offers 14 different flavors of dressings and has diversified, producing huckleberry jams and syrups and a chocolate-covered huckleberry candy. The goal of the plant, said Hawkins, is to produce other high quality food items, but he would not disclose what their next product might be; however, he said, plans are underway.

Total production of the dressing takes place at the Sandpoint plant, including the printing of the jar lettering and the production of the mayonnaise used in making the dressing. Such operations were previously done in Seattle.

The mayonnaise machine is capable of producing 60,000 pounds of mayonnaise in one shift, said Hawkins, and approximately 3,000 jars of dressing are made each production day. The plant employs 35 area residents.

The Hawkins family seem to have found the right ingredients—a good recipe, family input and local help—to successfully fulfill a dream and business venture that began 22 years ago.

STAR WARS

● Mr. SIMON. Mr. President, Townsend Hoopes is a former Assistant Secretary of Defense who has contributed to this country in a variety of ways.

Recently he gave a talk to the Milwaukee Institute of World Affairs on the whole question of star wars.

But it is really more than simply a comment on star wars. It outlines a sane, sensible policy for this Nation to be following.

We should be listening to these voices of sanity, rather than to the voices that would push us into an irrational policy.

I urge my colleagues to read his remarks.

I ask that the speech be printed in the RECORD.

The speech follows:

TOWNSEND HOOPES: ADDRESS TO MILWAUKEE INSTITUTE OF WORLD AFFAIRS, NOVEMBER 12, 1985

You have given me a very large topic—the Summit and Beyond—to discuss in the culminating lecture of this seminar series. To do the subject justice would have seemed, a month ago, to require a gift of prophecy, but I doubt if this is any longer the case. Regrettably, it is now rather clear that this Summit Meeting is not going to amount to much in substantive terms—an exercise in public relations and posturing for the home audiences, a mutual effort to reassure a world worried about nuclear war, and perhaps an agreement to meet again. This last could be a promising development.

But it is now almost certain that there will be no agreement on arms control. The best to be hoped for on that fundamental issue are new guidelines for the negotiators at Geneva. But even that is a long shot. Until a few weeks ago, I believed there was an historic opportunity to reaffirm explicitly a tacit understanding on the paramount reality: mutual vulnerability—that mutual vulnerability is an existential condition of our age; that neither side can significantly alter the present stalemate, no matter how great its military and technological exertions; that we and the Soviets face a common security problem based on the reality that we will live together or perish together; that we should accordingly reinforce those attitudes and policies that rule out war between the two superpowers.

What are the chances for such an understanding? Not very good. Obstacles to such commonsense exist in both camps, but the Soviets seem closer to grasping this reality than the Reagan Administration. A new Soviet leader, indeed a new generation of Soviet leadership, has taken over from the diminished band of tired old men who were the last of the original revolution-makers, and the new men seem determined upon a major effort to clear away the dry rot—to reinvigorate and redirect Soviet society. But to achieve this even partially, Gorbachev knows he needs a stable international environment, and especially a stable relationship with the United States. He needs, above all, to avoid a vast new arms race that would serverly constrict plans for economic reform. And I believe he understands that a new arms race would be dangerously destablizing as well as futile. I believe he has made this clear, for example, in his interview with Time magazine, and in a series of quite respectable proposals for arms reductions which he has since put forward.

The Reagan Administration is unfortunately ambivalent, a house deeply divided from the top down. The rational part of the apparatus sees a need for compromise to reduce the threat of catastrophic war and to give reassurance to worried allies. But key Reaganites, in their heart of hearts, really don't want an agreement—any agreement—with the "focus of evil" whose machinations they see as the root cause for 9/10ths of the troubles in a seething world.

Professional military men, represented on the Joint Chiefs of Staff, support balanced arms reduction agreements, for they see dangerous uncertainty and loss of control in a continuing arms race that has no limits. But civilian leaders in the Pentagon, (like Weinberger, Ikle, and Perle) don't really want to give up the arms race, for they still nurture the illusion that this will overstrain the smaller Soviet economy and run it into breakdown. For the first time in our postwar history, we have a Secretary of Defense who is an avowed opponent of arms control.

President Reagan is somewhere in between these positions—susceptible to reason on occassion, but with an instinctive preference for confrontation, polarization an no binding agreements. His illusion is that Star Wars can work and will be good for the country. Unfortunately for all of us, he is too shallow an intellect to think through these issues with clarity or precision, so his government has become a cacaphony of conflicting voices.

We are now in the fifth consecutive year of an unprecedented military build-up (which is not incidentially the largest single contribution to the unprecedented national budget deficit, which is in turn the chief cause of the present paralysis in Congress over budget reductions). Mr. Reagan and Secretary Weinberger continue to assert that the buildup is required because the Soviets somehow managed to get way ahead of us in the 1970's and are continuing at a relentless pace. CIA estimates however have consistently shown that Soviet military spending has been steady, at a growth factor of about 3% a year, with no significant surges since the early 1970s—that is to say over the past 15 years.

Recently there has been growing resistence to further increases in defense spending, so the country may be slowly returning to a better sense of proportion about security. But after 5 years of buildup and a near tripling of the defense budget, no one can say with confidence that our people, our industry, or our society are safer today against the threat of nuclear war.

The truth is there is no way to protect people and cities against the nuclear threat. Mutual vulnerability is now an irremovable condition of life. When we start from the fact that each superpower possesses some 10,000 warheads and the means of their delivery, then additional weapons and delivery systems do not change the strategic balance or in any way improve the security of either side. Both populations remain totally vulnerable in the event of nuclear exchange.

As I have said, I don't believe this rock bottom truth has really penetrated Mr. Reagan's mind. But the considerble public tolerance and sympathy for this vagueness here suggests a wider ambivalence in the American psyche. By instinct and heritage we are a nation of "can-do" unilateralists. American historical experience has made it natural for us to act alone, but difficult for us to accept the idea of interdependence, and even more difficult for us to cooperate with nations whose political philosophy we despise and whose power we fear. We have preferred either to avoid them or destroy them. But now an attempt to destroy them would very probably bring about our destruction as well. In part, this mind-set is explainable by our heritage of separation, both physical and philosophical. Our forefathers came to America to escape what they regarded as a Europe riven by intrigue, corruption, and alien ideologies, and this produced an enduring American legacy of aloofness and moral censure toward the rest of the world. The heritage of separation, carrying with it the sense that we are both different and better, has shaped the American attitude toward political conflict and the use of power. It has made us impatient with deep-seated disputes between and within older nations—disputes that must be lived with because they can never be clearly resolved. Inescapable interdependence is the oldest story for every other nation in the world, but we Americans continue to resist any limits on our freedom of action.

When we meet resistance from allies or adversaries, the rebuff tends to strengthen our national preference for acting alone, and also for believing that military force can cut the Gordian knot. In a strange way, we still conduct our foreign policy as though we were a unique nation standing somewhat outside of history. History is something that happens to other people.

Yet we now exist in a world where practical power is widely diffused, where no single state or coalition of states has control, where interdependence is a fact and cooperation a necessity. The plain truth is that the United States does not have either the resource base or the political will to police the world. Neither does the USSR. We cannot be sure how this truth affects Soviet ambitions, but the macho portion of the American mind seems to chafe against these limitations, finding them irritating; they force us to face the fact of interdependence even among unequal nation states. We resist, for interdependence dilutes our sense of uniqueness and puts fetters on our freedom of action.

But if our situation is truly one of interdependence, and if our vulnerability to destruction cannot be removed no matter how much we spend on sophisticated defense, then surely wisdom lies in facing that fact and putting first things first. The highest priority task is to find sufficient common ground with the other superpower so that we can significantly lower the risks of nuclear war. This in turn requires focus on agreements that can stabilize the relationship by fostering greater predictability and thus the growth of some essential minimum of mutual trust. Like it or not, the ability to control and reduce nuclear arms by agreement has become the primary barometer of the US-Soviet political relationship—inevitably so because the life or death of both nations depends on how the opposed arsenals are managed.

For this reason, the issue of nuclear arms control must be at the top of our agenda with the Soviets, must be tenaciously pursued, and must be segragated from other issues. Every effort must be made to avoid linking nuclear arms agreements with various regional conflicts that beset the world—in Lebanon, Afghanistan, Central America, or South Africa. Such linkage is a powerful and instinctive reaction of the American political system; it gives us emotional satisfaction to say we will refuse to reduce our nuclear weapons until the USSR gets out of Poland. But with respect to progress on nuclear arms control, such linkage is self-defeating. Our refusal, for example, to ratify SALT II (1979) exercised no leverage over Soviet behavior in Poland or Afghanistan, but did contribute to a growing uncertainty in the nuclear arms race.

Unfortunately, the Reagan Administration has developed no clear sense of priorities. It tends to denigrate arms control agreements, and it resists setting aside, even temporarily, the many other issues on which it feels it must confront the USSR.

It is notable that in the flurry of arms reduction proposals over recent weeks, all of the original offers came from the Soviets. The Reagan Administration reacted, belatedly and with evident reluctance, prodded by public opinion at home and by pressure from NATO allies in Europe to make its own proposals for reduction, compromise and accomodation. And then the President went to the United Nations and tried to shift the focus of public opinion away from nuclear arms control, by talking about selected regional issues, like Nicaragua and Afghanistan.

Now I don't wish to be misunderstood. Nuclear arms agreements that limit the stockpiles will not of course solve all of our problems. They will not, for example, resolve the basic conflict of purpose and values between us and the Soviet Union. Under the best possible circumstances, Americans must continue to live with a range of Soviet positions and actions that will seem to us illogical or offensive. And competition will continue at the political, economic and idelogical levels, for each superpower seeks to extend its influence in the world.

But precisely because the differences are so basic and sharp, it is very important that we proceed as much as possible on the basis of knowledge and fact, so that we can at least reduce the distorting influences of myth. The Soviet union is of course not an ideological abstraction, but a nation, the outgrowth of the Russian state that has lived for centuries on the borders of Europe and which has partaken, partially, in the development of modern Europe. Despite its arbitary character (perhaps because of it, since Russian governments have always been arbitrary), the Soviet Government finds ultimate support in the nationalism and patriotism of the Russian people. The Soviet economy is backward, inefficient, and overcentralized, but it is also large, strong, and able to resist outside pressures. The Soviet Government is a dictatorship given

to arbitrary and brutal methods both at home and where its writ runs abroad, but Soviet leaders do not glorify offensive war as a way to achieve their goals in the world; in theory—and substantially in practice—they aim at military power to hold "imperialist" power in check, thereby allowing social-economic forces in the world to determine the future. Such is their Marxist-Leninist doctrine.

Soviet leaders appear to retain a residual belief that history will proceed according to Marxist-Leninist analysis, and also a revolutionary attitude toward the outer world. In foreign affairs they seek to exploit disintegrative change in the existing international order, but there is little or nothing left in the USSR of the original dream of communist utopia. They make no pretense, for example, of believing in a classless society, and they defend their own internal social-economic stratification with great rigor. Despite the reality of their revolutionary impulse, their chief preoccupation is the defense of their internal system, their national boundaries, and their buffer zone in Eastern Europe. Which means in practice that, while they seek to maximize Soviet influence in the international arena, they consistently do so within the bounds of a cautious, pragmatic, low-risk prudence—which may owe something to their ultimate belief (or hope) that history is on their side.

Given the very real differences in the two systems, and given also the mutual suspicion and distrust, I would argue that a basic understanding about nuclear arms is the vital key to assured mutual survival. And I would argue that this is entirely possible, for each side has the rational capacity to recognize what must be done to assure its own survival.

I would further argue that only through agreements can inherent uncertainties be reliably reduced, and numerical ceilings and qualitative prohibitions on weapons be formally established and monitored. Only through sustained negotiations and sequential agreements can agreed weapons limits be pushed steadily downward.

Beyond the Summit, the possibilities for improving the relationship will thus depend on a genuine mutual effort to broaden the areas of cooperation. I am sorry to say that Mr. Reagan's simplistic anti-communism, combined with an instinctive tactical approach that narrows the options in nearly every situation, suggests that the relationship is unlikely to improve much while he is in office. I would like to be proved wrong on this point. But under Mr. Reagan, our political system has become the victim of a shallow public dialogue on foreign affairs, for he and his men insist on casting almost every foreign policy problem—from Lebanon to Nicaragua—almost exclusively in terms of military competition with the USSR. In a strange way, he serves as a kind of unwitting PR man for the USSR, inflating Soviet influence in places where its actual assets are quite marginal. Marxist ideology is really quite shopworn and motheaten, but Mr. Reagan periodically pulls it back from the political "ash heap of history." His approach reflects strong distaste for diplomatic solutions and a preference for straightforward action involving the threat or use of American military muscle. The trouble is that an American tendency to unilateral action in situations which are inherently interdependent serves only to complicate and aggravate those situations, bringing us no closer to a workable solution.

It seems to me that Star Wars is perhaps the ultimate example of wrongheaded American unilateralism—unilateralism gone bonkers. In his address to the nation in January 1983, President Reagan proclaimed the vision of a wholly new strategy; a Star Wars defense would replace the morally uncongenial doctrine of deterrence, where-under our security rests on the explicit threat to reduce our adversaries to rubble. Despite cogent attacks on the credibility of this proposal, he has not wavered from his original objective. As recently as March 29 of this year he told the National Space Club: "we need to render obsolete the balance of terror—or mutual assured destruction as it is called. Now, this is not, and should never be misconstrued as, just another method of protecting missile silos."

What the President is telling the American people is that we can achieve a nice, clean, technological, once-and-for-all solution to the threat of nuclear destruction without the need for Soviet cooperation. The implicit promise is breathtaking: once the strategic defense system is in place, neither the Soviet Union (nor any other potential adversary) would ever again pose a nuclear threat to us or our allies. The competition in strategic offensive weapons and other forms of military technology would somehow come to a benign halt.

If this were merely the vision of something distant, propounded by a scientist or a moral philosopher, it would not be much noticed. But it was propounded by the American President, and not merely as a desirable, if remote, possibility, but as the centerpiece of global strategy now, to be backed by $26 billion in hard cash for research and testing. The Reagan rhetoric has given the impression that a reliable alternative to the deterrent strategy lies within our grasp; moreover, that the Soviets can be readily persuaded of its benefits for them. A significant percentage of Americans, yearning for a simple way to escape the baffling nuclear nemesis, tends to look favorably on this scheme.

In the pre-nuclear ear concentration of effort on defense against attack was the natural order of things. And defense was, and is, morally more comfortable than reliance on nuclear deterrence. But the nuclear age is different. The destructive power of one nuclear warhead can kill a city (including millions of people). So the possession by both sides of thousands of warheads means there can be no effective defense in the sense that President Reagan hopes for.

To kill 1,000 silos would require a minimum of 2,000 warheads, but to kill 10 major cities would require only 10 warheads. 100 weapons used against our cities would utterly destroy the United States as an operating society (and conversely the Soviet society). But 100 warheads is only 1% of the available weaponry on each side, and the means of delivering warheads to their targets continue to grow more varied and more sophisticated. There is no conceivable way in which a defense system could prevent "leakage" against nuclear missiles to the extent of 1%. Yet unless the system formed a permanent, impenetrable umbrella, the vast cost and effort and political strain required to construct it would be useless.

There are, I believe, decisive technical reasons why the Star Wars system would not work, and I can perhaps deal with some of those in the question period. However, even if we assume it is technically feasible, it would be fatally flawed by its vulnerability to Soviet countermeasures. There is no argument about this. The scientific community is virtually unanimous in believing that a wide range of countermeasures against missile defenses are available; also that they are less expensive and less technically demanding to deploy than the defenses themselves. Zealous cheerleaders for Star Wars like Mr. Weinberger chastise critics by asserting they are the same people who said we could not get to the moon. But the analogy is false. The effort to get to the moon was not complicated by the presence of an adversary. A platoon of hostile moonmen with axes could have made it a disaster.

Rather astonishingly, the Administration has argued that the Soviets will welcome the effort. For example, General Abrahamson who directs SDI, has said that "when they see that we have embarked on a long term effort to achieve an effective defense, supported by a strong national will, then they will give up on the development of more offensive missiles and move in the same direction." We must ask ourselves, if it were the Soviets who were hell bent to develop a strategic missile defense, how would the U.S. react? Mr. Weinberger once remarked that an effective Soviet missile defense "would represent one of the most frightening prospects I could imagine." Why does he think so? Because he would perceive it as an effort to deny the US its retaliatory capacity, its deterrent. How is it possible, one wonders, that the Administration can so totally fail to understand that the Soviets will have the same perception of the Star Wars program?

In the late 1960s, the Soviets developed a rudimentary, ambiguous antiballistic missile defense around Moscow. Did we at that point conclude that our land and seabased missiles were obsolete? On the contrary, we countered directly development of the so-called MIRV missile (multiple independently targetable re-entry vehicle) which was designed specifically to confuse and evade a Soviet defense system should it be fully built. The central fact is here abundantly clear: faced with Soviet defensive developments which we interpreted as having the potential to deprive us of our retaliatory capacity, we moved resolutely to assure that our warheads could still penetrate. There was in our policy councils no thought of "giving up" on the further development of offensive missiles.

The Soviets will react to Star Wars in exactly the same way for exactly the same reasons. And if, as seems likely, they not only proliferate their offensive arsenal to ensure penetration, but also attempt their own version of strategic defense, the U.S. will be sucked into the development of further offensive weapons as well. The result will be the most expensive, most dangerous, most unnecessary and most futile round yet seen in the nuclear arms race.

It will be noted of course that the professional operatives in the Administration are trying to reshape the President's vision—to develop a more limited defense program confined to terminal defense around land-based missile silos. Four points should be made about this different effort: (1) it seems to be proceeding without the President's full understanding; (2) it will contribute nothing to population defense; (3) it will protect our silos only against intercontinental ballistic missiles, but will provide zero protection against missiles fired in low trajectory from submarines lying off our coasts, or against cruise missiles; (4) perhaps most important, it is likely to trigger the same kind of Soviet reaction as would a full-scale Star Wars effort—that is, the develop-

ment of countermeasures to neutralize the defense, thus triggering a new arms race.

As these criticisms gather force, the Administration is beginning to shift its rationale for the program. Secretary Weinberger now tells us Star Wars is necessary because the Soviets no longer believe in mutual assured destruction; therefore, second-strike deterrence is not enough to avoid war. Another new argument is that Star Wars is merely a response to a large-scale Soviet strategic defense effort. Indeed a retired officer, General Graham, has suggested that the strategic defense initiative should be renamed the strategic defense response. Truth is the casualty here. The Soviets have of course carried on research on missile defense possibilities, but there was no mention of this in 1983 when President Reagan first announced Star Wars. And neither then nor now has there been the slightest hint of concern from our own military people that Soviet defense developments in any way hamper our ability to penetrate with ballistic missiles or air-launched cruise missiles. In short, this is a phony argument, employed to manipulate a public opinion that has developed increasing doubts about the program.

My regrettable conclusion is that Star Wars is another naive American effort to escape the condition of vulnerability in the nuclear age. It began with a presidential obsession with a dubious idea; it has gained momentum through the magnetic attraction of presidential power—it is a case of self-deception reinforced by sycophancy, greed and hype. Defense contractors, who doubt that Star Wars will ever work, are lining up at the Pentagon door rubbing their hands; politicians and assorted experts are visibly hedging their bets, wary of losing their influence with this Administration if they reject the program out of hand. Thus has a vague notion of stardust and moonbeams been converted in 3 years into what looks like becoming the Great Pork Barrel in the Sky.

If we pursue Star Wars, we can expect only increased aggravation and tension in the US-Soviet relationship, endless expense and no improvement in our security. Star Wars is a trillion dollar *mirage* in which our nation will be endlessly, and pointlessly, pursuing an ever-receding technological horizon. We will never quite get there. But in the process, we will impose the kinds of pressure on the USSR that are likely to magnify the dangers of war. Our allies—and the world at large—will have greater reason to doubt our judgment and commonsense.

If we genuinely wish to improve U.S.-Soviet relations, we must start by recognizing the fundamental fallacy of believing that national safety can be secured by unilateral means. For the naked truth is that our survival is in the hands of the Soviet leaders and the survival of the Soviet Union is in the hands of our leaders. That is a difficult fact to face, but it is a fact.

Also, we must recognize that deterrence, based on the consequence of mutual destruction in the event that one side attacks the other, remains the controlling reality. Mutual Assured Destruction is a morally unsatisfying description of strategy, and there is no doubt that Mr. Reagan's vision of a leak-proof astrodome spread over our country and much of the free world is far more appealing to our ethical and aesthetic sense. Unfortunately, Mutual Assured Destruction is not an idea that can be worn today and cast off tomorrow like a change in the fashion of clothing. For it is not so much a strategy as a condition—simply stated, it is the very likely consequence of nuclear war.

If all responsible American leaders—Republicans and Democrats, military officers and civilian officials alike—shrink from the idea of launching a first-strike because they see they are peering into an abyss of limitless uncertainty and peril, where even "success" would bring down on our country a dimension of disaster beyond anything any nation has suffered or even dreamed about—then I suggest it is reckless ignorance to argue that the Soviets view the same prospect with equanimity—that they don't believe in the reality of Mutual Assured Destruction; that they are possessed fanatics who prefer death to life. All the evidence runs in the opposite direction. Like us, they want their system to survive and evolve. Like us, they are circumscribed by the same lethal uncertainties and the limits these place upon any sane policy.

A final point. In his famous and successful call for a Limited Test Ban Treaty at American University in April 1963, President Kennedy gave eloquent expression to the sense of proportion I have tried to define this evening. He said: "Americans are neither omnipotent nor omniscient," and warned his countrymen that "we must not see a distorted and desperate view of the other side; we must not see conflict as inevitable, accommodation as impossible, and communication as nothing more than an exchange of threats."

The Russian response to that statesmanship was immediate and forthcoming (in other passages, the Kennedy speech expressed sympathy for hard Russian realities, including the terrible losses of World War II; it showed an understanding of the truth that security is a mutual problem and that negotiations to strengthen it must be conducted on the basis of equality). Pravda printed the speech in its entirety—a first for Soviet journalism at the time. Averell Harriman went to Moscow and negotiated the Limited Test Ban Treaty in less than a month.

We will never fully agree with the USSR and will never totally eliminate nuclear weapons—indeed there are considerations of stability which will dictate that we should not try. But a process of substantial mutual reductions carried on incrementally over a period of years and verified to the satisfaction of both sides would impart a very reassuring measure of trust and confidence to the US-Soviet relationship, and the world would breathe a little easier.

To achieve this, we need arms control agreements. The challenge of serious negotiation has been, and remains, formidable. But there is no other way.

TOWNSEND HOOPES

UNITED STATES-BRITISH EXTRADITION TREATY

● Mr. LUGAR. Mr. President, the Senate Foreign Relations Committee has devoted many hours this year to consideration of the United States-United Kingdom Supplemental Extradition Treaty.

Senator PRESSLER, chairman of the Subcommittee on European Affairs, recently wrote an excellent article on the treaty which analyzes the issues relating to it.

Mr. President, I ask that Senator PRESSLER's article from the November 16 to 17, 1985, edition of the International Herald Tribune be printed in the RECORD.

The article follows:

THIS EXTRADITION TREATY IS AN OCCASION

(By Larry Pressler)

WASHINGTON.—The U.S. Senate has a tremendous opportunity to strike a blow against international terrorism by ratifying the U.S.-British extradition treaty. Surprisingly, the Senate may refuse to do so. Yet the opportunities embodied in the accord, which is now before the Senate Foreign Relations Committee, are clear. Above all, it would deny fugitives accused or convicted of certain serious crimes the ability to avoid extradition from the United States on the ground that their offenses were "political."

Ratification is on hold because a small but vocal group of Irish-Americans has tried to turn the debate into a referendum on support for the IRA. Without ratification, America will be a safe haven for IRA terrorists. Ratification would ensure extradition of those accused of the most serious offenses, including aircraft hijackings and sabotage, crime against diplomats, hostage-taking, murder and the use of firearms and explosives.

In recent years, four terrorist fugitives from British justice have escaped to freedom in the United States, and many more are likely to do so if this loophole remains open. All four cases involved members of the IRA who were convicted of or sought for murder or attempted murder. Three of those four cases involved the death or injury of innocent civilians. Yet under the present extradition treaty, U.S. courts classified each of these offenses as "political" and refused extradition.

Much of the current debate focuses on the "legitimacy" of IRA violence. This dangerous diversion must be stopped. The real issue is terrorism.

The treaty, signed last June by President Reagan, is consistent with recent government policy. Since 1981 the United States has signed, and Congress has ratified, extradition treaties with Mexico, Colombia and the Netherlands. None of those ratifications provoked protest. Each treaty allows the executive branch, not the courts, to determine whether a political-offense exception is necessary.

Such treaties offer three advantages: First, a political-offense exception to extradition is reserved for unusual cases, ensuring flexibility to safeguard individual rights. Second, terrorists are clearly warned that routine political-offense exceptions will not be granted, stengthening the deterrent against such incidents. Third, mutual cooperation among Western governments in the battle against terrorism is greatly increased.

The proposed U.S.-British treaty is consistent with the European Convention on the Suppression of Terrorism adopted in 1976. It provides that the broadest range of terrorist offenses will be grounds for extradition. The Europeans saw the need for a compatible, universal approach to terrorism; so should Americans.

Ironically, even Ireland's strong extradition treaties both with the United States and Britain are similar to the proposed U.S.-British treaty and have repeatly been by Irish courts for the transfer of felons.

Although the United States has demanded repeatedly that its European allies take even more aggressive steps in terrorist situations where U.S. interests are at stake, it is seen to be waffling on this treaty.

As a Justice Department official said in August, "The United States cannot condemn terrorism committed abroad against our citizens and then provide shelter on these shores for perpetrators of such atrocities against citizens of other countries."

This treaty meets the need, but it does not exceed it. The treaty does not extend the range of extraditable offenses, nor diminish the requirement for a substantive case against the fugitive. It does not diminish the standard of evidence required to convict the fugitive, if he has not already been convicted. It does not affect the U.S. government's right to consider whether an extradition request is being improperly sought, for example because of religious or political beliefs. America's time-honored policy of providing a haven for political refugees will not be affected by Senate ratification of the treaty.

But homicide cannot be confused with political protest, and the right of asylum is not jeopardized when two allied democratic states jointly arrange to extradite terrorists. Stable and reliable extradition treaties are crucial if Western democracies are to prevail in their war against terrorism.●

IRANIAN HUMAN RIGHTS ABUSES

● Mr. HATFIELD. Mr. President, a few days ago three victims of the brutal Khomeini regime came to my office and described the horrors they had experienced as political prisoners in Iran. Their ordeals clearly demonstrate that human rights continue to be systematically violated in that country. For that reason, last week the U.N. General Assembly approved ratification of a resolution on the situation of human rights in Iran, detailing its deep concern over the specific and detailed allegations of abuses. I am sure my colleagues will be shocked and distressed, as my staff and I were, at the stories of brutality which these victims have suffered at the hands of a tyrant. While we must remain concerned about Khomeini's support for international terrorism, it is important to focus on acts of lawlessness that take place within Iran.

Mr. Hossein Dadkhah still suffers from the effects of the tortures he endured while in Tehran's Evin Prison. His feet were severely beaten, and several toes had to be amputated as a result of irreparable injury. Mr. Dadkhah's wife and brother were both executed by the regime. His parents were arrested and severely beaten, the psychological trauma causing both to suffer nervous breakdowns. Mr. Dadkhah's 18-month-old child has been taken by the regime as a hostage against his return to Iran.

Ms. Narges Shayesteh, a former teacher, was imprisoned for 2½ years. The effects of torture are still evident on her nose, hands, knees and chest, where during a 5-hour session with Khomeini's guards she was branded with 15 cigarettes.

Ms. Mojan Homayounfar is a former student of fine arts and a teacher. During her 3-year imprisonment one of her legs was amputated and the other crushed. Confined to a wheelchair, Ms. Homayounfar suffers a variety of ailments as a result of her ordeal.

These three victims are convinced that international exposure of the Khomeini regime's atrocities plays a crucial role in reducing the number of executions and the use of torture. In Ms. Shayesteh's words, "If because of a brief speech in a foreign parliament or an interview, one person is going to receive fewer lashes or one less person is executed, it is worth all the effort." She adds, "I have been in those prisons."

Mr. Dadkhah emphasizes, "We are the exceptions; we have gotten out. But 50,000 others have been executed, and 140,000 more may also be executed unless we do something about it. There are presently over 576 prisons and 3,771 professional torturers whose identities have been revealed in a recently published list. Such levels of repression reveal the extent of the present struggle for freedom in Iran."

Testimony given by Mr. Dadkhah, Ms. Shayesteh and Ms. Homayounfar in a recent press conference at the United Nations was instrumental in the December 6, 1985 ratification of the U.N. General Assembly Resolution on the situation of human rights in Iran. The General Assembly has expressed its deep concern over the specific and detailed allegations of abuses, "in particular, those related to the right to life, such as summary and arbitrary executions; the right to freedom from torture or cruel, inhumane or degrading treatment or punishment; the right to liberty and security of person and to freedom from arbitrary arrest or detention; the right to a fair trial; the right to freedom of thought, conscience and religion and to freedom of expression; and the right of religious minorities to profess and practice their own religion."

The systematic violation of human rights in Iran has been known to us for some time. Various international organizations have published numerous reports on the situation over the past 4½ years. The gravity of the Iranian situation has not been adequately portrayed; reporters wishing to investigate allegations are denied entry and appeals by international organizations such as Amnesty International and the United Nations go unanswered.

In its November 1985 report to the Political Affairs Committee of the European parliament, Amnesty International reported that its organization "has repeatedly requested Iran to comply with the international human rights instruments to which it is committed, calling for the implementation of adequate safeguards against torture and ill-treatment of prisoners in Iran, for the release of prisoners of conscience, for fair trials for all political prisoners and for an end to executions. Meanwhile the organization continues to receive numerous and persistent reports that human rights abuses are still occurring today."

Amnesty notes that the Iranian regime has officially acknowledged over 6,000 executions; the organization adds that many executions are carried out in secret. The actual total is probably much higher.

The Council of Europe in its Written Declaration of January 1985 declared that the Assembly is "appalled at reports of arrest, torture, and execution of political opponents of the regime resulting in 40,000 executions and 120,000 political prisoners since June 1981." The Council voiced its "strongest possible protest against the repressive measures" of the present regime in Iran.

The European parliament, the U.N. Economic and Social Council, the U.N. Commission on Human Rights, and the British Parliamentary Human Rights Group, among others, also have expressed their deep concern over abuses of human rights in Iran.

Unfortunately, despite the level of international protest in this matter, the Iranian envoy to the United Nations clarified his Government's position: "We do not claim that we observe human rights standards * * * the Bill of Human Rights" he said, "is more of an introduction to the material conception of Jewish-Christian culture. We urge our critics no to criticize us for violating what we do not believe in."

In an urgent plea for her fellow Iranians, Ms. Homayounfar asks "every humanitarian individual and organization to expose these atrocities, and thus contribute to the cause of humanity." Ms. Homayounfar, Ms. Shayesteh and Mr. Dadkhah have overcome their personal tragedies in order to help others, and I am hopeful that the U.S. Senate will continue to pressure the Khomeini regime and not let these human rights abuses go unnoticed.●

"SARGE" RICHARDS

Mr. SYMMS. Mr. President, in the December, 1985 issue of Better Homes and Gardens, author Kathryn Stechert tells the magazine's thousands of readers about 12 unique Americans who keep the Christmas spirit alive year-round.

One of these 12 is a close friend to many Idahoans in Boise, 71-year-old Bob Richards, or "Sarge" to most of us.

I am delighted that "Sarge" Richards has been singled out by a major national publication for recognition. He is living proof that you are only as old as you feel.

For years "Sarge" has brought hope and joy to many senior citizens in my State. With jokes and encouragement he has made a success of the "Happy Hoofers," a loose-knit group of some 100 seniors who walk, joke, laugh, and hug—in other words, bring happiness to others.

If anyone wants to lighten their day and give a spring to their step, all they have to do is read about "Sarge" Richards.

Mr. President, I ask that the Better Homes and Garden article about "Sarge" be inserted in the CONGRESSIONAL RECORD along with an article about him from the Idaho Statement.

The articles follow:

[From Better Homes and Gardens, December 1985]

KEEPING HAPPY IN HAPPY HOOFERS

With a punctuality the airlines surely would envy, about 70 senior citizens in Boise, Idaho, get together twice a week to walk. The group, all members of the 100-strong Happy Hoofers and all aged "60 or better," don't just walk; they also talk and laugh and hug one another. The group's founder, 71-year-old Bob Richards, is known as Sarge or Papa Hoofer. He starts each Happer Hoofer walk with an authoritative blow of his whistle, followed by a joke. "We want to keep the word 'happy' in 'Happy Hoofers,'" he explains. Then come the hugs—five big ones delivered to whoever is handy—and the group sets off. The walks always end at a restaurant so the hoofers can rest and talk. "It's like a chicken coop," says Sarge, "lots of good, healthy chatter and lively laughter." The whole thing is so healthful, in fact, that Boise doctors sometimes recommend it as therapy for their older patients.

[From the Idaho Statesman, Nov. 18, 1985]

BOB RICHARDS AND HIS HAPPY HOOFERS

"There were three crows on a telephone wire," Bob Richards said as he gave his morning address. "What were they doing there? Waiting to make a long distant 'caw'!"

His audience, the Happy Hoofers, Boise's senior walkers, let loose with a chorus of boos and laughter. Then there was an exchange of hugs, and more laughter, as their walk along the Greenbelt got under way.

This ritual takes place at 9 a.m. every Tuesday and Saturday morning in Boise, and it's as dependable as the rising sun—though the jokes and routes vary. The Hoofers have been walking together for longer than four years now, and Mother Nature hasn't been able to do anyhing to stop them.

"Rain or shine, sleet, snow and fog haven't stopped us yet," said Richards, 71, the group's founder. "We haven't missed a scheduled walk in over four years."

Richards helped organize the Happy Hoofers in August four years ago with two other seniors, because at the time there wasn't a walking program in the Boise Center's Growing Younger program.

"It started with just three of us, but I knew it would work," Richards said. "Since then it's been just like the birth of a child, with normal and steady growth. We have over 100 Happy Hoofers now, depending on the season. The friendships are so strong now that you couldn't break them up if you wanted to."

Richards takes pride in the fact that the Happy Hoofers developed by word of mouth, with no recruiting or advertising, and that politics have no place within their organization.

"There are no committees, board of directors, and no punching of the clock," Richards said. "We've retired from all of that. We just start the day with hug and humor therapy, and our walk—we're just a happy bunch of senior walkers."

By general acclaim, Richards is "Papa Hoofer." With the help of other Hoofers, Richards organizes the group's monthly schedule, and has an answering machine at home that directs the Hoofers to their next meeting place, walking area and where they will gather afterward for fellowship and breakfast.

"Everyone walks at their own pace, with the group in high gear walking six or more miles," Richards said, "Then when they're all back together in the restaurant, good healthy chatter fills the air. It sounds like a chicken, coop!"

Other senior walking groups have grown out of the Happy Hoofers, including the Wednesday Night Owls and the Line Dancers, who dance as a group and visit nursing homes. And there have even been three Happy Hoofer marriages to date. As the Hoofers continue to grow, Richards looks forward to what he considers his main responsibility.

"My job is just to keep the word 'happy' in the Happy Hoofers," he said. "Ulltimately we'll all be meeting together in Happy Hoofers Heaven."

TEENAGE PREGNANCY

● Mr. DURENBERGER. Mr. President, one of the most pressing and, indeed, troubling issues of our time is that of unwanted pregnancies. I know of no other issue that can divide and confound this body, and this country, as this issue does. Recently, the questions of family planning and abortion came to the fore as funding for family planning programs under title X of the Public Health Service Act came under congressional consideration.

Although the Senate Labor and Human Resources Committee has agreed to reauthorize the title X family planning program, many aspects of the recent debate indicate that we are far from resolution of the many differences of opinion and philosophy on the prevention of unwanted pregnancies, particularly teenage pregnancies, family planning, adoption, and abortion. In that vein of further investigation and debate, I urge my colleagues to read the recent cover story in Time magazine, entitled, "Children Having Children."

Mr. President, I ask that the full text of the article be printed in the RECORD.

The article follows.

[From Time Magazine, Dec. 9, 1985]

CHILDREN HAVING CHILDREN—TEEN PREGNANCIES ARE CORRODING AMERICA'S SOCIAL FABRIC

Before the baby came, her bedroom was a dimly lighted chapel dedicated to the idols of rock 'n' roll. Now the posters of Duran Duran and Ozzy Osbourne have been swept away and the walls painted white. Angela Helton's room has become a nursery for six-week-old Corey Allen. Angie, who just turned 15, finds it hard to think of herself as a mother. "I'm still just as young as I was," she insists. "I haven't grown up any faster." Indeed, sitting in her parents' Louisville living room, she is the prototypical adolescent, lobbying her mother for permission to attend a rock concert, asking if she can have a pet dog and complaining she is not allowed to do anything. The weight of her new responsibilities is just beginning to sink in. "Last night I couldn't get my homework done." she laments with a toss of her blond curls. "I kept feeding him and feeding him. Whenever you lay him down, he wants to get picked up." In retrospect she admits: "Babies are a big step. I should have thought more about it."

The rhythm of her typing is like a fox trot, steady and deliberate. It is a hot summer day in San Francisco, and Michelle, a chubby black 14-year-old, is practicing her office skills with great fervor, beads of sweat trickling down her brow. She is worried about the future. "I have to get my money together," she frets. "I have to think ahead." Indeed she must. In three weeks this tenth-grader with her hair in braids is going to have a baby. "I have to stop doing all the childish things I've done before," she gravely resolves. "I used to think, ten years from now I'll be 24. Now I think, I'll be 24, and my child will be ten."

It is early afternoon, and the smells of dirty diapers and grease mingle in the bleak Minneapolis apartment. The TV is tuned to "All My Children," and Stephanie Charette, 17, has collapsed on the sofa. Her rest is brief. Above the babble of the actors' voices comes a piercing wail. Larissa, her three-week-old daughter, is hungry. In an adjacent bedroom, Joey, 1½ years old and recovering from the flu, starts to stir. Stephanie, who is an American Indian and one of ten children herself, first became pregnant at 15. It was an "accident," she explains. So too was her second baby. "I'm always tired," she laments, "and I can't eat." Before Joey's birth, before she dropped out of school, Stephanie dreamed of being a stewardess. Now her aspirations are more down-to-earth. "I want to pay my bills, buy groceries and have a house and furniture. I want to feel good about myself so my kids can be proud of me." It has been a long, long while, she confides, "Since I had a good time."

They are of different races, from different places, but their tales and laments have a haunting sameness. Each year more than a million American teenagers will become pregnant, four out of five of them unmarried. Together they represent a distressing flaw in the social fabric of America. Like Angela, Michelle and Stephanie, many become pregnant in their early or midteens, some 30,000 of them under age 15. If present trends continue, researchers estimate, fully 40% of today's 14-year-old girls will be pregnant at least once before the age of 20. Says Sally, 17, who is struggling to

raise a two-year-old son in Los Angeles: "We are children ourselves having children."

Teenage pregnancy has been around as long as there have been teenagers, but its pervasiveness in this country, the dimensions of its social costs and the urgent need to attack the problem are just beginning to be widely appreciated. According to a Harris poll released in November, 84% of American adults regard teenage pregnancy as a serious national problem. The news in recent weeks illustrates the growing concern:

In Wisconsin last month, Governor Anthony Earl signed landmark legislation designed to combat unwanted teen pregnancies and, as he put it, to "limit thousands of personal tragedies that are played out in our state every day." The law, which won unanimous approval in the state legislature, provides funding for sex education in public schools, repeals restrictions on the sale of nonprescription contraceptives and provides $1 million for counseling pregnant adolescents. It also takes the unusual step of making grandparents of babies born to teenagers legally responsible for the babies' financial support. "All of us," said Earl, "young people and parents of young people, have a responsibility for our actions."

At Chicago's DuSable High School, controversy erupted when school officials decided to establish an on-campus health clinic, authorized to dispense contraceptives to students who have parental permission. The school, which serves one of the nation's poorest neighborhoods, is battling a veritable epidemic; each year about one-third of its 1,000 female students are pregnant. The clinic has elicited picketing and protest, mostly by religious and antiabortion groups, but the school has refused to back down. Says, Principal Judith Steinhagen: "All I can say is, we're trying to keep some young ladies in school and off welfare."

The school board in Los Angeles announced that it too plans to open a health clinic offering contraceptives to high school students. So far, nine schools around the U.S. have taken this step, and others are expected to follow suit. Says School Board Member Jackie Goldberg: "There's an appalling number of teen pregnancies. I hope to upgrade the quality of teen medical care, and I hope that young men and women will consider the ramifications of being sexually active."

Such strong and controversial measures reflect the magnitude of the problem and its consequences. Teen pregnancy imposes lasting hardships on two generations: parent and child. Teen mothers are, for instance, many times as likely as other women with young children to live below the poverty level. According to one study, only half of those who give birth before age 18 complete high school (as compared with 96% of those who postpone childbearing). On average, they earn half as much money and are far more likely to be dependent on welfare: 71% of females under 30 who receive Aid to Families with Dependent Children had their first child as a teenager.

As infants, the offspring of teen mothers have high rates of illness and mortality. Later in life, they often experience educational and emotional problems. Many are victims of child abuse at the hands of parents too immature to understand why their baby is crying or how their doll-like plaything has suddenly developed a will of its own. Finally, these children of children are prone to dropping out and becoming teenage parents themselves. According to one study, 82% of girls who give birth at age 15 or younger were daughters of teenage mothers.

With disadvantage creating disadvantage, it is no wonder that teen pregnancy is widely viewed as the very hub of the U.S. poverty cycle. "A lot of the so-called feminization of poverty starts off with teenagers' having babies," says Lucile Dismukes of the Council on Maternal and Infant Health in Atlanta, a state advisory group., "So many can't rise above it to go back to school or get job skills."

Among the underclass in America's urban ghettos, the trends are especially disturbing. Nearly half of black females in the U.S. are pregnant by age 20. The pregnancy rate among those ages 15 to 19 is almost twice what it is among whites. Worse still, nearly 90% of the babies born to blacks in this age group are born out of wedlock; most are raised in fatherless homes with little economic opportunity. "When you look at the numbers, teenage pregnancies are of cosmic danger to the black community," declares Eleanor Holmes Norton, law professor at Georgetown University and a leading black scholar "Teenage pregnancy ranks near the very top of issues facing black people."

The shocking prevalence of teenage pregnancy among white as well as black Americans was brought to light earlier this year, when the Alan Guttmacher Institute, a nonprofit research center in New York City, released the results of a 37-country study. Its findings: the U.S. leads nearly all other developed nations in its incidence of pregnancy among girls ages 15 through 19. As a point of comparison, AGI investigations looked at five other Western countries in detail: Sweden, Holland, France, Canada and Britain. Though American adolescents were no more sexually active than their counterparts in these countries, they were found to be many times as likely to become pregnant. And while black teenagers in the U.S. have a higher pregnancy rate than whites, whites alone had nearly double the rate of their British and French peers and six times the rate of the Dutch. Observes AGI President Jeannie Rosoff: "It's not a black problem. It's not just an East Coast problem. It's a problem for all of us."

It is also a complex problem, one that strikes many sensitive nerves. The subject of teenage pregnancy seems to raise almost every political explosive social issue facing the American public: the battle over abortion rights: contraceptives and the ticklish question of whether adolescents should have easy access to them; the perenially touchy subject of sex education in public schools; controversies about welfare programs; and the precarious state of the black family in America. Indeed, even the basic issue of adolescent sexuality is a subject that makes many Americans squirm.

To understand the nature of the problem, one must look beyond statistics and examine the dramatic changes in attitudes and social mores that have swept through American culture over the past 30 years. The teenage birth rate was actually higher in 1957 than it is today, but that was an era of early marriage, when nearly a quarter of 18- and 19-years-old females were wedded. The overwhelming majority of teen births in the '50s thus occurred in a connubial context, and mainly to girls 17 and over. Twenty and 30 years ago, if an *unwed* teenager should, heaven forbid, become pregnant, chances are her parents would see that she was swiftly married off in a shotgun wedding. Or, if marriage was impractical, the girl would discreetly disappear during her confinement, the child would be given up for adoption, and the matter would never be discussed again in polite company. Abortion, of course, was not a real option for most until 1973, when the Supreme Court ruled it could not be outlawed.

All this has changed. Today if a girl does not choose to abort her pregnancy (and some 45% of teenagers do), chances are she will keep the baby and raise it without the traditional blessings of marriage. "The shotgun marriage is a relic of the past," observes Mark Testa, of Chicago's National Opinion Research Center. With teen marriges two to three times as likely to end in divorce, he explains, "parents figure, why compound their mistake?" In 1950 fewer than 15% of teen births were illegitimate. By 1983 more than half were, and in some regions of the country, the figure exceeds 75%. Unwed motherhood has become so pervasive that "we don't use the term illegitimate anymore," notes Sister Bertille Prus, executive director of Holy Family Services, a Los Angeles adption agency for pregnant teens.

With the stigma of illegitimacy largely removed, girls are less inclined to surrender their babies for adoption. In fact, fewer than 5% do (compared with roughly 35% in the early 1960s). "In earlier times if a girl kept her child, society would treat her like an outcast," reflects Sister Bertille. "The fear and guilt are not the same as before."

Unwed motherhood may even seem glamorous to impressionable teens. "They see Jerry Hall on TV, flinging back her hair, talking about having Mick Jagger's second [out-of-wedlock] child, and saying what a wonderful life she has," bristles Daphne Busby of Brooklyn, founder of the Sisterhood of Black Single Mothers. A succession of attractive stars, including Farrah Fawcett and Jessica Lange, have joined Hall in making a trend of extramarital pregnancy, something that 35 years ago helped get Actress Ingrid Bergman blackballed in Hollywood.

But if unwed motherhood has lost much of its notoriety, premarital sex has over the same period become positively conventional. Like it or not, American adolescents are far more sexually active than they used to be. Guttmacher statisics show that the incidence of sexual intercourse among unmarried teenage women increased by two-thirds during the 1970s. Moreover, the sexual revolution seems to have moved from the college campus to the high school and now into the junior high and grade school. A 1982 survey conducted by Johns Hopkins Researchers John Kantner and Melvin Zelnick found that nearly one out of five 15-year-old girls admitted that she had already had intercourse, as did nearly a third of 16-year-olds and 43 percent of 17-year-olds. "In the eyes of their peers, it is important for kids to be sexually active. No one wants to be a virgin," observes Amy Williams, director of San Francisco's Teenage Pregnancy and Parenting Project (TAPP). The social pressure even on the youngest adolescents can be daunting. Says Stephanie, 14, of suburban Chicago, now the mother of a four-month-old, "Everyone is, like, 'Did you lose your virginity yet?' "

Social workers are almost unanimous in citing the influence of the popular media—television, rock music, videos, movies—in propelling the trend toward precocious sexuality. One survey has shown that in the course of a year the average viewer sees more than 9,000 scenes of suggested sexual intercourse or innuendo on prime-time TV. "Our young people are barraged by the mes-

sage that to be sophisticated they must be sexually hip," says Williams. "They don't even buy toothpaste to clean their teeth. They buy it to be sexually attractive."

And yet, for all their early experimentation with sex, their immersion in heavy-breathing rock music and the erotic fantasies on MTV, one thing about American teenagers has not changed: they are in many ways just as ignorant about the scientific facts of reproduction as they were in the days when Doris Day, not Madonna, was their idol. In a study funded by the Rockefeller Foundation, Demographer Ellen Kisker of Princeton University found that teenage girls are awash in misinformation. Among the commonest myths: that they could not become pregnant the first time they had sex, if they had it only occasionally or if they had it standing up. Adolescents are especially foggy on the subject of contraception.

A National Opinion Research Center survey of teenage mothers found that few were familiar with the IUD, and most, says Researcher Pat Mosena, "didn't even know what the diaphragm was." Mistaken notions about the health risks of the birth control pill are rampant. All this may help explain why, according to Johns Hopkins researchers, only about one in three sexually active American girls between ages 15 and 19 uses contraceptives at all. And many who do use them have a rather weak grasp of the methodology: one-quarter of the girls in the NORC survey said they were using birth control at the time they became pregnant.

It is the naiveté and ineptitude coupled with less openness in American society generally about birth control that, according to Guttmacher researchers, constitute one of the most striking differences between American adolescents and their European peers. In Sweden teenagers are sexually active even earlier than they are in the U.S., and they are exposed to even more explicit television. However, the Swedish National Board of Education has provided curriculum guidelines that ensure that, starting at age seven, every child in the country receives a thorough grounding in reproductive biology and by age ten or twelve has been introduced to the various types of contraceptives. "Teachers are expected to deal with the subject whenever it becomes relevant, irrespective of the subject they are teaching," says Annika Strandell, the board's specialist in sex education. "The idea is to dedramatize and demystify sex so that familiarity will make the child less likely to fall prey to unwanted pregnancy and venereal disease."

In Holland, sex is similarly demystified. While the country has no mandated sex-education program, teens can obtain contraceptive counseling at government-sponsored clinics for a minimal fee. In addition, the Dutch media have played an important role in educating the public, says Dr. Evert Ketting of the Dutch Mental Health Center, citing frequent broadcasts on birth control, abortion and related issues. "We've been told that no Dutch teenager would consider having sex without birth control," says Guttmacher Spokeswoman Jane Murray. "It would be like running a red light."

The signals are quite different for American teenagers. Last summer, when the American College of Obstetricians and Gynecologists unveiled a new public service announcement designed to combat teenage pregnancy, all three major TV networks balked. The reason: the announcement included the word contraceptives. These are the same networks that, as one ABC official put it, routinely depict intercourse to "the point of physical motion under the covers of a bed." Network officials have since relented, but the offending word has been dropped.

How to explain this skittishness? "We are still very much governed by our puritanical heritage," answers Faye Wattleton, president of the New York-based Planned Parenthood Federation. "While European societies have chosen to recognize sexual development as a normal part of human development, we have chosen to repress it. At the same time, we behave as if we're not repressing it." In studying various cultures, the Guttmacher researchers found that the highest teen-pregnancy rates were in countries with the least open attitudes toward sex. "The ambivalence our society is projecting about sex is costing us a lot," concludes Institute President Rosoff.

People who work directly with teenagers agree. "We maintain this incredible double standard with teenagers about sex," says Alice Radosh, coordinator of pregnancy and parenting services in the New York City mayor's office. "If you're swept away by passion, then you didn't do anything wrong. But if you went on a date after taking the Pill or with a diaphragm, then you're bad. You were looking for sex, and that's not permitted."

The message that contraception is bad is often reinforced by parents, who are loath to admit that their children are sexually experienced. "I went to my mom five different times to see if she could at least get me to a doctor to get me on the birth control," recounts Nancee Mason, 19, from Pontiac, Mich., who has a nine-month-old son. "But my mom is the kind of person who, if you mention sex, she turns all red and clams up."

The Reagan Administration has taken steps to make it difficult for teenagers to obtain contraceptives. Since taking office, the President has repeatedly tried to restrict the availability of family-planning services. One-third of the women who seek such services at federally funded clinics are teenagers. In 1983 the Administration further attempted to control teenage access to contraceptives by issuing what quickly became known as the "squeal rule." The regulation required federally funded clinics to notify parents within ten days of prescribing contraceptives to minors. However, the squeal rule was squelched in the courts on the ground that it would have increased unwanted pregnancies and abortions.

Even without the risk of being squealed on, many young girls are embarrassed about going to a public clinic. "I chickened out,"confesses Debra Stinnett, 18. "I just never went back to Planned Parenthood for the pills." She now has a one-year-old daughter. Studies show that, on the average, teens wait twelve months after first becoming sexually active before they seek contraception. By then it is often too late. "When you're young," says Kim Adalid, 19, of Lawndale, Calif., a wise old mother to two, "all you think about is the weekend."

When they do become pregnant, many girls simply hide the fact, denying it even to themselves. For Angela Spencer, 16 of Lawndale, reality did not hit home until five months into her pregnancy, when she entered a special school for young mothers. "A lot of girls had already had their babies," she relates. "When I walked in that classroom, it was like the first time I realized what was happening to me." Unable to grasp their situation, adolescents frequently wait too long even to consider having an abortion. The gravity of such a decision often eludes them. "I was going to have an abortion, but I spent the money on clothes," confesses Sonya Lyde, 18, of Chicago, now the mother of a seven-month-old boy.

According to the most recent statistics, almost 30% of U.S. abortions are performed on teenagers. Abortions seem to be commonest among the affluent. "Upper-middle-class girls look at abortions as a means of birth control," says Myra Wood Bennett, a county health official in southern Illinois. The poorer girls, she notes, simply cannot afford it. Federal funding of most abortions for low-income women was barred by Congress in 1976; only nine states have stepped into the breach, providing for abortions without restrictions.

There is for many young girls another, less tangible factor in the sequence of events leading to parenthood: a sense of fatalism, passivity and, in some cases, even a certain pleasure at the prospect of motherhood. Such attitudes are especially prevalent among the poor. Take Zuleyma, 16, of Los Angeles, who gave birth last May: "I thought I might want to have a baby," she says. "I was thinking more in the future, but things happen." Or Derdra Jones of Chicago, who gave birth at 15: "Part of me wanted to get pregnant," she confesses. "I liked the boy a lot, and he used to say he wanted a baby." Or Marquel, 17, of Hawthorne, Calif.: "I had birth control pills in my drawer. I just didn't take them," she says. "My life was getting boring. I wanted a baby."

For young girls trapped in poverty, life offers few opportunities apart from getting pregnant. High school may seem pointless. Even graduation is little guarantee of a job. Their lives are circumscribed in every sense. Says Social Worker Lisa Rost, who counsels such youngsters at Project Hope in Chicago: "Some of these kids have never seen Lake Michigan." Pregnancy becomes one of the few accessible means of fulfillment. "Nobody gets more attention than a little girl who's pregnant," observes Bishop Earl Paulk of Chapel Hill Harvester Church, a Protestant church in Atlanta that sponsors a program for pregnant teens. "It feels good to be the center of things."

Youngsters who get pregnant often have a history of feeling deprived and neglected. Many have been abused or raped. "Their getting pregnant has nothing to do with sex," observes Pat Berg, director of a Chicago program for homeless youth. "It's attempting in a perverse sense to get some security and nurturing needs met. . . . It's like when kids get puppies." Finally, there is little social pressure to persuade them to postpone childbearing, notes Joy Dryfoos, who has conducted research for the Rockefeller Foundation. Middle-class girls tend not to have babies, she says, "because Mother would kill them if they did." For the lower socioeconomic groups, she says, "it's the big shoulder shrug. They don't get abortions. They don't use contraception. It's just not that important; they don't have a sense of the future."

No wonder teenage pregnancies have reached epidemic proportions in some ghetto areas. According to Guttmacher statistics, black American teenagers have the highest fertility rate of any teenage population group in the entire world. (Israeli Arabs come in a distant second.) One in four black babies in the U.S. is born to a teen mother, most of them unwed. "In the black community, the phenomenon of teen marriage is

almost gone," observes Mark Testa of NORC. "Eventually these girls get married, but it might be years later and not to the father of the child." Young black women under age 24 are facing "a shrinking pool of marriageable—that is, economically stable—young men," explains Sociologist William Julius Wilson of the University of Chicago, who coauthored a 1985 study titled "Poverty and Family Structure." The reasons he cites for the dearth of eligible candidates: unemployment, incarceration and an appalling rate of murder, the leading cause of death of black males age 15 to 44.

Wilson is part of a new breed of black academicians and leaders who have begun to acknowledge teenage pregnancy as a major issue for the black community. The National Urban League has declared it its No. 1 concern and last spring, on Father's Day, launched a program aimed at teenage boys, the often forgotten partners in the problem of teen pregnancy. Says League President John Jacob: "We cannot talk about strengthening the black community and family without facing up to the fact that teenage pregnancy is a major factor in high unemployment, the numbers of high school dropouts and the numbers of blacks below the poverty line."

The public recognition from black leaders is a significant departure from the past. Back in 1965 when New York Senator Daniel Patrick Moynihan, then Assistant Secretary of Labor, released a study depicting instability in the black family and stressing the problem of the absentee father, he was roundly accused of racism for ignoring the economic basis of the situation. In the heyday of the civil rights movement, admits Jacob, "teenage pregnancy was not the kind of subject we were willing to deal with publicly. We felt the black community would be blamed." That lack of attention was unfortunate, as black leaders now acknowledge. In the years since the Moynihan report, observes Eleanor Holmes Norton, the status of the black family has deteriorated. In 1965, she points out, only about one-third of black children were born to single mothers. Now more than half are. She insists that the black family remains strong, but admits "there have been important structural changes that will be hard to reverse."

Some blame the welfare system for contributing to the desintegration of the black family by providing an incentive for young women to have babies. While rules vary from state to state, indigent girls generally become eligible for public assistance in their third trimester of pregnancy. Most social-service workers argue, however, that the welfare system is at most a minor factor in teenage pregnancy. "It's possible that with no assistance, we would see fewer kids going to term," says Radosh of New York City's mayor's office. "But I don't think you'd see fewer getting pregnant."

Guttmacher researchers concur, pointing out that countrys like Holland, Sweden and France provide far more generously for indigent young mothers, yet have low pregnancy rates. Research by Sociologist Frank Furstenberg of the University of Pennsylvania further refutes the notion that teenagers who become pregnant are simply looking for a handout. In following 400 young black mothers in Baltimore, Furstenberg discovered that most were "surprisingly motivated to get off welfare." In fact, 17 years after bearing a first child, only one-quarter were receiving public assistance..

Despite the discrepancy in statistics, teen pregnancy, as black leaders are quick to point out, should not be seen as a specifically black problem. Rather, says Jacob, it is a poverty-related problem. "It has a greater impact on the black community because it is a poor community." Indeed, poor whites as well as blacks tend to have high rates of teenage pregnancy. In the largely white community of North Adams, Mass., an old mill town where unemployment has been high, teen pregnancy is reaching epidemic levels. One out of five births at North Adams Regional Hospital is to an adolescent, and 90% of the young mothers wind up on welfare. "I'm seeing a world where kids feel being pregnant is a viable option," sighs Maggie Bitman, who runs a parenting program in North Adams. "They feel their lives are in disarray." The situation is similar in the mostly white, down-at-the-heels southern counties of Illinois, and in white, working-class areas where the work has disappeared. The underlying reasons for the pregnancies are no different from those in urban ghettos: lack of opportunity, absence of interesting alternatives to childbearing. The girls feel "locked into their stations in life," says Health Official Wood Bennett of southern Illinois. "They're not motivated to break out."

Needy girls who imagine that having a baby will fill the void in their lives are usually in for a rude shock. Hopes of escaping a dreary existence, of finding direction and purpose, generally sink in a sea of responsibility. With no one to watch the child, school becomes impossible, if not irrelevant. And despite the harsh lessons of experience, many remain careless or indifferent about birth control. About 15% of pregnant teens become pregnant again within one year; 30% do so within two years. "You ask, 'Why didn't you come in for the Pill?' and they say, 'I didn't have time,'" says an exasperated Kay Bard of Planned Parenthood in Atlanta. "Their lives begin to spiral out of control."

The problems faced by children of such parents begin before they are even born. Only one in five girls under age 15 receives any prenatal care at all during the vital first three months of pregnancy. The combination of inadequate medical care and poor diet contributes to a number of problems during pregnancy, says Dr. John Niles of Columbia Hospital for Women in Washington: "Teenagers are 92% more likely to have anemia, and 23% more likely to have complications related to prematurity, than mothers aged 20 to 24." All of this adds up to twice the normal risk of delivering a low-birth-weight baby (one that weighs under 5.5 lbs.), a category that puts an infant in danger of serious mental, physical and developmental problems that may require costly and possibly even lifelong medical care.

Infants that escape the medical hazards of having a teenage mother do not always manage to negotiate the psychological and social perils. Desirée Bell, 19, of New York City, had her first son at age 15 and her second the following year. Her elder son Eddie has a learning disability and was almost auitistic as an infant. Bell, who has managed heroically to complete high school and secure a good job with the city, blames herself for his problems. "I hated the fact that I was pregnant," she recalls. "I was resentful of my unborn child. I used to punch myself in the stomach. Poor Eddie," she muses, "the first year I wouldn't play with him. He didn't talk until he was nearly two; he would just grunt. I would say, I traumatized my own son."

Desiree Bell has recognized her error and tried to give her son the extra attention he needs. Not all tennagers do. According to the Children's Aid Society in New York City, one of the oldest family agencies in the country, a large number of babies delivered to teenage mothers wind up in foster care. "Teenagers get excited about this little, adorable person that's all theirs," explains Barbara Emmerth of the New York City—based Citizens' Committee for Children, "but when the kid is in the terrible twos and the mother wants to go out on dates instead of taking care of the little monster, they change their minds."

Often the state must intervene in cases where abuse or neglect is suspected. Two-year old Ana Marie seemed to be perpetually falling and hurting herself. "I didn't pay her enough attention," admits her mother Kim Adalid, 19, who also has a three-year old son and expects a third child in January. After one of Ana Marie's mishaps, Kim took her daughter to a doctor, who quickly discovered that the child's arm was broken. Believing that the girl had been neglected (a charge that Kim vigorously denies), the doctor filed a report with the California courts. Ana Marie was taken away and placed with a temporary guardian.

Such interventions come at a considerable cost. In Illinois, state officials calculated that teenage pregnancy cost $853 million in medical care, day care, welfare and other social programs last year. It has been estimated that overall, the U.S. spends $8.6 billion on income support for teenagers who are pregnant or have given birth.

Most programs addressing the problem of teen pregnancy are directed at the group easiest to identify and help adolescents who are already pregnant or have given birth. The goals: to ensure that the girls obtain adequate prenatal care, continue their education and learn how to be good parents. Providing prenatal care has become a bigger problem since 1982, when the Reagan Administration reduced the appropriation for the Feeding Program for Women, Infants and Children, which offers nutritional supplements and medical care to low-income expectant mothers. The cuts say critics, will prove expensive in the long run, because caring for undersize, ailing infants through Medicaid is many times as costly as preventive prenatal measures. In recent years, private organizations and local governments have attempted to fill the gap left by WIC cutbacks. San Francisco's TAPP, a model program that the state plans to extend to other cities, has helped reduce the incidence of low-birth-weight infants to about 4% among the teenagers it counsels, against a national average of 17%.

Keeping young mothers in school has proved to be a stickier problem. Among TAPP counselees, for example, nearly half who were not enrolled in school were persuaded to resume their education. Unfortunately, an additional 31% who had been attending decided to drop out. In New York City, special public high schools have been established for pregnant teenagers to encourage them to stick with it. New York has also established day-care facilities at 18 of its 117 high schools, so that mothers can continue to attend after they have given birth.

Increasingly, conservative religious organizations have got into the business of aiding pregnant teenagers as a way of discouraging abortion. Jerry Falwell's Moral Majority has, for example, developed a nationwide $4 million program called Save-a-Baby, run in

conjunction with an adoption agency. "We agree to assist girls who are fixing to have an abortion, if they will let the baby live," says Jim Savley, the program's executive director.

Other programs for teen mothers emphasize careful instruction in family planning to prevent more unwanted pregnancies. Some go so far as to send a social worker to the hospital shortly after the girl has given birth in order to present gifts of condoms and contraceptive foam, along with something for the baby. Increasingly, programs like the Door in New York and Crittenton Center in Los Angeles have extended their contraceptive-counseling programs to teens who have not yet become pregnant. Crittenton purposely holds discussion groups that mix young mothers with other adolescents to reinforce the lessons on birth control. "When they see how hard it is to be a mother," says executive Director Sharon Watson, "they don't get pregnant."

Many believe that such lessons should be a regular part of the curriculum in public schools. According to the Time poll taken by the research firm of Yankelovich, Skelly & White, Inc., 78% of Americans respond yes to the question "Do you favor sex education in the schools, including information about birth control?" And yet, despite the majority opinion the subject of sex education remains a divisive one. On one side are those like Wattleton of Planned Parenthood who argue that Americans should learn to accept adolescent sexuality and make guidance and birth control more easily available, as it is in parts of Europe. On the other side are those who contend that sex education is up to the parents, not the state, and that teaching children about birth control is tantamount to condoning promiscuity. Sex-education classes are simply "sales meetings" for abortion clinics, says Phyllis Schlafly, a leading right-to-lifer. In addition, she claims, there is simply no way to tell youngsters about contraception "without implicitly telling them that sex is O.K. You've put your Good Housekeeping seal on it."

The conflict has contributed to riotous clashes at school-board meetings whenever the sex-education curriculums come up for review. Last year, for example, when New York City developed a program designed to help combat a runaway rate of teenage pregnancy, religious groups presented a list of 56 objections. In middleclass San Juan Capistrano, Calif., the fray over sex-education reform grew so heated last spring that conservative opponents showed up at a school-board meeting dressed in Revolutionary War garb and bearing a cannon.

In 1981 the Reagan Administration instituted a program to, in its words, "encourage teenagers not to engage in sexual activities" and foster "good communication between parents and child about sexual matters." The plan has won favor with conservative church groups but has been derided by family-planning advocates as an unrealistic "chastity act." Terrance Olson, professor of family sciences at Brigham Young University in Provo, Utah, is using funds from the new program to develop a conservative sex-education curriculum. Olson's offering stresses abstinence, and, he says, "we try to involve teenagers with their parents in understanding the issues of marriage, family and reproduction." The program has been tested in selected schools in Utah, California and New Mexico since 1982, but, he admits, "we can't have a lot of evidence yet that we've changed behavior."

Changing human behavior is, of course, always an elusive objective. When Researcher Douglas Kirby, head of the Washington-based Center for Population Options, studied the behavioral effects of sex education, he found them to be few and far between. Sex-education graduates certainly knew more about reproduction, but that did not significantly affect their habits. There was, however, one important exception. Kirby found that when sex-education programs are coupled with efforts to help teenagers obtain contraceptives, the pregnancy rate drops sharply.

The model for this type of program was the Mechanic Arts High School in St. Paul, which in 1973 became the first public high school in the U.S. to have its own full-service health clinic in the building. Set up by St. Paul-Ramsey Medical Center, it offered everything from immunizations to sport physicals to treatment for venereal disease. Significantly, it also advised teenagers on contraception and dispensed prescriptions for birth control devices (provided that parents had agreed beforehand to allow their children to visit the clinic).

Such clinics now exist at four other St. Paul high schools (Mechanic Arts High has been closed). The results have been dramatic. Between 1977 and 1984, births to female students fell from 59 per thousand to 26 per thousand. Even girls who did become pregnant seemed to benefit from the counseling. At Mechanic Arts High, their dropout rate fell from 45% to 10%, and only 1% had another unwanted pregnancy within two years of the first. The controversial clinic at Chicago's DeSable High School and ones at other schools around the country were modeled after St. Paul's pioneering program.

For all their apparent success, in-school clinics do not necessarily get at the emotional wellsprings of teenage pregnancy: the sense of hopelessness and resignation felt by many underprivileged girls. In Milwaukee, Janice Anderson, a successful black businesswoman, is trying to do something about it. Anderson, 36, was inspired to act last March when she read that her hometown led the country in birthrates among black teenagers. "I sat up in bed at 2 a.m. and wrote down the name of every black professional woman I knew," she recalls. "I came up with a list of 42 names and wrote to each one, asking them to come help their sisters." Anderson's early-hour inspiration evolved into Reach for the Stars, a volunteer program that pairs inner-city adolescents with black role models who are successful achievers.

Similar groups have begun to appear around the country. In New York, the Family Life program, co-sponsored by the state and the Children's Aid Society, is attempting to give dead-end kids a sense of self-esteem, says Michael Carrera, its energetic director. Since the program's initiation last February, not one of the 55 participating youngsters has become pregnant or fathered a child.

These efforts are aimed at what may be the true root of the teenage pregnancy problem: not simply lack of sex education or access to birth control but a sense of worthlessness and despair. Recounts Watson of Crittenton Center: "The girls tell me, 'Before I was pregnant, I was nothing. Now I am somebody. I'm a mother.'" As long as adolescents look in the mirror and see nobody there, they are likely to seek identity by becoming—ready or not—somebody's mother.

THE MISSING-FATHER MYTH

They are the forgotten partners. It is obvious but often overlooked: for every teenage mother there is a father, usually a teenager who finds himself treated as an outsider, receiving none of the solicitous attention that occasionally attends the mother and child. These fathers are usually depicted as churlish scamps, irresponsible hit-and-run artists out to prove their sexual prowess without a thought for the consequences. Until recently, no one even seemed to factor the father into the situation. But with the surge of concern about teenage mothers, several groups and studies have taken a closer look at teenage fathers. Their findings have challenged many prevailing myths.

A recent study partially funded by the Ford Foundation revealed that many young fathers are not only willing but eager to help their partner and offspring. The project, coordinated by New York City's Bank Street College of Education, offered vocational services, counseling, and prenatal and parenting classes to nearly 400 teenage fathers and prospective fathers in eight U.S. cities. At the end of the two-year program, 82% reported having daily contact with their children; 74% said they contributed to the child's financial support. Almost 90% maintained a relationship with the mother, whom they had known for an average of two years. "We are learning that many teen fathers are anxious to participate in the parenting of their children," says Prudence Brown of the Ford Foundation, but she points out, "they need a lot of help and support to help them assume a responsible father role."

Teenage fathers usually have lower incomes, less education and more children than do men who wait until at least the age of 20 to have children. One reason for this is that a teenager who has got his girlfriend pregnant often compounds his first mistake with a second one: dropping out of school. "When they leave school, they head right for a low-paying job," says Amy Williams, the executive director of the Teenage Pregnancy and Parenting Project in San Francisco. "Their own internal drummer says to them, 'If you are going to be a good father, you have to get a job.'" Few are able to perceive the trap they are falling into. Says a counselor: "Five years down the line, they won't have skills to qualify for much more than work in a fast-food restaurant."

Teenage fathers are usually bewildered by the news of the impending arrival. Their own fathers, statistics show, were often phantom parents, and the young men have very little idea of what a father is supposed to do. Notes Debra Klinman, project director of the Bank Street College study of teenage parents. "A lot of fathers want to love their babies and do the right thing for them, but they don't see how to do what is right."

For many of the young men there is also a conflict between the desire to provide for their children and doubts about their own abilities as providers. Says Tommy Milladge, a counselor at the Youth and Family Center in Lawndale, Calif.: "The paradox felt by teen fathers is that while they want the young lady to receive services, they are ambivalent because they can't provide for them the way they should. It defeats their masculinity." Until recently it was thought that this same sense of masculine pride would prevent young fathers from participating in programs designed to help them. The Bank Street College study showed that

the opposite was true: teen fathers lunged at the opportunity, particularly where job training was offered. At the end of the two-year program, 61% of the previously unemployed young men had found jobs. Perhaps more important, 46% of those who had dropped out of school had resumed their education.

Programs designed to assist teenage fathers are still relatively few, but their growing number offers hope in arresting the cycle of children producing children. Terry, who is now 21, has a 17-month-old child and is himself the child of teenage parents. After being helped by the Teenage Pregnancy and Parenting Project in San Francisco, he is now a counselor there. "My father was a parent when he was a teenager," Terry says firmly. "My mother and grandmother were. It didn't stop with me or with my brothers. I know it will stop with my son."●"

NATIONAL FIREFIGHTERS DAY

● Mr. GORTON. Mr. President, I am pleased to join my distinguished colleagues in cosponsoring Senate Joint Resolution 244, which designates October 8, 1986, as "National Firefighters Day." Appropriately, this day will occur during National Fire Prevention Week.

As chairman of the Subcommittee on Science, Technology, and Space, which oversees and authorizes the Federal Fire Prevention and Control Act, I am well aware of the tremendous dedication of our Nation's firefighters. These courageous men and women are devoted to saving lives. I can think of no group more deserving of such an honor.

Mr. President, I ask the Members of the Senate to reflect, for a moment, on the magnitude of the job of fighting fires in this country. Each year, public fire departments respond to roughly 2½ million fires. There are over 28,000 public fire departments, staffed by over 2 million career and volunteer firefighters. Property damage resulting from fires costs us between $6 and $7 billion per year. Tragically, civilian—nonfirefighters—fire deaths still exceed 5,000 per year, and civilian fire injuries top 28,000 per year; but I am encouraged that civilian fire injuries and deaths have declined in recent years.

I am distressed, however, that the loss of life to firefighters is increasing. Last year, 117 firefighters died in the line of duty. Injuries to firefighters exceed 100,000 per year, which is roughly 24 injuries per 1,000 fires attended. More than 10 percent of these injuries are severe enough to require hospital treatment. Clearly, firefighting is one of the most hazardous occupations in our Nation.

Fire prevention and control is primarily a State and local responsibility. The Federal role is to provide services that are impractical for each community to develop, such as the collection of fire data, research into the causes of fires and methods to reduce fire loss, and education. Training programs at the National Fire Academy promote firefighter safety. The U.S. Fire Administration seeks to reduce firefighter deaths and injuries by funding projects such as fires—a project to improve the protective equipment worn by firefighters.

The U.S. Fire Administration recognized the sacrifice made by our firefighters by establishing the National Fallen Fire Fighters Memorial in Emmitsburg, MD. During the annual Fire Prevention Week ceremonies, an observance is held at the memorial to increase public awareness of the hazards faced by firefighters. The bronze plaque on the beautiful 7-foot pyramid-shaped cairn of Indiana and Pennsylvania limestone carries the following message from our President, Ronald Reagan:

Dedicated to the thousands of fire fighters who lost their lives in the very act of saving others.

I commend this memorial and the annual observance to your attention.

Mr. President, I commend Senator DECONCINI for introducing this resolution, and I join with the other sponsors to express our gratitude for the sacrifices made by our gallant firefighters, our Nation's first line of defense against the ravages of fire.

FIREFIGHTER WALTER McGINN, A BRAVE BOSTON HERO

● Mr. KENNEDY. Mr. President, last Sunday, Boston firefighter Walter McGinn demonstrated his willingness to make the ultimate sacrifice when he risked his life to save a 28-year-old man about to leap from an elevated highway in Boston. Fireman McGinn wrapped himself around the man, who finally succeeded in jumping, dragging McGinn with him. Together they plunged 30 feet to what could have been sudden death for them both. Fortunately, McGinn's firefighting colleagues were perfectly positioned below, and managed to break their fall with a safety net. McGinn and four of the nine firefighters holding the net were injured, but not seriously, and the man they were trying to save was unhurt.

The need for committed public servants is revealed time and time again by those who face such crises with quiet heroism. But the courage of Walter McGinn in his unrelenting and successful effort to salvage the life of a man he did not know writes an eloquent chapter of bravery all its own. We are all grateful for the strength and dedication of men and women like Walter McGinn whose commitment in the service of their fellow human beings is an inspiration to Americans everywhere. The faith and leadership that Walter McGinn and his colleagues demonstrate daily is a tribute to the best ideals of our people and our country, and I salute his personal act of humanity.●

INFANT MORTALITY

● Mr. DURENBERGER. Mr. President, infant mortality is a major public health problem in this country. The rate of infants dying during their first year of life has markedly decreased over the years, but in recent years the rate of decline has suddenly slowed. While everyone tries to figure out just why this has happened, the U.S. infant mortality rate remains higher than that of a dozen other developed nations. This is completely unacceptable.

One thing is well known and undeniable: low birth weight is the single most important factor in the early death of infants. Babies born weighing less than 5½ pounds are 40 times more likely to die in their first 4 weeks of life than are their normal weight counterparts. Neonatal intensive care has been able to save the lives of many tiny ones; however, the cost of this high technology treatment is tremendous—between $15,000 and $100,000 for every baby's intensive care hospital stay.

Why not do all we can to keep these infants in the best incubator of all—their mother's womb? It makes all the sense in the world. And how do we do that? A recent Institute of Medicine study concluded that the single most important thing is for all pregnant women to receive adequate prenatal care.

This, unfortunately, is not happening in this country, given the variability of States' eligibility levels for the Medicaid Program and the sparseness of preventive services for low-income, high-risk pregnant women in this country.

Mr. President, there are two bills which have yet to be reported out of the Committee on Governmental Affairs, of which I am a member. S. 1620, of which I am the sponsor, would establish a Council on Access to Health Care. The other, S. 1209, sponsored by my distinguished colleague, the Senator from Florida, [Mr. CHILES], would set up a National Commission on Infant Mortality.

Mr. President, these two measures go hand in hand and are good policy for improving this Nation's health. We need to assure that all pregnant women have access to prenatal services. We need to know what the problems are with the current programs and how they can be made more effective. We also have to identify just how far we as a nation have come in assuring needed access to health care services for all Americans and what effects the recent changes in the financing of the health care industry are having on the access and quality of services.

This Council and Commission would give us information we need to accomplish these things. Only with this information can we really move ahead and get services to those who need them. Then we can certainly say that we are improving the public's health.

In a recent article in the Atlantic, Stephen Budiansky presented a timely view of what some of the problems are and why they exist for pregnant women who need prenatal care but are unable to get it.

Mr. President, I ask that this article be printed in the RECORD following my statement. I also ask my colleagues on the Governmental Affairs Committee and in Congress for their support of these important legislative initiatives. I look forward to returning in the new year and seeing their successful passage through both the committee and Senate.

The article follows:

PUBLIC HEALTH: A MEASURE OF FAILURE

Infant mortality, a public-health problem that most Americans, if they had to guess, would probably rank in importance somewhere between yellow fever and beriberi, has been getting a lot of attention lately. Public-health officials, who make their living dealing with things like AIDS, Legionnaires' disease, and an astounding assortment of poisonings, have come to refer to infant mortality with words like "worrisome" and "disquieting." Congressional hearings, governors' association reports, and mayoral task forces have become the order of the day.

The concern began three years ago, when the pace of decline in the country's rate of infant mortality suddenly slowed. Since 1965, when the infant-mortality rate in the United States was 24.7 deaths per thousand live births, the rate had fallen quickly—by 4.4 percent a year, on average. By 1982 infant mortality stood at 11.5 deaths per thousand live births. Then, in 1983, the rate fell by only 2.6 percent, to 11.2 deaths per thousand, and it seemed to many that nearly two decades of steady progress had come to an end.

Infant mortality has long been regarded as an indicator of a nation's health overall. In the United States it has had an added significance, underscoring gross economic and racial disparities in health and access to health care. It is not surprising, then, that interpretations of the slowdown have been distinctly political. When the 1983 figures were released, the Children's Defense Fund and the Food Research and Action Center—two Washington-based organizations that had been protesting the Reagan Administration's cutbacks in funds for Medicaid and food stamps—seized on them as evidence that the Administration's policy was causing real harm. Federal officials reacted by dismissing the slowdown as temporary—a "statistical artifact"—and suggested that in any case the major remaining causes of infant mortality were smoking, drinking, and drug-taking by pregnant women.

Provisional data for 1984—the most recent available—show that the slowdown had persisted: since 1983 the infant-mortality rate fell by only 2.8 percent. These days Administration officials do not try to argue that the pace of decline in infant mortality is satisfactory. But the explanations for the slowdown continue to have political implications, and the Administration continues to belittle any connection with the budget.

So far the debate has been less than illuminating. The best evidence to support a connection between infant mortality and the funding of social programs is a slight increase—immediately following the 1981-1982 cuts in the budgets of many federal health programs—in the percentage of women failing to receive timely prenatal care. Although that increase is significant inasmuch as it reversed a ten-year trend, its size is not impressive: from 1981 to 1982 the percentage of all pregnant women who either received no prenatal care or received it only in the last trimester rose from 5.2 to 5.4.

The budget-cut critics have been able to make a stronger case by marshaling data from states and localities which appear to show jumps in infant-mortality rates following cutbacks in health services. One often cited found that the infant-mortality rate for five Boston neighborhoods nearly doubled in a single year following funding cuts for neighborhood health centers. The trouble with such data is that vital statistics always fluctuate greatly from year to year in a small population. In a neighborhood where 100 babies are born each year there should be an average of one infant death a year, given the current U.S. infant-mortality rate of 10.6 per thousand. But there might well be two infant deaths one year and none the next. Such fluctuations would cause the infant-mortality rate for the neighborhood to appear to jump to twice the national average and then fall to zero. Trends are reliably ascertained only by looking at large samples or by sampling over a long period.

Because the debate over the cause of the recent slowdown has focused on the short term, a larger message contained in the numbers has been lost. The data point to the existence of a problem that has little to do with the politics of the past few years and a lot to do with the fundamental nature of our health-care system.

To put the story in context, we really need to begin with 1900, when an infant born in America faced a one-in-ten chance of dying before its first birthday. Infectious diseases, abetted by poor sanitation and unopposed by antibiotics, took the biggest toll on infant life.

Public-health researchers divide infant deaths into two groups: those that occur within the first four weeks (the majority being the result of low birth weight) and those that occur from the age of one month to one year (generally as a result of environmental factors, such as infectious disease or accidents). In 1900 a third of infant deaths occurred in the first month, and two thirds after—a sobering reminder of the threat once posed by whooping cough, scarlet fever, diphtheria, and other illnesses.

By 1950 the overall infant-mortality rate had fallen by two thirds. Significantly, nearly all of the improvement had come in the category of deaths after four weeks. Infectious disease had been conquered, but the underweight newborns were dying as readily as ever.

After a long plateau from 1955 or so to 1965, infant mortality began another sharp decline. From 1965 to 1982 it fell by half, but this time the bulk of the improvement—three quarters—came in the category of deaths within the first four weeks. The explanation is not hard to discern: beginning in the mid-sixties intensive care for underweight newborns came into its own. Incubators, monitoring devices, and respirators designed especially for infants were perfected; hospitals established regional intensive-care facilities for newborns. Infants who once would have had no chance to survive were being saved.

Meanwhile, the reason for all the new facilities—low birth weight—persisted. Today low birth weight is the single most important factor in the early deaths of infants. Newborns who weigh less than five and a half pounds are prone to such problems as hemorrhages, infections, and respiratory ailments. As a result they are forty times more likely to die in their first four weeks than are their normal-weight counterparts. The difference in American infant-mortality rates for blacks and whites—black infants are twice as likely to die—is paralleled by a difference between the two groups in the incidence of low birth weight. Despite all the progress achieved in the United States since 1900, the low-birth-weight rate has declined slowly—much more slowly than the rate of infant mortality. For example, whereas from 1965 to 1982 the overall infant-mortality rate fell by 4.4 percent per year and the rate of infant mortality in the first month by 4.8 percent per year, the low-birth-weight rate fell by only 1.2 percent per year.

The biological cause of low birth weight is simply not understood. Some people have suggested that the disappointing U.S. statistics for low birth weight and infant mortality mean that a fundamental physiological limit has been reached, and that it is unreasonable to expect much more improvement. Over and over again, however, epidemiological studies have shown that inadequate prenatal care, poor nutrition, poor education, teenage pregnancy, smoking, drinking, and drug use are risk factors. Moreover, the performance of the United States does not match that of other developed countries. For the past twenty years the United States have never ranked higher than thirteenth on the list of countries with the lowest infant-mortality rates. Those countries whose rates are lower than ours continue to make progress in achieving further reductions; they also have less incidence of low birth weight. It has been argued that in the Scandinavian countries and Japan, where infant-mortality and low-birth-weight rates are lowest, the population is ethnically homogeneous. Yet even if one considers the infant-mortality and low-birth-weight rates for white Americans only, the Scandinavians and the Japanese are still ahead.

The Reagan budget cuts in programs designed to improve nutrition, education, and health care may have made those services marginally less effective, but the real message in the statistics is that even when those programs were fully funded they did not go far enough. Conservative ideologists hold that the Great Society and War on Poverty programs, started in the 1960s, failed because they were poorly managed or were based on speculative social theories. But there is nothing speculative about the effects of prenatal care. A recent study by the Institute of Medicine, an affiliate of the National Academy of Sciences, concluded that providing adequate prenatal care to women who currently lack the means to receive it could reduce the national incidence of low birth weight by 15 percent—ten years' worth of progress at current rates. Medicaid, which provides free medical care to the poor, is hampered by some perverse restrictions. In twenty states a pregnant woman in a two-salary household cannot receive Medicaid coverage for prenatal care, no matter how low the household income might be. A

single pregnant woman living alone must have an income far below the federal poverty level of $437.50 a month to qualify in most states. In the worst case, Alabama, the cutoff is $88 a month. Even before the Reagan budget cuts only about half of all women of childbearing age whose incomes fell below the federal poverty line were eligible for Medicaid.

The obvious solution is to spend more money—not a very popular idea these days. But the implicit decision, made in the 1960s, to save infants through the high technology of neonatal intensive care has proved very costly indeed—running to perhaps $2 billion a year. A stay in an intensive-care nursery can cost from $15,000 to well over $100,000. According to the Institute of Medicine study, preventing low birth weight would be cheaper. The study compared the cost of providing adequate prenatal care to one large group of women at high risk of having underweight babies—the 1.4 million women who did not finish high school who receive some form of government assistance, and who are not now receiving adequate prenatal care—with the savings that would be realized if there were fewer underweight babies in need of hospitalization. It was calculated that the investment in prenatal care would yield a net return of from $12 million to $29 million a year.

Prevention may become an even more attractive investment as further innovations in high-tech intensive care yield diminishing returns. Already in geriatrics wards much life-sustaining technology is merely death-delaying; machines can keep a patient breathing while doctors stand by, helpless to alter the course of the ailment. Geriatrics technology has advanced faster than medicine. Provisional statistics from the Department of Health and Human Services for 1983 and 1984 suggest that this may also be the case with neonatal intensive care. For although the overall infant-mortality rate continues to decline slowly, as does the mortality rate for vulnerable infants under four weeks old, the rate for infants four weeks old and over actually appears to be increasing. In other words, the heroic efforts of the intensive-care nursery are keeping alive for at least a month more infants who used to die shortly after birth—but many of those infants still die before the year is out.

Our present system of health insurance ensures that society as a whole foots the bill—in the form of higher insurance premiums—for any new medical technology that makes it out of the experimental phase. Society likewise foots the bill for treating uninsured patients, because hospitals pass on the costs in the form of higher fees. Yet those same hospitals that take charity cases in an emergency generally refuse to provide free preventive care. Medicaid, similarly, winds up paying emergency intensive-care costs of "medically needy" infants whose mothers have been ineligible for prenatal-care coverage. These costs are large but hidden, and they won't be eliminated until all pregnant women are assured access to prenatal care as a matter of course.—STEPHEN BUDIANSKY.●

THE IMPORTANCE OF CONTINUING TO COMPLY WITH THE SALT II TREATY

● Mr. LEVIN. Mr. President, I wish to join my Senate colleagues and other concerned Americans in urging the President to continue to observe the provisions of the SALT II Treaty beyond the treaty expiration date of December 31 of this year.

When considering the desirability of extending the provisions of the SALT II Treaty, and it is indeed desirable, it is important to note possibly the most unusual and important aspect of the SALT II Treaty. This treaty, unratified by the Senate and not officially binding upon either the United States or the Soviet Union, has nonetheless been observed by both countries since 1980. Despite many, strong disagreements between both countries; despite treaty limitations which explicitly and rigidly restrict the development and deployment of nuclear weapons on both sides; the SALT II Treaty in large measure has been observed by both countries. This is a wonder. The question is, Why has the unratified SALT II Treaty been observed for so long? Many close advisers to the President have recommended that he repudiate the treaty. He hasn't, and neither have the Soviets.

Let me suggest why this is so.

There are two reasons for observing a treaty: One is the benefits realized by observing the treaty. The other is the cost of repudiating the treaty.

The SALT II Treaty benefits the United States in a variety of ways. Most importantly, the treaty has put explicit, verifiable limits on the development, modification, and deployment of nuclear weapons: ICBM's, submarine-launched ballistic missiles, bombers, and cruise missiles. These limits have nonetheless permitted modernization of the respective nuclear forces. We have now reached those limits in the area of submarine-launched missiles and both sides are now decommissioning or otherwise removing older submarines from their nuclear roles. This is a clear example of the treaty working to our mutual benefit. The Soviet Union, alone, between 1974 and today, has retired hundreds of missiles from its nuclear forces in order to replace their older missiles with newer ones and still remain within the limits of the SALT I and SALT II Treaties. These treaties have worked and are working.

Critics of the treaty will point out that the destructive power of the nuclear forces of both the United States and the Soviet Union has increased despite the SALT agreements. They are correct. The treaties were not intended to reduce the size of the nuclear forces, but to limit growth of nuclear weapons, especially of the most dangerous weapons. Those critics tend to ignore the fact that the Joint Statement of Principles within SALT II was to serve as the basis of SALT III negotiations. And in SALT III, one of the principal objectives was significant and substantial reduction in strategic offensive weapons. In other words, SALT II was a critical precondition for the actual reduction of the nuclear arsenals of the United States and the Soviet Union. Another benefit of the SALT process has been that it has established an agreed-upon rubric for the conduct of these extraordinarily important and complex negotiations. These rules and procedures were hard won and it would be a tragedy to jeopardize them by repudiating the SALT II agreement.

Beyond the benefits of continued observance of the SALT II Treaty, there are the costs of repudiation. Repudiation of SALT II would almost certainly bring an end to substantive arms control negotiations for the Reagan administration. The recent summit between President Reagan and Secretary General Gorbachev has established a framework for negotiations. This framework would be dashed if the President refuses to continue observing the SALT II limits. This would be bad enough, but, worse, such action could precipitate a nuclear arms race of frightful dimensions. The technological genies which live in our aerospace industries are capable of shaping nuclear weapons to be used in space or on Earth that are beyond our imaginations. Other nuclear weapons control treaties, such as the test ban treaty or the nuclear nonproliferation treaty, could be swept away in such an arms race. The hope for a better, more secure world which the Geneva summit extended to us all would be gone for many years.

It is for these reasons that I urge the President to heed his better instincts and the heartfelt hopes of people everywhere and continue U.S. compliance with the SALT II Treaty.●

TRIBUTE TO POSTMASTER NATALE E. FELICETTI

● Mr. PELL. Mr. President, I noted with great interest over the weekend a most deserving tribute in the Westerly Sun to retiring Postmaster Natale E. Felicetti of Westerly, RI, which I would like to share with my colleagues.

In this period when it seems fashionable to criticize Federal and postal employees, many of whom go unrecognized year after year for their excellent contibutions to the quality of life and individual citizens, it is most rewarding to read a fine tribute regarding a career civil servant who has sacrificed much to ensure that families are brought closer through the mail service.

The career of Natale E. Felicetti is an example of excellence and sacrifice in Government service. It is a remainder to the citizens of our country of exemplary service rendered on a daily basis by many Federal and postal employees. Equally important, the example set by Postmaster Felicetti is one

for current and future Federal employee to aspire to.

My warmest congratulations to Postmaster Felicetti.

Mr. President, I ask that the text of the article from the Westerly Sun appear in the CONGRESSIONAL RECORD.

The article follows:

[From the Westerly Sun, Dec. 15, 1985]

RETIRING POSTMASTER RECALLS A DRAMATICALLY DIFFERENT DAY

(By Stephanie LaTour)

WESTERLY.—When Postmaster Natale E. Felicetti started working for the Postal Service in 1936, at 65 cents an hour, all mail was delivered by train and sorted by hand.

Back then, it cost only two cents to mail a sealed letter, even less for an unsealed one.

In his 49 years with the Postal Service, Felicetti has seen a lot of change.

As his retirement approaches, he looks back on the good old days, when the service had not "lost its personal touch."

"When I used to deliver mail down in Misquamicut, I knew all the families personally," Felicetti says.

"In fact, the most tragic stage of my career was the hurricane of 1938, when I saw those people lose their homes and their lives. It was horrible.

"My favorite work, though, was doing the window clerk position because that's when I got to meet everybody," he adds.

"Of course, we have to keep up with progress. But it's too bad we have to lose that personal touch along the way."

Felicetti was in high school when the Depression began, working as a delivery boy. Sometimes the chauffeurs and maids of the Watch Hill families would sneak him an ice cream after a delivery, he says.

"You really appreciated a thing like that in those days. Everyone helped each other and learned the value of a dollar. Why, I used to go out on a date with 20 cents in my pocket."

After graduating from Westerly High School in 1932, Felicetti went to Rhode Island State College (now the University of Rhode Island) with the idea of becoming a dentist. But he had to leave college to get a job after an illness had drained away much of his parents' money.

"My sister urged me to take the postal exam. I had never thought about it, but I figured 'Why not?' Well, I'm glad she did think of it because I ended up loving the Postal Service."

"Sometimes I would dream about being a big Wall Street broker, you know. . . . But I've never really considered leaving the Postal Service. It's the greatest."

Felicetti, who got a 94.5 on that original test, moved up in the Postal Service through the years. He became a permanent letter carrier in 1941, a sub-clerk in 1942, a regular clerk in 1944, then assistant postmaster in 1955.

During World War II, when the night employees had to work with the blinds drawn tight for the wartime blackout, Felicetti would call families if a letter arrived from "their boys overseas," he says. "They would come at any time of the night to get those letters, even past midnight. We knew how important it was to them."

"In 1966, Felicetti helped organize a program called "Packages for Vietnam," allowing people to send Christmas packages to family members in Vietnam for half price. The local committee later received a letter from Vietnam commander Gen. William C. Westmoreland commending the program, through which hundreds of packages and cigarette cartons were sent to the front.

One of the biggest periods of change came in 1971, says Felicetti, when the Postal Service was reorganized as an independent organization. The postmaster position, which had been a "political plum," became based more on merit, he says.

When former postmaster Charles Butler retired in 1976, Felicetti was appointed to replace him, after rigorous screening.

Since then, he has been responsible for running the post office, maintaining a budget and making improvements. "I basically have to oversee everything. It has kept me pretty busy," he says.

As postmaster, Felicetti is on call seven days a week. One year, he even had to go out on Christmas day to take care of an express mail delivery.

Many other activities have kept him busy, including an appointment as beach commissioner, a position on the Advisory Charter Revision Commission and involvement in the Lions Club, Knights of Columbus and the Calabrese Society.

Felicetti, now 71 lives with his wife, the former Yvonne Boucher of Voluntown, on Lawrence Street. He says he likes gardening and spending time at the beach during his free time.

Many members of Felicetti's family work for the Postal Service, including his son Robert N. Felicetti, postmaster of West Kingston, and his son-in-law, Glenn Handley, a postal carrier in West Warwick. He has a daughter, Sheila Handley of Westerly, and five grandchildren.

"I tell the young people, like my grandchildren, to consider entering the Postal Service," he says, "You can't beat it for security and for the opportunity to move up if you work hard."

What will Felicetti do after retiring in January?

He says he plans to "take it easy" for a few months and take care of his ice cream business at the beach.

"It will be a readjustment," he says, "There's no question about it, I'm definitely going to miss the place."

There will be a testimonial dinner in honor of Felicetti on Jan. 18. at the Calabrese Club, starting with a social hour at 6:30 p.m., then dinner at 7:30 p.m. Invited guests include Leo Manfred, chairman, George Salimano, vice chairman, Joseph Turco, Anthony Chiaradio Jr., Capt. Robert Chiaradio and Milton Holland. The Calabrese Club may be contacted for tickets.

ACTION ON RADON NEEDED

● Mr. LAUTENBERG. Mr. President, just over a year ago, the potential for significant indoor radon contamination came to our attention when Stanley Watras, a worker at a nuclear facility in eastern Pennsylvania, set off a radioactive alarm upon entering the facility. The source of Mr. Watras' contamination turned out to be his home, which contained dangerously high levels of radon contamination: the highest levels ever recorded in a residence. The level of radiation Mr. Watras was exposed to was equivalent to exposure to 455,000 chest x-rays in a single year.

Since the Watras incident, we have learned a great deal about radon. But for every question we address, another arises. From studies on uranium miners, we know that exposure to high levels of radon over an extended period of time results in lung cancer. But we don't know what levels in a home would pose a similar threat.

Radon contamination in Pennsylvania, New Jersey, and New York has been traced to large deposits of uranium lying in a geologic formation known as the Reading Prong. But radon problems have been detected throughout the country, under vastly different geologic conditions.

Mitigation has worked in some homes, but not in others. In some, radon levels were reduced to safe levels, one to rise again to hazardous concentrations.

The need for increased Federal attention to radon is clear. The Centers of Disease Control has estimated that 6 million Americans could be exposed to hazardous levels of radon. An estimated 5,000 to 30,000 lung cancer deaths may be attributable to radon each year. Over the course of this year, I have tried to focus Federal attention on the dangers of radon.

Earlier this year, I joined Senators MITCHELL and BRADLEY in sponsoring the Indoor Air Quality Research Act of 1985, which was adopted by the Senate as an amendment to the Superfund reauthorization bill. This bill establishes, for the first time, within EPA, a comprehensive indoor air program, with an emphasis on radon. It lays the foundation for an effective national radon program

Additionally, during consideration of the fiscal year 1986 HUD-Independent Agencies appropriations bill, I was successful in securing $1.5 million in funding for the EPA for radon research, and an additional $1.5 million for general indoor air research. This funding is a starting point, and represents a down payment on a 5-year plan that professional staff at EPA has developed for Administrator Thomas. EPA intends to use the bulk of these funds for an expanded radon mitigation demonstration project, which has been started on a limited scale in Pennsylvania. It is my hope that EPA will include New Jersey in this expanded program.

Mr. President, radon is a national problem. Some 30 States have been found to have some degree of radon contamination. In New Jersey, we identified our problem earlier than most other States. Problems in New Jersey, and Pennsylvania, are well documented. In three radon workshops I have held throughout New Jersey, almost a thousand people have attended, a clear indication of the level of concern in my State. And it is only a matter of time before this concern is shared by citizens throughout this country.

There is a clear need for action. Four steps must be taken in our efforts to deal with the problem of radon: First, we must assess the scope of our problems nationally, and find the hot-spots; we must develop efficient and affordable mitigation measures; we must establish adequate health guidelines for residential radon exposure; and we must disseminate this information to the public.

Radon is a problem that can be dealth with, and must be dealt with. I will continue to work to see the Federal Government take the necessary action on radon, and hope my colleagues will join me in this effort.●

A TRIBUTE TO FRANCIS "MAC" McADAMS

● Mr. DODD. Mr. President, I wish to pay tribute to a friend and a fine public servant, Francis H. McAdams, known by his family and friends as "Mac," who recently passed away.

Mac's life spanned an ever-active 69 years. He devoted most of those years to the world of aviation: Flying seemed a fitting avocation for this man's generous and imaginative spirit.

Mac was one of the original members of the National Transportation Safety Board, which is responsible for investigating airline accidents, and a longtime advocate of improved training for airline pilots.

To the residents of Washington, DC, Mac is probably best remembered as the board member in charge of investigating the Air Florida jet crash into the 14th Street Bridge, a tragedy that killed 78 people. With his reassuring and fatherly manner, Mac was able to comfort the entire city in a time of grief and confusion.

Mac was also known as the "great dissenter" among his colleagues on the board. In keeping with his determined character, he was not afraid to disagree with the other members on findings of probable cause in transportation accidents.

The dissent for which he is best known involved a midair collision over San Diego in 1978 that killed 144 people. Not satisfied with the board's conclusion that the probable cause "was the failure of the flight crew" of one of the planes, Mac argued that "inadequacies of the air traffic control system" were the probable cause. This contention was eventually adopted as the board's majority opinion. Everyone of us who uses the airlines owes a debt of gratitude to Mac for his persistence and thoroughness in ensuring that these tragic accidents would never be repeated.

Born in Brooklyn, NY, Mac graduated from Georgetown University and Law School. His affinity for flying began in 1939 when he earned his commercial pilot's certificate. He served as a Navy Pilot in World War II and was executive officer of an aircraft-carrier fighter squadron. After the war, he was employed by Capital Airlines as an attorney. His civil career in Government began when he joined the Civil Aeronautics Board in 1948.

In 1967, Mac was appointed to the Transportation Safety Board by President Johnson. He was reappointed three times thereafter, by Presidents Nixon, Ford, and Carter. He served with the Safety Board until 1983. He then served as safety counselor of the Air Transport Association, the major airlines' trade group.

Mac is survived by two daughters, Hope and Wootie, two sons, Michael and Peter, a son-in-law, Steven, and a grandson, Simon, of whom he was very proud.

Mac will long be remembered by his family, his friends, and those he worked with and for. His many and valuable contributions will not be forgotten. But most of all, Mr. President, we shall miss him.●

NEXRAD

● Mr. DANFORTH. Mr. President, I would like to update my colleagues on the status of development of the Federal Government's next generation weather radar system. The system, known as Nexrad, is being developed to the specified requirements of the National Weather Service, the Federal Aviation Administration, and the Air Force, and is intended to replace existing Federal weather radar units, many of which were designed in the 1950's and 1960's.

The Nexrad system will improve dramatically our ability to monitor and predict severe weather conditions such as tornadoes, thunderstorms, and flash floods. Nexrad is a Doppler radar system, capable of generating detailed meteorological data which, combined with advanced processing and display systems, will revolutionize severe weather forecasting.

Nexrad is being developed to support a number of Federal missions, including hazardous weather warnings, flash flood predictions, aviation warnings, water resource management, and protection of military resources. Improved performance of these missions will reduce the annual average of 600 deaths and $20 billion in damages caused by severe weather in the United States.

Mr. President, the benefits of Nexrad will be greatest in areas such as my home state of Missouri, where tornadoes and thunderstorms are common. Tests have shown that Nexrad can provide tornado warnings in specific areas with average lead times of 20 minutes, compared to the current average of one-minute lead time for area-specific warnings. The warnings also will be accurate enough to increase responsiveness. One problem with the current system is that warnings are often general or inaccurate, and frequent false alarms cause people to ignore the forecasts. Nexrad will provide warnings that are timely and accurate enough to enable people to take measures to protect themselves and their property from severe storms.

Nexrad will provide significant benefits to Missouri, where, in an average year, severe weather kills or injures nearly 100 people and causes about $80 million in economic damage. I am very pleased that three of the first 10 Nexrad units will be installed in Missouri.

I also anticipate that Nexrad will improve the services provided by the National Severe Storms Forecast Center and the National Aviation Weather Advisory Unit, both of which are located in Kansas City, MO. These facilities have respective national responsibility for severe weather advisories and aviation warnings. Both facilities already do excellent jobs of providing area advisories, but Nexrad is needed to increase the lead time of these advisories and to enable local forecasters to develop more specific watches and warnings.

Mr. President, Nexrad development has proceeded in accordance with system requirements and a schedule agreed upon by the three responsible agencies. The schedule, which calls for deployment of the first operational Nexrad units in 1988, was observed through research phases and into a competitive evaluation phase involving two system contractors. Limited production is scheduled to begin during fiscal year 1986. The administration, however, reduced Nexrad funding in order to study Nexrad against alternative technologies to see if a more cost-effective system should be developed.

The Commerce Committee, which authorizes National Weather Service and Federal Aviation Administration funding, has supported the original technical requirements and schedule originally established for Nexrad. With regard to the administration's decision to undertake a study of alternative technologies, the committee stated, in a report on a fiscal year 1986 National Oceanic and Atmospheric Administration [NOAA] authorization bill (S. 1103), that:

> Regardless of whether such study is carried out, all interested parties agree that the original development schedule and technical requirements for Nexrad should not be compromised. The Committee notes that the Nexrad schedule calls for limited production of Nexrad units during fiscal year 1986, and the committee expects to be notified by NOAA of NOAA's plans for proceeding with established system requirements.

The administration's study, carried out by the Advisory Committee for Nexrad system requirements evaluation, has been completed, and I was pleased upon receiving the Advisory

Committee's final report to learn that the Advisory Committee has echoed the position taken by the Commerce Committee. The Advisory Committee reported that the technical requirements for Nexrad are appropriate and should not be compromised. The Administrator of NOAA, Tony Calio, has informed me that he believes Nexrad development should proceed without further delay.

Mr. President, I am encouraged by these recent developments. However, I remain concerned about future administration actions to unreasonably delay Nexrad development. While spending for Nexrad will unavoidably come under scrutiny pursuant to the new Gramm-Rudman budget process, Nexrad should be considered in the context of necessary Federal programs. The cost of the system will be great, in the order of several hundred million dollars, but the benefits will be even greater. If Nexrad reduces by 1 percent the property damage caused by severe weather, the system will pay for itself in 2 years. This estimate ignores the potential for saving of lives, which we cannot measure in dollars. The need for the Nexrad system is clear, and I hope my colleagues agree that its development should not be subject to any unnecessary delays.●

TRIBUTE TO WEST VIRGINIA SERVICEMEN

Mr. ROCKEFELLER. Mr. President, last Thursday, a tragic air crash claimed the lives of 258 American soldiers of the 101st Airborne Division. Five of these young men were West Virginians. I would like to take a moment to pay tribute to Pfc. Mark Abrams of Rhodell, Sgt. Kevin Gantzer of Wheeling, Pfc. Thomas Hileman of Fairmont, P2c David Jordan of Nitro, and Sgt. James Mollett of Kermit, and all their brethren. These dedicated men were part of a multinational peacekeeping force in the Middle East. After serving their country half way across the world, they were on their way home to spend the holiday season with their families and friends. I know I join with the entire country in expressing my deep sympathy to each family. I hope they will find some comfort knowing the selfless role their loved ones played in furthering the case of world peace. As Charles Dickens wrote:

When Death strikes down the innocent and young, for every fragile form from which he lets the panting spirit free, a hundred virtues rise, in shapes of mercy, charity, and love to walk the world, and bless it.●

SUPPORT FOR MEDVID PANEL ON ASYLUM

● Mr. HUMPHREY. Mr. President, on December 6, I introduced a resolution on behalf of myself and 52 of my colleagues that would establish a special Senate panel on asylum to investigate the bungling of the case of Miroslav Medvid. I have been greatly encouraged by the tremendous support from across the political spectrum that this resolution has received. Today I received a letter from Hyman Bookbinder of the American Jewish Committee, pledging their support for this resolution. I ask that the full text of this letter be printed in the CONGRESSIONAL RECORD.

The letter follows:

THE AMERICAN JEWISH COMMITTEE,
Washington, DC, December 18, 1985.
Senator GORDON HUMPHREY,
Hart Office Building,
Washington, DC.

DEAR SENATOR: We support your efforts to thoroughly investigate the human rights case of the Ukranian seaman, Miroslav Medvid, who was returned by the U.S. Border Patrol to the Soviet Freighter, the Marshall Koniev, on October 29, 1985.

The American Jewish Committee is pleased to note the wide range of bi-partisan support you have received for your proposal to create a special 7 member panel. We offer full cooperation in your efforts to explore the implications of the Medvid case and its significance for our present asylum procedures.

Sincerely,

HYMAN BOOKBINDER,
Washington Representative.

MARTIN LUTHER KING DAY

● Mr. RIEGLE. Mr. President, 1986 marks the first year that we as a nation will acknowledge the contributions and achievements of the Reverend Martin Luther King, Jr., by celebrating a national holiday in his honor on January 20. I would like to take a few moments to reflect on the vital contributions Dr. King made as a leader in the fight for equality.

Dr. King's courage and restraint inspired a new quest for a freedom long awaited for by our Nation's minorities and the oppressed. Through his nonviolent resistance and passionate oratory, Dr. King was able to elevate the struggle for civil rights to the forefront it deserved on the national agenda.

Dr. King's basic doctrine, as he proclaimed in a speech during the bus boycott in Montgomery, AL, was as follows:

If you will protect courageously, and yet with dignity and Christian love, when history books are written in future generations, the historians will have to pause and say, "There lived a great people—a black people—who injected new meaning and dignity into the veins of civilization." This is our challenge and our overwhelming responsibility.

Dr. King spoke not for one group, but for many, and although he did not live to see his dream come true, we as a nation must continue to keep his dream and commitment to equal opportunity for all people alive.

In my home State of Michigan, there are many tributes and events taking place to honor one of the few individuals in our Nation's history who touched our collective conscience as deeply as did Mr. King. January 20 will serve as a reminder of the work still to be done, and the challenges still to be met as we strive to reach the dream that Dr. Martin Luther King cherished.●

SMALL BUSINESS COMMITTEE'S INITIATIVE TO SIMPLIFY "SMALL PURCHASE" PROCUREMENT PRACTICES

● Mr. WEICKER. Mr. President, the Committee on Small Business is now in the process of conducting an inquiry into the "small purchase" practices used by various Federal agencies. The ultimate purpose of this committee initiative is to devise ways to simplify the Government's small purchase procurement procedures and forms to encourage small businesses to compete in this segment of the Federal procurement market. Today, I would like to share with my colleagues the broad outline of the committee's effort and to enlist their suggestions and their support.

To begin, Mr. President, let me describe what is meant by a "small purchase" in the Federal procurement process and where these procurements fit in the overall universe of the total Federal procurement market. By statute, any procurement opportunity which is valued at less than $25,000 is recognized as a "small purchase" and may be awarded through so-called "simplified small purchase procedures." Small purchases encompass the acquisition of the complete spectrum of items of supply, services, and construction (principally repair or alteration of existing structures). In the acquisition of supplies, small purchases can include both one-time buys of common, commercial items by remote field offices to the repetitive purchase of "spare parts" fabricated to Government design specifications by the large inventory control points operated by the military services to stock the Defense Department's supply system.

In fiscal year 1985, the executive branch expended slightly less than $183 billion through slightly more than 21.1 million procurement actions (contract awards and contract modifications). What is generally not recognized is that 98.1 percent of these procurement actions, some 20.7 million procurement actions, are below the "small purchase" threshold, only recently raised from $10,000 to $25,000.

This vast "small purchase" market, which aggregated to a total of slightly more than $16 billion in fiscal year 1985, or about 8.8 percent of the total

for the fiscal year, should be a prime market for small business participation. This fact was recognized by the Congress in 1978, when it established a statutory small business reserve for small purchase contracting opportunities. Under Public Law 95-507, all procurements conducted under small purchase procedures were reserved for exclusive competition among small business concerns.

Yet, Mr. President, from the very limited data available from the Federal procurement data center (the Government's centralized procurement data repository operated by the General Services Administration under the statutorily recognized policy direction of the office of Federal procurement policy), it is estimated that small businesses receive less than 50 percent of the "small purchase" contract awards. Further, one would intuitively expect that the award of contracts for supplies, services, or construction valued at $25,000 or less would be highly competitive. This, too, does not seem to be the case. In fiscal year 1985, 45.1 percent of all procurement actions reported as "small purchases," almost 9.4 million procurement actions, totaling $7.3 billion, were made on a noncompetitive basis. Even after eliminating modifications to existing contracts, which are legitimately noncompetitive, it is estimated that between 30-40 percent of small purchase contract awards are being made on a sole-source basis. We need to know, Mr. President, why this is so, and that is part of the goal of the committee's inquiry.

If we find that the small purchase market is as noncompetitive as it appears to be, it may be that we need to communicate to the managers of the Federal procurement system that the congressional mandate for competitive procurements, clearly enunciated in the Competition in Contracting Act of 1984, does extend to those purchases below the small purchase threshold. I would hasten to add any legislative direction aimed at enhancing the competitive character of these millions of small purchase contract awards must give special recognition to the costs, in terms of time and personnel, that may be associated with seeking to foster such an improved competitive environment. Competitive procurement practices are not an end in themselves, but a means to better utilization of taxpayer dollars to fulfill recognized public requirements in the most effective manner. But, Mr. President, the procurement process, whether it be for "small purchases" or those contract opportunities over the small purchase threshold, must be an open process that permits any qualified supplier to compete.

From the committee's initial efforts, it has become clear that the "small purchase" element of the overall Federal procurement process, some 20.7 million procurement actions in fiscal year 1985, have received very little attention, both within the executive branch and from the Congress. The principal reason is probably that all these actions totalled "only" $16 billion in fiscal year 1985, a "mere" 8.8 percent of the total, and are therefore considered "small potatoes" by those charged with managing the procurement process.

Mr. President, I have already alluded to the very inadequate data that is being centrally maintained through the Federal Procurement Data System [FPDS]. The data on "small purchase" procurement actions being reported to the EPDS does not differentiate the simple, but important, distinction between types of actions. For example, we presently cannot readily determine whether an action is a new contract award or a modification to an existing contract. Nor, can we separate out those awards of less than $1,000 which are currently exempt by regulation from any requirement to seek competition. This makes impossible any analysis of the competition that exists in a market that has consistently constituted the vast majority of contract awards. Similarly, the current FPDS reporting system does not differentiate among contract modifications included in the "small purchases" count. For example, five contract modifications to a $5 million contract, if each were under $25,000, would be counted as a "small purchase" action along with a $1,500 modification to a true small purchase contract of, say, $15,000. It almost seems that the data collection system, the FPDS, was designed to obscure the parameters of the "small purchase" market, rather than to define them.

Interestingly, the committee staff's initial inquiries have revealed that more detailed information, in significantly divergent formats, is being maintained at the Department of Defense, by one of the military services, by that services major procurement commands, and even by major procurement centers within those service procurement commands. Interviews reflect that this additional data is being collected because these procurement managers believe that it is needed to manage effectively. Presently, the Office of Federal Procurement Policy is leading a comprehensive assessment of the Federal Procurement Data System. Hopefully, the inadequacy of the data being centrally collected on small purchases will be addressed during this effort.

Congress, too, has been generally inattentive to the vast small purchase segment in the overall Federal procurement market, despite devoting substantial time and energy to Federal procurement practices, generally, and those of the Department of Defense, in particular. During the 98th Congress, three major pieces of basic procurement policy legislation were enacted into law: The "Competition in Contracting Act of 1984", a part of Public Law 98-369; the "Defense Procurement Reform Act of 1984", title XII of Public Law 98-525; and the "Small Business and Federal Procurement Competition Enhancement Act of 1984", Public Law 98-577. Yet, all of those important pieces of procurement policy legislation properly focused on the solicitation and award of contracts above the small purchase threshold, the 1.9 percent of the procurement actions (only 411,407 in fiscal year 1985) which accounted for 91.2 percent of the procurement dollars expended ($166.8 billion in fiscal year 1985). The Committee now believes, Mr. President, that the "small purchase" procurement process, should receive a comprehensive review to assure that the congressional objectives embodied in the recently enacted legislation, especially the Competition in Contracting Act of 1984, are reflected in the small purchases procurement market.

Some useful analysis of the small purchases procurement practices of the executive agencies has been undertaken through the leadership of the Office of Federal Procurement Policy [OFPP]. In seeking to implement Executive Order 12352 (Federal Procurement Reforms), issued in March 1982, OFPP organized six interagency working groups, one of which was charged with devising concrete recommendations to implement section 1(E) of the executive order. This provision of the executive order tasked the managers of the Federal Procurement System to "establish programs to simplify small purchases and minimize paperwork burdens imposed on the private sector, particularly small businesses."

The final report of the OFPP task group was issued in March 1984, and distributed to the various executive departments and agencies by OMB in May 1984. Each agency was left to its own initiative to make use of the report's array of recommendations. One of the task group's most promising endeavors, the development of a model small purchase manual for use by all agencies, seems to have languished. Mr. President, the seemingly unnecessary differences in the procedures and forms used by the various executive agencies in awarding small purchase contracts is one of the complaints most frequently heard from small businesses.

Further, Mr. President, the task group, composed of agency procurement managers, tended to focus on changes that would be most beneficial to those doing the buying for the agencies rather than those competing to win the contracts, the small business contractors. In working with the

report of the OFPP task group on small purchase simplification, the committee will seek to inject greater balance by working closely with various groups representing the interests of small business Government contractors.

Some of the task group's recommendations were incorporated into OMB's so-called "management budget" for fiscal year 1986 (Management of the United States Government, Fiscal Year 1986). Several legislative proposals relating small purchase simplification were subsequently presented to the Congress, one being referred to the Small Business Committee and the others being referred to the Governmental Affairs Committee and its Oversight of Government Management Subcommittee. From initial analyses, it appears that they will need substantial revision, lest they impede and diminish the participation of the small business Government contractors, whose participation we should be encouraging. But, Mr. President, these legislative proposals from OMB and the underlying work done by the OFPP-led task group, do encourage me that others believe that the small purchase procurement process is in need of attention by Congress as well as the executive.

Mr. President, the committee's staff inquiry into the small purchase procurement practices of the various executive agencies is now proceeding with assistance being provided by an experienced procurement policy analyst on detail from the General Accounting Office. Let me now outline the two basic parts of our inquiry.

First, the committee staff is reviewing the regulatory guidance, principally part 13 (Small Purchase and Other Simplified Purchase Procedures) of the government-wide Federal Acquisition Regulation [FAR], which provides the basis for the array of supplementary guidance—agency small purchase manuals as well as local procedure and forms peculiar to specific buying activities. To supplement this review of the "paper guidance", the staff is conducting discussions with those agency officials charged with establishing small purchase policy guidance, with special attention being given to obtaining their views on various proposals for improvement and to solicit further suggestions based upon their experience as public purchasing professionals. In addition, the committee staff has been collecting and analyzing the studies of Federal small purchase procurement practice that they have been able to identify from sources both inside and outside of Government. Very careful attention is being directed to findings and recommendations flowing from reviews of particular procurement centers, which have been conducted by the inspectors general, or other internal audit groups, of the various executive agencies and the military departments within the Department of Defense. Included among those reports is a recent review of the small business administration's procurement operations conducted by the SBA inspector general.

The second element of the committee's inquiry includes a series of visits to selected purchasing offices with substantial small purchase procurement activity. This will permit the staff to observe the process first-hand, to test the validity of problems identified and concerns expressed by small business Government contractors. The visits will also provide the committee staff with the opportunity to evaluate proposals for improvement from the viewpoints of both those who execute small purchase procurements on behalf of the Government and those small business contractors who compete for these contract opportunities. During these visits, the committee staff will be working closely with both the agency competition advocates and SBA respresentatives at the visited purchasing center, especially the breakout procurement center representatives.

Initially, the committee staff are focusing on Defense Department purchasing centers, since DOD has the lion's share of small purchase procurement activity in terms of both numbers of actions and dollars expended. According to the Federal Procurement Data System's report for fiscal year 1985, DOD reported 14.5 million procurement actions below the $25,000 small purchase reporting threshold, some 70 percent of the total number of actions, government-wide. These small purchase actions had an aggregate value of some $12.5 billion, which was 77.5 percent of the $16 billion Government-wide total.

Mr. President, there are two additional reasons for looking to DOD small purchase procurement activities first. Small purchase procurement operations, especially high volume operations, are very labor intensive. Given the shear volume of DOD's small purchase procurement responsibilities, and the fact that much of this activity is concentrated in repetitive buys of spare parts and support equipment by a relatively few inventory control points that stock the DOD supply system the military services and the Defense Logistics Agency have undertaken their own initiatives to make the process more efficient. Principally, they have undertaken the expanded use of computers to realize faster purchases with fewer people. For example, the Army Materiel Command [AMC] has been testing an automated procurement system on its small purchase procurement operation at communications-electronics command [CECOM] at Fort Monmouth, NJ. With the success of the tests at CECOM, AMC's Command Automated System for Procurement (CASPR) will be expanded to the small purchase operations at AMC's other inventory control points. Similar efforts are underway within the Navy at both its ships parts control center and the naval supply center, Norfolk. The Defense Logistics Agency has been operating an automated small purchase procurement activity at the defense general supply center in Richmond.

While recognizing the substantial efforts at improvement now being taken throughout the Department of Defense, we cannot ignore the facts that many of the spare parts "horror stories," which have so captured the public's attention and so discredited DOD's acquisition process, were for buys that fell below the $25,000 "small purchase" threshold, and were, therefore, receiving almost no review as to the noncompetitive character of the awards or the reasonableness of the prices resulting from these sole source buys. Mr. President, the two $659 ashtrays for the Navy, E-2C Hawkeye purchased by the Naval Air Station at Miramar, CA, were acquired on a sole source basis, using small purchase procedures.

The committee staff is planning to visit some of these base-type small purchase operations. And, if time permits, visits will be made to civilian agency activities with low-volume small purchase procurement operations. It is our intention to maintain a Government-wide perspective in our inquiry and in the recommendations that flow from the committee's efforts to simplify the Government's small purchase market to foster small business participation.

Mr. President, the committee staff investigation which I have just outlined will result in the issuance of a committee staff report. If warranted, the committee will hold multiple days of hearings during the early spring. The purposes of these hearings would be threefold: (1) to review the findings and recommendations of the staff report, hearing from Representatives of both the Federal agencies and the small business government contractors; (2) to motivate executive branch procurement policymakers to make appropriate administrative changes to foster expanded small business participation in the "small purchase" Federal procurement marketplace; and (3) to shape any appropriate legislative package needed to fully attain the objectives of small purchase procurement simplification.

Mr. President, it would be my expectation that any legislation flowing from this committee effort would likely fall within the jurisdiction of the Governmental Affairs Committee, and its oversight of Government Management Subcommittee. Specifically,

we may well make first use of the authority to test innovative procurement procedures which is provided by section 15 of the Office of Federal Procurement Policy Act.

This important committee effort in the procurement arena is being carried forward on a bipartisan basis. My colleague and ranking minority member of the Small Business Committee, DALE BUMPERS, has contributed his staff resources to the effort. We would welcome the contributions of committee members active in the Federal procurement arena: Senator DIXON, who joined me in the last Congress in moving S. 2489 into law; Senator NICKLES, chairman of our Procurement Subcommittee; my friend from Michigan, Senator LEVIN, who serves as the ranking minority member of our Procurement Subcommittee as well as companion panels on the Armed Services and Governmental Affairs Committees; and my friend from Georgia, Senator NUNN, former ranking minority member of the committee and presently ranking minority member of the Armed Services Committee. Senator NUNN has repeatedly suggested the need to test innovative procurement techniques to simplify many defense procurements; we look forward to exchanging ideas with him as our two efforts move forward.

Throughout this committee effort, I have instructed our staff to maintain a close liaison with the staff of the Governmental Affairs Committee, especially its Subcommittee on the Oversight of Government Management, chaired by Senator COHEN, who along with Senator LEVIN, carried the Competition in Contracting Act of 1984 into law. Concurrently, close liaison is also being maintained with the staff of the Committee on Armed Services, and its Subcommittee on Defense Acquisition Policy, chaired by Senator DAN QUAYLE. If the experience of the last Congress are any guide, such a cooperative working relationship among our three committee's could well lead to a followon success to the effort that saw the enactment of important companion procurement reform legislation: The "Defense Procurement Reform Act of 1984," title XII of Public Law 98-525, and the "Small Business and Federal Procurement Compeitition Enhancement Act of 1984," Public Law 98-577.

Mr. President, the small purchase procurement simplification initiative of the Committee on Small Business is a major undertaking that I wanted to share with my colleagues. Once again, I enlist their suggestions and their support, for if our effort is successful the ultimate beneficiaries will be many thousands of small business Government contractors and the Government agencies to whom they will be providing their supplies, services, and construction.●

● Mr. NICKLES. Mr. President, as the Chairman of the Small Business Committee has indicated, small purchase procurements need to be reviewed for competitiveness. Substantial changes in the law governing these procurement actions were made last year. The Small Business Committee is beginning an initiative to review and evaluate those changes to see if further improvements in the Governmentwide procurement system are necessary.

The volume of small purchases is staggering. The Federal Government expended $183 billion in fiscal year 1985 for approximately $21.1 million procurement actions; $20.7 million of these actions were small purchases, that is, less than $25,000. The dollar amount of these actions were $16 billion, small in comparison to total procurements. So pervasive are the small purchases, however, two such purchases are made every second of the workday.

I anticipate that we will find that the reforms made in 1984 for more competitive purchases will show reductions in the cost of procurement actions. Changes were desperately needed in light of the ongoing revelations of exorbitantly priced spare parts by the military. However, we need to verify any improvements and propose further changes if needed.

Given the chance to compete, small business has shown the innovation and efficiency to produce substantial savings in our procurement budget. The use of set-asides and other artificial means of promoting small business participation only glosses over the problem. What we need to emphasize is the ability and opportunity of small business to compete head-to-head with the larger companies.

In hearings I have held in Oklahoma, small businesses are asking for the chance to compete and a reduction of the burdensome paperwork required in Federal procurements. The Committee will also address the paperwork issue as we review the Small Purchase and Other Simplified Purchase Procedures in the Federal Acquisition Regulation.

Mr. President, I want my colleagues to know that the committee will be proceeding in this fashion and as chairman of the Subcommittee on Government Procurement, I solicit their input on the scope and nature of our work.●

● Mr. COHEN. Mr. President, I rise today to commend my colleague from Connecticut, Senator WEICKER, for taking the initiative to review the Federal Government's "small purchase" procurement practices. With much of the focus these days on major weapons system acquisition, not enough attention is being paid to the tens of millions of "small purchases" made each year.

While these purchases, in the aggregate, represent only a small percentage of the Government's annual procurement budget, they account for the vast majority of transactions. For this reason, I agree with the chairman of the Small Business Committee that Congress should look beyond the big-dollar buys to see how the small dollars are being spent.

The Competition in Contracting Act [CICA], which was passed last Congress, requires agencies to use competitive procedures, except under certain circumstances, in procuring property or services. CICA recognizes that the competitive procedures required of large purchases may not be cost-effective for small purchases and, therefore, requires that agencies provide "special simplifed procedures" for those purchases under $25,000.

These procedures do not, however, exempt agencies from awarding contracts competitively. Rather, CICA specifically states that agencies, in using small purchase procedures, "shall promote competition to the maximum extent practicable." While this does not mean that agencies are to use the formal source selection procedures proscribed by CICA, they should make some effort to solicit offers from more than one source.

Unfortunately, this does not seem to be the case in over one-third of the small purchase contract awards, according to the Small Business Committee staff's preliminary examination. I would encourage my friend from Connecticut, in reviewing the Government's "small purchase" procedures, to carefully consider the extent of competition, determine why so many contract awards are made noncompetitively, and perhaps recommend what can be done to encourage more competition on these small-dollar buys.

As chairman of the Governmental Affairs Subcommittee on Oversight of Government Management, which would have jurisdiction over any legislation in this area, I again commend Senator WEICKER for undertaking this initiative and look forward to working with him on this important issue.●

● Mr. DIXON. Mr. President, I am pleased to take this time to share with our colleagues the current initiative that we are taking in the Senate Small Business Committee to review the Federal Government's small purchase procurement procedures. I also look forward to again working with Chairman WEICKER and the other members of the Small Business Committee on a major procurement initiative.

During the past several years, Congress increased from $10,000 to $25,000 the level below which Federal agencies may use small purchase procedures. This increase has been consistent with efforts to raise the threshold on other related procurement activities. A number of agencies have also taken

their own initiatives, or have made recommendations for improvements to the policies and practices for using small purchase procedures.

However, Congress has not undertaken a systematic or comprehensive review of the agencies' implementation of the small purchase programs, or assessed the advantages and disadvantages of this program to the small business contracting community. The Small Business Committee's review is therefore timely and important, particularly in light of the fact that over 98 percent of all Government contract actions, and over 70 percent of all DOD contract actions, fall under the $25,000 small purchase level.

Mr. President, in 1984 Senator WEICKER and I joined together in the Small Business Committee to greatly expand the opportunities for small and minority businesses to participate in the Federal Government purchase of major systems and subsystems. Our efforts culminated in the enactment of the Small Business and Federal Procurement Competition Enhancement Act of 1984, Public Law 98-577. In addition, because of the initiatives we took in the Small Business Committee, major portions of our work were made applicable to DOD and incorporated in the Department of Defense Procurement Reform Act of 1984, title XII of Public Law 98-525.

The procurement work that we have undertaken on the Small Business Committee in the past gives me great hope that, in the near future, we may be able to recommend to our colleagues a package of procurement recommendations that will improve the Federal Government's use of small purchase procedures, reduce the time and cost of conducting these contract actions, and, by expanding competition, increase the participation of small and minority businesses in the Federal marketplace.

I would welcome the comments and assistance of our colleagues, the small business community, and the Federal agencies in this review. I also want to compliment the Small Business Committee's chairman [Senator WEICKER] and ranking member [Senator BUMPERS] for their leadership in this comprehensive and bipartisan initiative.●

● Mr. NUNN. Mr. President, I am pleased to join with the chairman of the Senate Small Business Committee, Senator WEICKER, in calling attention to the work that the Senate Small Business Committee has under way reviewing the small purchase procurement practices of the Federal Government. This review is long overdue, and represents another important procurement initiative by the Small Business Committee. The executive branch has also undertaken some valuable reviews of their own policies and procedures, and have made recommendations which the Small Business Committee will be analyzing, as well. These recommendations, coupled with the committee's inquiry, should provide the committee with a solid foundation from which we can assess the need for further legislative or regulatory action in this area early next year.

Mr. President, there is no secret that the Federal acquisition process has become overly complex, time-consuming, and burdensome. During the past several years, Congress has undertaken a wide range of procurement reforms. Many of these reforms have focused on the highly visible, large dollar value purchases. In the Department of Defense, for example, the legislative and regulatory attention has been directed primarily at the procedures for purchasing major weapons system.

But as Chairman WEICKER correctly noted in his statement, the overwhelming number of procurement actions in the Federal Government generally, and in the Department of Defense specifically, are for purchases under the "small purchase" threshold of $25,000. Even though these purchases account for less than 9 percent of the dollars of Federal procurement activity, they account for over 98 percent of the contract actions on a Government-wide basis, and over 70 percent of the contract actions within DOD. When properly used, the small purchase procedures provide a means for the agencies to carry out the millions of routine, noncontroversial, low dollar value contract actions that the Government must make.

Mr. President, I believe it is important that the Congress carefully study the procedures used to award these contracts, and it is appropriate that the Small Business Committee undertake this initial review at this time. The need for congressional oversight in this area is long overdue.

Furthermore, many of the small and minority businesses that we have consistently tried to encourage to participate in the Federal procurement process can be expected to receive their first contracts as a result of the small purchase process. Yet with the large number of potential competitors for these contracts, it was surprising to note that almost half of the small purchase actions were still awarded on a "non-competitive" basis. Any reform of the small purchase procedures which further expands the opportunities for small and minority businesses to actively and aggressively compete for a share of the Federal procurement dollar enhances the viability of the business itself and pays both direct and indirect dividends to the Federal Government.

Finally, I believe we in Government need to find a way to simplify the total acquisition system. Any initiatives that we may adopt in the area of small purchase procedures could provide a potential model for streamlining and simplifying the high dollar value purchases in the Federal Government, particularly in the Department of Defense.

I want to compliment the chairman of the Small Business Committee on undertaking this initiative. As a senior member of the Small Business and Governmental Affairs Committees, and as the ranking member of the Senate Armed Services Committee, I look forward to working with him and Senator BUMPERS on this timely review of the Government's small purchase procedures.●

● Mr. BUMPERS. Mr. President, I am pleased to join the Senator from Connecticut, the distinguished chairman of our committee, in introducing the Small Business Committee's initiative to simplify "small purchase" Federal procurement practices. The committee has begun an extensive inquiry into the "small purchase" practices used by various Federal agencies. The purpose of the study is to devise ways to simplify Federal small purchase procurement procedures to encourage small businesses to compete in this segment of the Government procurement market.

A "small purchase" is one valued at less than $25,000 and, by statute, is to be awarded through simplified procedures. Out of the total 21.1 million procurement actions recorded by the executive branch in fiscal year 1985, 98.1 percent were below the small purchase threshold, but those actions accounted for only 8.8 percent of the funds expended for all procurement actions. In spite of the fact that the Government procurement market is flush with small purchases, little attention is paid to that side of the market because the related dollar expenditure is so low. Congress did recognize this potential small business market in 1978 when it established a statutory small business reserve for small purchase contracting opportunities. Under Public Law 95-507, all procurements conducted under small purchase procedures were reserved for exclusive competition among small business concerns.

Despite this statutory backing, it is estimated that small businesses receive less than 50 percent of the small purchase contract awards. In fiscal year 1985, somewhere between 30 and 40 percent of all small purchase procurement actions were made on a noncompetitive basis. The purpose of our inquiry is to find out why this is so, how much it costs to use noncompetitive procedures and what changes should be made.

To make it clear that the Competition in Contracting Act of 1984 requires that all Government purchases, including those below the small purchase threshold, are to be made on a

competitive basis, the committee hopes to do the following: first, focus attention on the fact that 98 percent of all procurement actions are considered small purchases; second, create through the Federal Procurement Data System a method of determining whether an action is a new contract award or a contract modification which need not be made on a competitive basis; third, work with the Office of Federal Procurement Policy and its task force to devise concrete recommendations for establishing programs to simplify the small purchase procurement process; fourth, review the regulatory guidance provided in the Federal Acquisition Regulation for small purchases and discuss methods of improvement with those agency officials charged with establishing small purchase policy guidance; and fifth, have committee staff visit selected purchasing offices which have substantial amounts of small purchase activity and witness first-hand the problems identified by small business government contractors.

The committee has scheduled to have this review completed by late March 1986 and expects to conduct hearings on the results by April. The intended result is to create a small purchase procurement market which benefits those thousands of small businesses which can provide valuable services to the Government. This is a fully bipartisan effort in our committee, as the other statements by my colleagues reflect, and I hope the Defense Department is aware of our commitment to reform. I am instructing the minority staff of the Small Business Committee to participate fully in the background work for this projet, and I look forward to working with Senator WEICKER and my other colleagues on the committee on this important issue.●

OJO CALIENTE CRAFTSMAN CO.

● Mr. BINGAMAN. Mr. President, on my last trip to New Mexico, I made a special trip to the small northern New Mexico community of Ojo Caliente to visit a unique family-owned company, Ojo Caliente Craftsman. The company is owned and operated by Daniel Joseph, Julian Joseph, and Phil Archuleta. Ojo Caliente Craftsman fabricates and manufactures safety directional and informational signs for traffic control. The signs are constructed with the latest in silk-screen technology. Presently, 60 percent of their contracts are with the U.S. Forest Service and 30 percent are with the State of New Mexico. The other 10 percent are out-of-State contracts.

The reasons for my visit was to commend Ojo Caliente Craftsman for their innovative business practices and achievements in improving productivity and honor them as runner-up in a recent Senate Productivity Award. It is appropriate, I believe, that its contribution to northern New Mexico's economic development be recognized in this manner.

The population of Ojo Caliente is 415 and Ojo Caliente Craftsman employs 45 people. It is the company's philosophy to employ workers from Ojo Caliente or the immediate surrounding areas. Such commitment to local economic development is exemplary in this day and age of high technology and industrial expansion. I have great respect for Mr. Julian and Daniel Joseph and Mr. Phil Archuleta for their hard work, for their quality product, and for their commitment to creating and maintaining opportunities for challenging employment to the citizens of Ojo Caliente.●

COMMENDING ROBERT L. SUMMITT ON PROMOTION TO RANK OF REAR ADMIRAL, MEDICAL CORPS, U.S. NAVAL RESERVE

● Mr. SASSER. Mr. President, I rise today to pay tribute to Robert L. Summitt, the first person to be promoted to the rank of admiral who is also dean of a medical college. This is only the latest of many triumphs that Dr. Summitt has experienced during his distinguished career.

A native of LaFollette, TN, Dr. Summitt graduated from Davidson College and received his doctor of medicine from the University of Tennessee College of Medicine in 1955. Upon completion of his internship, he entered the U.S. Navy in 1956. While in the Navy he was designated a flight surgeon in 1957, a position he maintained during his active career in the Navy.

When Dr. Summitt left the Navy in 1959 he began a 2-year residency program in pediatrics at the University of Tennessee Medical College-City of Memphis Hospitals. Following a fellowship at the University of Tennessee and a fellowship in genetics at the University of Wisconsin, Dr. Summitt joined the faculty of the University of Tennessee College of Medicine. Since April 1981 he has been the dean of the college of medicine.

As a member of the Naval Reserve since 1957, Dr. Summitt has taken his commitment of service seriously by creating innovative programs to assist the Navy with its medical readiness planning. One of these programs is Naval Medical Reserve PRIMUS [physicians reservists in medical universities and schools], which Dr. Summitt was instrumental in organizing. This is a nationwide program with the detachment at the University of Tennessee being the Nation's largest and most active.

Dr. Summitt is to be commended for his outstanding work not only to his country, but to the advancement of the study of medicine. He has set an example of dedication to duty which should be emulated by all. I am sure that Dr. Summitt will experience more honors in his distinguished career, and I congratulate him on his most recent promotion.●

SPEECH DELIVERED BY THOMAS A. DINE ON UNITED STATES-ISRAEL RELATIONS

● Mr. WILSON. Mr. President, as is the case with many policy issues with which the Congress is presented, there are often many possible approaches and many competing concerns. And, as we search for answers, we speak with our constituents, with groups that have interests in and expertise with the questions at hand. When the question concerns Israel, there are few groups as understanding of the issues and well prepared to meet them as the American Israel Public Affairs Committee.

Mr. President, the executive director of AIPAC, Thomas A. Dine, recently gave a speech before the Comstock Club in Sacramento entitled "U.S.-Israel Cooperation: Pressing the Peace Issue." It touches on matters across the spectrum of United States-Israel concerns, from the very troublesome Pollard spy case to basic issues affecting the peace process in the Middle East. I believe that the speech provides important insights on a number of topical issues, and I therefore ask that it be printed in the RECORD.

The speech follows:

UNITED STATES-ISRAEL COOPERATION: PRESSING THE PEACE ISSUE

(By Thomas A. Dine)

Thank you Harry Tonkin, for that generous introduction. It is a privilege to come before the Comstock Club, and I look forward to receiving your questions, indeed hearing your comments, following my prepared remarks.

What I plan to do today is, first, speak about the whys and wherefores of the U.S.-Israel relationship, then the part that the American pro-Israel lobby plays in this and, third, analyze the most pressing issue of all in the Middle East, the peace process.

But, before I address these, I want to comment on the topic that has been in the headlines for the past ten days, the question of a U.S. Navy civilian employee, a counter-intelligence analyst, selling our documents to Israeli government officials.

It is a fact that the bilateral partnership between Washington and Jerusalem is strong, indeed very strong today, and rests on a firm moral, political, and military foundation. But it is also fact that the Pollard spy scandal has cast a shadow over the relationship. A whole list of allegations have been made by our Justice and State Department against the accused; in Israel a stunned and skeptical public, press, and parliament have vigorously asked their government to explain why certain officials would purchase U.S. Government secrets.

Yesterday, the Israeli Cabinet, after a week of hesitation, made a clear statement about the Israeli role and apologized to the

American government. I am pleased by this move, but I believe it behooves both governments to move quickly and forthrightly on this matter and get back to the basics in the bilateral relationship. U.S. interestes are involved; so are Israel's.

I suggest several guidelines to overcome the current problem:

(1) The policy of friends not spying on friends must be reaffirmed and adhered to. The Pollard case—and perhaps revelations about the U.S. covertly acquiring Israeli military plans—are the exception, not the rule. The Cabinet statement yesterday was explicit: "Spying on the United States of America stands in total contradiction of our policy." The White House articulated similar words last week. Neither is to engage to covert activities against the other.

(2) All the purloined papers in Government of Israel hands must be returned to Washington.

(3) Israel should make available to U.S. investigators, for questioning, those Israelis involved with the arrested John Pollard.

(4) A credible, independent inquiry needs to be undertaken by Israel, led by a respected public figure. As we in this country have painfully learned, the government cannot investigate itself. There are many individuals of stature in Israel who could explore and analyze the initiators of this episode, how it took on a life of its own, and why there was a failure of accountability.

(5) Those Israeli officials involved, outside and inside the Israeli political mainstream, must be dealt with in an appropriate manner and steps must be taken so that such an episode not be repeated. It is encouraging that the unit, perhaps a rogue outfit, responsible for this egregious incident will be dismantled.

(6) And finally, underlying problems in the U.S.-Israel partnership revealed by this anomaly must be dealt with in a spirit of cooperation which has frankly characterized the bilateral relationship over the years. I would start first with the two intelligence communities. Enormous amounts of information are already shared. As one high-ranking U.S. official told me last week, "An intimate degree of cooperation has been achieved between the intelligence services. . . . It is broad and far-reaching and among the best we have in the world." We have learned, however, that there is information not shared. Awkward arrangements need to be squarely dealt with. Friends do check up on friends, but public accusations of parallel spying must stop. The only beneficiaries of current tensions in American-Israeli ties are the Soviets and their surrogates such as Syria. The U.S. has no interest in damaging Israel's intelligence abilities; President Reagan personally thanked Prime Minister Peres, when he was in Washington, for Israel's help in both the *Achille Lauro* hijacking and the U.S. interception of the flight with the perpetrators of the ship's hijacking and the Klinghoffer murder. Israel has no interest in upsetting American intelligence efforts. It would be timely, then, for the heads of the CIA and Mossad to meet in an intelligence summit so that inconsistencies among various agencies in both governments can be ironed out, working parameters reviewed, and altered arrangements made.

As this episode is fully and thoroughly addressed inside Israel and between the two governments, we must not be diverted. We need to keep our eyes on real American interests in the region:

The preservation of the U.S.-Israel alliance;

The preservation of a secure and sound Israel;

The preservation, indeed the forwarding of, an on-again, off-again peace process.

Let me now turn to the essence of the U.S.-Israel relationship. What makes the two peoples, the two democracies, kindred spirits?

First are the unique moral and political bonds between the two countries. The nation-state of Israel, recreated out of the ashes of the Holocaust and the results of British colonialism, since May of 1948 has proved itself to be a determined, feisty democracy, with the promising energy and visions of an immigrant people.

Israel has emerged as the only stable country in the Middle East. It has and regularly pursues meaningful free elections. It possesses a robust free press, checks and balances to prevent and correct abuses of authority, as witness what happened following the Sabra and Shatilla tragedies in September 1982 and now the Pollard case, extensive protections for the rights of individuals and minorities, basic equality for women, and other safeguards that are typical of a free society. It stands in sharp contrast to the other countries of the region—feudal monarchies like Saudi Arabia, one-bullet regimes like Jordan and Egypt, dictatorships like Syria, or radical states like Libya and Iran.

The moral and political bonds between the United States and Israel give them more than a common value system, a common sense of purpose. It means that Israel is and will be allied with the United States over the long term, long after erstwhile friends of convenience are supplanted and superceded. Israel has emerged as a geopolitical ally of the United States. This was enunciated by President Reagan on November 29, 1983 in his announcement of strategic cooperation between the two countries. Since then, Israel has demonstrated on multiple occasions its strategic value to the United States. Israel has:

Undertaken military planning with the United States to meet threats to mutual interests in the Middle East and the Eastern Mediterranean. And today through Wednesday discussions are again underway in Washington to enhance plans and develop new areas of cooperation.

Participated in joint naval exercises with the Sixth Fleet.

Made facilities available for the storage and maintenance of U.S. materiel for American use in a conflict. Pre-positioning of materiel is one agenda item being discussed this week.

Engaged in military training exchanges with the United States Marines.

Entered into formal arrangements and conducted two simulated tests to provide access to its sophisticated hospital facilities for U.S. military casualties in a conflict.

Undertaken joint research and development projects with the Pentagon to build on the technological expertise acquired from decades of conflict.

Stepped up its cooperation with the United States to combat international terrorism.

These undertakings have considerable strategic significance for the deterrent posture of the United States in the Middle East and Eastern Mediterranean. They provide tangible evidence to the Soviet Union and its clients that U.S. capabilities are supplemented and supported by Israel. Although, of course, Israel is a small nation, the Soviet Union understands better than some just what this means:

Israel's knowledge of and experience with Soviet equipment have for many years helped the United States develop more effective military countermeasures and tactics.

Israel's naval and air forces are sufficiently strong to challenge Soviet naval forces in the Eastern Mediterranean and therefore make a significant difference to the Soviet calculus of the balance of power in that area when added to American force deployments.

Israel has demonstrated the vulnerability of Soviet SAMs and MiGs, forcing the Soviet Union to divert expenditures from force expansion to force renovation, and discrediting the weapons on which much Soviet influence depends. The recent Syrian-Israeli dogfight over Lebanon and Syria is only the most recent example of this. The Israelis devised an innovative application of the U.S.-made AIM9L air-to-air missiles—which the Israelis fired from their F-15s at a range of twenty miles. Pentagon officials were astounded. "It is a remarkable feat," said one. "We've never fired one beyond the range of thirteen miles!"

The U.S. has invited all NATO nations, Japan, and Israel to participate in the research and development of the Pentagon's proposed Strategic Defense Initiative (SDI) and only the United Kingdom and Israel have said, "Yes!"

Israel's role as a friend and ally of the U.S. goes beyond the confines of military cooperation in the important Middle East region. More and more, it is a two-way street.

According to Congressional testimonies, over the last few years, Israel has voted with the United States in the United Nations in the highest percentage of any other country in the world, including the governments of Canada, England, France, Germany, Italy, and Japan.

After Spain, Greece, Turkey, and Oman rejected the U.S. Government's request to station a Voice of America transmitter on their soils to beam new programs into the Soviet Union, Washington went to Jerusalem and Israel, after intensive debate, accepted.

Israel now implements technical assistance development programs in Africa, at America's request.

And in the war on terrorism, America and Israel work side by side, as I mentioned earlier, in the whole Achille Lauro affair.

And it should be noted that with all of this, the Legislative and Executive branches of our government have come to view U.S. economic and military assistance to Israel as what several Senators label, a "bargain." To put the grants and loans slated for Israel into their proper perspective, just compare them to what the U.S. annually pays to protect Western Europe and Japan. Top Pentagon and State Department officials estimate that U.S. defense of Europe costs, in actual cash outlays alone, over $129 billion a year. The defense of Japan and Korea costs us an estimated $47 billion per year.

Contrast this with military aid to Israel, totaling $1.8 billion this year. And remember that all of the military grants for Israeli defense purposes are spent right here in the U.S. In short, we have a strong, deepened affinity for Israel and we have correctly backed that up with American military and economic assistance.

The American people at large are quite aware of the importance of this relationship. Three weeks ago, a Harris Poll showed support in this country for Israel to be at an

all-time high. Sixty-four percent of Americans side with Israel on Middle East questions, 14 percent with the Arabs. Nearly 90 percent, according to Harris, see the PLO as an enemy of the United States.

The pro-Israel community is the activation of this American consensus. In Washington, the American Israel Public Affairs Committee or AIPAC is the keeper of that consensus. AIPAC is the political arm of America's pro-Israel activists. As a citizens' group, we promote through the political and policy process close and consistently strong U.S.-Israel relations. As such we contribute to Mr. Jefferson's and Mr. Madison's grassroots democracy.

AIPAC's objective is to affect the outcome of the foreign policy debate in our country. We engage in lobbying on Capitol Hill and within the Executive branch. We work closely with Members of Congress, with their staffs, with House and Senate committees, with Administration political officials, with career experts at the National Security Council, the Departments of State, Defense, and Treasury, and the CIA.

We engage in grassroots political action across the country. AIPAC members, in Congressional District after Congressional District, are Jews and Christians, liberals and conservatives, neo-liberals and neo-conservatives, Democrats and Republicans. We try to enlarge and enhance the pro-Israel consensus that stretches from one end of the political spectrum to the other. Our personal views—citations of history or of future trends notwithstanding—take a back seat as we build political bridges, not burn them. In short, we provide a domestic base to U.S. policy in the Middle East.

What about the prospects for peace between Israel and its neighbor Jordan, and perhaps even Palestinians who dwell on the "West Bank?" Why is the peace process, begun so dramatically by President Sadat and joined in by Menachem Begin, now in such a precarious position?

The seemingly endless Arab-Israel conflict needs to be broken down into each of its significant parts. We need to see the cards each player holds as they maneuver around the idea of an international peace conference, perhaps to be hosted by the United Nations.

First are the political activities of the PLO. Its military arm is weaker than ever, but Yasir Arafat has played Arab leaders off each other and gained himself continued clout. Israel and the United Sttes have both denied Arafat a place in peace negotiations as long as the PLO rejects or refuses to acknowledge Israel's right to exist and continues to uphold terrorism as its form of political action. Egypt embraces Arafat, but Jordan more and more is ambivalent, trying to distance itself from an unyielding chairman. King Hussein remains wedded to the February 11th accord with the PLO—but with less and less enthusiasm. A key happening in the peace process would be Hussein breaking from Arafat and dealing directly with Israel.

This leads to the second player in this precarious situation, Syria. Syria's alliance with the Soviets and Syria's efforts to divide-and-conquer the PLO compose one Syrian objective: preeminence in the Arab world. Destroying Israel is, in truth, less a Syrian goal than is the unification of all the Arab states under a banner of anti-West, anti-Zionist slogans, with Syria itself in the lead. Hatred is a significant, unifying force—and Syria's Assad intends to exploit it. The terrorism exported by Assad is his tool to train cadres—and it is a crafty mechanism. No public attacks, but frequent quiet murders. This ploy appears to keep Hussein's attention; it may also put the King into a political quagmire. Recent signs of reconciliation between Syria and Jordan have raised eyebrows in Washington. Will this lead to further motion in the peace process or less? Perhaps Syria is being drawn into the framework of an international conference. Damascus says it want in if the Soviets can play a role. This affects Palestinian representation as well, becasue Syria wants to bring its own Palestinian contingent and so further weaken Arafat. But, on the other hand, Syria remains firmly in the Soviet sphere and advocates a pan-Arab delegation. Moving into an international conference with these intentions puts further pressure on Jordan to adopt a non-negotiating line toward Israel.

Meanwhile, Jordan retains a moderate position. Hussein's overtures to Shimon Peres indicate his interest in rapproachment with Israel and his need for friendship with the United States. But the King is dragging his heels as long as he seeks an Arab consensus and Arab cover. In doing so, the King allows Arafat to retain a veto over his moves and allows Syria to blackmail him against Sadat-type boldness.

The Soviet Union wants to join the international peace conference as well—but it wants peace far less than it wants influence and turmoil. Soviet interests are best served by complicating life for Western powers, especially the U.S. In fact, the whole idea of an international conference itself originated with Brezhnev. Such a grouping would inject Moscow into a central nerve of Middle East decision-making. Having employed terrorism as an ineffective wedge for their policies—the Soviets now seek to come to the table. Having realized they cannot disrupt peace directly, they hope to at least manipulate the outcome of peace talks. In this effort, country-courting has been a new and successful Soviet ploy. Two weeks ago, the United Arab Emirates followed Oman's lead and established diplomatic relations with the Soviet Union. Previously, Kuwait was alone among the Gulf Cooperation council states to have formal ties with the Soviets. These maneuvers are calculated. In stark contrast to committed U.S.-Israel friendship, the Soviets establish ties that bind with the adhesive of opportunity. The pure pragmatism of an alliance determines its creation—or its cremation. The Soviets are playing political hard ball—and everybody knows it. The stopper is the condition issued by Prime Minister Peres—Soviet participation only if Moscow renews diplomatic relations with Israel.

Meanwhile, Washington and Jerusalem have coordinated their roles in this process. There is agreement on four major principles:

An international conference should only be an accompaniment, a prelude, not a place to negotiate. It cannot replace direct, bilateral talks between Jordan and Israel.

At an international conference, Syria cannot be allowed a veto.

The PLO, as presently constituted, cannot be involved because of its refusal to recognize Israel's right to exist, to renounce terrorism totally, and to accept U.N. Resolutions 242 and 338. Palestinians must be people of peace, not terror.

The Soviet Union can only be involved if it is prepared to alter its diplomatic policies toward Israel. Hopefully this will include the emigration of Soviet Jewry.

In this vein, Israel's Prime Minister has made it clear to his Likud coalition partners at home and his American ally that if the right conditions are met, he will:

Agree to an international conference with Jordan;

Agree to a PLO presence; and

Agree to Soviet participation.

The time for a break-through for peace is now. It is clear Peres is ready to play. The ball is in Hussein's court. There is motion among the players, but the process needs forward play, movement underway, real exchange.

The Reagan Administration has made it clear—over and over again—that Israel is the reality with which the Arab nations must deal. Arab nations must rid themselves—once and for all—of their delusions and agree to co-exist with an Israel that is here to stay. Our focus is on Jordan, to break through the vultural and political inhibitions in the Arab world and to at last deal directly with its neighbor across the river.

Prospects for peace are better than they have been in a long time. Peace is the hope of the American pro-Israel community. This is the hope of the U.S. Congress and Administration. This is the hope of the Israeli Government. And in this special season for all of us, this could become the new reality we deal with and nurture in 1986.

Thank you.●

SENATOR ROCKEFELLER'S REMARKS AT MARSHALL UNIVERSITY

● Mr. PELL. Mr. President, my distinguished colleague and the junior Senator from West Virginia recently addressed a large gathering of business leaders, educators, and students on the role of education in strengthening his State's and our Nation's competitiveness. He made his remarks at Marshall University, one of West Virginia's fine public institutions, at a special meeting of the Huntington, WV, Rotary Club on November 23, 1985.

It is indeed a fine statement on the critical need to make a major investment in education at all levels. Senator ROCKEFELLER's assistance in elementary, secondary, and higher education, and I would respectfully request that his Marshall University speech, "Education: Responding to the Competitive Challenge" be inserted in the RECORD in its entirety.

The remarks follow:

"EDUCATION: RESPONDING TO THE COMPETITIVE CHALLENGE"

Today I would like to talk with you about the most critical issue facing West Virginia and our country: how we insure our economic competitiveness in a world economy that is changing at a stunning pace.

We are facing this challenge at a time when our businesses, our workers, our universities—even our public schools—compete with those around the world. That's a fundamental change from the 1950's and 60's; it places major responsibilities on the entire nation; and it adds a new dimension to the economic problems already facing our state.

I cannot think of a better gathering to discuss the problem of economic competitiveness than here at Marshall University. So

many of you—through the Center for Regional Progress and other initiatives—have been deeply involved with revitalization activities in this state. From first-hand experience, you know how much is at stake in terms of jobs. You've worked hard to generate public and private investments that contribute to growth and development of our local economies.

I see the challenge of economic competitiveness as a three part problem. We must have economic and trade policies that give us a reasonable chance to compete. We must also look at the way we do business and adapt some of our habits to the current realities of intense international competition. Finally, we must step up critical investments—both public and private—in areas that can boost our industrial performance: principally, education, training, research, and advanced technology.

Let's talk first about economic and trade policy.

West Virginia's unemployment rate of 12.6 percent is the legacy of a brutal recession and lopsided recovery. Throughout this period, our industries have struggled with the handicaps of high interest rates and an overvalued dollar—and many of them continued to lose jobs. Now, faced with an unprecedented trade deficit of at least $150 billion this year, the rest of the country is realizing the problem isn't confined to states like ours. The overvalued dollar has been a great equalizer: inflicting damage on West Virginia's coal miners, Iowa's wheat farmers, oil drillers in Texas, aircraft producers in Washington state and the computer industry in California.

Now that trade is a front burner issue in the Congress, there are some encouraging signs. The actions taken by the United States and other industrialized countries in the last two months to reduce the value of the dollar are most welcome, and the Administration should be commended for its role in initiating them. But the dollar is still roughly 30 percent higher, relative to other major currencies, than it was in 1980. Continued international monetary coordination will help, but real headway will depend on fundamental changes in general economic policy—both here and abroad.

Here at home, we have to substantially reduce the federal budget deficit. If coupled with changes in monetary policy, deficit reduction will help us to lower interest rates and produce a more favorable set of exchange rates. We must reduce the deficit fairly, so that we don't sacrifice critical investments for our future, but we must reduce the deficit. I supported the Gramm-Rudman amendment mandating a five year glidepath to a balanced budget because it was a departure from business as usual, and business as usual hasn't come to terms with the deficit crisis.

We must also stand up to unfair trade practices, and insist that other countries open their markets to our products and services. Nobody likes to resort to protectionist actions; as we export roughly 20 percent of what we produce in West Virginia, we cannot take lightly possible threats of retaliation against our exports.

But our trade laws are there for a reason, and we in the Congress have to continue to pressure the Administration to enforce them much more aggressively. We can't keep on doing nothing when other countries subsidize their exports and close their markets to our products. It makes you wonder what the Administration is saving its enforcement powers for if competitors feel free to resort to a variety of "non-tariff" barriers like standards, tests, and regulatory requirements to keep our products out.

Henry Kissinger wrote recently that "the United States cannot be the only nation practicing free trade in an increasingly mercantilist world." Where trade policy is concerned, we cannot drift while other countries chart their course. Try explaining to an unemployed steelworker how our government can preach free trade, while government ownership, subsidy and control of the steel industry is a basic fact of economic life almost everywhere in the world. Try explaining to anyone how we battle for years to get our oranges, lumber, telecommunications equipment into Japan, while millions of VCR's pour into this country.

Ultimately, we need to modernize, adjust and compete—not hide behind our borders and opt out of the world economy. Our prosperity—and everyone else's—depends on a high level of world trade. But we must insist that our trading partners open their markets to our products, that Europe and Japan play their part in the world economy and accept their share of exports from the third world countries as well.

To secure our competitive position in world trade, however, we'll need to go beyond economic and trade policy, as important as they are. We will have to face up to the rapid changes taking place in world markets—and recognize that some of the policies we followed, the ways we did business, and the habits we developed when the United States dominated international trade are no longer good enough.

I'm encouraged by the growing interest in more cooperative approaches to labor-management relations in many sectors of American industry. In the past, the strength of our competitive position allowed us to lead the world economy despite labor-management hostility. But those days are gone, and they won't be returning. Continuing the old antagonisms will cost us dearly—and in some cases, like the recent conflict at Wheeling-Pittsburgh, throw a company's survival into doubt.

The new contract ratified at Wheeling-Pitt, which ended an extremely bitter 98-day strike, was a tremendous breakthrough in labor-management relations. It envisions genuine opportunities for workers to participate in the full range of decisions affecting the company's future. Involving workers in solving problems—from the shop floor to the board room—is an inherently more productive way to do business, as so many of our competitors have demonstrated. While the antagonisms are deeply ingrained—particularly in our part of the country, labor and management simply must try to kick this habit—and recognize that they can accomplish so much as partners than as adversaries.

Competitiveness also depends on our industries having access to the most advanced technology available. Again, our foreign competitors—like Japan—offer some useful lessons. Over the years, the Japanese have made strenuous efforts to learn about our scientific research and discoveries: they've combed our professional journals, sent students to our unversities, and consulted extensively with American companies and researchers. Partly because of the language barrier, we don't regularly follow technological developments in Japan—even though first-rate research and innovation is occurring there.

In the Senate, I have sought to improve access to Japanese scientific and technical information through legislation which increases our government's efforts to translate such material. This bill, which I introduced with Senator Baucus of Montana in May, has been approved by the Senate Commerce Committee. At the very least, if our companies, scientists, and engineers could read about what the Japanese are doing, we'd know more about the kinds of technologies and products that will soon be competing against us. And in some fields, what we learn could spell the difference between keeping up with the competition and falling behind.

Despite the pressure created by the federal budget deficits, and our state's continuing recession, we cannot forget that some investments are absolutely essential to our economic well-being. If we scrimp on research and development, on technological innovation, on job training, we will save some money today—and pay the price in low growth and lost opportunities for years to come.

In my view, nothing is more important than investing in education at all levels. As the President's commission on education pointed out in its report entitled "A Nation at Risk," "knowledge, learning, information and intelligence are the new raw materials of international commerce." Anyone who believes that we can have a world-class economy without a world-class education system is deluding themselves.

The Reagan Administration deserves great credit for establishing the commission that wrote "A Nation at Risk." That commission rang a firebell in the night, with its memorable warning that our education system is "being eroded by a rising tide of mediocrity that threatens our very future as a Nation and as a people."

That commission and other studies have painted a disturbing picture of the contrast between our education system and Japan's. Japan has the highest rate of high school completion and literacy in the world. Japanese students study and learn more. As a major report by private corporations says, the Japanese students "spend more time in class than their American counterparts; by the time they graduate from high school, they have completed the equivalent of a second year at a good American college." In addition, Japanese children are consciously taught to appreciate team work and a sense of responsibility for others, the very qualities that universities and businesses say are declining among young Americans.

The good news is that America's wave of self-examination rather immediately turned into a push for reform. The most significant and dramatic efforts have taken place in the states, with a focus on public schools. Within a year after "A Nation at Risk," it was possible to issue another report "A Nation Responds," which described the tangible commitments of governments, business leaders, and individual educational institutions to achieve greater excellence in education.

West Virginia was among the states that responded vigorously. Along with our southern state neighbors, and fueled by the understanding of the economic significance, we built the coalitions to improve our schools. This has been a major undertaking. West Virginia ranked 44th in the nation in teacher salaries. Our high school dropout rate also placed us in the bottom ten states. And about 10.5 percent of the state's population has a college education, well below the national average of 16.5 percent.

As Governor, I went through an intense and sometimes painful assessment of the condition of West Virginia's educational system. West Virginia simply had to produce better student test scores, teacher salaries, literacy rates, curriculum, and candidates for college. Moreover, as Judge Recht ruled in 1982, there were serious inequities in the local funding of schools which had to be eliminated.

I am proud of the action we took. A revised "Master Plan for Public Education in West Virginia" emerged, drawing on the expertise and ideas of countless public and private leaders, as a blue-print for long-range educational change. It established new guidelines for textbooks, school accreditation, curriculum, student testing, and many other aspects of education that seriously needed up-dating. Some of the measures in the plan were already underway, but many others represented major advances in the school system.

Key steps called for in the revised Master Plan are now being taken. This year, ninth-graders will be required for the first time to complete an additional unit of science in order to graduate—to make their knowledge of science more comprehensive and attuned to today's demands. And new teachers will be required to pass tests on basic skills and certain subjects in order to qualify for positions.

But we could implement only so many changes with the funding available. The struggle for additional funding was frustrating but absolutely essential. With the Legislature, $29 million was appropriated to help equalize salaries for both teachers and service employees. This was the first step of a three-year program to bring all teacher salaries up to a level which could attract and retain the talent we must have to improve our public schools.

Today, the fate of the state's educational reform effort is in question. I believe that West Virginians understand how high the stakes are. The quality of our school system is the key to the state's economic destiny, and we can't have a first-rate education system unless we are willing to pay for it.

In stating those hard truths, our political leaders need the support of the business and education leaders of our state. Many distinguished members of the business community are here today. You know the cost of failing to provide students with the basic requirements for success in the workplace. In very real terms, you recognize support for the school system as an investment whose profits can be measured in increased productivity, a strengthened ability to compete for the Saturn plans and high-tech firms of the future.

Clearly, the main responsibility for improving our education system rests with the state. But the federal government's role, while limited, can also be pivotal. We all remember the federal government drive to emphasize education in response to Sputnik in the late 1950's—a drive that propelled the innovation and the prosperity of the 1960's.

It is the federal government that must continue to keep our country on the cutting edge of research in computers, engineering, math and sciences. Moreover, the federal government should assist in pioneering new approaches in curriculum and teaching.

For example, I introduced the Technology Literacy Act of 1985. At an early age, students should be exposed to the skills and concepts they need to compete in an increasingly technological world. My legislation would support efforts to develop effective curricula in technology education and to train teachers accordingly.

With respect to higher education, I believe that the importance of the federal government's role is undeniable—particularly in the area of student financial aid. The Reagan Administration's earlier proposal to cut over $2.3 billion in student aid programs was disastrous. I fought this suggestion aggressively, and was part of a successful effort to restore most of the funding in the federal budget.

At the same time, I am interested in exploring changes within the student aid system. More and more students are getting through college by going heavily into debt through student loans. As a consequence, they feel enormous pressure to find a decent-paying job immediately after graduation from college. The incentives for public service just do not exist for these young people. And it is similarly difficult for them to take any time to explore options for careers.

In order to motivate and enable students to perform community service as well as to meet critical needs, student aid as grants in return for a certain amount of time in community service should be considered. A recent report by the Carnegie Foundation strongly endorses this idea. Deploring a lack of commitment to "citizenship" among young people, the report calls upon the younger generation to take an active interest in society's problems—and urges that avenues for letting them do so be opened.

Using ROTC as a model, such a program could help pursue the ultimate goal of restoring and increasing America's competitiveness. For example, a program specifically designed for individuals interested in teaching would achieve a number of critical related objectives. Grants or fellowships would be given to students to receive a college education, with special emphasis on training for teaching. Certain obligations would be accepted by the student, the main one being an agreement to teach for two or three years after graduation. The student assistance could be geared towards fields where there are teacher shortages, such as math and science. In addition, like the National Health Service Corps program for doctors, this effort could provide teachers to areas of the country with the greatest need.

The intensified nature of international competition poses a great challenge for our country, but it presents real opportunities as well. To borrow a word from the Carnegie report, we need nothing less than an American "resurgence" in productivity and everything that contributes to it: research, technological innovation, education at all levels.

Despite the budgetary difficulties we face, it is not a time for retrenching, or even standing pat. It is a time to enlist the talents of our private sector, our universities, and our government in the kind of constructive partnership that has meant so much to other areas of our country. We need only to look at Silicon Valley in Northern California, Route 128 in Massachusetts and the Research Triangle in North Carolina to see what can happen when universities and the private sector work together. Your efforts here, in the Huntington area, could improve the industrial landscape in our state considerably—and deserve the support of all of us.●

PRESIDENT'S VETO OF COPPER RELIEF LEGISLATION

● Mr. BINGAMAN. Mr. President, I am greatly disappointed by the action of President Reagan in vetoing legislation to provide relief to the beleaguered copper industry. Unfortunately, this action is further evidence of the President's complete and utter refusal to help U.S. copper workers and producers.

The amendment which was added to the textile import bill during earlier Senate consideration, would have revitalized the copper industry by mandating that the United States enter into negotiations for voluntary production restraint agreements with major copper-producing countries. The President had earlier refused pleas to enter into such negotiations so it is not surprising he has now vetoed this bill.

Domestic copper production is at an all time low. There has been a 50-percent reduction in U.S. employment and a 25-percent loss in production. Sixteen major mines have closed. At the same time foreign production, much of it financed by U.S. backed international financing, is at an all-time high. As a result, there is a glut in the world copper supply.

We in Congress must continue to press the case for copper relief. There must be impressed upon the President the need to address the unfairness of the current situation, and I shall continue to do this in Congress.●

THE LANGUAGE OF FOREIGN TRADE

● Mr. PELL. Mr. President, one of the greatest threats to our economic and national security is our inability to conduct business in the languages of the international marketplace. It is unconscionable that the wealthiest nation with the greatest educational institutions should find itself at a disadvantage of this nature in the international arena. To my mind, it is absolutely clear that our ability to keep our competitive edge rests squarely on our willingness to improve our facility with other languages and cultures.

I would like to commend to my colleagues an excellent article written by Leonard Lauder entitled "The Language of Foreign Trade" which appeared in the New York Times on October 7. This article forcefully demonstrates just how far we are falling behind other nations in foreign language education, and of the great disservice this does to our trade position. His trenchent analysis provides persuasive argument for increasing our commitment to foreign language instruction and international education.

The threat that this situation poses to the strength of our economy moved my colleagues on the Senate Subcommittee on Education and me to in-

crease our Federal commitment to foreign language instruction. In the Higher Education Amendments of 1985 which were recently reported out of the subcommittee, we expanded the international educational program by making new provision for the establishment of language resource centers, intensive summer language institutes and fellowships for advanced graduate training in foreign languages.

Analyses such as Mr. Lauder's clearly support such an expansion, and I would ask that the full text of his article be printed in the RECORD.

[From the New York Times, Oct. 7, 1985]

THE LANGUAGE OF FOREIGN TRADE

(By Leonard A. Lauder)

The debate rages over United States foreign-trade difficulties. But nobody is talking about the one issue that is more disturbing and far more revealing about the underlying problem than our overvalued dollar, closed foreign markets and the other obvious causes of our stunning trade deficit.

Why has no one raised the fact that so many Americans engaged in foreign trade can speak no language but their own? It's getting late in the day to realize that the language of international trade is not English. The language of international trade is the language of the customer.

In part, Japan, West Germany and other successful exporting nations have penetrated foreign markets because they have tried to understand the cultural peculiarities of those markets. Their executives take the trouble to learn the language of the country with which they wish to trade as the first step in gauging demand.

It is self-evident that you can't sell unless there is a demand for the product. It is also self-evident that you can't begin to understand what a people demand if you can't talk to them on their own terms. Their own terms, of course, means their own language.

It is hard to find figures on how many American business executives overseas speak the native tongue; it is certain, however, that virtually all foreign business executives in the United States speak English. S.I. Hayakawa, a former U.S. Senator, estimated a few years ago that there were 10,000 Japanese in business here, all of whom spoke English, compared with 1,000 American in business in Japan, of whom perhaps a handful spoke Japanese. That no hard data exist is not surprising. There's not enough interest to gather it.

The situation today is not better and is probably worse than it was when Mr. Hayakawa made his estimate. As far as business is concerned, our national parochialism is growing worse. A study commissioned by the National Council on Foreign Language and International Studies questioned 1,690 young men and women in 564 business schools working toward their doctoral degrees in business in the spring of 1984.

The study found only 17 percent of these students were taking one or more courses in international affairs and foreign languages. In 1976, that figure was 25 percent. Those surveyed are the people who will one day be teaching in business schools training our future business executives. In an area crucial to the health of business and the United States economy, these future teachers are inadequate.

Meanwhile, we continue to demand that the rest of the world speak English, play by our rules, buy more of our goods. Not in our country, in theirs. From a deficit-inflated dollar to the tongue-tied American executive, our foreign-trade problems are largely a self-inflicted wound.

Next May, the first class will graduate from the Joseph R. Lauder Institute of Management and International Studies at the University of Pennsylvania with an M.B.A., from the Wharton School and an M.A. in international affairs from the School of Arts and Sciences. There will be 51 of these dual-degree holders, all with a foreign-language proficiency. That same spring, 50,000 more M.B.A. candidates will graduate from the other 563 business schools. In just 13 of those schools are courses in foreign languages and international affairs required for graduation.

American business and business education are not the only guilty parties. The State Department does not require a foreign language to enter the Foreign Service. There are more teachers of English in the Soviet Union than there are students of Russian in the United States. Aside from the coverage given by a few national newspapers, the media's coverage of world affairs is scanty to the point of ridicule. A national survey of high school seniors to assess their knowledge of international affairs showed recently that 40 percent thought that Israel was an Arab nation.

After World War II, as other nations were rebuilding, the United States was a world player shaping its own terms. The U.S. still has the world's mightiest economy, but it is now one of several mighty economies. We are watching our strength and influence erode before our eyes. Paradoxically, this is happening not from weakness but from arrogance.

ORDERS FOR THURSDAY

RECESS UNTIL 11 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 11 a.m. on Thursday, December 19, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I further ask unanimous consent that following the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business for not to extend beyond the hour of 11:30 a.m. with Senators permitted to speak therein for not more than 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. I have just indicated that following morning business we can expect to turn to the conference report hopefully on the continuing resolution. That should be over between 1 or 1:30. I assume that prior to disposition of that, we will know the fate of the reconciliation conference report.

We might be in a position to advise Members by midafternoon on when we may expect sine die adjournment.

But there could be votes. Probably there will be votes on a conference report, or conference reports.

If there are other items that we can clear, we will take them up. I will make every effort to avoid rollcall votes tomorrow so that we may expedite sine die adjournment.

There could be some other matters on the Executive Calendar, if we can agree on those.

RECESS UNTIL 11 A.M. TOMORROW

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move in accordance with the previous order, that the Senate stand in recess until 11 a.m., Thursday, December 19, 1985.

The motion was agreed to; and, at 8:05 p.m., the Senate recessed until tomorrow, Thursday, December 19, 1985, at 11 a.m.

NOMINATIONS

Executive nominations received by the Senate December 18, 1985:

IN THE AIR FORCE

The following officers for appointment in the Regular Air Force under the provisions of section 531, title 10, United States Code, provided that in no case shall any of the following officers be appointed in a grade higher than lieutenant colonel:

LINE OF THE AIR FORCE

Carne, James E., [redacted]
Dunn, Payton E., Jr., [redacted]
Gilson Mark D., [redacted]
Irwin, George F., Jr., [redacted]
Malec, Thomas A., [redacted]
McClure, Edward J. Jr., [redacted]
Miller, Howard H., [redacted]

The following officers for appointment in the Regular Air Force under the provisions of section 531, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform the duties indicated, provided that in no case shall any of the following officers be appointed in a grade higher than lieutenant colonel.

CHAPLAIN

Brown, D. Bruce, [redacted]

NURSE CORPS

Alexander, Elizabeth A., [redacted]
Witt, Sandra M., [redacted]

BIOMEDICAL SCIENCES CORPS

Pontier, John H., [redacted]
Walker, Marilyn A., [redacted]

IN THE AIR FORCE

The following Air National Guard of the United States officers for promotion in the Reserve of the Air Force under the provisions of sections 593, 8374 and 8379, title 10 of the United States Code. Promotions made under section 8379 and confirmed by the Senate under section 593 shall bear an effective date established in accordance with section 307, title 32 United States Code:

LINE OF THE AIR FORCE

To be lieutenant colonel

Maj. Terry O. Bernhardt, [redacted]

Maj. Bruce K. Blakeman, xxx-xx-xxxx
Maj. Mark H. Bondo, xxx-xx-xxxx
Maj. Bernard C. Bryan, Jr., xxx-xx-xxxx
Maj. Richard Czarnota, xxx-xx-xxxx
Maj. Gilbert R. Dardis, xxx-xx-xxxx
Maj. George G. Ervice, xxx-xx-xxxx
Maj. Frank J. Fullmer, xxx-xx-xxxx
Maj. Robert G. Hawk, xxx-xx-xxxx
Maj. Joseph R. Herkalo, xxx-xx-xxxx
Maj. Gordon J. Hill, xxx-xx-xxxx
Maj. Paul C. Hlavaz, xxx-xx-xxxx
Maj. Frank C. Johnson, xxx-xx-xxxx
Maj. Kenneth G. King, xxx-xx-xxxx
Maj. Richard O. Lillie, xxx-xx-xxxx
Maj. Darrell L. Logan, xxx-xx-xxxx
Maj. Sherman P. McKenney, xxx-xx-xxxx
Maj. Louis Olivas, xxx-xx-xxxx
Maj. Robert R. Olson, xxx-xx-xxxx
Maj. David R. Parker, xxx-xx-xxxx
Maj. Seth E. Perelman, xxx-xx-xxxx
Maj. William J. Peters, Jr., xxx-xx-xxxx
Maj. Joe L. Rhoden, xxx-xx-xxxx
Maj. Kenneth L. Ross, xxx-xx-xxxx
Maj. Charles C. Taylor, Jr., xxx-xx-xxxx
Maj. Gary A. Tenney, xxx-xx-xxxx
Maj. Howard J. Thomsen, Jr., xxx-xx-xxxx

LEGAL

Maj. Joseph F. Speelman, xxx-xx-xxxx
Maj. Ronald E. Wurtz, xxx-xx-xxxx

MEDICAL CORPS

Maj. Michael T. Phillips, xxx-xx-xxxx

NURSE CORPS

Maj. Bettyann Herreros, xxx-xx-xxxx

IN THE AIR FORCE

The following officer for appointment in the Regular Air Force under the provisions of section 531, title 10, United States Code, with grade and date of rank to be determined by the Secretary of the Air Force provided that in no case shall the officer be appointed in a grade higher than indicated:

LINE OF THE AIR FORCE

To be major

Mumford, Paul R., xxx-xx-xxxx

IN THE AIR FORCE

The following-named officers for permanent promotion in the U.S. Air Force, under the provisions of section 628, title 10, United States Code, as amended, with dates of rank to be determined by the Secretary of the Air Force:

MEDICAL CORPS

To be major

Kellogg, Scott K., xxx-xx-xxxx
Perkinson, Diana T., xxx-xx-xxxx

DENTAL CORPS

To be major

Alkire, Randy G., xxx-xx-xxxx
Boyle, John J., Jr., xxx-xx-xxxx
Bradford, Victor P., xxx-xx-xxxx
Briley, John B., xxx-xx-xxxx
Dickerson, Herman S., xxx-xx-xxxx
Greenwell, John H., III, xxx-xx-xxxx
Ramer, John P., xxx-xx-xxxx
Robinson, Paul M., xxx-xx-xxxx
Standelmann, Philip P., xxx-xx-xxxx
Zinser, Philip J., Jr., xxx-xx-xxxx

IN THE AIR FORCE

The following-named officers for promotion in the Air Force Reserve, under the provisions of sections 593, 8362, and 8371, title 10, United States Code:

LINE OF THE AIR FORCE

Lieutenant colonel to colonel

Abbott, Thomas F., xxx-xx-xxxx
